16. BÖLÜM

BESİN ZİNCİRİNDE MİKROPLASTİKLER

Yahya Terzi*, Rafet Çağrı Öztürk

16.1.GİRİŞ

Endüstriyel olarak üretimi 1950 yılında başlayan plastik, sağlam, üretimi kolay, ucuz ve uzun ömürlü bir materyal olması nedeniyle modern dünyada yaygın bir kullanım alanı bulmuştur (Sivan, 2011). 2020 yılı itibarı ile küresel ölçekteki plastik üretimi 367 milyon tona ulaşmıştır (PlasticsEurope, 2020). Bu geniş kullanım ve yüksek üretim hacmi sonucunda oluşan plastik atıklar, bertaraf ve depolamadaki eksiklikler nedeniyle zamanla doğal ortamı kirletmeye başlamıştır.

Plastik partiküllerin doğadaki varlığı ilk olarak 1972 yılında Sargasso Denizi'nde ortaya konmuştur (Carpenter ve Smith, 1972). Bu tarihten itibaren araştırmacılar farklı denizlerde plastik partiküllerin varlığını rapor etmiştir (Colton vd., 1974; Eryaşar vd., 2021; Erüz vd., 2022; Gedik vd., 2022; Morris ve Hamilton, 1974; Terzi vd., 2022; Wong vd., 1974). Mikroplastiklerin doğadaki varlığı 1970'lerden bu yana bilinmesine rağmen Moore vd. (2001) tarafından Kuzey Pasifik döngüsündeki mikroplastik kütlelerinin planktonların altı katından fazla olduğunun belirlenmesi üzerine konu ile ilgili çalışmaların sayısı hızla artmıştır. Bu kirletici ile ilgili yapılan ilk çalışmalarda mikroplastiklerin birim hacimdeki miktarının, şekillerinin, boyutlarının ve renklerinin belirlenmesine odaklanılmıştır. Bu süreçte mikroplastiklerin farklı ekosistemlerdeki varlığı, dağılımı ve kaynakları kapsamlı bir şekilde araştırılmış olmasına rağmen (Ivleva vd., 2017; Ya vd., 2021) bunlarla etkileşime giren canlılar üzerindeki etkileri hâlâ tam olarak anlayılamamıştır. Canlıların bu kirletici ile girdikleri en önemli etkileşim şekli ise bu partiküllerin doğrudan veya dolaylı şekilde besin maddesi olarak tüketilmesidir (Wesch vd., 2016). Özellikle sucul canlılar üzerinde yapılan araştırmalarda bu canlıların sindirim sistemlerinde mikroplastiklerin varlığı belirlenmiştir (Eryaşar vd., 2022; Gedik and Eryaşar, 2020) ve bunların besin zinciri ile taşınabildikleri ortaya konmuştur (Cartery vd., 2018; Zhang vd., 2019). Canlılar tarafından tüketilen mikroplastikleri

yonlara, hücre toksisitesine ve genotoksisiteye yol açabilmektedir (Lehner vd., 2019). Solunum yolu ile uzun süre mikroplastığe maruz kalınımı astım ve pnömokonyoz gibi solunum hastalıklarına neden olabilmektedir (Walker et. al. 2022).

16.5. SONUÇ ve ÖNERİLER

Yapılan çalışmalar karasal ve sucul ekosistemlerdeki birçok canlı grubunun doğrudan veya dolaylı olarak mikroplastiklere maruz kaldıklarını ortaya koymuştur. Bunun sonucunda da beslenme, büyüme, üreme gibi yaşamsal faaliyetlerin olumsuz etkilendiği, bu kirleticinin besin zincirinde üst basamaklara taşınabildikleri belirlenmiştir. Ayrıca mikroplastikler barındırdıkları diğer kimyasal katkı maddeleri vasıtasıyla toksik etkiye neden olabilmekte, ortamdaki diğer kimyasal kirleticilerle etkileşime girerek bunların toksik etkilerini arttırabilmekte veya azaltabilmektedir.

Mikroplastiklerin ve katkı kimyasallarının canlılar üzerindeki etkilerinin araştırılması adına birçok model canlı üzerinde farklı deneysel çalışmalar yürütülmüştür. Ancak bu deneysel çalışmaların büyük bir çoğunluğu canlıların doğal ortamda maruz kaldıkları mikroplastik miktarının üzerindeki konsantrasyonlarda gerçekleştirilmiştir.

Mikroplastiklerin etkilerinin habitat, canlı türü, canlının beslenme stratejisi, mikroplastiklerin polimer türü, şekli, büyüklüğü ve hatta rengi gibi birçok faktöre bağlı olduğu göz önüne alındığında yapılacak deneysel çalışmaların bu farklı matrislerin kombinasyonları ile farklı sonuçlar göstermeleri kuvvetle muhtemeldir. Bu nedenle deneysel çalışmalar öncesinde çalışma yapılacak canlının doğal ortamda hangi tür mikroplastiklere ne mertebede maruz kaldıklarının bilinmesi araştırmacılara daha gerçekçi deney ortamları hazırlamakta konusunda yardımcı olacaktır. Mikroplastikler her ne kadar küresel bir sorun olsa da bunların besin zincirindeki yerel boyutta kaynaklarının ve çeşitliliklerinin anlaşılması gerekmektedir.

17. BÖLÜM

PLASTİK PARTİKÜLLERİN SAĞLIK ETKİLERİ

Gonca Çakmak*, İrem İyigünođdu

17.1. GİRİŞ

Kimyasalların üretim çeşitliliđi, üretim miktarı, kullanımları ve dolayısıyla çevresel yükleri gün geçtikçe artmaktadır. Üretilen kimyasallar ise kozmetikten ilaca, gıdadan tekstile kadar yaşamımızı kolaylaştıran pek çok alanda kullanılmaktadır. Aralarında plastik yapıda olanların üretimi yıllık 300 milyon tonu aşmaktadır (H. Sun, Chen, Yang, Xia, & Wu, 2021). Yaşamımızın vazgeçilmezi haline gelmiş olan plastikten yapılan ürünlerin üretim miktarındaki artış ve kullanım yoğunluğunun yanı sıra, plastikler son yıllarda sağlık riskleri ile gündemdedir.

Plastik partiküllerin her türlü ekosistemde ve canlıların özellikle de insanların biyolojik örneklerinde bulunduğu ve biriktiđinin saptanmış olması (Chen, Feng, & Wang, 2020; Hirt & Body-Malapel, 2020; Jing et al., 2022) günümüzün en önemli çevresel kaynaklı maruziyetleri arasında anılmasına neden olmaktadır. Son yıllarda bilimsel literatürdeki araştırmalar mikro plastikler (MP) ve nano plastikler (NP)'in çevrede bulunuşları, maruziyet yolları, maruziyetin çeşitli sistemlerde yol açtığı toksik etkiler ve sağlık etkileri üzerine yoğunlaşmaktadır.

Bu çerçevede plastikler ve plastik partiküller ile ilgili düzenlemelerin yapılabilmesi için üretim, çevrede bulunuş, maruziyet ve maruziyet ile ilişkili toksik etkilere yönelik bulguların artması gerekmektedir. İkibinli yıllarda hız kazanan araştırmalar ve ikibinyirmilerin başında elde edilen bulgular detaylı derlemelerde biraraya getirilmiştir. Derlemelerin odaklandığı konular plastik partiküllerin toksisitesi, in vitro çalışmaları, sucul canlılarda ve memelilerde etkiler, toksisiteyi etkileyen faktörler, çeşitli dokular ve organ sistemleri üzerine etkiler ve genel olarak insan sağlığı üzerine etkilerine yönelik (Banerjee & Shelver, 2021; Chen et al., 2020; Hirt & Body-Malapel, 2020; Kannan & Vimalkumar, 2021; Kögel, Björøy, Toto, Bienfait, & Sanden, 2020; Kumar et al., 2022) olup ilgili 17. bölümün oluşturulmasında bunlardan yararlanılmıştır

ruziyet yollarına yönelik hedef hücreler ve dokular seçilmektedir. Partikül ve lif özellikli bütün etkenlerde olduğu gibi plastiklerde de toksisiteyi etkileyen şekil, boyut, yapıldığı ve üzerinde taşıyabileceği maddeler, sağlık etkilerinde ve canlıdaki dağılımında rol oynamaktadır. Öyle ki kan dolaşımına girebilecek kadar küçük plastik partiküllerin toksisitelerini ve istenmeyen sağlık etkilerini solunum, bağırsak, karaciğer, kan, sinir, kalp, böbrek ve üreme sisteminde gösterebildiğine ait bulgular son yıllardaki çalışmalardan elde edilmektedir.

Toplumun her kesiminden toplanan kan, karaciğer, kolon, akciğer biyolojik örneklerinde plastik partiküllerin varlığı gösterilmiştir. Ayrıca plasenta ve anne sütünde de saptanmaları, bu dokuların da maruziyet kaynağı olarak değerlendirilmesine ve konunun ne kadar önemli olduğuna bir kanıttır. Sağlık etkileri en fazla araştırılan plastik polimeri PS'dir. Plastikleri temsil eden molekül olarak sıklıkla kullanılmaktadır. Ancak, diğer polimerler ve oluşturabilecekleri toksisite, çevrede plastik partiküllerin üzerine tutunabilecek hava kirliliği etkenleri, endüstriyel kirleticiler de toksisiteyi şekillendirmede önemlidir. Dolayısıyla, bu konulardaki çalışmalar bilimsel verilerin artmasına ve sağlık etkilerinin sınıflandırılmasına katkı verecektir ya da vermektir.

Her ne kadar insanların biyolojik örneklerinde maruziyet biyogöstergeleri ile plastikler ve ilgili etkenler saptansa da moleküler epidemiyoloji çalışmaları ile etki biyogöstergelerini de içeren kontrollü çalışmaların tasarlanması olası sağlık etkilerini, hastalıklarla plastik maruziyeti arasında bir ilişki bulunup bulunmadığını açıklayabilecektir.

Plastiklere yönelik araştırmaların disiplinlerarası tasarlanması önemlidir. Böylece tüketici ürünlerinden hava, su ve toprağa karışan plastiklerin çevredeki durumları, canlılara ulaşması sonucu olası toksisiteleri ve sağlık etkileri gibi bulgular toksikolojik risk değerlendirmesinde kullanılabilir. Bu da risk yönetiminin ve yasal düzenleyici otoritelerce maruziyet sınır değerlerinin belirlenmesi basamaklarının her birinin profesyonelce tamamlanmasını sağlayacaktır.

18. BÖLÜM

UZAKTAN ALGILAMA YÖNTEMLERİ KULLANILARAK SU ORTAMINDAKİ PLASTİKLERİN İZLENMESİ

Mustafa Said Tanrıverdi, Uğur Avdan*

18.1. GİRİŞ

Plastik kirliliği insanoğlunun meydana getirdiği, son yüzyılın en büyük çevre sorunlarından biri olacaktır. Plastik kirliliği Dünya genelinde katlanarak artmakta ve tüm denizlere ve okyanuslara hızla yayılmaktadır. Sınır tanımayan ve bir türlü önüne geçilemeyen plastik kirliliği küresel boyutta ciddi bir tehdit haline gelmiştir. Özellikle son 20 yılda Dünya genelinde endüstriyel ve sanayi alanlarında plastiğin yoğun üretimi ve kullanımı çevresel boyutta ciddi sorunları beraberinde getirmektedir. Bu devasa kirlilik, gelecek nesillere bırakacağımız kötü bir mirastır. İnsanoğlunun kullandığı plastiklerin büyük çoğunluğu atık olarak değerlendirilmiş ve bunların birçoğu gerek hava gerekse başka yollar ile su kaynaklarına karışmıştır. Şu an sadece su kaynaklarında değil, karalarda, dağların tepelerinde, yediğimiz gıdalardan içtiğimiz sulara ve hatta kanımızda bile çok küçük boyutlarda plastik partiküller ile karşılaşmak mümkündür. Su kütlelerinde bulunan plastikler hacimsel olarak fazla olmasına rağmen, plastiklerin boyutunun küçük olması plastik kütlelerin tespitini zorlaştırmaktadır. Bunun en önemli nedeni büyük parçalardan aşınmış küçük plastik parçalarından oluşmasıdır.

Dünya genelinde ve kamuoyunda ise mikroplastiklerin çevresel etkileri hakkındaki endişeler gün geçtikçe artmaktadır. Mikroplastikler, küçük plastik parçaları olup doğal ortamlarda ve su kaynaklarında yaygın olarak bulunmaktadır. Atığa dönüşen plastiklerin büyük çoğunluğu gerek hava gerekse başka yollar ile su kaynaklarına karışmaktadır. Şu an sadece su kaynaklarında değil, karalarda, dağların tepelerinde, yediğimiz gıdalardan içtiğimiz sulara ve hatta kanımızda bile çok küçük boyutlarda plastik partiküller ile karşılaşmak mümkündür. Dünya'nın en büyük çöplükleri okyanus ve denizler üzerinde karadan binlerce kilometre uzakta, gözden uzakta bulunmaktadır. Söz konusu çöp alanları, kamuoyu tarafından yedinci kıta veya sekizinci kıta olarak isimlendirilmektedir. Bu şekilde isimlendirme-

tır. Yine Eskişehir ili merkezinde bulunan Porsuk Çayı ve Sazova Parkına ait aynı tarihli Sentinel görüntülerine ilgili komut dosyası uygulandığında insan ve şehir faktörünün etkisi sonuç haritalarına yansımıştır. Her iki alandan elde edilen görüntüler incelendiğinde şehirden ve yapay kirlilikten uzak olan Borabey Göletinin nispeten şehir merkezinde bulunan sulak alanlardan daha temiz olduğu görülmektedir. Bu sonuçlar, uydu görüntüleri ve araştırmacıların geliştirmiş olduğu komut dosyasının çalıştırılması ile elde edilmiştir. Plastik kirliliğinin daha detaylı tespit edilebilmesi için görüntülere esas alanlardan alınan su numunelerinin laboratuvar ortamında analiz edilmesi gerekmektedir. Uzaktan algılama yöntemleri ile elde edilen veriler kesin bir değer vermeyip öncül veya öngörü niteliğindedir.

19. BÖLÜM

TOPLUMSAL FARKINDALIK İÇİN PLASTİK AYAK İZİ

Ayça Erdem Ünşar*, Çiğdem Moral

19.1. GİRİŞ

Her yıl Dünya çapında artarak çoğalan miktarlarda plastik üretilmekte, farklı alanlarda kullanılmakta ve atık olarak çeşitli şekillerde bertaraf edilmektedir. 2019 yılında Dünya genelindeki plastik üretiminin 368 milyon tona ulaştığı (PlasticEurope, 2020) ve buna tekstil sektörü plastik atıklarının da eklenmesiyle bu miktarın yaklaşık 420 milyon tona çıktığı (Lebreton ve Andrady, 2019; The Fiber Year, 2017) rapor edilmiştir. 2019'da 7,7 milyar olan insan nüfusunun 2040'ta 9,2 milyara çıkmasıyla (UN, 2019), plastik üretiminin 2050'ye kadar 589,3 milyon ton olacağı tahmin edilmektedir (Tisea, 2021). 2010'da karasal kaynaklardan okyanusa 4,8–12,7 milyon ton plastik atığın karıştığı tahmin edilmiştir (Jambeck ve ark. 2015). Su ortamlarındaki plastik kirliliğinin, mevcut üretim, tüketim ve atık yönetimi uygulamalarının devam etmesi durumunda 2016'da yıllık 19–23 milyon tondan 2030'a kadar neredeyse üç katına çıkacağı öngörülmüştür (Borrelle vd., 2020). Söz konusu artışın, insan ve çevre sağlığı üzerinde olumsuz etkilere yol açtığı çeşitli çalışmalarla bildirilmiştir. Gündoğdu (2018) sofrta tuzunda, Li vd. (2020) deniz yosunlarında, Li vd. (2019) ve Gündoğdu vd. (2020) midyelerde ve Çevik vd. (2022) diğer birçok deniz ürünüde plastik ve mikroplastiklere rastlandığını raporlamıştır. Plastik kirliliğinin olumsuz etkilerinin yakın gelecekte de artması beklenmektedir. Çalışmalar, plastik kirliliğinin plastik ayak izi ile doğrudan ilişkisi olduğunu göstermektedir. Temel anlamda plastik ayak izi, Dünya'da oluşan plastik atığına ne kadar plastik katkı yaptığınızı göstermektedir. Dolayısıyla kişisel, ürün, şirket/kuruluş, ülke, bölge ve/veya küresel boyutta meydana gelen plastik kirliliğinin olumsuz etkilerini ölçmek için kullanılan plastik ayak izi önemli bir göstergedir. Plastik ayak izinin belirlenmesi için farklı metodolojiler geliştirilmiş olup, Yaşam Döngüsü Analizi (Life Cycle Assessment, LCA), Malzeme Akış Analizi (Material flow analysis, MFA), Çok Bölgeli Girdi-Çıktı (Multi-Regional Input-

yısıyla doğada bu plastikler küçük parçalara ayrışır ve mikroplastik ayak izini arttırır.

Tüm bunlar dikkate alındığında plastiğin insanoğlunun günlük hayatındaki yaygın kullanımı kolayca gözlenebilir. Diğer yandan kişilerin bireysel olarak çevreye yüklediği plastiklerle ilgili üretim, kullanım ve atma alışkanlıklarını değiştirmesinin önemli olduğunun farkına varması geleceğe bırakılan mikroplastik ayak izini olumlu yönde etkileyecektir (URL 15).

20. BÖLÜM

MİKROPLASTİK AR-GE ÇALIŞMALARININ DİJİTALLEŞTİRİLMESİ VE YAYILIMI BAĞLAMINDA VİDEOLAR

Nuray Gedik*, Barış Yiğit

20.1. GİRİŞ

Dijitalleşme tüm bilimsel alanlarda değişim ve dönüşüme neden olmaktadır. Bilimsel araştırma süreçlerinde yaşanan değişim ve dönüşümlerin çalışma konularının belirlenmesinden, deneysel süreçlere, bilgi paylaşımından toplumsal katılıma kadar geniş bir alanı kapsadığı görülmektedir (OECD, 2020). Dijitalleşme süreci, endüstri ve sanayi için sürdürülebilir gelecek adına etkili ve verimli bir devrim olarak da tanımlanmaktadır (World Economic Forum, 2022). Birleşmiş Milletler tematik eylemleri arasında gösterilen “dijital öğrenme ve dönüşüm” başlığı altında dijital öğrenme kavramının eğitim amaçlı kullanılan yazılım, donanım ve dijital kaynakların hepsini kapsadığı görülmektedir.

Peki dijitalleşme, yükseköğretimde araştırma ve geliştirme (ar-ge) süreçlerine nasıl etki etmektedir? Bu sorunun yanıtı, kullanılan dijital teknolojiler ve ar-ge çalışmalarının bağlamına göre değişmektedir. Örneğin video, uzaktan erişimli laboratuvar, bulut bilişim gibi teknolojilerden; artırılmış, sanal ya da karma gerçeklik, dijital ikiz gibi teknolojilere kadar pek çok teknolojiye söz edilebilir. Aynı şekilde ar-ge süreçleri açısından da veri toplamadan, deneysel süreçlere, veri analizinden yorumlamaya, raporlamaya ve iş birlikli çalışmadan yayınlamaya kadar tüm süreçlerde dijitalleşmenin farklı kullanımlarını ve uygulamalarını görmek mümkündür (Tablo 1). Kimi gelişmeler ve dijital teknolojiler yıkıcı olarak adlandırılmakta ve tüm süreçlere ve bileşenlere yönelik etkisinin de yıkıcı olacağı değerlendirilmektedir. Bu teknolojilerin başında uzun yıllardır hayatımızda olan yapay zeka uygulamalarının son dönemdeki gelişmeleriyle ortaya çıkan Web 4.0 ve Web 5.0 gibi uygulamalar ve sanal asistanlar gibi gelişmeler gösterilebilir. Yıkıcı teknolojiler, mevcut pratikleri ve kullanılan teknolojileri ortadan kaldıran teknolojiler olarak tanımlanmaktadır (Flavin, 2012). Dijital dönüşüm başlığı altında da incelenen bu teknolojilerin etkilerinin yapay zeka uygulamaları ile köklü

İÇİNDEKİLER

Teşekkür	iii
Ön Söz	iv

1. BÖLÜM

KONUT MUTFAKLARI.....	1
Konutlarda Mutfak Tasarımının Önemi	1

2. BÖLÜM

KONUT MUTFAKLARINDA YER ALAN EYLEMLER VE EYLEM ALANLARI....	3
Temel Olarak Mutfakta Yer Alan Eylemler.....	3
Eylem Sırası	4
Mutfakta Çalışma Üçgeni	5
Eylem Grupları İle ilgili Çalışma Bölgeleri.....	8
Hazırlama Bölgesi.....	8
Pişirme Bölgesi	9
Servise Hazırlık ve Servis Bölgesi.....	11
Yemek Yeme Bölümü	12
Bar Tipi Yemek Alanı Düzenlemeleri için Temel Ölçüler.....	16
Bulaşık Yıkama-Temizleme Bölgesi	18
Depolama Bölgeleri	19

3. BÖLÜM

KONUT MUTFAKLARINDA YER ALAN EKİPMAN VE DONATILAR.....	21
Mutfaklarda Yer Alan Ekipmanlar.....	22
Mutfak Tezgâhları	22
Mutfak Tezgâhlarında Kullanılan Malzemeler ve Özellikleri	23
Masif Tezgâh	23
Laminat Tezgâh.....	23
Doğal Taş Tezgâh.....	23
Mermer Tezgâh	24
Granit Tezgâh.....	24
Sert Yüzeyle Mutfak Tezgâhları	24
İşlenmiş Taş (Kuvars) Tezgâh.....	24
Corian-Akrilik Tezgâh	25
Dekton Tezgâh.....	25
Paslanmaz Çelik Tezgâh	25
Beton Tezgâh	26
Cam Tezgâh	26
Seramik Tezgâh	26
Mutfak Dolapları	29
Tezgâh Altı (Döşeme) Dolapları	29
Yüksek Dolaplar	32
Tezgâh Üstü (Duvar) Dolapları	35
Mutfak Dolaplarında Kapak Malzemeleri ve Özellikleri	38
Profil Kapak	38
Alüminyum Profil Kapak	39
Suntalam/Mdf lam Kapak	40
Laminant Kapak	42
PVC (Membran) Kapak	43
Thermofoil Kapak	43
Akrilik Kapak	44
High Gloss Kapak	45

Lake Boya Kapak	46
Masif Ahşap Kapak.....	48
Ahşap Kaplama Kapak	49
Evye Biriminin Özellik ve Boyutları.....	50
Bulaşık Makineleri	54
Pişiriciler.....	55
Aspiratör ve Davlumbazlar.....	57
Soğutucular	60

4. BÖLÜM

MUTFAK TASARIMINDA KULLANICI FAKTÖRÜ	63
Kullanıcı Gereksinimleri ve Mutfak Tasarımı.....	63
Mutfak Tasarımında Dikkate Alınması Gerekli Boyutlar.....	66
Ayakta ve Oturur Pozisyonda Çalışma Yükseklikleri	67
Yatayda Erişim, Çalışma Alanı ve Boyutları.....	68
Depolama Ünitelerine Erişim ile İlgili Boyutlar.....	68
Çalışma Bölgelerinde Ekipmanların Önünde Rahat Çalışma ve Sirkülasyona İlişkin Boyutlar	71
Yaşlı ve Engelliler için Mutfak Tasarımı	72
Çalışma Bölgelerinin Düzenlenmesine İlişkin Prensipler	74
Depolama Alanlarının Tasarımına İlişkin Prensipler	78
Sirkülasyon Çözümüne İlişkin Prensipler	84
Görsel Konfor/Aydınlatma.....	85

5. BÖLÜM

MUTFAKLARDA AYDINLATMA	91
Genel Aydınlatma.....	92
Bölgesel Aydınlatma	95
Tezgâh Üstünün Aydınlatılması	95

Depolama İçinin ve Rafların Aydınlatılması.....	96
Yemek Masası veya Yemek Bölümünün Aydınlatılması.....	97

6. BÖLÜM

MUTFAK TİPLERİ VE TASARIM İLKELERİ.....	101
Tezgâhın Düzenleniş Biçimine Göre Mutfak Tipleri	101
I (Tek Duvar Tipi) Tipi Mutfak	101
Koridor Tipi Mutfak.....	102
L Tipi Mutfak.....	102
U Tipi Mutfak.....	103
G (Yarım Ada Tipi) Tipi Mutfak.....	105
Ada Tipi Mutfak	106
Eylemlerine Göre Mutfak Tipleri.....	108
Çalışma-İş Mutfağı	108
Yemek Mutfağı.....	109
Açık Mutfak	110

7. BÖLÜM

MUTFAK STİLLERİ.....	113
Victorian Stil	113
İtalyan Stil	115
Tuscan Stili.....	117
Georgian Stil.....	119
Country Stil	121
Arts and Crafts Stil	124
Rustik Stil.....	126
Art Deco Stil	129
Modern Stil	132

8. BÖLÜM

ENDÜSTRİYEL MUTFAKLAR.....	135
Restoran Mutfakları	135
Restoran Mutfaklarında Tasarım Prensipleri	136
Restoran Mutfaklarında Eylem/İş Akışı	137
Çalışma Bölgeleri	141
Malzemenin Kabulü.....	141
Depolama Bölgeleri	141
Yiyecek ve İçeceklerin Depolanması.....	142
Kuru Depolar.....	142
Sebze-Meyve Depoları	143
Soğuk Depolar	143
İçecek Depoları	143
Yiyecek Hazırlık Bölgeleri	144
Pişirme Bölgesi	146
Bulaşık Yıkama Bölgesi	146

1

Temel Kavramlar

1.1 Bilgi ve Bilgi Kaynakları

Bilgi ve bilgi kaynakları en değerli kavramlardan olmalarına karşın hak ettiği değeri görmeyen olgulardandır. Bilgi; araştırma, gözlem, deney, öğrenme gibi farklı şekillerle elde edilen bir gerçektir. Edinilen bilgi farklı işlerde kullanılarak pratiğe dökülür.

Edinilen bilgi kadar bilginin kaynağı da önemlidir. Bilgi edinme süreçleri ile bilgi kaynağının güvenilirliği muhakkak sorgulanmalıdır. Akademik bilgiler bilimsel yayınlar şeklinde literatüre eklenir. Ekleme sırasında bilginin doğruluğu bilimsel yayınların yayımlandığı dergiler tarafından kontrol edilir.

Günümüzde bilgi farklı yollarla elde edilebilir. Bunları aşağıdaki gibi listeleyebiliriz.

1. Hissetmeye dayalı bilgi
2. Bir başkasından elde edilen bilgi
3. Uzman kişiden elde edilen bilgi (Güvenilir Kaynak)
4. Mantık yürütme şeklinde elde edilen bilgi (Kısmi Güvenilir Kaynak)
5. Bilimsel Bilgi (Güvenilir Kaynak)

1.2 Araştırma Türleri

Araştırma türleri genel olarak Nitel ve Nicel Araştırma olmak üzere ikiye ayrılır.

1.2.1 Nitel Araştırma

En temel anlamıyla nitel araştırmalar sözcüklerle ifade edilen araştırmaları kapsamaktadır. Mühendislik tabanlı yapılan araştırmalarda bu tür araştırmalar pek tercih edilmez.

1.2.2 Nicel Araştırma

Nicel araştırmalar sayısal verilere dayanarak elde edilen araştırmaları kapsamaktadır. Bu tür araştırma kapsamında elde edilen sonuçlara dayanarak pek çok genelleştirilmiş yasalar elde edilebilir.

2

Araştırma Konusu ve Bilgi Kaynakları

2.1 Bilimsel Çalışmanın Temel Şartları

İnsanlar, yaratılışlarındaki kodlar ve yaşamı içerisinde değiştirebileceği özellikleri ile çeşitli farklılıklara sahiptirler. Farklı din, dil, dünya görüşü, siyasi yönelim vb. özellikler insanları farklılaştırır da insan hakları, temel hukuki düzen ve prensipler çerçevesinde herkes eşittir. Benzer biçimde bir bilimsel çalışmanın ortaya konması sürecinde de temel prensip, insanların sahip olduğu bu farklılıkların araştırmayı "bilimsellik"ten koparmaması, temel özelliklerini değiştirmemesidir. Bu bağlamda bir bilimsel çalışma için diğer tüm kriterlerin öncesinde dikkate alınabilecek temel şartlar söz konusudur (Silverman, 2021; Tang, 2020; Thiel, 2014).

Bilimsel bir çalışmanın başlıca ön şartları aşağıdaki gibi listelenebilir:

- Dürüstlük
- Nesnellik
- Güvenilirlik
- Özgünlük
- Geçerlilik
- Güncellik

Bu maddeler bilimsel çalışmanın niteliğini arttırmak açısından da ön şartlar olmakla birlikte; ilk olarak, çalışmanın etik yönü ve bunun olası ihlali durumunda ortaya çıkabilecek hukuki durum açısından belirleyicidirler (TÜBA, 2002; Pruzan, 2016). Bu maddeler ve bunlara karşılık yerine gelmesi gerekenler açısından gerekli tutum ve özen ortaya konmalıdır. Bu noktada gerekli dikkat ve özenin ortaya konmasında bilinçli ya da bilinçsiz olarak oluşacak eksiklikler çalışmanın bilimselliği üzerine gölge düşmesine neden olur. Ortaya çıkan durumun niteliğine bağlı olarak, çalışmanın bilimsel etiğe uygunluğu ortadan kalkar, hukuki sonuçlar ortaya çıkması söz konusu olur. İhlalin düzeyine bağlı olarak bu sonuç cezai ve idari yaptırıma dahi dönüşebilir.

Bunlar dışında grafik tablet klasik yazım ortamı ile sayısal depolama arasındaki bağlantıyı kuran bir araçtır. Grafik tablet, el yazısı ile not tutma; bu şekilde alınan notlar ve elle yapılan çizimlerin sayısal ortamda etkin biçimde depolanması ve gerektiğinde basit biçimde düzenlenmesini olanaklı kılar. Bir başka donanım örneği olarak sunum kumandası düşünülebilir. Kablosuz bir sunum kumandası ile bilgisayar başında sabit durarak sunumu kontrol etmek yerine; araştırmacı hareketli biçimde, sunum perdesi üzerinde dinleyicilere ilgili bölümü göstererek anlatımını yapar ve konusunda daha yetkin ve profesyonel görünür, önündeki kitleye daha etkili ulaşabilir.

Araştırmacılar özellikle tez yazımı gibi yoğun dönemlerinde birden fazla bilgisayarda (örnek olarak gündüz saatlerinde iş yerinde akşam evde) çalışabilirler. Bu durumda çalışılan dosyaların sistematik kaydedilmesi ve olası veri kayıplarının önlenmesi açısından bulut teknolojilerinden yararlanılabilir.

Bütün bu teknolojik araçlar ve bunların bilimsel araştırma sürecine katkıları yanında, klasik araç ve yöntemlerin önemi ortadan kalkmış değildir. Kalemin, kâğıdın ve basılı bir kitabın yerini buradaki hiç bir teknoloji dolduramaz.

Literatür Tarama Süreci

3.1 Temel Bilgiler

Literatür arama sürecine daha iyi hâkim olabilmek adına bazı terimleri bilmekte fayda vardır.

3.1.1 Literatür Nedir

Literatür, çözmeye çalıştığımız problem için geliştirilen yöntemler veya problem ile ilgili her türlü bilginin yer aldığı havuz olarak tanımlanabilir. Literatür denildiğinde bilimsel yayınlar ile problem çözümüne yapılmış katkılar olarak düşünebiliriz.

3.1.2 Literatür Taraması Nedir

Literatür taraması farklı şekillerde yapılabilir. Bunlardan en önemlisi bilimsel yayınların yayınlandığı ve toplandığı veri tabanlarında araştırma yapmaktır (Liberati ve ark, 2009).

3.1.3 Bilimsel Veri Tabanları Hangileridir

Bilimsel yayınlar dergi, kitap ve tez gibi pek çok farklı formatta yayımlanır. Bilimsel yayınların bir arada okuyuculara sunulduğu sistemlere bilimsel veri tabanı denir. Google Scholar (<https://scholar.google.com.tr>) bu veri tabanlarında arama yapmak için sıklıkla kullanılır.

Türkçe makalelerin bir arada toplanması ve yönetilmesi için TÜBİTAK tarafından geliştirilen DergiPark platformu bulunmaktadır. Buradaki makalelerde arama yapabilmek için <https://dergipark.org.tr> adresine ulaşabilirsiniz. Burası dergilerin bulunduğu veri tabanı olarak düşünülebilir.

3.1.4 Veri Tabanı Tipleri

Bilimsel dergiler yayınladıkları makaleler kullanıcılara ücretli veya ücretsiz bir şekilde sunabilir. Buna ek olarak üniversiteler, kurum kuruluşlar bu veri tabanla-

araştırılması, (3) Problemin çözümü için yeni olarak ne yapılacağıın belirlenmesi. 3. madde lisansüstü tez konusu belirleme açısından en önemli parametredir. Bunu belirleyebilmek için mühendislikte problem çözümlerinde kullanılan yöntemlere çok iyi hâkim olunması gereklidir. Bu sayede farklı bir yöntem ve süreç ortaya konması mümkün olur. Bu yüzden eğitim hayatı sürecince farklı yöntemler öğrenilmesi ve bunların uygulanmasına yönelik bilgi kazanılması son derece önemlidir.

Buna ek olarak farklı alanlarda kullanılan yöntemlerin yeni bir alanda uygulanması ile gerçekleştirilen çalışmalar da bilimsel yayın niteliğindedir. Bilimsel araştırmalarınız aşağıdaki tanımlardan birine girmesi gerekir. Çalışmaların niteliğini sorgularken aşağıdaki başlıklara göre değerlendirebilirsiniz. Çalışmaların niteliği aşağıda verilen sırayla artmaktadır.

- Var olan bir problem için var olan çözüm yöntemi kullanma
- Özgün bir problem için var olan çözüm yöntemi kullanma
- Var olan bir problem için özgün bir çözüm yöntemi geliştirme
- Özgün bir problem özgün bir çözüm yöntemi geliştirme

4

Bilimsel Yayın İçeriği ve Hazırlık Süreci

4.1 Bilimsel Çalışma Yapma ve Yazma Motivasyonu

Nitelikli bir bilimsel çalışma yapma ve yazmaya yönelik olarak; ön şartlar, planlama aşamaları ve sistematik biçimde sağlanması gereken temel işlem basamakları söz konusudur (Silverman, 2021; Schimel, 2011; Thiel, 2014; Tang, 2020). Bu süreçlerin ilk aşaması ve sonrası açısından en temel unsurlardan biri ise motivasyondur. Söz konusu çalışmayı temel bir sürecin doğal bir parçası olarak yapmak, örneğin yüksek lisans, doktora tezi, bir motivasyon kaynağı olarak düşünülebilse de burada kastedilen, araştırmacının kendinden kaynaklanan bir irade ve istektir. Ancak bu tür bir doğal gerekliliğin var olması, araştırmacının kendi istek ve iradesinin ortaya çıkmayacağı anlamına gelmez. Aksine, gereklilikten uygun şekilde yararlandığında, olumlu stres olarak değerlendirilebilecek bir etki ortaya çıkarak çalışma konusunda kendinden gelen merak ve isteğe sahip araştırmacının başarısında pozitif katkı oluşturur. Bunun yanında, bu çalışmanın zorunlu olarak bir görev gibi değerlendirilmesi ve yalnızca bu yaklaşımla hareket edilmesi böylesi bir motivasyonun ortaya çıkmasına engel olarak çalışmanın niteliği üzerinde de olumsuz etki oluşturabilir. Özet olarak, bir araştırmacı için bir bilimsel çalışma sonunda somut bir maddi fayda elde edilecek olması, örnek olarak bir lisansüstü öğrencisinin tamamlaması gereken tezi, öğretim üyeliğine atanma için gerekli indeksli makale, bir doçent adayının başvurusu için gerekli başlıca eseri vb. çalışma için doğal bir motivasyona engel değil, aksine iyi kullanıldığında olumlu bir etki kaynağıdır.

Yukarıda sayılan örneklerdeki gibi elde edilmesi beklenen zorunlu ve hızlı bir somut karşılık olmasa da bir araştırmacı bir bilimsel yayın hazırlama ve yazma konusunda gerekli motivasyona sahip olabilir. Öğrencilere ve diğer bilim insanlarına yardımcı olmak, çalışılan kurumun ve/veya vatandaşı olunan ülkenin itibarını arttırmak, bilimsel dünyada alanında tanınırlık kazanmak vb. bu duruma yönelik örnekler olabilir. Bu hedeflere ulaşma durumunda da belli bir faydadan söz edilse de, bunlar kazanımları daha zor ve yavaş biçimde ortaya çıkan ve araştırmacının kendisi kadar diğer insanlara da yararlı olmayı amaçladığı daha ulvi motivasyonlar olarak dikkate alınabilir.

Yukarıda belirtilen türden, denklem editörü ile oluşturulabilecek özel işaretlere ihtiyaç olmaması, yalnızca özel karakterlerin kullanımının gerekmesi durumunda simge ve sembol listelerinden yararlanılabilir. Bunların ASCII adı verilen kod karşılıkları olup, klavye tuşlarında yer almasalar da buradaki harf, rakam, işaretler gibidirler. Arama motorlarında ilgili sembol aratılarak kısa yol karşılığı elde edilerek, yalnızca klavye kombinasyonu ile de bu karaktere ulaşılabilir. Örnek olarak sağda rakam tuş paneli olan klavyelerde ALT + 0215 tuş kombinasyonu ile × simgesi, ALT + 0176 tuş kombinasyonu ile ° (derece) sembolü elde edilebilir. Bu karakterler için farklı tuş kombinasyonları da olabilmektedir. Benzer biçimde diğer semboller için de bunları oluşturan tuş kombinasyonları mevcuttur.

4.6.6 Kısaltmalar

Kısaltmalar genel olarak birden fazla sözcük ya da harf parçalarından oluşan ve birden fazla kez tekrarlanan uzun ifadelerin uygun biçimde kısa formda yazılmasıdır. İlk kullanımlarında kısaltmaların hem açık hem de kısaltma karşılıkları birlikte verilmelidir. Kısaltmalar çoğunlukla açık hâldeki her sözcüğün baş harfi kullanılarak yalnızca büyük harfler içeren bir karakter dizisi şeklinde oluşturulsa da farklı kısaltma formatları da söz konusudur.

Tezlerde başlangıçta Simgeler ve Kısaltmalar Listesi ya da çok benzer isimde bir bölüm olup, burada tüm kısaltmalar ve açıklamaları verilmelidir. Makale ve bildiri gibi görece daha az sayfalı dokümanlarda az oranda farklı örnek olsa da, çoğunlukla böyle bir kısaltma listesi kullanımı söz konusu değildir. Verilen esas çerçevede ilk kullanımda tanımlanmaları yeterlidir. Bu noktadan sonra sadece kısaltma hâlinde kullanılabilirler.

5

Microsoft Word Programının Doğru ve Etkin Kullanımı

5.1 Microsoft Word

Bilimsel çalışmanın etkin ve doğru bir araçla yazımı, sürecin verimli biçimde yönetilmesini sağlayacak en kritik noktalardan biridir. Planlanan bir takvim içerisinde tamamlanması gerekli bir çalışmanın yazımı için harcanan toplam süre çok önemli olup; etkin zaman kullanımı ve eksiksiz bir basılı nüsha ortaya çıkarmak ilgili yazım araçlarının doğru kullanım bilgisini gerektirmektedir (Vanhus, 2016; Gastel, 2016).

Microsoft® Word, Microsoft yazılım firması tarafından başta Microsoft® Windows olmak üzere uzun yıllardır hem bilgisayarlar hem de günümüzde tablet, telefon gibi taşınabilir aygıt işletim sistemlerinde çalışmak üzere tasarlanan gelişmiş bir sözcük işlemci programıdır (Cram ve ark, 2019). Microsoft® Word programının bu alandaki en yaygın kullanılan program olmasının en temel sebebi, gelişmiş metin düzenleme seçenekleri, kapsamlı ve görselliğe uygun biçimde tablo, şekil ve grafik oluşturma özellikleridir. Ancak Microsoft® Word programının bu denli geniş ölçekte kullanımının sebebi sadece bu tür metin ve bağlantılı görsel içeriğin oluşturulmasına olanak vermesi değil, aynı zamanda bu içeriğin oluşturulmasını kolayca sağlamasıdır. Zira, LaTeX gibi, kullanma ve öğrenme süreci daha zorlu olan bir ortam, temel kullanıcılar için ilk aşamada uygun bir başlangıç seçeneği değildir. Fakat giriş seviyesi açısından ilk tercih olarak gözükmese de profesyonel işlerde LaTeX kullanımı daha uygundur. Bununla birlikte gerekli yazım ve hazırlama işlemleri için doğru program özelliklerinin bilinmesi durumunda Microsoft® Word programı ile de çok sayfalı dokümanların gerektiği gibi hazırlanması mümkündür.

Özellikle programla ilgili kapsamlı bir bilgiye sahip olunmasa da temel düzeyde yazım ve düzenleme işlerinin sezgisel olarak yapılabilmesi Microsoft® Word programının en büyük avantajıdır. Ancak basit bir Microsoft® Word bilgisi ve istenen format özelliklerinin bir şekilde amatörce ayarlanması, kısa dokümanların oluşturulmasında temel kullanıcılar için önemli sorunlar oluşturmasa da, başta

- Dokümanın uzunluğu ve içindeki vektörel olmayan görsel öğelerin sayısına bağlı olarak Microsoft® Word dokümanı farklı dosya boyutlarına sahip olabilir. Bu anlamda standart bir dosya boyutunun bahsedilmesi kolay olmasa da tez dokümanları için birkaç on MB düzeylerinden itibaren dosya boyutunun çok da uygun olmadığı rahatlıkla söylenebilir. Muhtemelen ilgili dokümanda görsel öğeler gereğinden fazla boyutta tutulmaktadır.

6

LaTeX

6.1 Temel Bilgiler

6.1.1 LaTeX Nedir

Büyük dokümanların bir araya getirilmesi ve içeriğin düzenlenmesi muazzam iş yüküne sahiptir. LaTeX büyük dokümanların düzenlenmesi ve dizaynı için bilim dünyasında ön plana çıkmış ve neredeyse standartlaşmış bir profesyonel dizgi programıdır.

Dizgi sırasında oluşan hataların giderilmesi farklı bir sorundur. LaTeX'in en önemli avantajı metin içerisindeki tüm içeriğin yazılımsal olarak hazırlanmasıdır. Bu sayede kayma, tabloların şekillerin değişmesi, sayfalarda boşlukların kalması, tablo ve şekillerin metin içerisinde gezinmesi gibi problemler çözülmüş olur. Tüm bu işlemlerin hatasız ve sistematik yapılması sayesinde dijital ya da fiziksel baskı ortamlarında profesyonel gözükten dokümanlar elde edilmiş olur.

Bu bölümün amacı temel düzeyde kullanabilecek LaTeX altyapısını vermek ve araştırmacıların çalışmalarını LaTeX kullanarak etkin ve hızlı biçimde oluşturmalarını sağlamaktır. Bu yüzden ihtiyaç duyulmayacak bilgiler çalışma içerisinde verilmeyecektir. İhtiyaç duyulabilecek diğer ileri seviye bilgilere nasıl ulaşılacağı sonraki bölümlerde değinilecektir.

6.1.2 Nerelerde Kullanılır

LaTeX bilim dünyasında sıklıkla kullanılan bir platformdur. Kitap basımı konusunda yayın evleri, çeşitli akademik dergiler, üniversite enstitüleri gibi pek çok yer özellikle çok sayfalı dokümanlarda LaTeX kullanımını Microsoft® Word'e tercih etmektedir. Ancak metin büyüklüğü az olan ve şablon ihtiyacı duyulmayan metinlerin düzenlenmesi için LaTeX'in çok etkin olduğu söylenemez. Çok daha fazla sayıda araştırmacının Microsoft® Word bilmesi ve tercih etmesi, dergi ve yayınevi ortamlarında baskı süreçlerinin profesyonel ekipler tarafından yürütülmesi gibi nedenlerle çalışmanın Microsoft® Word ortamında yazılmış ham hâlinin araştırmacıdan istenmesi de yaygın bir yöntemdir.

```
\cite{Rasool2019}
```

6.3.9 Yeni Bilgi Edinme

Yeni bir konu araştırılmak istenildiğinde arama motorlarında İngilizce olarak "***** in Latex" yazdığınızda birçok kaynak çıkacaktır. Örnek kodlamaları çalışmanıza eklemeyen önce muhakkak boş bir LaTeX dosyası içerisinde stabil çalışır olduğunu görmeye çalışın. Bu sayede hataların takibi kolaylaşacaktır.

7

Makale Hazırlama Süreci

7.1 Giriş

Bu bölümde makale hazırlama süreci tüm yönleriyle anlatılacaktır. Makale hazırlama süreci doğası gereği 5 temel adım içerir.

1. Problemin Belirlenmesi - **Literatür Taraması**
2. Önerilen Çözüm Yöntemi - **Literatür Taraması**
3. Makale Taslağının Oluşturulması - **Plan**
4. Uygulama - **Gerçekleştirme**
5. Makale Yazımı - **Yazım**

7.2 Problemin Belirlenmesi

Problemin belirlenmesi sürecinde literatür taraması detaylı bir şekilde yapılmalıdır. Literatür taraması ile problem belirlenebilir (Bartosz, 2015). Problem belirlendikten sonra literatür taraması derinleştirilir. Bu adımda problemin çözümü için geliştirilmiş yöntemler incelenir ve sistematik bir şekilde tarama yapılır. Literatür taraması sırasında toplanan makalelerin kolay incelenebilmesi için FileLocator Pro ve dtSearch gibi indeksleme programları kullanılabilir (Team, 2021a; Team, 2021b).

Örnek konu olarak "Vücut Yağ Yüzdesinin Belirlenmesi" problemi belirlenmiştir.

7.3 Önerilen Çözüm Yöntemi

Problem belirlendikten sonra, problemin çözümü için ele alınabilecek yöntemler sistematik bir şekilde hazırlanan derleme makalelerinden incelenebilir (Liberati ve ark, 2009). Derleme makalesi araştırma makalesi hazırlanmasından daha kapsamlı ve zor bir süreçtir. Konuyla ilgili ancak uzun dönemdir çalışan araştırmacılar tarafından ilgili tüm literatürü analiz edilmesi ile hazırlanan çalışmalar derleme makalesi olarak yayınlanabilir (Ryan-Wenger, 2017). Bu tür derleme makaleleri ilgiyi konuya dair derinlemesine araştırma yapma sürecindeki araştırmacılar için son derece yararlıdır.

Başarılı ve Etkili Bir Sunum Hazırlama Süreci

8.1 Sunum Türleri, Sunum Yapmanın Gerekliliği ve Önemi

Sunum hazırlama ve bu hazırlanan çalışmayı sunma, başta öğrencilik ve profesyonel iş hayatı olmak üzere çok çeşitli şekillerde modern yaşam içerisinde önemli bir konu olarak ortaya çıkar. Sunumlar fikirleri, hedefleri, yapılan çalışmaların detaylarını ve sonuçlarını diğer insanlara anlatmanın en etkili yollarından biridir (Carnegie, 1990; Crosby, 2019). Çok çeşitli amaçlarla sunum hazırlama ve bu çalışmayı sunma gereksinimi dikkate alınabilecek olmakla birlikte, bu dokümanda hem öğrencilik hem de iş yaşamı yönünden dikkate alınabilecek akademik amaç ve kapsamda sunum hazırlama süreçleri incelenecektir.

Günümüz imkânlarının da katkısıyla, içerik bakımından başarılı ve sunum tekniği yönünden de etkili sunumlar hazırlamak kolaylaşmıştır. Ancak potansiyel olarak var olan bu avantajı kullanarak iyi ve etkili bir sunum ortaya koymak için sunumu yapan araştırmacıya büyük iş düşmektedir. Sunum yapmanın kolaylaşması, çok çeşitli amaçlarla sunumlar yapılması, artık sunumların bir kısmının fiziksel olarak biraraya gelmeden online olarak yapılması gibi nedenlerle dinleyiciler açısından daha az önemsenen ve küçük bölümü akıllarda kalan sunumlar ortaya çıkabilmektedir.

Sıradanlıktan uzak, iyi bir sunum için ilk şart hazırlanan çalışmanın bilimsel niteliği ve araştırmacının konuya hakimiyeti olmakla birlikte, sunum safhası açısından bu gerek şart olmakla birlikte yeterli değildir. Çalışma için sunum süresi, sunum ortamı, dili, dinleyici kitlesi vb. çeşitli noktalar dikkate alarak en uygun sunum kapsamı belirlenmelidir (Carnegie, 1990; Crosby, 2019; Lucas, 2014).

Bu çalışmada sunum kelimesiyle kastedilen, var olan bir akademik kapsamı, Microsoft® PowerPoint, Prezi gibi bir sunum yapma programı ile uygun gösterim formatında aktarmaktır. Sunumun katılımcılarla fiziksel olarak bir arada olduğunda projeksiyon cihazı ile ya da online olarak herkesin kendi cihazını/ekranını kullanması yoluyla aktarılması gibi iki temel aktarım ortamı söz konusudur. Bu-

Çalışma ve sunum için harcanan süreye göre çok çok küçük bir zaman daha harcayarak çalışmanın farklı dijital ortamlarda yedeğini anında erişebilecek biçimde saklayın.

Gerekli bilimsel donanımına sahipseniz ve hazırlığınızı yapmışsanız kendinize güvenin ancak mütevazı olun.

9

Araştırma ve Yayın Etiği

9.1 Giriş

Bilimsel çalışmalar bilgi üretimini, bilginin geliştirilmesini ve yayılmasını amaçlar. Bu sayede insanlığa katkı sunulmuş olur. Çalışmalar sonucunda üretilen bilimsel yayınların belirli kurallar çerçevesinde sunulması gerekir. Bilimsel yayınlardaki bilgilerin eksiksiz, çarpıtılmadan, tekrar üretilebilecek ve geliştirilebilecek çerçevede sunulması gerekir. Bu süreçlerle birlikte Bilim Etiği kavramı ortaya çıkmıştır. Çalışmaların etik kurallara uygun bir şekilde yürütülmesi gerekmektedir. Etik kurallar dışında gerçekleştirilen davranışlara etik dışı davranışlar adı verilir (Yördem, 2021). Bilimsel çalışmaların etik kurallara uygun bir şekilde devam ettirilmesi gerekir. Aksi hâlde bazı yaptırımlarla karşı karşıya kalınabilir (Ünal & Başpınar, 2012). Bu çalışmada etik ihlallerinde ortaya çıkabilecek yaptırımlar değerlendirilmiştir.

9.2 Hukuki Yaptırımlar ile ilgili Kanun ve Yönetmelikler

Bilimsel araştırma ve yayın etiği ihlallerine karşı bazı yönetmelikler ve kanunlar kullanılmaktadır. Yükseköğretim Kurulunun (YÖK) hazırladığı Yükseköğretim Kurumları Bilimsel Araştırma ve Yayın Etiği Yönergesinde (YÖK BAYEY) bilimsel araştırma sırasında gereken etik kurallar için bir çerçeve belirlenmiştir. Ancak burada yaptırım ve cezai hükümler yer almamaktadır. Araştırma etiğine aykırı suçlar 1951 tarihli Fikri ve Sanat Eserleri Kanunu (FSEK) kapsamında değerlendirilir (Kültür Bakanlığı, 1951). Ancak bu kanun tam anlamıyla bilimsel suçları değil engellemek için çıkarılmamış fikri hakların korunumunu kapsamaktadır. Buna ek olarak bilimsel araştırmalar etik ihlallerinin değerlendirilmesinde 2547 sayılı Yükseköğretim Kanunu (YÖK Kanunu, 1981), Üniversitelerarası Kurul Bilimsel Araştırma ve Yayın Etiği Yönergesi (ÜAK, 2021) ve Türkiye Bilimsel ve Teknolojik Araştırma Kurumu (TÜBİTAK) Araştırma ve Yayın Etiği Kurulu Yönetmeliği (TÜBİTAK, 2018) kullanılmaktadır. Yapılan etik ihlaller karşısında bu kanun ve yönetmeliklerdeki yaptırımlarla karşı karşıya kalınabilir. Etik ihlallerde esas yetki YÖK'te olmakla birlikte TÜBİTAK projeleri kapsamında gerçekleşen etik ihlaller sebebiyle TÜBİTAK'ta duruma müdahil olup kişilere yaptırım uygulayabilmekte-

YÖK BAYEY Madde 4-(2)-h'de hayvanlara zarar vermek ve ekolojik yapıyı tahrif etmek şeklinde diğer etik ihlaller çeşidi belirtilmiştir. Bu etik ihlal gerçekleşmesi durumunda YÖK Kanununa göre aylıktan veya ücretten kesme cezası verilir (Madde 53-3-c) (YÖK Kanunu, 1981).

YÖK BAYEY Madde 4-(2)-ı araştırmaların yapılabilmesi için gerekli izinlerin almamak şeklinde diğer etik ihlaller çeşidi belirtilmiştir. Bu etik ihlal gerçekleşmesi durumunda YÖK Kanununa göre kınama cezası verilir (Madde 53-2-ı) (YÖK Kanunu, 1981).

YÖK BAYEY Madde 4-(2)-i'de Türkiye'nin dâhil olduğu anlaşmalardaki hükümlere ayrı iş yapmak şeklinde diğer etik ihlaller çeşidi belirtilmiştir. Bu etik ihlal gerçekleşmesi durumunda YÖK Kanununa göre kınama cezası verilir (Madde 53-2-i) (YÖK Kanunu, 1981).

YÖK BAYEY Madde 4-(2)-j'de çalışmalar ile ilgili kamu görevlilerini çalışmanın olumsuz yönleri hakkında bilgilendirmemek şeklinde diğer etik ihlaller çeşidi belirtilmiştir. Bu etik ihlal olması durumunda YÖK Kanununa göre kınama cezası verilir (Madde 53-2-j) (YÖK Kanunu, 1981).

YÖK BAYEY Madde 4-(2)-k'de çalışmada toplanan verilerin gizliliğine riayet etmek şeklinde diğer etik ihlaller çeşidi belirtilmiştir. Bu etik ihlal olması durumunda YÖK Kanununa göre aylıktan veya ücretten kesme cezası verilir (Madde 53-3-d) (YÖK Kanunu, 1981).

YÖK BAYEY Madde 4-(2)-l'de akademik atama süreçlerinde yanlış bilgi vermek şeklinde diğer etik ihlaller çeşidi belirtilmiştir. Bu etik ihlal olması durumunda YÖK Kanununa göre aylıktan veya ücretten kesme cezası verilir (Madde 53-3-k) (YÖK Kanunu, 1981).

İÇİNDEKİLER

ÖN SÖZ.....	iii
-------------	-----

BÖLÜM 1

GİRİŞ.....	1
1.1. Planktonun Besin Zincirindeki Yeri ve Önemi.....	2
1.2. Planktonik Organizmaların Gruplandırılması.....	8
1.2.1. Biyolojik Özelliklerine Göre Plankton.....	8
1.2.2. Büyüklüklerine Göre Plankton.....	8
1.2.3. Şekillerine Göre Plankton.....	10
1.2.4. Kökenine Göre Plankton.....	11
1.2.5. Yaşadıkları Ortama Göre Plankton.....	11
1.2.6. Topoğrafik Dağılımlarına Göre Plankton.....	12
1.2.7. Dağılım Seviyelerine Göre Plankton.....	12
1.2.8. Işık Durumuna Göre Plankton.....	14
1.2.9. Birey Sayılarına Göre Plankton.....	14

BÖLÜM 2

PLANKTON POPÜLASYONUNUN DİNAMİĞİ.....	17
2.1. Ötrofikasyon.....	17
2.2. Red-Tide.....	20
2.3. Biyoluminesans.....	24
2.4. Toksin Üreten Türler ve Neden Oldukları Zararlar.....	25
2.4.1. Aşırı Üremeye Neden Olan Cinsler.....	25
2.4.2. Zehirler ve Etkileri.....	28
2.5. Tutunucu (Fouling) ve Delici (Boring) Organizmalar.....	29
2.5.1. Fouling Organizmalar.....	29
2.5.2. Boring Organizmalar.....	32
2.6. Su Yüzeyinin Yüzer-Gezer Organizmaları.....	34
2.7. Biyomonitör Türler.....	36

BÖLÜM 3

FİTOPLANKTON.....	41
3.1. Fitoplanktonun Genel Özellikleri.....	41
3.2. Fitoplanktonun Tanımlanması.....	42
3.3. Fitoplanktonun Sınıflandırılması.....	43

BÖLÜM 4

ZOOPLANKTON	57
4.1. Zooplanktonik Organizmaların Genel Özellikleri.....	57
4.1.1. Altalem: Protista (Protozoa = Bir Hücreliler)	57
4.1.2. Altalem: Metazoa (Çok Hücreliler)	66

BÖLÜM 5

İHTİYOPLANKTON	115
5.1. Balık Yumurtalarının Genel Özellikleri.....	115
5.2. Balık Larvalarının Genel Özellikleri	119

BÖLÜM 6

PLANKTON KÜLTÜRÜ	139
6.1. Kültür Tipleri	139
6.1.1. Koruma-Bakım Kültürleri (Maintenance Kültürler)	140
6.1.2. Zenginleştirici Kültürler (Enrichment Kültürler).....	140
6.1.3. Tek Organizma Kültürleri	141
6.1.4. Akselik Kültürler.....	141
6.1.5. Klonal Kültürler	142
6.1.6. Sınırlı Hacimli Kültürler	142
6.1.7. Kitle Kültürleri (Mass Kültürler)	142
6.1.8. Sürekli Kültürler	143
6.2. Fitoplankton Kültürü	143
6.2.1. Akuakültürde Mikroalgler	144
6.2.2. Fitoplankton Kültürünün Hazırlanmasında Kullanılan Başlıca Araç-Gereçler	148
6.2.3. Fitoplankton Kültüründe Kullanılan Bazı Besin Maddeleri (Kimyasal Maddeler-Zenginleştiriciler).....	148
6.2.4. Fitoplankton Kültüründe Kullanılan Deniz Suyunun ve Kültür Ortamının Özellikleri.....	150
6.2.5. Fitoplankton Kültürünün Hazırlanması.....	150
6.2.6. Kültürü Yapılan Bazı Fitoplankton Türleri	151
6.3. Zooplankton Kültürü	155
6.3.1. Zooplankton Kültür Teknikleri	156
6.3.1.1. Kalanoid Kopepod	156
6.3.1.2. Harpaktikoid Kopepod.....	158
6.3.2. Rotifer Yetiştiriciliği	160
6.3.2.1. Rotifer Yetiştiriciliğinde Kullanılan Bazı Araç-Gereçler.....	162
6.3.2.2. Rotifer Kültüründe Kullanılan Deniz Suyunun ve Kültür Ortamının Özellikleri	163
6.3.2.3. Rotifer Kültürünün Hazırlanması.....	163
6.3.3. <i>Artemia</i> Kültürü	165
6.3.3.1. <i>Artemia</i> Kültüründe Kullanılan Temel Araç, Gereç ve Kimyasallar	168

6.3.3.2. <i>Artemia</i> Kistlerinin Kuluçkalanması	168
6.3.3.3. <i>Artemia</i> Türünde Dekapsülasyon İşlemi	169
6.3.4. <i>Daphnia</i> Kültürü	171
6.3.4.1. <i>Daphnia</i> Kültür Yöntemleri	173
BÖLÜM 7	
PLANKTON ARAŞTIRMA VE DEĞERLENDİRME YÖNTEMLERİ	175
7.1. Plankton Örneklemeye Araçları	175
7.1.1. Örneklemeye Şişeleri	175
7.1.2. Plankton Kepçeleri	177
7.1.3. Yüksek Hızla Kullanılan Araçlar	180
7.1.4. Motopomplar	181
7.2. Plankton Çekim Yöntemleri	181
7.3. Plankton Örneklerinin Tespiti ve Korunması	183
7.3.1. Formalin Solüsyonu	183
7.3.2. Lugol (İyot) Solüsyonu	184
7.4. Plankton Miktarının Tayini	184
7.5. Plankton Sayımında Kullanılan Araçlar	185
7.5.1. Pipetler	185
7.5.2. Utermohl Sedimentasyon	185
7.5.3. Petroff Hausser Lamı	185
7.5.4. Neubauer Hemositometresi	186
7.5.5. Palmer-Moloney Sayım Kamarası	186
7.5.6. Sedwick-Rafter Sayım Kamarası	186
7.5.7. Dollfus-Cuve Sayım Kamarası	186
7.5.8. Sayım Tepsisi	186
7.5.9. Milimetrik Kâğıt	186
7.6. Planktonik Organizmaların Biyokütle ve Bolluk Hesapları	188
7.6.1. Biyokütle	188
7.6.2. Bolluk	188
7.7. Mikroskop	190

İÇİNDEKİLER

ÖN SÖZ	iii
ŞEKİL LİSTESİ	xi
Bu Kitaba Nasıl Çalışılmalı?	xix
KISIM 1: R İLE PROGRAMLAMA	1
1. R DÜNYASINA GİRİŞ	3
1.1. R Programı Nasıl Elde Edilir?	4
1.2. R Project vs RStudio	6
1.3. RStudio'nun Elde Edilmesi	9
1.4. RStudio Arayüzü	9
1.5. RStudio Arayüzünün Kişiselleştirilmesi	17
2. R PROGRAMLAMA DİLİNİN TEMELLERİ	21
2.1. Değişken Tanımlama	21
2.2. Aritmetik İşlemler ve Yorum Satırı	23
2.3. Değişken Çeşitleri	26
2.4. Veri Çeşitleri	28
2.4.1. Vektör Veri Tipi (vector)	28
2.4.2. Matris Veri Tipi (matrix)	31
2.4.3. Array Veri Tipi (array)	39
2.4.4. Veri Çerçevesi (data.frame)	40
2.4.5. Faktör Veri Tipi (factor)	43
2.4.6. Liste Veri tipi (list)	44
2.5. Paket Kavramı	47
2.6. R Dilinde Kullanılan Bazı Önemli Matematiksel Fonksiyonlar	47
2.7. R Dilinde Kullanılan Bazı Önemli İstatistiksel Fonksiyonlar	53
2.8. R Dilinde Kullanılan Diğer Önemli Fonksiyonlar	53
2.9. R Dilinde Bazı İstatistiksel Dağılımlardan Rastgele Veri Üretme	64
3. R PROGRAMLAMA DİLİNDE KARAR YAPILARI	67
3.1. If Yapısı	69
3.2. If-Else Yapısı	71
3.3. If- Else if Yapısı	72
3.4. ifelse Fonksiyonu	74

3.5. Switch Fonksiyonu	74
3.6. Karar Yapıları İçin Çözümlü Örnekler	75
4. R PROGRAMLAMA DİLİNDE DÖNGÜLER	79
4.1. for Döngüsü	79
4.2. while Döngüsü	87
4.3. repeat Döngüsü	89
4.4. Döngü Yapıları İçin Çözümlü Örnekler	91
5. R PROGRAMLAMA DİLİNDE KULLANICI TANIMLI FONKSİYONLAR	95
6. apply AİLESİ	103
6.1. apply () Fonksiyonu	103
6.2. lapply () Fonksiyonu	107
6.3. sapply () Fonksiyonu	109
6.4. tapply () Fonksiyonu	111
6.5. apply Ailesine Yakın Hazır Fonksiyonlar	113
7. dplyr PAKETİ İLE VERİ İŞLEME	115
7.1. select() Fonksiyonu	115
7.2. filter() Fonksiyonu	119
7.3. arrange() Fonksiyonu	119
7.4. rename() Fonksiyonu	120
7.5. mutate() Fonksiyonu	121
KISIM 2: R İLE İSTATİSTİKSEL ANALİZ	123
8. TEMEL İSTATİSTİKSEL KAVRAMLAR	125
8.1. İstatistik	125
8.2. Kitle ve Örneklem	125
8.3. Parametre ve Tahmin Edici	126
8.4. Değişken	127
8.4.1. Nitel ve Nicel Değişkenler	127
8.4.2. Bağımlı ve Bağımsız Değişkenler	127
8.5. Değişkenlerin Ölçme Düzeyleri	128
9. BETİMSSEL İSTATİSTİKLER	129
9.1. Merkezi Eğilim Ölçüleri	129
9.1.1. Ortalama	129
9.1.2. Ortanca (Medyan)	133
9.1.3. Mod (Tepe Değer)	135

9.1.4. Geometrik Ortalama	136
9.1.5. Harmonik Ortalama	138
9.1.6. Çeyrekler (Quartiles)	140
9.1.7. summary() fonksiyonu	140
9.2. Dağılım (Saçılım, Yayılım) Ölçüleri	141
9.2.1. Açıklık (Range)	141
9.2.2. Ortalama Mutlak Sapma	143
9.2.3. Varyans	145
9.2.4. Standart sapma	148
9.2.5. Değişim Katsayısı	149
9.2.6. Çarpıklık Katsayısı	152
9.2.7. Basıklık Katsayısı	156
9.2.8. Medyan Etrafında Mutlak Sapmaların Medyanı: MAD	159
9.3. Frekans Tabloları	161
9.4. Çapraz Tablolar	165
10. GRAFİKLER İLE VERİ ÖZETLEME	169
10.1. Çubuk (Sütun) Grafikleri	169
10.2. Pasta Grafikleri	176
10.3. Histogram	178
10.4. Boxplot Grafiği	181
10.5. Saçılım Grafiği	184
10.6. Temel Grafik Fonksiyonu ve Argümanları	189
10.6.1. x ve y argümanları	190
10.6.2. type argümanı	191
10.6.3. main, xlab ve ylab argümanları	192
10.6.4. pch argümanı	193
10.6.5. bg argümanı	193
10.6.6. col argümanı	193
10.6.7. las argümanı	194
10.6.8. bty argümanı	195
10.6.9. cex ve lwd argümanı	196
10.6.10. lty argümanı	196
10.6.11. xlim ve ylim argümanları	198
10.7. Diğer Grafik Fonksiyonları	198
10.7.1. grid() fonksiyonu	198
10.7.2. points() fonksiyonu	199
10.7.3. legend() fonksiyonu	201

10.7.4. <code>lines()</code> fonksiyonu	202
10.7.5. <code>abline()</code> fonksiyonu	202
10.7.6. <code>text()</code> fonksiyonu	203
10.7.7. <code>par()</code> fonksiyonu	204
10.8. Bir grafiği Otomatik Kaydetme	205
11. HİPOTEZ TESTİ VE İLGİLİ KAVRAMLAR.....	207
12. KATEGORİK DEĞİŞKENLER ARASINDAKİ İLİŞKİLERİN İNCELENMESİ	223
12.1. Ki-kare χ^2 Bağımsızlık Testleri	223
12.1.1. $R \times C$ Tipindeki Çapraz Tablolar	223
12.2.2. 2×2 Tipindeki Çapraz Tablolar	234
12.2. Sınıflama Ölçme Düzeyindeki Değişkenler İçin İlişki Katsayıları	242
12.2.1. Φ (Phi) Katsayısı	242
12.2.2. Kontenjans Katsayısı	244
12.2.3. Cramer'in v Katsayısı	246
12.2.4. Theil'in Belirsizlik (U) Katsayısı	247
12.3. Sıralama Ölçme Düzeyindeki Değişkenler İçin İlişki Katsayıları	250
12.3.1. Gamma γ Katsayısı	250
12.3.2. Tau-b τ_b Katsayısı	252
12.3.3. Tau-c τ_c Katsayısı	255
12.4. Kategorik ve Sayısal Değişkenler İçin η Katsayısı	256
13. NİCEL DEĞİŞKENLER ARASINDAKİ İLİŞKİLERİN İNCELENMESİ	259
13.1. Kovaryans	259
13.2. Pearson Korelasyon Katsayısı	262
13.3. Kısmi (Partial) Korelasyon Katsayısı	267
13.4. Spearman Sıra Korelasyon Katsayısı	269
13.5. Korelasyon Katsayısının Anlamlılık Testi	271
13.6. R ile Korelasyon Analizinin Görselleştirilmesi	279
14. NORMALLİK TESTLERİ	285
14.1. Kolmogorov-Smirnov Uyum İyiği Testi	285
14.2. Cramer-von Mises Uyum İyiği Testi	287
14.3. Shapiro-Wilk Normallik Testi	289
14.4. Lilliefors Normallik Testi	289
14.5. Grafiklere Dayalı Normallik İncelemesi	290
15. TEK KİTLE İÇİN HİPOTEZ TESTLERİ	297
15.1. Tek Kitle Ortalama Parametresi İçin Testler	297
15.1.1. Tek Örnek Z Testi	297

15.1.2. Tek Örnek t Testi	304
15.1.3. Tek Örnek Wilcoxon İşaretli Sıra Sayıları Testi	311
15.1.4. Tek Örnek Test Sonuçlarının Görselleştirilmesi	312
15.1.5. Tek Örnek Konum Parametresi İçin R Fonksiyonu Oluşturma	315
15.2. Tek Kitle Oran Parametresi İçin Testler	318
15.3. Tek Kitle Varyans Parametresi İçin Testler	322
16. İKİ KİTLE İÇİN HİPOTEZ TESTLERİ	327
16.1. İki Bağımsız Kitle Ortalama Parametreleri İçin Testler	327
16.1.1. İki Bağımsız Örnek Z Testi	328
16.1.2. İki Bağımsız Örnek t Testi	331
16.1.2.1. Bilinmeyen kitle varyansları eşitse $\sigma_1^2 = \sigma_2^2$:	331
16.1.2.2. Bilinmeyen kitle varyansları eşit değilse $\sigma_1^2 \neq \sigma_2^2$	339
16.1.3. Mann-Whitney U Testi	348
16.1.4. İki Bağımsız Örnek Test Sonuçlarının Görselleştirilmesi	349
16.2. İki Bağımlı Kitle Ortalama Parametreleri İçin Testler	352
16.2.1. Paired t Testi	354
16.2.2. Wilcoxon İşaretli Sıra Sayıları Testi	363
16.3. İki Kitle Ortalaması Testi İçin R Fonksiyonu	364
16.4. İki Kitle Oran Parametreleri İçin Testler	369
16.5. İki Kitle Varyans Parametreleri İçin Testler	372
17. ANOVA ve KRUSKAL-WALLIS TESTLERİ	379
17.1. Varyansların Homojenliği İçin Hipotez Testleri	379
17.2. Tek Yönlü Varyans Analizi	381
17.3. Çoklu Karşılaştırmalar	386
17.4. Kruskal-Wallis H Testi	389
17.5. Sonuçların Görselleştirilmesi	391
18. REGRESYON ANALİZİ	395
18.1. Basit Doğrusal Regresyon Analizi	395
18.2. Çoklu Regresyon Analizi	407
18.3. Kategorik-Nitel Açıklayıcı Değişken Durumu: Kukla (Dummy) Değişken	413
19. GÜÇ (POWER) ANALİZİ VE ÖRNEK HACMİ BELİRLEME	417
19.1. t-Testleri İçin Power Analiz	418
19.2. ANOVA İçin Power Analiz	422
19.3. Korelasyon İçin Power Analiz	424
19.4. Regresyon İçin Power Analiz	425
19.5. Ki-Kare Testleri İçin Power Analiz	427

20. BAZI ÖRNEKLEME DAĞILIMLARINA İLİŞKİN TABLOLAR	431
20.1. Standart Normal Dağılım Tablosu	431
20.2. Student <i>t</i> Dağılım Tablosu	434
20.3. χ^2 Dağılımı Tablosu	436
20.4. F Dağılımı Tablosu	438
KISIM 3: R DİLİNDE İLERİ DÜZEY ARAÇLAR	443
21. R İLE OTOMATİK TABLOLAR VE RAPORLAMA	445
21.1. <i>table1</i> Paketi	445
21.2. <i>stargazer</i> Paketi	449
21.3. <i>furniture</i> Paketi	452
21.4. <i>report</i> Paketi	453
22. İLERİ DÜZEY GRAFİKLER: ggp1ot2 PAKETİ	457
22.1. Çubuk (Sütun, Bar) Grafiği	458
22.2. Pasta (Pie) Grafiği	461
22.3. Histogram Grafikleri	463
22.4. Yoğunluk Grafikleri	465
22.5. Kutu (Boxplot) Grafikleri	467
22.6. Keman (Violin) Grafikleri	469
22.7. Saçılım Grafikleri	469
22.8. Farklı Tür Grafiklerin Birlikte Kullanımı	472
22.9. Grafikleri Kaydetme	474
23. RMARKDOWN İLE RAPOR HAZIRLAMA	477
24. shiny PAKETİ	493
25. R PAKETİ OLUŞTURMA	509
25.1. Fonksiyon Oluşturma	509
25.2. Veri Dosyası Oluşturma	512
25.3. DESCRIPTION Dosyası Oluşturma	513
25.4. Paket Dosyalarının Hazırlanması	515
25.5. Paketin CRAN'a Yüklenmesi	517
25.6. SAP Paketinin PDF Dosyası	521

İçindekiler

Ön Söz.....	iii
-------------	-----

BİRİNCİ BÖLÜM

KÜMELER KURAMI.....	1
1.1. Küme Teorisinin Temel Kavramları.....	1
1.2. Kümeler Üzerinde İşlemler.....	3
1.3. Çözümlü Alıştırmalar	13
1.4. Kümeler İşlemleri Üzerinde R Program Uygulamaları	25
1.4.1. R Programında Kullanılan Küme İşlem Operatörleri.....	25
1.4.2. R programında Venn Şemalarının Oluşturulması.....	30

İKİNCİ BÖLÜM

KOMBİNATÖR ANALİZ.....	37
2.1. Faktöriyel Fonksiyon.....	37
2.2. Temel Sayma Yöntemleri.....	38
2.2.1. Toplama ve Çarpma İlkeleri.....	39
2.3. Permütasyon	40
2.3.1. Dairesel Permütasyon.....	41
2.3.2. Tümü Birbirinden Farklı Olmayan Nesnelerin Permütasyonu	43
2.3.3. İki Farklı Cinsteki Öğelerin Permütasyonu	44
2.4. Kombinasyon.....	44
2.5. Sıralı ve Sırasız Parçalanmalar	50
2.6. Binom Teoremi.....	52
2.7. Multinomial Teorem.....	55
2.8. Çözümlü Alıştırmalar	57
2.9. Permütasyon ve Kombinasyon Konusunda R Program Uygulamaları	69

ÜÇÜNCÜ BÖLÜM

OLASILIK.....	75
3.1. Giriş.....	75
3.2. Olasılık Kavramları	76

3.2.1. Olasılığın Tanımı.....	78
3.2.2. Olasılık Ölçüsünün Bazı Özellikleri.....	86
3.2.3. Koşullu Olasılık.....	88
3.2.4. Koşullu Olasılık İçin Çarpımsal Teorem.....	102
3.2.5. Örnek Uzayın Parçalanışı.....	103
3.2.6. Toplam Olasılık Teoremi.....	104
3.2.7. Bayes Teoremi.....	105
3.2.8. Bağımsız Olaylar ve İlişkili Sonuçlar.....	107
3.3. Çözümlü Alıştırmalar.....	115
3.4. R Program Uygulamaları.....	130

DÖRDÜNCÜ BÖLÜM

RASTGELE DEĞİŞKENLER VE DAĞILIMLARI	145
4.1. Rastgele Değişkenler.....	145
4.2. Kesikli Rastgele Değişken ve Olasılık Dağılımı.....	148
4.3. Sürekli Rastgele Değişken ve Olasılık Fonksiyonu.....	162
4.4. İki Boyutlu Rastgele Değişkenler.....	177
4.4.1. (X,Y) Kesikli Rastgele Değişkeninin Ortak Olasılık Fonksiyonu.....	178
4.4.2. (X,Y) İki Boyutlu Sürekli Rastgele Değişkeninin Ortak Olasılık Yoğunluk Fonksiyonu.....	191
4.5. Çok Boyutlu Rastgele Değişkenler.....	202
4.6. Rastgele Değişkenlerin Bağımsızlığı.....	209
4.7. Koşullu Olasılık Fonksiyonları.....	213
4.8. Çeyrekler (Kantiller).....	226
4.9. ÇÖZÜMLÜ ALIŞTIRMALAR.....	229
4.10. R Program Uygulamaları.....	289

BEŞİNCİ BÖLÜM

BEKLENEN DEĞER, VARYANS ve MOMENTLER	305
5.1. Beklenen Değer ve Özellikleri.....	305
5.2. İki Boyutlu Rastgele Değişkeninin Beklenen Değeri.....	323
5.3. Koşullu Beklenen Değer.....	333
5.4. Bir Rastgele Değişkenin Varyansı.....	339
5.5. Koşullu Varyans.....	349
5.6. Kovaryans.....	356
5.7. Korelasyon.....	372
5.8. Rastgele Vektörlerde Beklenen Değer ve Kovaryans.....	380
5.9. Momentler.....	386
5.10. Moment Üreten Fonksiyonlar.....	392

5.10.1. Moment Çıkaran Fonksiyon	393
5.10.2. Karakteristik Fonksiyon.....	399
5.10.3. Faktöriyel Moment Çıkaran Fonksiyon	404
5.11. Eşitsizlikler	407
5.12. Çözümlü Alıştırmalar	415
5.13. R Program Uygulamaları	458

ALTINCI BÖLÜM

BAZI ÖZEL KESİKLİ DAĞILIMLAR	479
6.1. Bernoulli Dağılımı	479
6.1.1. Bernoulli Dağılımının Ortalama ve Varyansı	482
6.2. Binom Dağılımı	485
6.2.1. Binom Dağılımının Ortalama ve Varyansı	491
6.3. Çok Terimli Dağılım (Multinomial Distribution).....	495
6.3.1. Çok Terimli Dağılımın Ortalama ve Varyansı.....	498
6.4. Geometrik Dağılım	502
6.4.1. Geometrik Dağılımın Beklenen Değer ve Varyansı	507
6.5. Negatif Binom Dağılımı (Pascal Dağılımı)	512
6.5.1. Negatif Binom Dağılımının Ortalama ve Varyansı	516
6.6. Hipergeometrik Dağılım	522
6.6.1 Hipergeometrik Dağılımın Ortalama Ve Varyansı	529
6.7. Genelleştirilmiş Hipergeometrik Dağılım.....	534
6.7.1. Genelleştirilmiş Hipergeometrik Dağılımın Ortalama ve Varyansı	536
6.8. Poisson Dağılımı.....	537
6.8.1. Poisson Dağılımının Ortalama ve Varyansı.....	542
6.9. Kesikli Düzgün (Uniform) Dağılım.....	547
6.9.1. Kesikli Düzgün Dağılımın Ortalama Ve Varyansı	550
6.10. Çözümlü Alıştırmalar	554
6.11. R Program Uygulamaları	579
6.11.1. Bernoulli Dağılım	579
6.11.2. Binom Dağılım	583
6.11.3. Çok Terimli Dağılım.....	592
6.11.4. Geometrik Dağılım	592
6.11.5. Negatif Binom Dağılım	597
6.11.6. Hipergeometrik Dağılım	602
6.11.7. Poisson Dağılımı.....	607
6.12 Kesikli Dağılımlar Arasındaki Yakınsamalar	616
6.12.1. Bernoulli Dağılımının Binom Dağılımına Yakınsaması.....	616
6.12.2. Binom Dağılımı İle Negatif Binom Dağılımı Arasındaki İlişki.....	617

6.12.3. Hipergeometrik Dağılımın Binom Dağılıma Yakınması	617
6.12.4. Negatif Binom Dağılımının Geometrik Dağılıma Yakınsaması	618
6.12.5. Binom Dağılımının Poisson Dağılımına Yakınsaması	619

YEDİNCİ BÖLÜM

BAZI ÖZEL SÜREKLİ DAĞILIMLAR	621
7.1. Sürekli Düzgün Dağılım (Uniform Distribution).....	621
7.1.1. Sürekli Düzgün Dağılımın Beklenen Değer, Varyans ve Moment Çıkaran Fonksiyonu	625
7.2. Normal Dağılım	627
7.2.1. Normal Dağılımın Beklenen Değer, Varyans ve Moment Çıkaran Fonksiyonu	634
7.2.2. Normal Dağılımın Asimetri ve Basıklık Ölçüleri	638
7.3. Standart Normal Dağılım.....	639
7.4. İki Değişkenli Normal Dağılım	657
7.5. Lognormal Dağılım	675
7.6. Üstel Dağılım.....	686
7.7. Gamma Dağılımı	694
7.8. Beta Dağılımı.....	704
7.9. Cauchy Dağılımı.....	712
7.10. Çözümlü Alıştırmalar	720
7.11. R Program Uygulamaları.....	740
7.11.1. Sürekli Düzgün Dağılım	740
7.11.2. Normal Dağılım	744
7.11.3. İki Boyutlu Normal Dağılım.....	751
7.11.4. Log-Normal Dağılım	756
7.11.5. Üstel Dağılım.....	759
7.11.6. Gamma Dağılımı.....	763
7.11.7. Beta Dağılım	770
7.11.8. Cauchy Dağılımı.....	776
 EK 1: Standart Normal Dağılım (z) Tablosu.....	 782
 KAYNAKLAR.....	 783

İÇİNDEKİLER

ÖN SÖZ	v
--------------	---

BÖLÜM 1

BİLGİSAYARIN YAPISI VE TEMELLERİ.....	1
1.1. Giriş	1
1.2. Bilgisayarın Tanımı.....	2
1.3. Bilgisayarın Veri İşleme ve Depolama Yöntemi.....	2
1.4. Bilgisayarın Bileşenleri.....	5
1.4.1. Donanım	5
1.4.2. Yazılım	6
1.5. Programlama Dilleri.....	8
1.5.1. Problem Çözme ve Programlama.....	10
1.5.2. Programlama Dillerindeki Veri Tipleri.....	11
1.6. Wolfram Mathematica.....	12

BÖLÜM 2

MATHEMATICA İLE MATEMATİK ÇOK KOLAY!	25
2.1. Giriş	25
2.2. İşlemciler.....	25
2.3. Bazı Matematiksel Fonksiyonlar (Arşiv Fonksiyonları).....	29
2.4. Bazı Alfasayısal (String) Fonksiyonlar	36
2.5. Vektörler/Matrisler/Diziler	39
2.6. Denklem/Denklem Takımları Çözümleri, Kuvvet Açılımları.....	47
2.7. Trigonometrik İfadeler	55
2.8. Limit, Türev, İntegral ve Diferansiyel Denklemler	58
2.9. Fiziksel Birimler ve Boyut Analizi	70
2.10. İki ve Üç Boyutlu Grafik Çizimleri.....	75
2.11. Vektörel İşlemciler.....	119
2.12. Etkileşimli Nesnelere	130

BÖLÜM 3

ALGORİTMA, AKIŞ ŞEMALARI VE MATHEMATICA İLE PROGRAMLAMA	145
3.1. Giriş	145
3.1.1. Matematiksel İşlemler	147
3.1.2. Karşılaştırma İşlemleri	150
3.1.3. Mantıksal İşlemler	150
3.2. Algoritma ve Akış Şeması	151
3.3. Mathematica ile Programlama	180
3.3.1. Açıklama (Remark)	181
3.3.2. Girdi Komutu	182
3.3.3. Çıktı Komutu	195
3.3.4. Mantıksal İşlem (Karşılaştırma) Komutu	204
3.3.5. Alt Program	211
3.3.6. Dallanma (Programın Akış Sırasını Değiştirme) Komutu	225
3.3.7. Sayaç ve Ardışık Toplama	230
3.3.8. Döngüler	236

BÖLÜM 4

İNDİSLİ DEĞİŞKENLER	271
4.1. Giriş	271
4.2. İndisli Değişkenler	271

BÖLÜM 5

ÖZEL FONKSİYONLAR	311
5.1. Giriş	311
5.2. Bessel Fonksiyonu	311
5.2.1. Birinci Tür Bessel Fonksiyonu	311
5.2.2. İkinci Tür Bessel Fonksiyonu (Neumann Fonksiyonu)	313
5.2.3. Üçüncü Tür Bessel Fonksiyonu (Hankel Fonksiyonu)	314
5.2.4. Modifiye Bessel Fonksiyonu	316
5.2.5. Küresel Bessel Fonksiyonu	317
5.3. Legendre Fonksiyonu	318
5.4. Hermite Fonksiyonu	321
5.5. Laguerre Fonksiyonu	323
5.6. Chebyshev Fonksiyonu	326
5.7. Hipergeometrik Fonksiyon	328

BÖLÜM 6

UYGULAMALAR	335
6.1. Giriş	335
6.2. Mükemmel Sayı Bulma.....	335
6.3. Lucas Sayıları	336
6.4. Binom Katsayılarının Hesaplanması	342
6.4.1. Binom Katsayılarının Grafiği.....	344
6.5. Pascal Üçgeni	345
6.6. Laguerre Polinomlarının Çarpımı	347
6.7. Alan Hesabı	349
6.8. Matris Hesap Makinesi.....	351
EK A: Yaygın Olarak Kullanılan Komutlar Listesi	371
KAYNAKLAR.....	379
DİZİN	381

İÇİNDEKİLER

ÖN SÖZ.....	iii
TEŞEKKÜR.....	v

BÖLÜM 1..... 1

SolidCAM YENİ ÖZELLİKLER3

1.1. Web Tabanlı Şablon Yapılandırıcısı.....	3
1.2. İlişkisel Koordinat Sistemi	3
1.3. Paylaşılan Konum Özelliğinin Kullanılması	6
1.4. Makine Ön İzlemede Takım Seçme	7
1.5. Tutucu Özelliklerini Tanımlama.....	10
1.6. Makine Kontrol Destekleri ve Eşitlikleri.....	11
1.7. Vida Açma Özellikleri.....	11
1.8. Hızlı Hesaplama Modülleri	12
1.9. Kenar Çapak Alma ve İstenmeyen Zincirleri Tanımama	12
1.10. Düzlem Yüzeylere Doğrudan Pah Özelliği Uygulama.....	13
1.11. Yüzeý Seçimi ile Pocket (Cep) Çizgileri Oluşturma	13
1.12. Sandvik Tornalama.....	14
1.13. Otomatik İşlemler.....	14
1.14. SolidCloud.....	15
1.15. SolidCAM Maker Version.....	15

BÖLÜM 2..... 17

SolidCAM PROGRAM ARAYÜZÜ19

2.1. SolidCAM Referans Noktası Belirleme	19
2.2. Stock (Kütük) Sınırlarını Belirleme.....	29
2.3. Target (Hedef) Belirleme.....	33

BÖLÜM 3..... 35

2.5D EKSEN FREZELEME (MILLING) OPERASYONLARI.....37

3.1. Yüzeý Frezeleme Operasyonu (Face).....	37
3.2. Çevresel Frezeleme Operasyonu (Profile).....	60
3.3. Cep/Havuz Frezeleme Operasyonu (Pocket).....	85
3.4. Punta Açma Operasyonu (Drilling).....	93
3.5. Delik Delme Operasyonu (Drilling).....	101
3.6. ToolBox Döngü Operasyonları (ToolBox Cycles).....	114

3.7. İş Parçası Üzerinde 2.5D Eksen (XYZ) Frezeleme Uygulaması	117
3.7.1. Face	124
3.7.2. Profile	129
3.7.3. Pocket	134
3.7.4. T-Slot	138
3.7.5. Drilling.....	142
3.7.6. Face-2	148
3.7.7. Pocket-2	151
BÖLÜM 4.....	157
2D EKSEN (XZ) TORNALAMA (TURNING) OPERASYONLARI.....	159
4.1. Alın Tornalama Operasyonu (Face)	159
4.2. Kademeli Tornalama Operasyonu (Turning).....	185
4.3. Delik Delme Operasyonu (Drilling)	203
4.4. İç Tornalama Operasyonu (Turning)	208
4.5. İç Vida Açma Operasyonu (Threading).....	225
4.6. Dış Vida Açma Operasyonu (Threading)	236
4.7. Kanal Açma Operasyonu (Grooving).....	246
4.8. Kesme Operasyonu (Cutting)	257
4.9. Tornada Ayna Ayak Mesafesi Ayarlama (Setup).....	264
4.9.1. Kesici Takımın Yönünü Değiştirme	271
4.10. Zarf Oluşturma	274
4.11. Takım Kütüphanesi Oluşturma.....	278
4.12. İş Parçası Üzerinde 2D Eksen (XZ) Tornalama Uygulaması	282
4.12.1. Face.....	292
4.12.2. Turning	298
4.12.3. Drilling.....	300
4.12.4. Turning (Delik Genişletme).....	303
4.12.5. Grooving	305
4.12.6. Threading.....	308
4.12.7. CutOff.....	311
BÖLÜM 5.....	317
SolidCAM ÖRNEK UYGULAMA ÇALIŞMALARI.....	319
5.1. 2D İki Boyutlu Çizim Çalışmaları.....	319
5.2. Frezeleme (Milling) Uygulama Çalışmaları	331
5.3. Tornalama (Turning) Uygulama Çalışmaları	343

CONTENTS

CONTENTS	iii
FOREWORD	ix
1. INTRODUCTION	1
1.1. Biomass Sources for Biofuel Production	5
1.2. Biofuel Classification	6
1.3. Biomass-to-Biofuel Conversion Technologies.....	8
REFERENCES	14
2. THERMOCHEMICAL CONVERSION OF SOLID BIOMASS	17
2.1. Direct Combustion	18
2.1.1. Combustion of Biomass.....	19
2.1.2. Biomass Heating Value	22
2.1.3. Combustion Systems.....	26
2.1.4. Biomass Electric Generation System	31
2.2. Pretreatment of Biomass for Energy Applications.....	44
2.2.1. Drying	45
2.2.2. Pelletization and Briquetting	52
2.2.3. Torrefaction.....	58
2.3. Biomass Gasification	63
2.3.1. Stages of Gasification Process	65
2.3.2. Factors Affecting on the Gasification Process.....	68
2.3.3. Biomass Gasification Processes	72
2.3.4. Mathematical Modeling of the Fluidized Bed Gasifier	79
2.4. Pyrolysis of Biomass	91
2.4.1. The Fundamentals of Biomass Pyrolysis	92
2.4.2. Process Description.....	100
2.4.2.1. Cutting, Grinding, and Drying	102
2.4.2.2. Cleanup	103

2.4.2.3. Oil Collection	103
2.4.2.4. Storage	104
2.4.2.5. Combustion.....	104
2.4.2.6. Pyrolysis Reactor.....	104
2.4.2.7. Biooil Methods of Improvement.....	118
REFERENCES	130

3. BIODIESEL PRODUCTION 135

3.1. Feedstocks	138
3.2. Biodiesel Production Processes.....	145
3.2.1. Transesterification	145
3.2.1.1. Catalyst.....	146
3.2.1.2. Methanol to Oil Molar Ratio.....	151
3.2.1.3. Reaction Temperature.....	151
3.2.1.4. Mixing System	152
3.2.1.5. Residence Time.....	155
3.2.1.6. Composition of Oil	156
3.2.2. Biodiesel Production Reactors	157
3.2.3. The Continuously Stirred Tank Reactor's Design Principles.....	161
3.3. Novel Biodiesel Production Processes.....	174
3.3.1. Transesterification Under Supercritical Conditions	175
3.3.2. Ultrasound Assisted Transesterification	176
3.3.3. Reactive Distillation	178
3.3.4. Microwave Technique.....	183
3.3. Biodiesel Purification	184
3.3.1. Separation of Glycerol Rich Phase	185
3.3.2. Wet Washing	188
3.3.3. Dry Cleaning.....	189
3.3.4. Separation by Membrane	192
3.3.5. Crude Glycerol Purification.....	198
3.3.6. Methanol Recovery From Biodiesel	200
3.4. Usage areas of Byproduct Glycerol.....	203
3.4.1. Usage Potential of Glycerol in Chemical Industry	204
3.4.2. Glycerol's Potential Use in Fermentation Technology.....	215
REFERENCES	222

4. BIOGAS PRODUCTION FROM AGRICULTURAL WASTES	227
4.1. Anaerobic Digestion Process Phases	231
4.1.1. Hydrolysis	232
4.1.2. Acidogenesis	233
4.1.4. Methanogenesis.....	233
4.2. Factors That Influence Anaerobic Digestion	234
4.2.1. pH	234
4.2.2. Hydraulic Retention Time (HRT)	235
4.2.3. Temperature	236
4.2.4. Nutrients and Carbon to Nitrogen Ratio	236
4.2.5. Toxins	237
4.3. Agricultural Residues' Potential for Biogas Production	238
4.3.1. Anaerobic Manure Digestion	239
4.3.2. Anaerobic Digestion of Lignocellulosic Biomasses	240
4.4. Biogas Purification Technologies	246
4.4.1. Removal of Carbon Dioxide.....	246
4.4.2. Hydrogen Sulphide Removal.....	254
4.5. Biogas and Digestate Utilisation.....	263
4.5.1. Heating	263
4.5.2. Electricity Generation or Combined Heat and Power (CHP).....	264
4.5.3. Vehicle Fuel.....	266
4.5.4. Fuel Cells.....	267
4.5.5. Digestates as Vegetable Crop Fertilizers	270
4.6. Modeling of the Anaerobic Fermentation Process	271
4.6.1. Microorganism Growth Kinetics.....	271
4.6.1. Volumetric Methane Production Rate.....	276
4.7. Process Design for Biogas	280
4.7.1. Energy Requirements for Biogas System	280
4.8. Process Control, Maintenance and Safety of the Biogas System.....	285
4.8.1. Process Control and Monitoring	286
4.8.2. Maintenance of the Equipments.....	287
4.8.3. Safety of the Biogas Plant	292
4.9. An Example of a Biogas Fermenter Design	296
REFERENCES	307
5. ETHANOL PRODUCTION FROM BIOMASS	311
5.1. Bioethanol Production Raw Materials	312
5.1.1. Raw Materials Containing Sugar.....	313
5.1.2. Raw Materials Containing Starch	314

5.1.3. Lignocellulose-Containing Raw Materials	315
5.1.4. Bioethanol Using Glycerol	316
5.2. Bioethanol Production From Lignocellulosic Biomass	317
5.2.1. Lignocellulosic Biomass Pretreatment	319
5.2.2. Fermentation of Sugars Produced by Hydrolysis	327
5.3. Design Principles of Bioreactors	334
5.3.1. Enzymatic Reactions and Enzyme Kinetics	335
5.3.2. Microorganism Growth Kinetics.....	343
5.4. Bioethanol Separation and Purification	356
5.5. Ethanol Applications	366

INTRODUCTION

The depletion of petroleum-derived fuel and environmental concerns have prompted researchers to investigate biofuel as an alternative fuel source. Biofuels are potentially viable and long-term substitutes for fossil fuels. Over the last few decades, there has been a significant increase in biofuel research and development. However, from the standpoint of production capacity and engine compatibility, a complete substitution of petroleum-derived fuels by biofuel is impossible.

Energy security and climate change are the two major driving forces behind global biofuel development, both of which have the potential to boost the agro-industry. However, there are other issues with biofuel use, such as automotive engine compatibility in long-term operation and food security issues caused by biofuel production from food-grade oil-seeds.

Biofuels are renewable fuels that are primarily produced from domestic biomass feedstock or as a byproduct of agricultural or food processing. The most well-known biofuel sources for the transportation sector are bioethanol and biodiesel. Biofuel does not contain petroleum, but it can be blended with petroleum fuel in any proportion to create a biofuel blend. It can be used in standard heating equipment or diesel engines without requiring any major modifications.

Major benefits of biofuels as a form of renewable fuel include (Awogbemi, 2021):

- 1- *Biofuels are renewable energy source*
- 2- *Less green house gases emissions are generated from the utilization of biofuels compared to fossil fuels*

and a naphtha-like liquid which can be *steam cracked* to yield ethene, propene and buta-1,3-diene. As a result, biomass has the potential to provide a cost-effective and sustainable source of energy while also reducing greenhouse gas emissions.

2.

THERMOCHEMICAL CONVERSION OF SOLID BIOMASS

Wood and other forms of solid biomass are some of the main renewable energy resources available and provide the only source of renewable liquid gaseous and solid fuels.

Biomass is used to heat facilities, generate electricity, and power combined heat and power plants. Several methods exist for converting biomass into electricity. Direct combustion of biomass material, such as agricultural waste or woody materials, is the most common. Other methods include gasification, pyrolysis, and anaerobic digestion. Gasification generates usable energy by heating the biomass with less oxygen than is required for complete combustion. Pyrolysis generates bio-oil by rapidly heating biomass in the absence of oxygen.

Woody biomass such as wood chips, pellets, and sawdust are combusted or gasified to generate electricity. Corn stover and wheat straw residues are baled for combustion or converted into a gas using an anaerobic digester. All wood is made up of primarily Cellulose ($C_6 H_{10} O_5$), Hemicellulose (xylose, mannose, galactose, rhamnose, and arabinose) and Lignin ($C_9 H_{10} O_2$, $C_{10} H_{12} O_3$).

All typical wood contains around 50% carbon, 6% hydrogen, 44% oxygen and the remaining ash is inorganic. Compared to hardwoods, softwoods often have lower oxygen concentration and higher carbon content. When entirely burned, around 12% of the wood mass is transformed to carbon dioxide, and approximately 12% to water. For hardwoods, this method produces roughly 8600 Btu per pound (20 MJ/kg) of thermal energy and 9000 Btu per pound (21 MJ/kg) for softwoods.

The supercritical fluids can be used as reaction condition in the production of bio-oil mainly in the process of hydrothermal liquefaction of biomass as well as it can be used for the upgradation of biooil. The SCFs upgrading of bio-oil is also performed in the presence of catalyst and solvent such as ethanol, methanol, CO₂, and water.

When SCFs are performed with acid catalysts and alcohol, the process is known as supercritical bio-oil esterification. The SCFs upgrading method is used to increase the heating value and lower the viscosity of the bio-oil. Using the supercritical water upgrading method, Duan and Savage reported that the heating value of algal bio-oil was increased to 43 MJ/kg and the total acid number was reduced from 256 to 25.

However, Zhang investigated the esterification of biooil compounds in supercritical ethanol. It was reported that at supercritical condition, all carboxylic acid from the crude biooil transformed completely into esters.

Shafaghat recently discovered that combining HDO and a supercritical fluid system increases the heating value of bio-oil and improves the deoxygenation degree. The heating value of upgraded bio-oil increased from 12.61 MJ/kg to 24.17 MJ/kg, and the degree of bio-oil deoxygenation was greatest when methanol was used as SCFs.

BIODIESEL PRODUCTION

Biodiesel, also known as B100, is a mixture of fatty acid alkyl esters (FAMES) produced by transesterification of vegetable and animal fats with alcohols such as methanol, ethanol, or propanol using catalysts. Numerous vegetable oils such as peanut, corn, safflower, soybean, palm, etc. have been utilized to produce biodiesel. Also, biodiesel is formed from non-edible oils like mahua neem, karanja, and jatropha.

Biodiesel fuel has several advantages over petro-diesel fuel. These advantages are as follows.

1. *It is sustainable, available, and renewable*
2. *It can provide modest and nearly fuel for rural economies*
3. *There is little toxic waste generated during production*
4. *Biodiesel production is simpler than diesel production*
5. *The combustion efficiency of biodiesel is very high*
6. *The cetane number of biodiesel is higher (around 50) than that of diesel energy. The cetane number is a commonly used index for determining diesel energy superiority*
7. *Biodiesel is almost sulfurless and non-aromatic. Furthermore, biodiesel has much better lubricity than low-sulfur diesel fuel. A small amount of biodiesel additive (about 1%) is sufficient to significantly improve the lubricity of conventional diesel fuel*
8. *According to life cycle analysis, biodiesel emits less CO₂ than conventional fossil fuels. The use of biomass energy has the potential to significantly reduce greenhouse gas emissions, and thus biodiesel contributes significantly less to global warming than fossil fuels*

reactions are termed oxidative fermentation, and the only known GA producers investigated so far belong to the acetic acid bacteria family.

Habe et al. demonstrated that more than 100 g/L of GA can be produced by both *G. frateurii* and *A. tropicalis*, and the product can be easily concentrated. GA was previously known as a minor by-product of DHA production by *G. oxydans*, these results may provide a new application for surplus glycerol. It will be necessary to demonstrate the functionality of GA or its derivatives and increase its industrial output to add more value to GA

Succinic Acid:

Succinic acid is a dicarboxylic acid produced as an intermediate of the tricarboxylic acid cycle and also as one of the fermentation products of anaerobic metabolism. It is used for the manufacture of synthetic resins and biodegradable polymers.

Lee et al. reported the production of succinic acid by fermentation of glycerol using *Anaerobiospirillum succiniciproducens*. Cells were grown in sealed anaerobic bottles containing 100 mL minimal salts medium containing 5 g/L glucose, 2.5 g/L yeast extract and 5 g/L polypeptone with CO₂ as the gas phase.

They cultured cells in a medium containing 6.5 g/L glycerol to give a high yield of succinic acid thus avoiding the formation of acetic acid as by-product. The gram ratio of succinic acid to acetic acid obtained was 25.8:1 (Padhi, 2013). The consumption of glycerol was strongly dependent on the amount of yeast extract added to culture medium. When glucose and glycerol were co-fermented with the increasing ratio of glucose to glycerol, the succinic acid yield decreased, suggesting that glucose enhanced acetic acid formation irrespective of the presence of glycerol.

4.

BIOGAS PRODUCTION FROM AGRICULTURAL WASTES

The negative environmental effects of residues produced by the food and agricultural industries can be reduced by using biomass wastes as raw materials for manufacturing. Biofuel production is an alternative use for agricultural waste. Anaerobic digestion biogas is often recognized as the most cost effective and environmentally friendly biofuel. It is also critical that the feed for the biogas plants be made up of local rubbish. Anaerobic digestion can thus be employed to treat a potentially harmful organic complex waste while also creating valuable energy and fertilizer.

The basic concepts of anaerobic digestion and their application in the synthesis of methane from biomass, such as lignocellulosic biomass, food leftovers, and micro(macro) algae, will be presented in this chapter.

The anaerobic digestion is a biochemical conversion method in an oxygen free environment, which employs bacteria to digest the lignocellulosic biomasses, sewage sludge, animal excreta, food wastes, municipal solid waste, industrial wastes like pulp residues and even spent microalgae residues post oil extraction.

The biogas consists of several gases, the main ones being methane (CH_4), in the range of 60–70%, and carbon dioxide (CO_2), in about 30% in the mixture. Also, it includes a lesser extent hydrogen (0–1%), nitrogen (0–7%), oxygen (0–2%), hydrogen sulfide (0–3%) and ammonia (0–1%) gases. Classified as impurities, CO_2 , hydrogen sulfide and ammonia gases negatively interfere with the biogas quality when in high concentrations. Carbon dioxide, for example, lowers the calorific value of biogas, while H_2S causes corrosive to metallic materials of equipment used and unpleasant smell.

Mass flow rate of Mobiltherm:

$$M_{Y_{ag}} = (11.5 \text{ kJ/s}) / (2.09)(5) \\ = 1.1 \text{ kg/s}$$

Volumetric flow rate of Mobiltherm:

$$V_{Y_{ag}} = 1.1 / 850 \\ = 1.3 \times 10^{-3} \text{ m}^3/\text{s}$$

Note: As can be seen, the majority of the energy necessary to keep the reactor running is spent on heating the feed slurry. This issue is caused by the chilly temperature of the water used to make the slurry.

The liquid in the hot liquid-solid stream exiting the reactor can be used to solve this problem. As a result, a solid-liquid separation method, such as plate-frame pressure filtering or centrifugal dehydration, should be applied.

5.

ETHANOL PRODUCTION FROM BIOMASS

When compared to fossil fuels, ethanol is a more environmentally friendly fuel. It is a volatile, flammable, colorless liquid under air circumstances. The following table lists the key physical features of ethanol.

Property	Value
<i>Normal boiling point</i>	78.32 °C
<i>Critical temperature</i>	243.1 °C
<i>Density</i>	0.7893 g/mL
<i>Heat of combustion at 25°C</i>	29676.69 J/g
<i>Autoignition temperature</i>	793.0 °C
<i>Flammable limits in air</i>	
<i>Lower</i>	vol% 4.3
<i>Upper</i>	vol% 19.0

Ethanol is an important organic chemical found in consumer and industrial products. Ethanol is utilized in the pharmaceutical, plastics, polishers plasticisers, cosmetics, and chemical industries. Ethanol is important in fuel applications because it burns cleanly and reduces greenhouse gas emissions particularly carbon dioxide.

In a fixed bed reactor, phosphoric acid adsorbed on the surface of a solid (silica) is used as a catalyst in the direct catalytic hydration of ethene in the presence of steam. The exothermic process is reversible.

Since the reaction time is 25 hours, the released heat energy in kW becomes

$$Q = - 32.1 * 10^6 / (25)(3600)$$

$$= - 356.66 \text{ kW}$$

Because a jacket can remove 390 kW of energy in the enzymatic hydrolysis reactor, it can also be utilized in the fermenter. Coolant flow rate required

$$M_{\text{water}} = (357) / (4.18 * 3)$$

$$= 28.5 \text{ kg / s}$$

6.

HYDROGEN PRODUCTION FROM BIOMASS

Hydrogen is a critical chemical in the petrochemical and chemical industries. Hydrogen is used in the petroleum industry to remove sulfur as well as to upgrade heavy crude oil. Also, it is used in the chemical industry to produce chemicals such as ammonia, methanol, and hydrochloric acid, among others.

Hydrogen is the cleanest energy carrier and can be used in a wide range of energy applications, including electricity generation and transportation. Hydrogen fuel energy is expected to be the most widely used energy carrier in the future; many benefits have been investigated, including its use in transportation, long-term storage, and low environmental impact.

Because it can be used in fuel cells, hydrogen is expected to be an important energy carrier in the future. Fuel cells use less energy than internal combustion engines, have no moving parts, and emit no pollutant gases. The hydrogen economy remains the most important hydrogen production issue in order to reap the benefits of hydrogen fuel. As a result, renewable energy sources should be used to generate hydrogen at a low cost.

In general, there are three types of hydrogen production processes. Methods such as electrochemistry, biology, and thermochemistry are used. All of these methods can be implemented on a sustainable basis. In the case of electrochemical methods, electricity must then be generated using renewable energy sources.

At the moment, the primary source of hydrogen production is based on fossil fuels. The hydrogen production efficiency ranges from (65% to 75%) when using the steam reforming process of methane. Steam reforming is a highly endothermic reaction in which a hydrocarbon or alcohol reacts with water at

PRODUCTION OF METHANOL

Methanol, often known as methyl alcohol is one of the most crucial chemical raw materials. In the chemical industry, methanol is employed as a solvent or starting material for synthesis in around 65% of cases. The remaining portion is used for energy and fuel. The formaldehyde industry uses the most of it followed by the acetic acid industry.

Methanol is a liquid with relatively high polarity and medium vapor pressure at room temperature. It is colorless and can be used as a standard organic solvent, dissolving substances with high and medium polarity. It is miscible with water, alcohols, and various organic solvents, as well as, to a lesser extent, oils and fats. It is a well-known chemical, and detailed information about its chemical properties can be found in the literature. Table displays a selection of the key physical data (Ullmann's Encyclopedia)

methanol, ethanol, higher alcohols, other oxygen containing organic compounds, and varying amounts of paraffins are present.

Organic substances that are water soluble degrade quickly biologically. The insoluble substances can be safely incinerated in a standard waste incineration unit. This residual water is sometimes subjected to additional distillative purification. The resulting mixture of alcohols, esters, ketones, and aliphatics can be added to carburetor fuel in small amounts.

The spent catalysts contain auxiliary agents and supports, as well as active components such as copper, nickel, cobalt and molybdenum. These metals are typically recovered or used in other ways.

The spent catalysts contain auxiliary agents and supports, as well as active components such as copper, nickel, cobalt and molybdenum. These metals are typically recovered or used in other ways.

MAKİNE ÖĞRENMESİ NEDİR?

Serkan Savaş, Selim Buyrukoğlu

ÖZET

Bu bölümde, makine öğrenmesi ile alakalı genel bilgilere yer verilmiştir. İlk olarak, denetimli öğrenmenin ne olduğu ve hangi amaçla kullanıldığı açıklanmıştır. Sonrasında, denetimli öğrenme algoritmaları tekil ve topluluk öğrenme algoritmaları olarak iki farklı bölümde anlatılmıştır. Topluluk öğrenme algoritmaları olarak torbalama ve artırma algoritmalarının çalışma prensibinden bahsedilmiştir. Denetimli öğrenmeden sonra denetimsiz öğrenmenin çalışma prensibi anlatılmış ve bu sınıfa ait algoritmalar listelenmiştir. Son olarak, temel Python kütüphaneleri ve komutlarından bahsedilmiştir.

Anahtar Kelimeler: Makine Öğrenmesi, Torbalama, Artırma, Python kütüphaneleri

WHAT IS MACHINE LEARNING?

ABSTRACT

In this section, general information about machine learning is given. Initially, the meaning of supervised learning and the purpose of using it is explained. Afterward, supervised learning algorithms are explained in two different sections as single-based and ensemble-based learning algorithms. The working principle of bagging and boosting algorithms as ensemble learning algorithms is mentioned. After the supervised learning, the working principle of unsupervised learning is explained and the algorithms belonging to this class are listed. Finally, basic Python libraries and commands are mentioned.

Keywords: Machine Learning, Bagging, Boosting, Python Libraries

Günümüzde farklı problemler için farklı algoritmalar kullanılmaktadır. Algoritmalar tekil olarak kullanılabilirken, çoklu öğrenme algoritmalarını kullanım da gün geçtikçe yaygınlaşmaktadır.

Son yıllarda makine öğrenmesi algoritmalarının elde etmiş oldukları yüksek doğruluklu başarımlar sayesinde tüm disiplinlerin bu algoritmalara ve tekniklere olan ilgileri katlanarak artmıştır. Hemen hemen tüm alanlarda çok disiplinli çalışmalar gerçekleştirilirken, makine öğrenmesi algoritmalarının kullanımı çok geniş bir yelpazeye yayılmış durumdadır. Bu bölümde makine öğrenmesi ile ilgili temel bilgiler verilmiş olup kitabın ilerleyen bölümlerinde algoritmalar örneklerle birlikte açıklanmıştır.

2. BÖLÜM

DOĞRUSAL REGRESYON MODELİ

Yıldıran Yılmaz

ÖZET

Bu bölüm, farklı boyutlara sahip şifrelenmiş verilerin TCP protokolü üzerinde gönderilirken iletim süresini tahmin eden doğrusal regresyon modelini kullanmaktadır. Bu doğrultuda konunun daha iyi anlaşılabilmesi için doğrusal regresyonun temelleri açıklanmakta ve Python programlama dilindeki uygulaması yapılmaktadır. Regresyon analizi, makine öğrenimindeki en önemli ve en yaygın alanlardan biridir. Doğrusal regresyon, belirli bir bağımsız değişken seti ile bağımlı bir değişken arasındaki ilişkileri modellemek için kullanılan istatistiksel bir makine öğrenmesi yöntemidir. Kullanılan veri seti, Cooja ağ simülatöründe oluşturulan, farklı boyutlarda şifrelenmiş verilerin TCP protokolünde aktarım sırasındaki iletim süreleri içermektedir. Sonuç olarak şifreleme yoluyla güvence altına alınan farklı veri boyutları için iletim süreleri değişkenindeki değişimin doğrusal regresyon modeli ile %98'inin girdi değişkenleri tarafından açıklanabildiği ortaya çıkmıştır. Deneysel sonuçlar R-squared değerinin 0.98 olduğunu göstermektedir ve buna göre doğrusal regresyon modelinin gözlemlenen verileri ne kadar iyi açıkladığı anlaşılmaktadır.

Anahtar Kelimeler: Makine öğrenmesi, Doğrusal Regresyon modeli, İletim süresi tahmini, TCP/IP packet, IPsec network.

4. BÖLÜM

NAIVE BAYES SINIFLANDIRICISI

Serkan Savaş

ÖZET

Naïve Bayes (NB) sınıflandırıcısı, matematikçi Thomas Bayes'in olasılık kuramı için önemli bir teorem olan Bayes Teoremi'nden adını almaktadır. Sınıflandırıcı, bir öznitelik değerinin belirli bir sınıf üzerindeki etkisinin diğer özniteliklerin değerlerinden bağımsız olduğunu varsayar. Bu varsayım, hesaplamaları basitleştirmek için kullanılır ve sınıf koşullu bağımsızlık adını alır. Gauss, çok terimli, Bernoulli, tamamlayıcı, kategorik gibi türleri olan NB sınıflandırıcısı, doğal dil işleme, sağlık sistemleri, ticaret, endüstri, siber güvenlik, vb. gibi pek çok alanda başarılı bir şekilde kullanılmaktadır. Bu nedenle kitabın bu bölümünde NB sınıflandırıcısı tüm yönleriyle ele alınmış ve Iris veri kümesi üzerinde bir uygulama gerçekleştirilerek sonuçları açıklanmıştır. Çalışmada gerçekleştirilen uygulama adımları izlenerek farklı veri kümeleri üzerinde işlemler yapılabilir. Başarılı sonuçları nedeniyle tekil olarak uygulamalarda kullanılabilir ve/veya farklı makine öğrenmesi algoritmalarıyla karşılaştırmalı çalışmalar da gerçekleştirilebilir.

Anahtar Kelimeler: Naive Bayes, Makine Öğrenmesi, Gauss Naive Bayes, Bayes Teoremi

NAIVE BAYES CLASSIFIER

ABSTRACT

The Naïve Bayes (NB) classifier is named after the Bayes Theorem, an important theorem for mathematician Thomas Bayes' theory of probability. The classifier assumes that the effect of an attribute value on a given class is independent of the values of other attributes. This assumption is used to simplify calculations and is called class conditional independence. The NB classifier, which has types such as Gauss, polynomial, Bernoulli, complementary, and categorical, has been used

nin önemine değinmiştir. NB sınıflandırıcısı adını Thomas Bayes'ten almış ve sınıf koşullu bağımsızlık varsayımı nedeniyle de naif (saf) olarak adlandırılmıştır. Olasılık tabanlı çalışan bu sınıflandırıcının farklı problemler için uyarlanmış türleri vardır. Örneğin ikili sınıflandırma işlemleri için Bernoulli NB kullanılabilirken, çok sınıflı çalışmalarda Gauss NB kullanılabilir.

Nicel ve ayrık verileri yönetme, izole gürültülere dayanıklılık, hız, verimlilik, performans, kolay uygulanabilirlik, ikili veya çok sınıflı verilere uyarlanabilirlik gibi pek çok avantajı bulunan NB sınıflandırıcısının, sıfır frekans problemi ve bağımsızlık varsayımı gibi sınırlılıkları da bulunmaktadır. Ancak avantajları, dezavantajlarına nazaran daha fazla olan NB sınıflandırıcısı farklı pek çok probleme uyarlanabilir ve başarılı sonuçlar elde edilebilir.

Bu bölümde NB sınıflandırıcı için global bir veri kümesi (Iris) üzerinde uygulama gerçekleştirilmiş ve adım adım sonuçları açıklanmıştır. Farklı global veri kümeleri veya özel veri kümeleri de kullanılarak benzer çalışmalar gerçekleştirilebilir.

DESTEK VEKTÖR MAKİNESİ

Rukiye Karakış

ÖZET

Destek Vektör Makinesi (DVM), sınıflandırma ve regresyon problemlerinde kullanılan verileri denetimli analiz eden bir Makine Öğrenimi (Machine Learning: ML) modelidir. İki sınıflı etiketli bir verisetindeki örnekleri kategorize etmek için geliştirilen herhangi bir doğrusal sınıflandırıcı, en çok karar sınırına yakın örnekleri ayırt etmekte zorlanmaktadır. Vapnik ve arkadaşları tarafından geliştirilen DVM, bu problemi çözerken tüm örnekler için sınıflar arasındaki mesafeyi maksimize edecek optimum bir karar sınırı bulmaya çalışmaktadır. Bu sebeple, eğitim kümesindeki her bir örnek, kategoriler arasındaki boşlukları maksimize etmek için uzaydaki noktalara eşlenmektedir. Yeni bir örnek geldiğinde ise önce bu öznelik uzayına eşlenmektedir ve ardından karar sınırına göre hangi kategoriye ait olduğu tahmin edilmektedir. Kitabın bu bölümünde, tıpta, biyolojide, doğal dil işlemede, tek boyutlu ya da çok boyutlu ses, görüntü, video gibi sinyallerin ve zaman serilerinin analizinde başarılı sonuçlar elde eden DVM'in teorik detayları aktarılmıştır. Ayrıca, son yıllarda pek çok problemin çözümünde başarılı sonuçlar elde eden bir ML yaklaşımı olan evrişimsel sinir ağı (ESA) modeli ile DVM tekniğinin hibrit olarak birleştirildiği bir uygulama okuyuculara aktarılmıştır.

Anahtar Kelimeler: Destek Vektör Makinesi, Makine Öğrenmesi, Öznelik Çıkarımı, Hibrit Sınıflandırma

doğru öznitelik analizleri ve boyut indirme operasyonları sonrasında DVM performans sonuçları iyileşebilir. Hiperparametre ya da kernel seçimi adımları optimizasyon teknikleri ile belirlenebilir.

Son yıllardaki araştırmalarda, veri kümesinin öznitelik seçim işlemleri derin öğrenme modelleri ile gerçekleştirilmektedir ve ardından bu modellerden elde edilen özniteliklerle DVM modeli eğitilmektedir. Sonuç olarak, hibrit yaklaşımların kullanımı sınıflandırma performansını artırıcı etkiye sahiptir.

KARAR AĞAÇLARI

İhsan Tuğal

ÖZET

Ağaca benzer modeliyle sınıflandırma ve regresyon problemlerinin çözümüne destek sağlayan yapılar karar ağaçlarıdır. Tahmin veya sınıflandırma için verideki hangi niteliklerin daha önemli olduğuna dair net bir gösterge sağlar. Karar süreçlerinde karmaşık verileri daha anlaşılabilir parçalara ayırdığı, makine öğrenmesi problemlerine çözüm ürettiği için çok kullanışlıdır. Bu yüzden makine öğrenmesinde kullanımı oldukça fazladır. Bu bölümde karar ağaçları anlaşılır bir şekilde anlatılmaya çalışıldı. Karar ağaçlarının önemi, nasıl oluşturulduğu, kullanılan farklı algoritmaları, avantaj ve dezavantajlarından bahsedildi. Örnek veri ile karar ağacı oluşturmak için hesaplamaların nasıl yapıldığı gösterildi. Python dilinde uygulama geliştirilerek verisetinden karar ağacı oluşturularak, sınıflandırma yapıldı.

Anahtar Kelimeler: Karar Ağaçları, Sınıflandırma, Makine Öğrenmesi, Denetimli Öğrenme, Bilgi Kazancı

DECISION TREES

ABSTRACT

Decision trees are the structures that support the solution of classification and regression problems with a tree-like model. It provides a clear indication of which attributes in the data are more important for prediction or classification. It is very useful in decision processes as it divides complex data into more understandable parts and provides solutions to machine learning problems. Therefore, it is widely used in machine learning. In this section, decision trees have been tried to be explained in an understandable way. The importance of decision trees, how they are created, the different algorithms they use, their advantages and disadvantages are mentioned. It was shown how the calculations were made to create a decision tree with sample data. An application was developed in Python and a decision tree was created from the dataset, and classification was made.

Keywords: Decision Trees, Classification, Machine Learning, Supervised Learning, Information Gain

RASTGELE ORMAN

Ayşe Doğru

ÖZET

Gelişen teknoloji ile beraber hızla ilerleme kaydeden makine öğrenmesi algoritmaları gündelik hayatımızda da yerini almaya başlamıştır. Başta medikal, eğitim, finans-bankacılık, e-ticaret, spor, arazi tanımlama ve adli vakalar gibi pekçok farklı disiplin alanlarında sorunların çözülmesini hızlandırıp hem maliyetten hem de zamandan tasarruf etmemize olanak tanımaktadır. Rastgele Orman algoritması birden fazla karar ağacının biraraya gelerek tahminde bulunduğu bir algoritmadır. Bireysel bir model olmayıp toplu tahmin sonuçlarını birleştirip karar veren bir yöntemdir. Büyük ve karmaşık veri setlerinde elde ettiği başarıları, anlaşılır ve esnek olması sayesinde yaygın olarak kullanılan bir model hâline getirmiştir. Ayrıca sürekli ve kategorik tipli veri setlerinde, dengesiz veri setlerinde de oldukça duyarlıdır. Tahmine dayalı problem çözümünde veri bilimciler arasında oldukça popüler bir algoritmadır. Bu çalışmada Rastgele Orman algoritmasının tarihçesi, hiper-parametre ayarları, çalışma modeli, kullanım alanları ve örnek uygulamalar ile genel bilgiler verilmektedir.

Anahtar Kelimeler: Rastgele Orman, Karar Ağaçları, Makine Öğrenmesi, Topluluk Öğrenmesi, Regresyon, Sınıflandırma

Şekil 3: Regresyon Problemi Sonuç Tahmini Grafiksel Gösterimi-2

5. SONUÇ

Geleneksel yöntemlerle saptanması zor olan veri ilişkilerinin tespit edilip, yorumlanması ve anlamlı sonuçlar çıkarılması makine öğrenmesi algoritmalarının daha çok tercih edilmesini sağlamıştır. RO makine öğrenmesi algoritması, sınıflandırma ve regresyon problemlerinden elde edilen doğruluk tahmin performansları incelendiğinde en başarılı yöntemler arasında bulunmaktadır. Çeşitli disiplin alanlarına hitap etmesi sebebiyle birçok veri bilimcinin ilgisini çekebilmiştir. Aşırı uydurma sorunun en aza indirgenmesi, varyansın azalması ve artan doğruluk tahmini değeri algoritmayı popüler hâle getirmiştir. Modelin tahmin performansını arttırmak için hiper-parametre ayarlarının yapılması önemli rol oynamaktadır.

ADABOOST ALGORİTMASI

Osman Güler

ÖZET

Bir topluluk öğrenme modeli olan AdaBoost algoritması, Yoav Freund ve Robert Schapire, tarafından sınıflandırma problemlerinde daha düşük hata oranı elde etmek ve sınıflandırma modelinin başarımının artırılması amacıyla önerilmiştir. Zayıf öğrenciler üzerine odaklanan AdaBoost algoritması, doğru sınıflandırılmayan zayıf öğrencilerin ağırlıklarını artırarak daha güçlü bir tahmin modeli elde etmektedir. AdaBoost algoritması sağlık alanı başta olmak üzere finans, karar destek sistemleri, tahmin sistemleri, siber güvenlik, optik karakter tarama vb. birçok alanda sınıflandırma problemlerinin çözümünde yaygın olarak kullanılmaktadır. Kitabın bu bölümünde AdaBoost algoritması, çalışma prensibi, avantajları ve dezavantajları ile kullanım alanları ele alınmış olup, örnek bir veri seti üzerinden bir sınıflandırma uygulaması ve algoritmanın modellenmesi açıklanmıştır. Başarılı sonuçlar elde eden AdaBoost algoritması, farklı modeller ile birleştirilebilir. Ayrıca farklı veri setleri üzerinde de uygulamalar yapılabilir.

Anahtar Kelimeler: AdaBoost, Boosting, Topluluk Öğrenmesi, Yapay Zekâ, Makine Öğrenmesi

AdaBoost algoritması, özellikle ikili sınıflandırma problemlerinde etkili sonuçlar elde etmektedir. AdaBoost algoritması yapısı gereğiyle aşırı öğrenmeye karşı duyarlıdır, veri ve sonuç ezberleme oranı düşüktür. Esnek bir yapıya sahip olduğu için diğer modeller ile uyum sağlayabilir. Aynı zamanda kullanım kolaylığı ve parametre değişimi açısından diğer modellere göre avantajlıdır. Bu avantajları sayesinde yaygın olarak kullanılmaktadır. Avantajlarının yanında AdaBoost algoritmasının hassas olduğu noktalar da vardır. Başarılı sonuçlar elde etmek için, büyük ve kaliteli bir verisetine ihtiyaç duymaktadır. Verisetinde aykırı değerlerden ve gürültülü verilerden kaçınılmalıdır.

Bu bölümde AdaBoost algoritması ile scikit-learn kütüphanesinde bulunan Iris veri seti kullanılarak pythonda model oluşturulması ve eğitimi üzerine bir uygulama gerçekleştirilmiştir. Yapılan denemeler sonucunda %91.11 ile %97.77 arasında test doğruluk sonuçları elde edilmiştir. Farklı verisetleri kullanılarak, AdaBoost algoritması farklı modeller ile kullanılarak farklı alanlarda yeni çalışmalar gerçekleştirilebilir.

AŞIRI GRADYAN ARTIRMA

Selim Buyrukoğlu

ÖZET

Extreme Gradient Boosting (XGBoost) algoritması Tianqi Chen ve Carlos Guestrin tarafından geliştirilmiştir (Chen & Guestrin, 2016). XGBoost algoritması hem sınıflandırma hemde regresyon problemleri için aktif olarak kullanılmaktadır. XGBoost algoritması en etkili topluluk öğrenme algoritması olarak kabul edilmektedir. XGBoost algoritması sağlık, çevre, tarım, eğitim, finans, spor vb. gibi birçok alanda aktif olarak kullanılmaktadır. Bu bölümde iki farklı XGBoost algoritması regresyon ve sınıflandırma problemlerinin çözümü için ayrı ayrı oluşturulmuştur. Regresyon problem çözümü için bir hava yoluna ait veri seti kullanılmıştır. Sonrasında, tek yönlü uçak bilet fiyatları tahmin edilmiştir. Sınıflandırma problemi için bir diyabet veri seti üzerinde uygulama gerçekleştirilip XGBoost algoritmasının sonucu açıklanmıştır. Sonuç olarak, XGBoost algoritmasının hem regresyon hemde sınıflandırma problemleri için aktif olarak kullanıldığı bu bölümde uygulamalı olarak anlatılmıştır. Farklı veri setleri kullanılarak XGBoost algoritmasını etkisi çeşitli alanlar içinde test edilebilir.

Anahtar Kelimeler: XGBoost, Gradient Boosting, Topluluk Öğrenmesi, Makine Öğrenmesi

zenli hâli olduğundan dolayı ilk olarak Gradient Boosting algoritması açıklanmıştır. Sonrasında, XGBoost algoritması kullanılarak iki farklı uygulama gerçekleştirilip her bir adım ayrı ayrı açıklanmıştır. Birinci uygulama regresyon problemi için gerçekleştirilirken ikinci uygulama sınıflandırma problemi için gerçekleştirilmiştir.

Regresyon problemi için bir hava yoluna ait veri kullanılmıştır ve tek yönlü uçak bilet fiyatları tahmin edilmiştir. Sınıflandırma problemi için ise diyabet hastalığı veri seti kullanılıp bir hastanın diyabet olup olmadığı tahmin edilmiştir. Farklı birçok veri seti kullanılarak XGBoost algoritmasının performansı regresyon ve sınıflandırma problemleri için elde edilebilir.

K-ORTALAMA KÜMELEME

Mohammed Rashad Baker

ÖZET

K-ortalama kümeleme tekniđi, bilim dünyasında en etkili ve yaygın olarak kullanılan veri madenciliđi algoritmalarından biri olarak kabul edilmektedir. Bununla birlikte, yutturmacaya rađmen, algoritmanın, beklenmedik yakınsama ile sonuçlanan merkezlerin rastgele başlatılmasıyla ilgili sorunlar gibi sınırlamaları vardır. Ek olarak, böyle bir kümeleme prosedürü, farklı kümelenmelerden sorumlu kümelerin sayısının bir aykırı deđer etkilerinden önceden belirlenmesini gerektirir. K-araç yönteminin bir dizi veri türünü işleyebilmesi, temel bir kusurdur. Bu bölüm, bu eksiklikleri gidermek için k-ortalama algoritması üzerinde yapılan arařtırmaların sistematik ve özlü bir özetini sunar. K-ortalama algoritmalarının gerekçeleri ve son gelişmeleri incelenmekte ve birçok veri setinin ampirik incelemesine dayalı olarak etkinlikleri arařtırılmaktadır. Bu bölüm, ayrıntılı analiz ve çeřitli k-ortalama kümeleme algoritmalarının tam bir karşılařtırmasını kullanan diđer erişilebilir anket çalışmalarıyla karşılařtırılır. Ayrıca, k-araç yönteminin ve çeřitli arařtırma uygulamalarının açık ve kapsamlı bir şekilde anlaşılmasının kısa bir özetini sağlar.

Anahtar Kelimeler: Kümeleme, K-Ortalama Kümeleme, Kategorik Nitelikler, Denetimsiz Öğrenme

Şekil 11: 3D grafik çıktısı

3. SONUÇ

Çok çeşitli uygulama etki alanlarında, veri analizi görevleri ağırlıklı olarak kümelemeye dayanır. Bu bölümde, popüler k-ortalama algoritması ile modeli başlatma ve verileri işleyememe sorunlarına odaklanıldı. Ayrıca k-ortalama kümeleme algoritmasının farklı varyantlarının performansları da gösterilmiştir. K-ortalama kümeleme algoritmasının belirgin güçlü yönlerinden biri, özelliğin sadece kümenin kendisi değil, küme üzerinden de ortalama bir değer vermesidir. Bu durum, segmentasyonla ilgili görüntü işleme görevlerinde, kümeleme sorunu olarak segmentasyonla uğraşırken çok yararlı olabilir. Son olarak bu bölüm aynı zamanda veri madenciliği araştırma topluluğunun Büyük Veri etrafındaki araştırma konularını ele alabilecek yeni tür kümeleme algoritmaları tasarlamasına ve geliştirmesine yardımcı olacaktır (Ahmed, 2019; Wang ve Garibaldi, 2005).

K-EN YAKIN KOMŞU ALGORİTMASI

Resul Bütüner, M. Hanefi Calp

ÖZET

K-En Yakın Komşu (K-Nearest Neighbor - KNN) algoritması, T. M. Cover ve P. E. Hart tarafından 1967 yılında önerilmiş olup örüntü tabanlı öğrenme veya tembel öğrenme türüdür. Bu algoritmada sınıfları belirlenmiş bir veri kümesindeki verilerden yararlanılmaktadır. Ayrıca tüm makine öğrenmesi yöntemleri içinde en basit yapıya sahip algoritmalardan biridir. KNN algoritmasının işlevi sadece yerel olarak yaklaştırılır ve tüm hesaplama, sınıflandırmaya kadar ertelenir. Ayrıca KNN, eğitim, doğal dil işleme, sağlık sistemleri, askeri, ticaret, endüstri, siber güvenlik, vb. gibi pek çok alanda başarılı bir şekilde kullanılmaktadır. Bu bağlamda, kitabın bu bölümünde KNN algoritması birçok yönüyle ele alınmış, COVID-19'a ait gerçek bir veri kümesi kullanılarak bir uygulama gerçekleştirilmiş ve elde edilen sonuçlar açıklanmıştır. Uygulamada bir bireyin COVID-19 virüsü taşıyıp taşımadığı tahmin edilmiştir. KNN algoritmasından elde edilen başarılı sonuçlar irdelendiğinde, söz konusu algoritma tek başına ve/veya farklı makine öğrenmesi algoritmalarıyla birlikte hibrit bir şekilde karşılaştırmalı olarak kullanılabilir. Elde edilen başarılı sonuçlar ile KNN algoritması ve farklı veri kümeleri kullanılarak, yeni çalışmalar yapılmasına örnek teşkil etmesi beklenmektedir.

TEMEL BİLEŞENLER ANALİZİ

Gonca Buyrukođlu

ÖZET

Bu bölüm Parkinson hastalığında büyük boyutlu veri analizi için temel bileşenler analizi (principal component analysis, PCA) kullanımını tartışmaktadır. PCA boyut indirgeme metotları ailesindedir ve özellikle veri çok değişkenli, büyük (her bir değişken için birden fazla gözlem varsa) ve değişkenler birbirleriyle büyük oranla ilişkiliyse oldukça faydalı bir yöntemdir. Amaç, orijinal veri setini temsil edebilecek nitelikte daha küçük boyutlu veri altkümesinde minimum bilgi kaybı ile bir indirgenmiş değişkenler kümesi belirleyebilmektir. PCA ve diğer boyut indirgeme metotları veriyi özetlemeyi ve kişisel farklılıklar hakkında bilgi çekmeyi sağlar. Bu da boyut indirgeme metodlarını bireysel tedavi ve büyük veri çağında oldukça kullanışlı metotlar yapar. Bu bölümde PCA genel yapısından bahsedilerek, bir uygulama veri setinin nasıl analiz edildiği gösterilmiştir.

Anahtar Kelimeler: Parkinson hastalığı, PPMI verisi, gözetimsiz öğrenme, büyük veri, temel bileşenler analizi

yı artan veri setlerinde ölçeklendirilebilmektedir. Ana bileşenler analizi ölçeklendirilebilme ve büyük boyutlu ve karmaşık verileri temsil edebilme yeteneği açısından büyük veri çağında hâlâ popüler bir yöntem olarak yerini korumaya devam etmesi beklenmektedir.

DOĞRUSAL OLMAYAN SİSTEMLERDE VERİ TAHMİN YÖNTEMLERİ ve ÖRNEK UYGULAMA

Nihat Daldal

ÖZET

Elektronik kontrol sistemlerinde, sistemi işleten ana işlemci sensörlerden okuduğu verileri değerlendirerek istenilen kontrolü gerçekleştirir. Bu sistemlerde sensörler ölçtüğü büyüklüğe göre doğrusal değişimli bir sinyal üretiyorsa basit bir doğrusal denklem ile sensör sinyalinden ölçtüğü büyüklüğün değeri kolayca öğrenilir ve bu değer durumuna göre istenilen kontrol gerçekleştirilebilir. Ancak sensör doğrusal değilse bu durumda sensörün ölçtüğü fiziksel büyüklüğe göre ürettiği sinyal basit bir matematiksel doğrusal denklem ile modellenemez. Şayet doğrusal denklem ile modellenirse sinyale göre ölçülen büyüklüğün değerinin tahmininde hatalar meydana gelir ve elektronik kontrol sisteminin çalışmasında olumsuz etki oluşturur. Kontrol sisteminin yanlış çalışmasına sebebiyet verebilir. Bu bölümde doğrusal olmayan sensörlerde ölçtüğü büyüklüğün hatasız tahmin edilmesi için polinom yöntemi, eğri uydurma ve yapay sinir ağı ile tahmin modelleri örnek bir uygulama üzerinden anlatılmıştır. Bu yöntemler ile tahmin değerinin minimum hata ile yapılması verilerin sayısına bağlıdır ve veri sayısı arttıkça doğruluk artar. Yapılan bu çalışma gömülü yazılım ile uğraşan mühendisler için örnek bir başvuru kaynağı niteliğindedir.

Anahtar Kelimeler: Sensör Okuma, Veri Tahmini, Polinom Denklemi, YSA, Yapay Zekâ

4. SONUÇ

Bu yazıda, elektronik mühendisliği ve gömülü yazılımda elektronik kontrol devrelerinde doğrusal olmayan sensörlerden veri okunup sensörün ölçtüğü büyüklüğün yüksek doğrulukta tahmin edilebilmesi için kullanılan yöntemlerden bahsedilmiş ve örnek bir PTC sensöründen alınan ölçümlere göre sıcaklık değeri tahmin edilmiştir. YSA ile tahmin modeli veya polinom denklemi ve eğri uydurma ile elde edilen denklem yapılarının tahmin doğruluğu uygulamalarda veri çeşidine göre farklılık göstermekle birlikte, tasarımcı elektronik sistemde kullandığı işlemci özelliğine bağlı olarak en uygun yöntemi kullanarak sensör okumayı yüksek doğrulukta gerçekleştirebilir.

ANADOLU MUTFAK KÜLTÜRÜ

Adem Ademođlu

GİRİŞ

İnsanlar, yaşamının devamını sağlayabilmesi için beslenmek/yemek yemek durumdadır. Bu fiziksel ihtiyacın karşılanmasında toplumların kültürel birikimleri, içinde buldukları coğrafya, iklim, tarımsal ürünler, ekonomik yapı gibi unsurlar etkili olmaktadır. Türkler uzun yıllar birbirinden farklı milletlerle komşuluk yaparak iç içe yaşamış ve Orta Asya'da sahip oldukları zengin gelenekleri Anadolu'ya getirerek bu coğrafyada yer alan zenginliklerle harmanlamıştır. Daha açık bir ifade ile Türkler yerleştikleri coğrafyada yer alan kültürlerden hem etkilenmiş hem de sahip oldukları zenginliği bu topraklara taşımıştır. Söz konusu bu kültürel değerlerin en başında yer alan yeme içme kültürü ise yaşamsal önem arz etmektedir (Güler, 2010). Orta Asya'nın sert ve kurak ikliminde o yöreye uygun beslenme alışkanlığı edinirken Anadolu topraklarına yapılan göçlerle birlikte birbirinden farklı ve zengin bölgelere sahip bu coğrafyada da en uygun beslenmeyi benimsemiştir. Anadolu yemek kültürünün gelişiminde oldukça önemli rol oynayan bu toplum, olağanüstü güzelliklerin yer aldığı bu kadim coğrafyada sahip olduğu bu eşsiz değerleri çok daha üst seviyelere taşımıştır. Dahası İpek Yolu ve Baharat Yolu'nun bu coğrafyadan geçiyor olması (Harita 1) farklı yiyeceklerin ülkeye getirilmesi ve baharatlarla lezzetlendirilmesi sayesinde mutfakın zenginleşmesini sağlamıştır.

Anadolu, tarımsal faaliyetlerin başlangıç noktası olması ve yerleşik yaşamın bu kadim coğrafyada yer almasının yanı sıra birbirinden farklı kültürlere ev sahipliği yapması âdeta hazine niteliğinde bir değerdir. Türk toplumunu belirtilen bu özelliklerin yanında sahip olduğu eşsiz değerler arasında ilk kent planı ve ilk tarım

eğitim merkezlerinde Türk kültürüne özgü değerlerin aktarıldığı kurslarla desteklenmesi toplumun farkındalığını artıracaktır.

İKİNCİ BÖLÜM

AZERBAYCAN MUTFAK KÜLTÜRÜ

Duygu Kırmızıkuşak

GİRİŞ

Türk kavminin ilk kez 4000 sene önce savaşçı ve göçebe bir kültüre sahip şekilde yeryüzünde bulunduğu yazıtlarda yazmaktadır. MÖ 1700 yılları sonrasında kitleler hâlinde Altay Dağları ile Tanrı Dağları arasındaki bölgeye yayıldıkları bilinmektedir. Türkler Orta Asya'daki bozkır arazilerinin elverişsizliği nedeni ile boylar hâlinde göçmüştür. Bu sebeple Orta Asya Türk mutfak kültürünün genel olarak kurutulmuş gıdalara (tarhana, pastırma, kurut) dayandığı bilinmektedir (Bedirhan, 2019: 190-196).

Türkler at, keçi, geyik, deve, koyun gibi hayvanların etinden, sütünden ve derisinden yararlanmışlardır. At, Orta Asya Türklerinde çok önemli bir semboldür. Öyle ki araç veya binek rolü ile birlikte etinden ve sütünden de yararlandığı görülmüştür. Türk devletlerinde süt ürünlerinin özellikle kırmızın öneminin büyük olduğu anlaşılmaktadır. Eski Türk toplumlarında bayramlar düzenlenmiş, Türk edebiyatına konu olmuştur. Türklerin İslamiyet'i kabulü, kırmızın helalliği konusunda belirsizliğe sebep olmuştur. Bu anlamda İslamiyet'i kabul eden Türkler için kırmızın eski önemini yitirdiği söylenebilmektedir. Kırmız yerine diğer bir süt ürünü olan ayranın belirgin olarak ön plana çıktığı görülmektedir (Yalınel, 2021).

İslamiyet öncesi Türk devletleri Çin'e canlı hayvan, yün, yağ, bal, elbise ve zırh ihraç etmekteydi. Türk devletlerinin kendi aralarında da ticaret yürüttüğü bilinmektedir. Dönemin en seçkin ve değerli eti, Oğuzlardan ithal edilen koyun eti idi (Bedirhan, 2019: 190-196). Orta Asya'dan günümüze kadar geçen zaman diliminde Türk mutfağı çeşitli ülkelerin ve kültürlerin içinde olgunlaşarak bugünkü hâline gelmiştir (Demirgöl, 2018):

yaşandığı söylenebilmektedir. Orta Asya'dan günümüze kadar gelen süreçte Türk mutfağının farklı coğrafyalarda çok az değişikliklerle yaşadığı görülmüştür. Bu alanda yapılacak karşılaştırmalı çalışmaların alan yazına katkı sağlayacağı ileri sürülmektedir.

ÜÇÜNCÜ BÖLÜM

DOĞU TÜRKİSTAN MUTFAK KÜLTÜRÜ

Hasan Önal Şeyhanlıođlu

GİRİŞ

Türkler, göçebe bir yaşam tarzını benimsemeleri ile mutfak kültürünün gelişimini sağlamışlardır. Orta Asya’da bulunan Türklerin bu yaşam tarzlarından dolayı tarımsal faaliyetlerle ilişkileri sınırlı olmuştur ve Orta Asya Türkleri hayvancılıkla daha kapsamlı faaliyetlerde bulunmuşlardır. Bu nedenle yapımı, stoklanması ve tüketimi kolay olan yemekler tercih edilmiştir (Çakar ve Erol, 2022). Türklerin yaşadıkları bölge ve coğrafya ile beslenmelerinin yakından ilişkili olduğu bilinmektedir. Bu nedenle hüküm sürülen bölgede hayvancılığın etkin olmasıyla etçil bir tüketim hâkim olmuştur (Demirgöl, 2018).

Türk tarihinde gelmiş geçmiş birçok devlet yer almıştır. Her biri de mutfak kültürüne önemli katkılar sunmuşlardır. Bu katkı sunanlardan biri de Uygur Türkleridir. Günümüzde Çin Halk Cumhuriyeti sınırları içinde yer alan ve İpek Yolu’nun geçiş noktasında olan toplam yüz ölçümü yaklaşık 1 milyon 660 bin km² olan Sincan Uygur Özerk Bölgesi, Çin’in yüz ölçümü bakımından en büyük olan eyalet seviyesindeki idari bölgesidir (Mollayakub, 2019). Sincan Uygur Özerk Bölgesi’nin sekiz ilke ile sınırı yer almaktadır.

Doğu Türkistan yemekleri kalori olarak yüksek ve doyurucu olarak tüketilmektedir. Bölge ikliminin yapısından kaynaklı olarak hayvancılık da bölgede gelişmiştir. Böylece et tüketiminin yüksek olduğu da bilinmektedir. Orta Asya kültüründen kaynaklı olarak tüketim hızlı olmaktadır. Sofrada tüketim yapıldıktan sonra sofraya toplanmaktadır. Kendine has tüketimi olan bu bölgede sokak lezzetleri de ön plandadır. Özellikle kavap (kebab) bu noktada tüketilen ve halkta tevecüh gören bir üründür. Bundan dolayı başta Urumçi ve Kaşgar illeri başta olmak üzere tüm şehirlerde sokak lezzetleri görülmektedir. Akşam saatlerine doğru daha da aktif satış yapılmaktadır. Buradan hareketle araştırmada Doğu Türkistan'ın mutfak kültürü, mutfağına dair yiyecek ve içecekleri, mutfağına dair gelenekler/ritüeller başlıkları altında geçmişten bugüne dek öne çıkan ürünlerin ve yerel yemek kültürünün ele alınması amaçlanmıştır. Doğu Türkistan mutfak kültürünü yansıtan az kaynağın olması nedeniyle bu araştırmanın alan yazına katkı sağlaması diğer amaçlar arasında var olmaktadır.

DÖRDÜNCÜ BÖLÜM

GAGAUZ MUTFAK KÜLTÜRÜ

Merve Sema Yiğit Tekinçay

GİRİŞ

Gagauz isminin gök-oğuz kelimelerinin birleşiminden meydana geldiği (Bozkurt, 1992; Köseoğlu, 1999) ve Romanya, Ukrayna, Moldova, Yunanistan, Kuzeydoğu Bulgaristan'da yaşayan Hristiyan Ortodoks Türklerine verilen isim olduğu ileri sürülmektedir (Atmaca ve Gözdaş, 2018). Günümüzde Moldova'da *Gagauz Yeri* adı verilen özerk yönetime sahip olmakla birlikte (Hünerli ve Arnaut, 2017) Gagauzların Orta Asya Türk Cumhuriyetleri, Türkiye ve Azerbaycan'da da azınlık olarak yaşadıkları bilinmektedir (Tan, 2001). Gagauz Türklerinin nüfusunun dünya çapında yaklaşık olarak üç yüz bin olduğu tahmin edilmektedir (Demir, 2011). Gagauz Yeri, haritada da görüldüğü üzere Moldova'nın güneyinde bulunan Gagauzların yaşadığı yere denilmektedir. Batısında Romanya, doğusunda ise Ukrayna yer almaktadır. 1837,9 kilometrekare yüz ölçümü olan Gagauz Yeri topraklarında toplam 171.500 olan nüfusun %82,6'sını Gagauzlar oluşturmaktadır (Gagauzya Coğrafyası, 2023).

Gagauz lehçesinin Türkiye Türkçesi ve Rumeli ağızlarına yakın olduğu bilinmektedir. Ayrıca Anadolu ağızlarında kullanılan birçok kelimeye sahip olmakla beraber Bulgarca, Rusça ve Romenceden de birçok kelime almıştır. Bu sözler üzerine yapılacak araştırmalar etnik kökeni aydınlatmak açısından önem taşımaktadır (Karpat, 1996). Gagauzların yaşadıkları sancaklarda kullandıkları kişi isimleri arasında en çok Uz (Oğuz) isimleri görüldüğünden %70'inin Tuna üzerinden Balkanlara geçerek yerleşen Uzlardan (Oğuz) oldukları, %10'unu Kuman (Kıpçak) ve Anadolu'dan gelen Selçuklu Türklerinin ise %20'sini teşkil etmektedir. Buradan hareketle Gagauzlar; Uz, Kuman, Selçuklu ve Peçeneklerden oluşan Oğuz ağırlıklı

SONUÇ

Gagauzların yemek kültürü göçebe olarak yaşadıkları yerlerdeki Türk, Bulgar, Slav, Romen ve Yunan kültürleriyle etkileşimleri sonucunda meydana gelmiştir. Tören ve özel günlerin; toplumun birlik ve beraberliğinin korunması bakımından büyük bir öneminin olduğu açıkça görülmektedir (Ademoğlu ve Durlu-Özkaya, 2022). Eski zamanlarda göçebe yaşam ve buzdolabı olmasının bir sonucu olarak etleri kurutarak, kavurma, pastırma ya da sucuk yaparak muhafaza etmişlerdir. Gagauz yemeklerinin Türk mutfağıyla olan benzerlikleri göz önünde bulundurulduğunda iki milletin de aynı kökene ait oldukları görüşü baskın gelmektedir (Pancu ve Selçuk, 2023).

Gagauz Türkleri ile ilgili alan yazın incelendiğinde Gagauz mutfak kültürü özelinde yapılan araştırmaların sınırlı olduğu görülmektedir (Güleç ve Özkaya, 2022; Pancu ve Selçuk, 2023). Gagauzların tarihsel olarak süreçlerine bakıldığında yaşadıkları coğrafyadan etkilendikleri, bazı âdet ve geleneklerinin unutulduğu veya günümüzde uygulanmadığı açıkça görülmektedir. İnanç bakımından Hristiyanlığı benimsemiş olduklarından dolayı diğer Türk topluluklarından ayrılmaktadır. Gagauzların geleneksel ve kültürel değerlerinin korunarak gelecek kuşaklara aktarılabilmesi için daha fazla çalışmaya ihtiyaç vardır.

Gagauz mutfağı farklı kültürlerden ve mutfaklardan etkilenerek kendine özgü bir tarz geliştirmiştir. Et ve sebze yemekleri, hamur işleri ve tatlılarıyla zenginleştirilmiştir.

BEŞİNCİ BÖLÜM

KAZAKİSTAN MUTFAK KÜLTÜRÜ

Cihan Canbolat

GİRİŞ

Kazakistan, Orta Asya'da bulunan yüz ölçümü olarak en geniş ülkedir. Rusya ile Çin arasında büyük bir toprak alanına sahip olduğu için önemli bir konumda bulunmaktadır (Harita 1). Orta Asya ve Avrupa'da bulunan bu bağımsız devlet Aral Gölü ve Hazar Denizi'ne sınırdadır. Ülke topraklarının yüzde olarak yarısına yakını çöl diğer yarısı bozkır dağ ve ormanlardır. Akarsular bakımından zengin bir ülkedir. Ülkede 48000 civarında göl bulunmaktadır. İklim, bölgelere göre çeşitlilik göstermektedir. Denizlerden uzakta bulunan Kazakistan'da kara iklimi belirgin bir şekilde görülmektedir. Kazak kelimesinin kökeni, eski Türk boylarının isimlerinin birleşmesi ile türemiştir. Diğer bir görüşe göre cesaretli insanlara verilen isimdir (Kobeshova, 2013).

- Pilav, genelde et yemeklerinin yanında takviye amacı ile verilmektedir
- Yemeklerin yanında kullanılan otlar, genellikle maydanoz ve dereotudur.
- Tatlı olarak hamur işi, sütlü tatlı ve helva Kazakistan mutfak kültürünün öncü tatlılarıdır.
- Geç girmiş olsa da deniz ürünleri de Kazak mutfağında önemli yer tutmaktadır.

Millî unsurlar barındıran Kazak mutfağı, yüzyıllardır alışkanlıkları ritüelleri ve zengin yemek çeşidi ile ülkenin kültürel değeri olarak Kazakistan için büyük bir tanıtım aracıdır.

Teknolojinin gelişmesi ve son yıllarda dünya genelinde ortaya çıkan gelişmeler Kazak mutfağını da etkilemiştir. Fast-food ve atıştırmalıklar gibi çeşitlerinde ülke mutfağına eklenmesi ile kazak mutfağına yeni türler girmeye başlamıştır. Her şeye rağmen diğer devletlerle karşılaştırıldığında geleneksel kimliğini koruyan sofranın sunum ve reçetelerine bağlı olan Kazak mutfak kültürü orijinalliğini korumaktadır (Yergaliyeva, 2011).

ALTINCI BÖLÜM

KUZEY KIBRIS MUTFAK KÜLTÜRÜ

İbrahim Çekiç

GİRİŞ

Kültür, toplumların geçmişten günümüze şekillendirdiği somut ve somut olmayan unsurların tümünü karşılayan genel bir kavramdır. Kavramın somut kısmı insanların bilgi, birikim, tecrübe ve yetenekleri sayesinde ortaya koyduğu fiziki varlığı kapsar. Kültürün somut olmayan kısmı ise söz konusu fiziki varlığın etrafında zamanla şekillenen her türlü sosyal algıyı ve toplumların duygu, düşünce, istek, hayal ve inanışları ile anlam bulan pratikleri bünyesinde barındırır. Mutfak bağlamında düşünüldüğünde yeme içme unsurlarını kültürün somut bileşenleri; bu bileşenler etrafında vücut bulan ve nesilden nesile aktarılan sözlü gelenekleri, gösteri sanatlarını, ritüelleri, şölenleri ve toplumsal uygulamaları kültürün soyut bileşenleri arasında değerlendirmek mümkündür. Söz konusu bileşenlerin birleştirici ve ayırt edici olmak üzere iki özelliği bulunmaktadır. Birleştiricilik özelliği aynı tadı paylaşmakla, yani benzer ya da aynı hislerle büyüüp ortak noktada ve sofrada buluşmakla ilgilidir. Ayırt edicilik özelliği ise geleneksel mutfak uygulamalarının ait oldukları toplumlara öne çıkarması ve görünür kılmasıdır. Baklava, künefe ve lokum denildiğinde Türkiye'nin akla gelmesi bu duruma örnek verilebilir. Aynı şekilde kuymağın Karadeniz'i, nohut dürümünün Gaziantep'i çağrıştırması ve hemşehricilik duygusuna atıfta bulunması söz konusu durumun farklı bir yansımasıdır.

Geleneksel mutfak uygulamaları ve bu uygulamalarla ilişkilendirilebilecek somut olmayan kültürel miras unsurları, günümüzde destinasyon pazarlamasının önemli argümanlarından biri olarak görülmektedir (Akgöz, 2021). Refah düzeyindeki artış ile ulaşım ve iletişim kanallarındaki gelişmeler sayesinde etki alanını genişleten bu argüman aynı zamanda turistik ürün çeşitliliği arayışında olan destinasyonlara fırsatlar sunmaktadır.

YEDİNCİ BÖLÜM

KIRGIZİSTAN MUTFAK KÜLTÜRÜ

Kenan Pala, Mustafa Yılmaz, Ümit Sormaz

GİRİŞ

Mutfak kültürü, bir toplumun temelini oluşturan en önemli unsurdur. Bu kültürün içerisinde; kullanılan malzemeler, yenilen yemekler, yeme adabı, yemeklerin sunumu gibi birçok faktör bulunmaktadır. Bu faktörler; o toplumun dinini, coğrafyasını, ekonomisini, gelenek ve göreneklerini, göçebe bir yaşam sürüp sürmediğini yansıtmakta ve kendisi için bir kimlik hâline gelmektedir. Bir milletin mutfağı, onun tarihî kimliğini yansıtmakta ve kendisinden haber vermektedir. Türk milletinin yemek kültürleri arasında farklılıklar olmakla birlikte birbirine benzer birçok yönü vardır. Örneğin; tüm Orta Asya Türklerinin mutfağında etli pilav yer almaktadır. Kırgızistan'da “aş”, Kazakistan'da “palav”, Özbekistan'da “polov” isimleri ile anılmaktadır. Manti, tüm Türk ülkelerinde boyut farklılıkları olsa da aynı şekilde yapılmaktadır (Çelik, 2017).

Yeryüzündeki Türkler, geniş bir coğrafyaya yayılmışlardır. Gittikleri yere kendi kültürlerini götürmüşler ve aynı zamanda oranın kültürlerini de almışlardır. Orta Asya Türkleri göçebe bir yaşam sürmüş ve dolayısıyla tarım ve hayvancılıkla uğraşmışlardır. Bu uğraş, yemek kültürlerine de yansımıştır (Çelik, 2017).

Kırgız mutfağı, oldukça geniş ve köklü bir geçmişe sahiptir. Mutfak kültürü, geçmiş ile bağlarını koparmamış ve bozulmamıştır. Eski âdetlerini, gelenek ve göreneklerini günümüzde de aynı şekilde yaşatmaktadır.

Kırgızistan'da şehir ve kasabalarda mutfak birbirinden farklılaşmaktadır. Kasaba ve köylerde halk çorba ve sulu yemeklerle beslenmektedir. Çorba ve sulu yemekler, az malzeme ile birçok kişiyi doyurma özelliğine sahiptir. En bilinen örnekleri ise carma ve maksımdır. Carma, arpa ve buğdayın ahşap havanda dövülmesinden

SEKİZİNCİ BÖLÜM

KIRIM MUTFAK KÜLTÜRÜ

Aysun Yılmazbaşar, Elif Zeynep Özer

GİRİŞ

İlk çağlardan bu yana insanların varoluşlarını sürdürebilmeleri için beslenme zorunlulukları ortaya birtakım yeme içme pratikleri çıkarmıştır. İlk başta fizyolojik bir olgu olan bu ihtiyaç, ihtiyacı karşılama yöntemleri açısından kültürel bir unsura dönüşmüştür. Bu dönüşüm başta toplumun içinde bulunduğu coğrafya, tarımsal ve hayvansal üretim sistemleri, ekonomi, ticaret, göç, diasporalar ve savaşlar gibi unsurların etkisinde gelişmektedir.

Ateşin kontrolü, alet kullanımı, yerleşik hayat beraberinde tarım ve hayvancılığın başlaması gibi gelişmeler kültürel değerleri oluşturan çabalardır. Gelişmeler kültürel yapı ile beraber insan yaşamını da şekillendirmiştir. Kültür ve beslenme kavramlarının bir araya gelmesi ile ortaya yemek kavramı çıkmıştır. Bu bağlamda yemeğin kültürel boyutu ifadesinde; etnik topluluk ve ülkelerin paylaştıkları ortak yeme alışkanlıklarını belirtmek üzere yemek ve mutfak kültürü ifadeleri kullanılmaktadır (Aksoy ve Üner, 2022).

Dünya üzerinde sosyoekonomik, sosyokültürel ve inanışlar yönünden farklı birçok toplum bulunmaktadır. Toplumların sahip oldukları bu farklılıklarla birbirlerinden ayrışan ve benzeşen yönleri, yemek ve mutfak kültürlerini ortaya çıkarmaktadır (Düzgün ve Durlu-Özkaya, 2015).

Kırım, tarihin genel akışı içerisinde birbirini izleyen Türk boylarının göç ettiği ülkelerden biri olmuştur (Kavak, 2008). İlk Türk kavimlerinin yerleşmelerinin MÖ 7. yy. öncesine dayandığı tarihî yazılı kaynaklardan bilinmektedir (Zaatov, 2018).

en iyi yollarından birinin de toplumun yemeklerinden geçmek olduğu ifade edilebilir.

Dinî ve kültürel açıdan farklı birçok etnik gurubun bira ada yaşadığı bir yarımada olan Kırım'da, gayrimüslim toplulukların çok önceleri tarımı başlattığı söylenebilmektedir. İç bölgelerde göçebe bozkır kültüründen gelen kıymız ve et gibi geleneksel beslenme gıdalarında sürekliliğin devam ettirildiği söylenebilmektedir. Kırım yarımadası güneyine inildikçe burada yaşayan farklı etnik toplulukların etkileşimi ile deniz iklimi etkisinde daha çok balık, meyve ve sebze gibi besin maddelerinin ön planda olduğu Akdeniz tipi beslenmeye yaklaşmaktadır.

Genel anlamda Kırım yemek kültürü Kafkas ve Ota Asya toplumlarının yemek kültürleri ile benzer bir çizgidedir. Yarımadada yaşayan Türk ve Rusların mutfak ve yemek kültürü kapsamında oldukça etkileşime girdiklerini ve isimleri değişik olabilese de benzer yemekleri tükettiklerini söylemek mümkündür. Kırım mutfağında kültürel etkileşime en güzel örnek 17. yy. gayrimüslim terekelerinde bulunan Kırım Türklerine özgü börek çeşidi olan Köbete'dir.

Kırım topluluklarında özel gün ve gecelerde gerçekleştirilen ritüellerde başat rolü Kırım mutfak kültürüne ait yiyecek ve içeceklerin oluşturulduğu görülmektedir. İlk yaşamdan ölüme kadar olan süreçte gerçekleştirilen ritüellerde çi börek, köbete, kıygaşa ve kalakay; Kırım özel gün gastronomisi uygulamalarına örnek verilebilir.

Bunların yanı sıra zaman içerisinde Türkiye'ye ulaşan Kırım Türklerinin de mutfaklarının Türk mutfak kültürü ile özdeşleşirken yemek kültürlerini de koruma çabaları yadsınamaz bir gerçek olarak ifade edilebilir.

Kırım sınırları içerisindeki çok kültürlülük Kırım mutfağını ortak ve zengin bir mutfak kültürü yapmaktadır.

DOKUZUNCU BÖLÜM

ÖZBEKİSTAN MUTFAK KÜLTÜRÜ

Yener Ođan

GİRİŞ

Türkler, ilk olarak Orta Asya'nın bozkır bölgelerinde yerleşik hayatı benimsemiştir. Burada geçimlerini tarımsal ve hayvancılık faaliyetlerine dayalı olarak sağlamışlardır. Hayvansal ürünlerden sığır, keçi, koyun ile tarımsal ürünlerden buğdaydan elde edilen un, yarma ve bulgur ilk olarak yararlandıkları besinlerdir (Ciđerim, 2001). Toygar (2001), Türk yemek kültüründe hayvansal ürünlerin önemli bir yer tuttuğunu belirtmiştir. Türkler, göçebe yaşam tarzı geleneğini sürdürerek yemek kültürlerini Anadolu'ya taşımışlardır. Türklerin İslamiyet'i kabul etmesi de yemek kültürünü etkileyen bir diğer husus olarak öne çıkmaktadır (Kızıldemir, Öztürk ve Sarusık, 2014). Çünkü İslamiyet'in yasakladığı ürünler Türklerin İslamiyet'i kabul etmesiyle Türk yemek kültüründe yer almamaya başlamıştır.

Şanlıer, Cömert ve Özkaya (2012) çalışmalarında Türk yemek kültürünü; Orta Asya'nın et ve mayalanmış süt ürünleri, Mezopotamya'nın tahıl ürünleri, Akdeniz'in sebze-meyve ve su ürünleri, Güney Asya'nın baharat ürünleri birleşmesi olarak ifade etmiştir. Dolayısıyla Türk mutfağının zengin ve çeşitli ürünlerin yer almasında farklı kültürlerle etkileşimde bulunmasının da önemli katkılar sağladığı söylenebilir (Dilsiz, 2010).

rumlanabilir. Türk kültüründe olduğu gibi sofrada adabının Özbek mutfağında da önemli bir yer bulunmaktadır. Örneğin, sofrada evin en yaşlı erkeği, sofranın başında oturmaktadır. Özbek mutfağı yemek çeşitliliği, pişirme yöntemleri, sofrada düzeni ve adabı, servis şekilleri, saklama teknikleri olmak üzere kendine özgü bir mutfak kültürü bulunmaktadır. Buradan hareketle çalışmada Özbekistan'ın mutfak kültürü ile ilgili mutfak kültürünün tarihsel gelişimi, mutfağına özgü yiyecek ve içecekleri, mutfağındaki öğünler ve mutfağına ait gelenekler/ritüeller başlıkları altında geçmişten günümüze kadar olan süreçte Özbekistan Cumhuriyeti'nin yemek kültürü değerlendirilmesi amaçlanmıştır. Özbek mutfak kültürünü yansıtan sınırlı sayıda kaynağın olması sebebiyle bu çalışmanın alan yazına katkı sağlaması diğer amaçları arasında yer almaktadır.

ONUNCU BÖLÜM

TATARİSTAN MUTFAK KÜLTÜRÜ

Özden Özdemir

GİRİŞ

Tarih süresince Tatar ismi her ne kadar farklı toplulukları tanımlamak için kullanılmışsa da günümüzde Rusya Federasyonunun sınırları içerisinde yaşayan Kazak Tatarları ile 2014 yılından beri Rusya tarafından ilhak edilen Kırım Tatarları olmak üzere bu iki topluluk yaygın olarak akla gelmektedir (Şahin, 2017). Tataristan Cumhuriyeti ise 67.836 km²lik yüz ölçümü ile Rusya'nın merkezinde, Volga ve Kama nehirleri arasında yer almaktadır (Harita 1). Tataristan, kuzeyde orman ve güneyde bozkır olmak üzere iki coğrafi bölgenin kesişim noktasında yer almaktadır. Tatar mutfak kültürü hem ulusal hem de kültürel açıdan oldukça zengin ve köklü bir geçmişe sahiptir. Bütün köklü kültürlerde olduğu gibi Tatar mutfağının da gelişmesinde eski geleneksel unsurlarla birlikte Tataristan'ın coğrafyası ve doğası da etkili olmuştur.

Göçlerle birlikte farklı kültürlerle etkileşime girmiş olan Tatar mutfağı, çevresinde yer alan Rus, Mari ve Udmurt gibi milletlerin yanında Orta Asya milletleriyle, özellikle de Özbekler ve Taciklerle etkileşim içerisinde bulunmuştur. Bu da Tatar mutfağının zenginleşmesine katkı sağlamıştır (Sysoeva, Sysoeva, ve Kharina, 2021:40). Bunun yanında Tatarların gittikleri bölgelere kendi mutfak kültürleri taşımaları Tatarların köklü bir mutfak kültürüne sahip olduğunu göstermesi açısından önem arz etmektedir. Geçmişte Ruslar tarafından göçe zorlanan ve Türkiye'ye göç eden Kırım Tatarlarının, köy ve kasabalarda beraberinde getirdikleri mutfak araç gereçlerini kullandıkları bilinmektedir.

arasındadır. Türk kültürünün önemli içeceklerinden olan geleneksel Türk kahvesi ve çay (Ademoğlu, 2022), Tatar mutfağının vazgeçilmez içecekleridir. Tatarlar, çayı genellikle süt ve kaymakla ikram etmektedirler. Tatar mutfağında tahıl ürünleri, sebzeler, meyveler ve arıcılık da önemli bir yere sahiptir. Ekmek üretimi ve tüketimi önemli bir geleneğe sahiptir ve hamur işi gıdalar da yaygın olarak tüketilmektedir. Sebzeler ve meyveler, çeşitli yemeklerde ve tatlılarda kullanılmaktadır. Arıcılık da Tatarlar arasında yaygın bir faaliyettir ve bal üretimi önemli bir geleneğe sahiptir. Tatar mutfağı, zengin bir tarih ve kültürel birikime sahip olan bir mutfaktır. Et ürünlerinin ön plana çıktığı, çeşitli koruma yöntemlerinin kullanıldığı ve süt ürünleri, tahıllar, sebzeler, meyveler ve balın da önemli bir yer tuttuğu bir mutfaktır.

Tatar mutfağı, Orta Asya'dan bu yana farklı kültürlerin etkileşimiyle şekillenmiş ve bugün bile Tatarların kimliklerinin önemli bir parçası konumundadır. Bu mutfak, yüzyıllar boyunca Tatarların yaşam tarzıyla, coğrafi konumuyla ve etkileşim hâlinde olduğu diğer kültürlerle bir araya gelerek zenginleşmiştir. Tatar mutfağı, çeşitliliğiyle ve özgün tatlarıyla tanınır. Tarihi ve kültürel birikimi yansıtan yemekler, geleneksel yöntemlerle hazırlanır ve günümüzde bile Tatar ailelerinin sofralarında yerini korur. Tatar mutfağının önemi, sadece lezzetleriyle sınırlı değildir. Bu mutfak, Tatarların kültürel kimliklerini korumalarına, nesilden nesile aktarmalarına ve birlikte yemek yemekle bağlarını güçlendirmelerine olanak tanır. Geleneksel yemekler, Tatar halkının ortak değerlerini yansıtır ve toplumun birlik ve dayanışma ruhunu besler.

ON BİRİNCİ BÖLÜM

TÜRKMENİSTAN MUTFAK KÜLTÜRÜ

Gökhan Yılmaz, Mustafa Ülker

GİRİŞ

Türkmenistan yemek kültürünün şekillenmesinde tarih, coğrafya, etnik çeşitlilik, iklim, gelenek ve görenek, inanç gibi faktörlerin önemli bir rol oynadığı bilinmektedir. Başka bir anlatımla Türkmen yiyecek, içecek ve yemeklerini bünyesinde barındıran gastronomik kimliğin özünde bölgenin tarihsel süreci ve coğrafi özellikleri yer almaktadır. Bu bağlamda Türkmenistan'ın yemek ve mutfak kültürünü anlatmadan önce bölgenin tarihi ve coğrafyasına kısaca değinmenin yararlı olabileceği düşünülmektedir. Türkmenistan'ın tarihî geçmişi, dokuzuncu yüzyılda bölgede yaşayan Kayı-Bayat, Yazır ve Salır-Kanık boylarından meydana gelen Oğuzlara kadar dayanmaktadır (Saray, 1993). On dokuzuncu yüzyıla kadar dağınık ve kabile şeklinde yaşayan Türkmen halkının 1884 yılında Rus hâkimiyetine girdiği göze çarpmaktadır (Kara, 2002; Charyyeva ve Öztürk, 2018). Yaklaşık kırk yıllık bir sürecin ardından Rusya'da gerçekleşen Bolşevik (Ekim, Rus) Devrimi'nin etkisiyle birlikte 27 Ekim 1924'te Türkmenistan Sovyet Sosyalist Cumhuriyeti'nin kurulduğu tarihe not düşülmektedir (Kara, 2000). Sovyet etkisinde geçen yetmiş yılın sonunda tarih 27 Ekim 1991'i gösterdiğinde ise Türkmenistan'ın bağımsızlığını kazandığı dikkat çekmektedir (Kara, 2002; Gayypov, 2022). Hâl böyle olunca Türkmen yemekleri ve mutfak kültürü de hem Orta Asya Türk kültürünün hem de Rus kültürünün izlerini taşımaktadır.

Türkmenistan Özbekistan, Kazakistan, Kırgızistan ve Tacikistan gibi Türk Dünyası ülkelerinin bulunduğu Orta Asya'nın merkezinde stratejik bir konuma sahiptir (Kara, 2006). Ülkenin kuzeyinde Kazakistan, kuzeydoğusu ve doğusunda Özbekistan, güneydoğusunda Afganistan, güneyinde İran ve batısında ise Hazar Denizi

Gelenekler ve ritüeller toplumu oluşturan bireylerin ortak paylaştığı değerler olarak nitelendirilmektedir. Her ne kadar yiyecek ve içecek çeşitliliği sınırlı olsa da Türkmenistan mutfak kültürüne özgü gelenek ve ritüellerin de var olduğu bilinmektedir. Türkmenistan mutfağında ekme ve sofraya ayrı bir öneme sahiptir. Yemeklerin genellikle yere oturarak ve bağdaş kurarak yenmesi ile ekmeğin yere konmaması, misafirin ekmeği koparmaması ve misafirlığe giderken muhakkak yiyecek-içecek götürülmesi gibi gelenekler bu duruma örnek olarak gösterilebilir. Bir diğer önemli gelenek ise Türkmen kültüründe beyaz ürünlerin ticaretinin günah olmasından dolayı daha çok kırsal bölgelerde sütün satılmamasıdır. Sütün satılmasının günah sayıldığı bu bölgelerde takas yoluyla bir alışveriş söz konusu olmaktadır. Birçok Türk toplumunda olduğu gibi Türkmenistan kültüründe de biri doğduğunda veya biri öldüğünde kişinin yakınları tarafından kurban kestirilmesi, yemek dağıtılması ve hediye edilmesi söz konusudur. Tüm bunların ışığında ana akım yazında kısıtlı bilgiye sahip olan Türkmenistan mutfağı ile ilgili bütüncül bir bakış açısının geliştirilebilmesi amacıyla bu bölüm hazırlanmıştır. Böylece Türkmen mutfak kültürüne dair kapsamlı bir değerlendirme yapabileme imkânı ortaya çıkmıştır. Bu bağlamda hem ilgili yazına katkı sağlayabileceği hem de ilgi duyan araştırmacılara yol gösterebileceği öngörülmektedir.

BÖLÜM 1

SINIFLANDIRMA PROBLEMLERİNE GİRİŞ

Ömer Faruk Rençber, Abdurrahman Coşkuner

1. GİRİŞ

Veri madenciliğinde kullanılan yöntemler; regresyon, sınıflandırma, kümeleme ve birliktelik kural çıkarımları olmak üzere dört kısımda incelenmektedir. Regresyon ve sınıflandırma algoritmaları danışmanlı öğrenme, kümeleme ve kural çıkarımları ise danışmansız öğrenme tabanlı olarak çalışmaktadır. Sınıflandırma problemlerinin temelinde farklı sınıflarda yer alan gözlemlerin ayırımlarında etkili olan faktörlerin ve ne düzeyde başarılı sınıflandırıldıklarının incelenmesi amaçlanmaktadır. Bu açıdan sınıflandırma algoritmasının kümeleme yöntemlerinden farkı danışmanlı öğrenme olmasıdır.

Veri madenciliği teknikleri kullanılan veri türüne göre metin madenciliği, görüntü işleme veya veri madenciliği olarak incelenmektedir. Metin madenciliğinde veriler metin dosyası, görüntü işlemede resim ve veri madenciliği problemlerinde ise sayısal veri olarak değerlendirilmektedir. Veri madenciliği tabiri, bu hesaplamaların genel adı olmakla birlikte sayısal veri analizleri için de kullanılmaktadır. Algoritmaların uygulamaları R, Phyton, RapidMiner veya KNIME ile yapılabilmektedir. Bu bölümde sınıflandırma algoritmalarının temel mantığı ve çeşitleri üzerine durulacak ve uygulama hususunda genel bilgilere yer verilecektir.

2. SINIFLANDIRMA PROBLEMLERİ

Literatürde sınıflandırma problemleri açısından birçok yöntem çeşitliği bulunduğu görülmektedir. Bu açıdan tarihsel gelişimine göre sınıflandırma problemlerinde klasik istatistik, makine öğrenme ve derin öğrenme yaklaşımlarına göre

BÖLÜM 2

LOJİSTİK REGRESYON ANALİZİ¹

Sinan Mete

1. GİRİŞ

Lojistik regresyon analizi, kategorik bağımlı değişkenin bağımsız değişkenler ile tahmin edilmesinde kullanılmaktadır. Klasik regresyon ve lojistik regresyon analizleri arasındaki fark; klasik regresyon analizinde bağımlı değişken sürekli iken lojistik regresyon analizinde sonuç değişkeninin ikili veya çoklu düzeyde kategorik yapıda olmasıdır.

Bu iki yöntem arasında üç önemli fark vardır (Elhan, 1997:4);

- Doğrusal regresyon analizinde tahmin edilecek olan bağımlı değişken sürekli iken lojistik regresyon analizinde bağımlı değişken kesikli bir değer almaktadır.
- Doğrusal regresyon analizinde bağımlı değişkenin değeri, lojistik regresyon analizinde ise bağımlı değişkenin alabileceği değerlerden birinin gerçekleşme olasılığı tahmin edilir.
- Doğrusal regresyon analizinde bağımsız değişkenin çoklu normal dağılım göstermesi şartı aranırken lojistik regresyon analizinde böyle bir şart yoktur.

Lojistik regresyonun amacı bağımlı ve bağımsız değişkenler arasındaki ilişkileri araştırıp kategorik bağımlı değişkenin alabileceği değerlerden birinin gerçekleşme olasılığını tahmin etmek ve böylece iki veya daha fazla gruba ilişkin üyelik tahmini yapmaktır. Bu anlamda analizin diğer amacının “sınıflandırma” olduğu söylenebilir.

¹ Bu bölüm, Prof. Dr. Aydın Ünsal danışmanlığında 2009 yılında tamamlanan “Kategorik Veri Analizi Yöntemleri ve Uygulamalar” başlıklı doktora tezinden üretilmiştir.

BÖLÜM 3

RASSAL ORMAN VE RASSAL EĞRELTİ OTU MODELİ

İlkay Altındağ

1. GİRİŞ

Günlük hayattaki sınıflandırma ve tahmin problemlerini çözmek için çeşitli makine öğrenme algoritmaları yaygın olarak kullanılmaktadır. Makine öğrenimi yöntemleri, sınıflandırılmış örneklerden öğrenilen yolu kullanarak yeni örneğin sınıfını bulmaya çalışır. Literatürde, sınıflandırma algoritması, eğitim örneği ve buna karşılık gelen çıktı ile birlikte verildiğinden, sınıflandırma için denetimli öğrenme terimi de kullanılmaktadır (Chaudhary, Kolhe ve Kamal, 2016; Abdoh, Rizka ve Maghraby, 2018; Dogru ve Subasi, 2018).

Karar ağaçları (KA), birçok makine öğrenimi uygulamaları için kullanılabilen güncel ve güçlü bir yöntemdir. KA, bağımlı değişkenin türüne göre adlandırılan parametrik olmayan bir yöntemdir. Bağımlı değişken kategorik ise sınıflandırma ağacı olarak bağımlı değişken sürekli ise regresyon ağacı olarak adlandırılır. Karar ağaçlarının amacı, bağımsız değişkenler açısından tahmin edici bir model geliştirmektir. Ağaç, verilerin ardışık olarak bağımsız değişkenlerden birine bölünmesiyle oluşturulur. KA algoritmaları, genel olarak okunabilir sınıflandırma kuralları sağladıkları için etkili bir yöntem olarak kabul görmektedir (Ben-Haim ve Tom-Tov, 2010; Esmaily vd. 2018, Altındağ; 2021). Sınıflandırma ve Regresyon Ağacı (CART: Classification and Regression Trees) yöntemi ise makine öğreniminde kullanılan tahmine yönelik bir karar ağacı algoritmasıdır. 1984'te Breiman, Friedman, Olshen ve Stone tarafından önerilen CART yönteminin amacı, bir sınıflandırıcı için parça parça sabit tahmin edici veya bir eğitim gözlem örneğinden bir regresyon fonksiyonu veren verimli bir algoritma oluşturmaktır. Bu algoritma, geniş bir ağaç koleksiyonundan bazı "iyi" ağaç yapısı tahmin edicilerinin

Veri seti eğitim ve test olmak üzere iki parçaya bölünmüş, ele alınan yöntemler ile eğitim veri seti üzerinde modeller oluşturulmuştur. Oluşturulan modeller ile test verisi ve eğitim verileri için tahminler yapılmıştır. Tahminlerin performansını değerlendirmek için test verisi hata yüzdeleri ve değerlendirme metrikleri ele alınmıştır.

Modellerden elde edilen değerlendirme metrikleri dikkate alındığında birbirlerine çok yakın sonuçlar elde edildiği, aralarında bariz bir farklılığın olmadığı belirlenmiştir. Hata oranları dikkate alındığında ise ele alınan Rassal Orman modelinin rassal eğrelti otu modeline göre daha düşük bir hata oranına sahip olduğu tespit edilmiştir.

DESTEK VEKTÖR MAKİNELERİ: R İLE SINIFLANDIRMA

Özlem Kuru Sönmez

1. GİRİŞ

Destek Vektör Makineleri (DVM), 1960'lı yıllarda geliştirilmeye başlanmış bir veri madenciliği ve makine öğrenmesi yöntemidir. Regresyon ve sınıflandırma problemlerinde çok sayıda farklı çalışma alanında uzun yıllardır kullanılmış ve günümüzde de kullanılmaya devam etmektedir. Bu alanlardan bazıları görüntü tanıma, metin sınıflandırma, ses tanıma, duygu analizi uygulamaları ile tarım, tıp, finans, enerji ve güvenlik olarak sayılabilir. Literatür incelendiğinde DVM yöntemi kullanılarak yapılmış çok sayıda çalışmaya ulaşmak mümkündür. Yöntemin bu kadar tercih edilen bir yöntem olmasının sebebi, yüksek doğruluk sağlaması ve uzun yıllardır kullanılmasından dolayı ortaya çıkan uygulama örneklerinin bol oluşu olarak düşünülmektedir.

Bu çalışmanın ikinci bölümünde DVM'nin doğrusal ve doğrusal olmayan çeşitleri ile ilgili teorik açıklamalar sunulmuştur. Üçüncü bölümde, DVM'nin sınıflandırma amacıyla kullanıldığı çalışmalardan örnekler özetlenmiştir. Çalışmanın dördüncü bölümünde ise doğrusal ve doğrusal olmayan DVM uygulama örnekleri sunulmuştur.

2. DESTEK VEKTÖR MAKİNELERİ

DVM'nin gelişimi üç ana adımdan oluşmuştur. Bunlardan ilki, eğitim örneklerinin dâhil olduğu iki sınıfın bir hiper düzlem ile ayrılabilmesine imkân sağlayan optimal hiper düzlem (Vapnik ve Lerner, 1963) ve 1960'lardan 1990'lara kadar geliştirilmeye devam eden Vapnik-Chervonenkis teorisidir. Bir sonraki adım ise Boser vd. (1992) tarafından çekirdek fonksiyonun maksimum marj modellerine

cek faktörlerdir. Bu bölümde veri setlerinden en yüksek doğruluk ile sınıflandırma yapmaktan ziyade RStudio ortamında bir DVM modelinin oluşturulması, iyileştirilmesi ve performans ölçütlerine ulaşılması aşamalarında kullanılan kodları anlatmak amaç edinilmiştir.

BÖLÜM 5

XGBOOST: R İLE SINIFLANDIRMA

Emre Yakut, Özlem Kuru Sönmez

1. GİRİŞ

Makine öğrenme tekniklerinden birisi olan XGBoost algoritması, sınıflandırma ve regresyon problemlerinin analizinde uygulanan denetimli makine öğrenmesi teknikleri arasında yer almaktadır. Bu yöntemin en önemli özelliği, verilerin sınıflandırma ve regresyon analizlerinde oldukça hızlı ve yüksek tahmin gücüne dayalı olmasıdır. Böylece XGBoost algoritması; bu avantajları nedeniyle enerji verileri, sağlık sektörü ve finans alanında araştırmacıların ilgisini çeken makine öğrenme tekniklerinden birisi olmuştur.

Bu çalışmada R uygulamasının UCI Machine Learning Repository veritabanında da yer alan “Ionosphere” isimli veri seti kullanılarak sınıflandırma analizi gerçekleştirilecektir. Çalışma beş bölüm başlığı altında toplanırken ikinci bölümde XGBoost algoritması tanıtılmış, 3. bölümde literatür taramasına yer verilmiş, 4. bölümde çalışmanın uygulaması için gerekli paketlerin kurulması ve çağrılmasından bahsedilerek analiz işlemleri yapılmış ve sonuç bölümünde ise yöntemin yüksek doğrulukla sınıflandırma başarısı açıklanarak bu yöntemin sınıflandırma tekniğinde de kullanılabileceğinin önemine vurgu yapılmıştır.

2. XGBOOST YÖNTEMİ

XGboost algoritması, Friedman (2001) tarafından geliştirilmiş, Gradyan Boosting (Gradyan Yükseltme) tabanlı, sınıflandırma ve regresyon problemlerinde uygulanan bir makine öğrenmesi tekniğidir. XGboost algoritması, gradyan boosting algoritmasının optimize edilmesiyle, aşırı öğrenme durumunun önüne geçilerek algoritmanın hızlı olmasına ve yüksek tahmin gücüne ulaşmasıyla diğer makine öğrenmesi algoritmalarına göre oldukça avantajlıdır. Bu kapsamda Chen ve

Daha önce de bahsedildiği gibi XGBoost yönteminde parametrelerin doğru ayarlanması başarıyı önemli derecede etkileyebileceğinden hiper parametre optimizasyonu gerçekleştirilerek modeli geliştirmek ve sınıflandırma başarısını yükseltmek amaçlanmıştır. Bu sebeple öncelikle bir trainControl nesnesi oluşturulmuştur. Ardından parametrelerin farklı değerlerini içeren bir grid nesnesi oluşturulup bu nesnelere kullanılarak iyileştirilmiş model eğitimi gerçekleştirilmiştir. İyileştirilmiş modelin performans metrikleri elde edildikten sonra doğru sınıflandırma oranı %95,71 olarak belirlenmiştir. Dolayısıyla iyileştirilmiş model, ilk modelden daha başarılı hâle getirilebilmiştir. Ardından ilk modelde olduğu gibi iyileştirilmiş modelde de değişkenlerin önem dereceleri belirlenip basit bir grafikte sunulmuştur.

Gerçekleştirilen uygulamada öncelikli amaç yüksek doğruluk oranına ulaşmaktan ziyade RStudio ortamında XGBoost yöntemi kullanarak sınıflandırma modelini oluşturma, performans ölçütlerine ulaşma ve model iyileştirme aşamalarını anlatmaktır.

Bölüm 6

LIGHTGBM ALGORİTMASI

Ahmet Çankal

1. GİRİŞ

Gradyan artırma karar ağaçları (Gradient Boosting Decision Tree, GBDT) , çok sınıflı sınıflandırma, tahminleme gibi makine öğrenmesi işlemlerini yüksek başarıyla gerçekleştiren geniş bir kullanım alanına sahip makine öğrenmesi algoritmasıdır. Buna karşın, öznelik sayısı ve veri boyutu arttığında verimlilik ve ölçeklenebilirlik konusunda yetersiz kalmaktadır. Buradaki en önemli sorun ise her bir öznelik için tüm veri örneklem noktalarının taranmasından dolayı işlemlerin çok zaman almasıdır. Modelin eğitim ve hesaplama zamanını azaltmak için Ke ve arkadaşları (Ke vd., 2017) LightGBM algoritmasını önermişlerdir.

2. LIGHTGBM ALGORİTMASI

LightGBM, Microsoft DMTK (Distributed Machine Learning Toolkit) projesi kapsamında 2017 yılında geliştirilmiş bir boosting algoritmasıdır (Url-1, 2022). Light Gradient Boosting Machine (LightGBM), karar ağacı algoritmasına dayanan bir Gradyan Artırıcı Karar Ağacı (GBDT) çerçevesidir (Tang vd., 2020). LightGBM karar ağaçları tabanlı Ke ve arkadaşları tarafından geliştirilmiş topluluk öğrenme yöntemidir (Saner vd., 2019).

LightGBM, geliştirilmiş daha hızlı eğitim verimliliği, düşük bellek kullanımı, daha yüksek doğruluk, paralel çalışma özelliği, GPU desteği ve büyük ölçekli veri işleme avantajlarına sahiptir. LightGBM’de, çoğu gradyan artırma karar ağacı algoritması tarafından kullanılan seviye odaklı (level-wise) karar ağacı büyüme stratejisi yerine derinlik kısıtlamaları olan yaprak odaklı (leaf-wise) strateji tercih edilmiştir. Yaprak odaklı stratejide hataları azaltarak aynı sayıda bölme süresi ile daha yüksek doğruluk elde edilebilir. Ancak yaprak odaklı stratejinin dezavantajı,

Uygulama sonucunda ele alınan LightGBM modeli yüksek doğrulukla DNA veri setinde sınıflandırma yapmıştır.

BÖLÜM 7

YAPAY SİNİR AĞLARI

Özlem Akay

1. GİRİŞ

Yapay Sinir Ağları (YSA), beyinde ve merkezi sinir sisteminde bulunan biyolojik nöronların davranışlarından esinlenen bir makine öğrenme algoritmasıdır (Shenfield ve ark., 2018). Yirminci yy.ın ilk yarısında YSA ile ilgili çalışmalar başlamıştır ve büyük bir hızla devam etmektedir. 1943 yılında, sinir hekimi olan Warren McCulloch ile matematikçi olan Walter Pitts basit algoritmaları çalıştıran insan beyninin işleyişine yaklaşmayı amaçlayan bir devre sistemi kurmuşlardır (Gönül ve ark., 2015). 1957 yılında Cornell Üniversitesinden araştırmacı Frank Rosenblatt, gelişmiş örüntü tanıma gerçekleştirmek için tasarlanmış bir algoritma olan algılayıcıyı geliştirmiş ve makineleri görüntülerdeki nesnelere tanıma becerisine doğru ilerletmiştir. 1969'da MIT araştırmacıları Marvin Minsky ve Seymour Papert, sinir ağlarının amaçlandığı gibi çalışması için günün bilgisayarlarının gereken verileri işlemede bilgi işlem güçlerinin çok sınırlı olduğu gerçeğini de dâhil ederek sinir ağları ile ilgili birkaç sorunu dile getiren “Perceptrons” kitabını yayınlamışlardır. Araştırmalar 2010 yılından sonra toparlanmış ve 2012 yılında, ImageNet yarışmasının bir parçası olarak bir sinir ağı, görüntü tanıma görevinde insan performansını geçmeyi başarmıştır. O zamandan beri, yapay sinir ağlarına olan ilgi artmakta ve teknoloji gelişmeye devam etmektedir (Al-Massri, ve ark., 2018).

Yapay Sinir Ağı, öğrenme yeteneği ve veriler üzerinde sınıflandırma, örüntü tanıma ve tahmin için kullanılabilen bir ağ modeli oluşturma yeteneği nedeniyle farklı uygulama alanlarında yaygın olarak kullanılmaktadır. Sinir ağının diğer sınıflandırma tekniklerinin sahip olmadığı en umut verici özelliği, ağı simüle etmeye ve daha önce ağa maruz kalmayan yeni veriler üzerinde uygulanabilecek ve daha fazla kullanılacak bir model oluşturmaya yardımcı olmasıdır (El-Khatib, ve ark., 2019). Verileri üreten sistemin, olasılık modelinin altında yatan varsayım-

BÖLÜM 8

ÖZYİNELEMELİ SİNİR AĞLARI

Erhan Turan

1. GİRİŞ

Yapay sinir ağlarını kabaca üç ana alt grup olarak sınıflandırılmaktadır. Bunlar; genel ileri-besleme sinir ağları (Feedforward Neural Networks, FNN), evrişimli sinir ağları (Convolutional Neural Networks, CNN) ve özyinelemeli sinir ağları (Recurrent Neural Networks, RNN), modern sinir ağları modellerinin çoğunluğunu kapsamaktadır. Günümüzde bu ana alt gruplar içerisinde melez modeller de özel problemlerde daha fazla verimlilik için kullanılmaktadır.

Bu bölümde, ardışık veriler üzerinde diğer yapay sinir ağlarına göre daha hızlı çalışan ve/veya daha iyi sonuçlar verebilen özyinelemeli sinir ağlarından, yaygın özyinelemeli sinir ağları, R programlama dili ile uygulamalı örneklerle anlatılmaktadır.

Literatür incelemesinde yapay sinir ağ modellerinin gelişimiyle ilgili çalışmalardan bahsedilmektedir. Bu yöntemlerden temel olan ve yaygın olarak kullanılan genel RNN ağları, uzun kısa-süreli bellek (Long Short-Term Memory, LSTM) ağları ve geçitli özyinelemeli birim (Gated Recurrent Unit, GRU) ağları yapısal olarak açıklanmakta ve uygulamalar altında R programlama dili ile Keras modülü kullanılarak sınıflandırma için örnekler sunulmaktadır.

2. LİTERATÜR İNCELEMESİ

Yapay sinir ağları, yüzeysel olarak biyolojik sinir ağlarından esinlenerek tasarlanmış bir yapay öğrenme yöntemleri sınıfıdır. Biyolojik sinir ağlarından ilk yapay sinir ağı *Perceptron* modeli McCulloch ve Pitts (1943) tarafından tanımlanmış fakat zamanla yapay sinir ağları biyolojik sinir ağlarından daha farklı modellere evrilmiştir (Goodfellow ve diğerleri, 2016). Bu model tek bir sinir hücre-

madığı sürece tek katmanlı ve dikkatlice seçilmiş parametreler ile yeterli sonuç alınabilmektedir.

Ardışık veriler ile eğitilerek anlamlı ilişkileri ortaya çıkarabilen yapıları, zamana dayalı verilerin analizinde de kullanışlı olabilmektedir. Qing ve Niu'nun (2018) çalışması, saatlik hava durumu bilgileri ile güneş ışığının parlama değerinin tahmin edilmesi üzerine, LSTM ağ modelinin BPNN gibi ağlardan çok daha iyi sonuçlar elde etmesi, özellikle LSTM ve GRU gibi geçitli modellerin başarılı olabileceğini göstermektedir. Fakat her zaman serisinden oluşan veri bu sinir ağı modelleri için bile uygun olmayabilir. Örneğin borsadaki bir firmanın geçmişe yönelik verilerinden faydalanarak bir sonraki gün veya hafta için yükselme ve düşme şeklinde ikili sınıflandırması yapılmak istenirse size çıkardığı model sadece o verilerin doğrultusunda oluşacak bir sonuçtur, gelecekte gelişecek özgün durumlar için modelin hata payı kabul edilen sınırın üstüne çıkabilir. Bir başka büyük sorun ise yakın zamanda bütün dünyayı etkileyen pandemi ile yıllardır oturmuş örüntülere sahip sistemlerin dahi son dönemde çok farklı zamana dayalı veri üreteceği de dikkate alınmalıdır.

Bölüm 9

BERT MODELİ İLE DUYGU ANALİZİ UYGULAMA ÖRNEĞİ

İbrahim Öztürk, Mehmet Gökhan Bakal

1. GİRİŞ

Günümüzde üretilen özellikle metin tabanlı veri miktarı hızla artmaktadır. Dolayısıyla metin tabanlı veriler üzerinden otomatik anlam çıkarma veya metin sınıflandırma yapabilme önemli problem alanlarından biridir. Makine Öğrenmesi literatüründe hâlihazırda var olan çözümlerin yanı sıra daha hızla yeni, efektif ve özgün ileri yöntemler geliştirilmektedir. Bu çalışmada da ileri tekniklerden biri olan BERT (Bidirectional Encoder Representations from Transformers) modeli ve temel kullanılan detayları yaygınca kullanılan bir veri seti üzerinde duygu analizi ile R dili kullanarak uygulamalı olarak sunulacaktır.

Bu çalışmada Metin İşleme veya Doğal Dil İşlemenin (DDİ) genel hatlarıyla tanıtılarak DDİ kullanılarak gerçekleştirilmiş bazı uygulama örnekleri ve uygulama alt yapılarına ait teorik düzenlemeler sunulacaktır. Ardından bu çalışmanın ana unsuru olan BERT modelinin tanımı ve model altyapısı detaylandırılacaktır. İkili sınıflandırma problemi üzerinden seçilen veri kümesinde gereken düzenlemeler yapıp hazır hâle getirilecektir. Oluşturulan veri kümesi eğitim, validasyon ve test alt kümelerine parçalanarak model performansı değerlendirilecektir.

2. LİTERATÜR İNCELEMESİ

Elektronik ve bilgisayar dünyasındaki hızlı ilerleyiş ile paralel olarak insanların kullandığı ve maruz kaldığı bilgi çok hızlı bir şekilde artmaktadır. Bu bilgi yığınları içerisinde aranılanın tespit edilebilmesi ve kullanılabilir kılınabilmesi için bilgilerin kurallı şekillerde düzenlenebilmesi gerekmektedir. Bu aşamada Makine Öğrenmesi yaklaşımları diğer alanlarda olduğu gibi metin işleme tarafında da do-

Kayıp ve doğruluk üzerinden öğrenme sonuçları test veri kümesi ile validasyona tabi tutulduğunda da %99 oranında bir doğruluk ve %3 civarında bir kayıp yaşanmıştır.

```
17371/17371 [=====] - 768s 44ms/step - loss:
0.0034 - binary_accuracy: 0.9997
Kayıp: 0.003383721224963665
Doğruluk: 0.9996545910835266
```

4. SONUÇ

Bu çalışmada Doğal Dil İşleme veya Metin İşleme alanlarında oldukça yeni bir altyapı olan BERT için temel oluşturan kodlayıcı ve kod çözücüler, dikkat ve öz-dikkat mekanizmalarının ardından BERT modeline ait teorik altyapı sunulmuştur. Beraberinde duygu analizi çerçevesinde sık kullanılan veri kümelerinden biri seçilerek ikili sınıflandırma çerçevesinde bir uygulama gerçekleştirilmiştir. Uygulama ile ilgili gereken tüm paketler, paket kurulumları ve ortam kurulumları detaylı olarak kod parçalarıyla sunulmuştur. İkili sınıflandırma neticesinde tek öğrenme fazında oldukça yüksek doğruluk oranlarına erişilebilmiştir.

Bölüm 10

HİBRİT MODELLEME İLE SINIFLANDIRMA YAKLAŞIMI

Mehmet Gökhan Bakal, İbrahim Öztürk

1. GİRİŞ

Günümüz dünyasında dijital dönüşümün hızla ilerlemesi hemen her alanda üstselsel olarak artan hızda veri yığınları oluşturmaktadır. Bu verilere örnek olarak haber yayınları, akademik makaleler, hasta kayıtları ile sağlık verileri, e-postalar ve sosyal medya paylaşımları gibi temel dijital kayıtlar öne çıkmaktadır. Yüksek boyutlu bu veri yığınlarının analiz edilerek anlamlandırılması için veri madenciliği ve makine öğrenmesi kapsamındaki hesaplamalı yöntemlere ciddi seviyede ihtiyaç duyulmaktadır. Bu bağlamda çözülmesi el yordamlarıyla kolay olmayan problemlerden birisi de birden fazla sınıfa ait verilerin otomatik olarak doğru kategorilerde sınıflandırılması işlemidir (Kolukısa vd., 2021). Bu anlamda sınıflandırma işleminin temeldeki zorluk nedeni ise katlanarak artan devasa boyutlardaki veri hacimlerinin manuel olarak analiz edilememesidir. Bu nedenle, araştırmacılar sayısallaştırılmış veri parçalarını işlemek için yoğun bir şekilde hesaplama tekniklerinden yararlanmaktadırlar (Labrinidis ve Jagadish, 2012; Bakal vd., 2018). Sınıflandırma görevlerinde ayrıca metinsel veriler üzerinde metin madenciliği de veri madenciliğinin bir alt dalı olarak Doğal Dil İşleme (NLP), Bilgi Getirme ve Makine Öğrenimi (ML) algoritmaları çeşitli alanlarda farklı yaklaşımlarla (Manning ve Schütze, 1999; Grishman, 2015; Bakal vd., 2021) kullanılmaktadır.

Bu bölüm çalışmasının amacı, makine öğrenmesi alanındaki sınıflandırma görevinin Gradyan Artırma Makineleri, Karar Ağacı Algoritması ve Yapay Sinir Ağı modelleri ile açıklanması ve sınıflandırma görevinin topluluk model yaklaşımı ile R dilinde uygulamasının IRIS veri seti üzerinden gerçekleştirilmesidir. Bu

Elde edilen performans değerleri Tablo 3'te gösterilmektedir. Modellerin performans değerlerine göre, en düşük logloss değeri en düşük yapay sinir ağı temelli model ile en yüksek değer ise gradyan artırma makineleri modeli ile elde edilmiştir.

Model	Logloss	MPCE
Karar Ağacı	0.5873598	0.1212121
Gradyan Artırma Makineleri	0.6073296	0.1212121
Yapay Sinir Ağı	0.06600335	0.03333333
Topluluk Öğrenme Modeli	0.1155815	0.03333333

Tablo 3. Modellerin Performans Ölçüt Skorları

Topluluk (*ensemble*) öğrenme modeli ise 0,1155 değeri ile logloss kriterinde ikinci en başarılı model olmuştur. Karar ağacı ve gradyan artırma makineleri modellerinin görece daha başarısız olması topluluk modelinin sınıflandırma performansını olumsuz olarak etkilemiştir. Öte yandan, model başına hata ortalaması (MPCE) değerlerine yapay sinir ağı modeli ve topluluk sınıflandırma modeli, karar ağacı modeli ve gradyan artırma makineleri modellerine göre aynı düzeyde daha başarılı olmuştur. Bu sonucun oluşmasında yine en önemli etken yapay sinir ağı temelli modelin yüksek başarı sağlamasıdır. Her ne kadar diğer modeller daha yüksek hata değerine sahip olsalar da topluluk temelli sınıflandırma yaklaşımının doğası gereği bir modelin hatalı sınıflandırma sonucunu bir diğer modelin kapatması sayesinde topluluk öğrenme modeli en düşük, sınıf başına ortalama hata değerini yapay sinir ağı modeli ile sağlamıştır.

ETİK KAVRAMI

GİRİŞ

Krizlerle birlikte yaşamaya çalıştığımız dünyamızda krizlerin odağındaki “insan”ın tutunabileceği temel ihtiyaç “etik yaklaşım” olacaktır. Etik yaklaşım; krize neden olan yaşam biçiminin değiştirilmesi ve sonucunda oluşan afetlerin önlenmesi, afetlere müdahalede son derece önemlidir. Yardım ya da insana yardım (afetler de dâhil) söz konusu olduğunda gündeme gelen etik, günümüzde daha çok bir yazılı normlar bütünü anlamında kullanılmaktadır. Etik birçok kural ortaya koymaktadır. Bu duruma rağmen etik; düzenlemeler ve bürokratik kurallarla eş tutulmamalıdır. İnsani yardım alanındaki çalışmaların uzmanlık gerektiren, salt teknik bir konu olarak ele alınması yeterli olmayacaktır. Afet durumunda olağan dışı koşullar hâkim olduğu için yasal düzenlemeler, yönergeler vb. denetim araçları geçerliliğini yitirebilir. Yine bu özel koşullar nedeniyle sahada ikilemler-problemlerle karşılaşılabilir. Bu durumda güncel hayatta kullanılan etik ilkeler işe yaramaz hâle gelecektir. Böylece yardım-hizmet alanında çalışanlar için dışsal olmaktan çok, içsel bir etik anlayışı önem kazanmaktadır. Bu nedenle sahada çalışanların etik konusunda bireysel felsefi bir anlayışa sahip olmaları son derece önemlidir.

Daha fazla yaşanabilir bir dünya için insan, doğa ve yaşama dair değerler vazgeçilmezdir. Değerleri insan oluşturur. Bu değerleri etik inceler, sorgular ve yorumlar. Değer ile ilgili sorunlar ve bu sorunlara ilişkin tartışmalar sonucunda etik yargılar oluşmaktadır. İnsana, doğaya, yaşama değer verme beraberinde etik kavramını öne çıkarmaktadır. Örnek olarak çevre etiği, çevre felsefesi gibi alanlar gösterilebilir. Bu anlamda çevre, doğa ve insan ilişkileri bütünlüğünde konuyu ele almak daha doğru olacaktır. Afetler söz konusu olduğunda tam da bu bütünlük önem kazanmaktadır. Afetlerin meydana gelmesi ve afet sonrası çalışmalar çevre, doğa ve insan ilişkileri bütünlüğünün bozulması ve yeniden kurulması üzerine gerçek-

inandıkları dinlerinden bağımsız olarak) değer vermek gerekir. “İlke”ye ve dolayısıyla değerlere sahip olunduğunda işler kolaylaşacaktır. Çünkü her problem durumunda çözüme bu ilke rehberlik edecektir. Bu anlamda insanlarla ilgili yardım ya da hizmet mesleklerinde “diğer insanlar” ve “değerler” en başta gelmesi gereken kavramlardır. Etik değerlere sahip olarak yaşayabilmek ve mesleği etik değerlere uygun olarak icra edebilmek için normlardan-prosedürlerden daha çok etik değerleri içeren felsefe bilgisine (felsefi bir eğitime) ihtiyaç vardır. Zamana karşı yarışılan afet durumlarında yapılacak tüm çalışmaların insan onuruna zarar vermeyecek biçimde olması gerekir. Bunu ancak bilgi sahibi, konu ile ilgili etik anlayış geliştirmiş, inisiyatif alabilen bireyler yapabilir. Bu kişi toplumsal kuralların ve değerlerin göreliliğinin farkında ve eleştirel bakış açısına sahip olmalıdır. Yardım-hizmet alanında çalışanlar için dışsal olmaktan çok içsel bir etik anlayışı önem kazanmaktadır. Bütün bu nedenlerden dolayı afet alanında çalışan uzmanların; etik ilke ve prensipleri içselleştirmeleri ve aynı zamanda etik kararlar vermede yetkinleşmeleri şarttır. Sahada çalışanların etik konusunda bireysel felsefi bir anlayışa sahip olmaları son derece önemlidir. Afetlerin meydana gelmesi ve afet sonrası çalışmalar çevre, doğa ve insan ilişkileri bütünlüğünün bozulması ve yeniden kurulması üzerine gerçekleşmektedir. Evreni bir bütün olarak anlamaya çalışan felsefe bu noktada işe yarar sonuçlar sunabilir.

BÖLÜM 2

AYRIMCILIK YAPMAMA-TARAFSIZLIK

GİRİŞ

Toplumlar kendi içlerinde bir bütünü oluştursalar bile farklı toplumsal, kültürel, siyasi, psikolojik geçmişe sahip bireylerden oluşur. Farklı geçmişleri olan bu bireylere yardım söz konusu olduğunda sahip oldukları bu farklılıkları dikkate alan bir hizmetin verilmesi gerekmektedir. Fakat uygulamaya bakıldığında bu bireylerin farklılıklarından dolayı zaman zaman ayrımcılığa maruz kaldığı görülebilir. Bu türden uygulamalar günümüzde bir hak ihlali olarak değerlendirilmektedir. Çünkü insan hakları açısından vatandaşların, eşit ve adil bir şekilde hizmet-yardım almaları gerekir. Buradaki etik ilke “Her insan doğuştan değerli ve saygıyı hak eden bir varlıktır.” şeklinde ifade edilebilir. Bu ilke ile beraber yaşlılık, toplumsal cinsiyet, dil, din, etnik köken vb. konulara karşı duyarlı olmak gereği ortaya çıkmıştır.

Literatüre bakıldığında toplumda dezavantajlı grupların (yaşlı, kadın, engelli vb.) ayrımcılığa maruz kalma olasılıklarının daha yüksek oldukları görülmektedir. Bu kişilere hizmet-yardım söz konusu olduğunda dolayı ayrımcılık karşıtı - tarafsız bir uygulamayı hayata geçirmek gerekmektedir. İnsanlara hizmet-yardım alanında günlük hayatta çoğu zaman karşılaşılan olumsuz durumlarda yeterli bilgi ve farkındalığın olmadığı görülmektedir.

AYRIMCILIK NEDİR?

Yardım-hizmet alanında, farklılıklarından (biyolojik, kültürel, sosyal, etnik vb.) dolayı ötekileştirilen insanların sorunlarının çözümünde yetersiz kalınması, farklı anlayışların meydana gelmesine neden olmuştur. Ayrımcılık karşıtı uygulama bu uygulamalardan biridir. Ayrımcılık karşıtı uygulama, insan ve insanların sahip oldukları yaşlılık, toplumsal cinsiyet, dil, din, etnik köken vb. farklılıkları nedeniyle maruz kaldıkları her türden sözlü ve sözlü olmayan, olumsuz tutum ve

AFETLERDE ETİK YAKLAŞIM

bakış açısına önem vermelidir. Ancak bu sayede yapılan hizmetin değerlendirilmesi, geliştirilmesi, etik ilkelere uygun ve ayrımcılık olmadan yapılması mümkün olacaktır.

BÖLÜM 3

İNSANİ YARDIM

GİRİŞ

Günümüz dünyasında giderek artan savaşlar, kıtlık, iklimsel kriz, afetler, ulusal ve uluslararası çatışmalar, kaynakların dağıtımındaki veya kaynaklara ulaşımındaki eşitsizlikler bireysel yaşamlardaki, gelir kaynaklarındaki, bölgesel ve ulusal istikrardaki sürdürülebilirliğin tehlikeye girmesine ve insani ihtiyaçların giderek artmasına neden olmakta, beraberinde global kalkınma planlarının sekteye uğramasına yol açmaktadır.

Doğal ya da insan kaynaklı afetler veya süreçler ortaya çıktığında mağdurlara insan onuruna yakışır bir hayat için yardım ederek acıyı hafifletmek ve hayata bağlamak insani yardımın gelişimindeki temel motivasyondur.

İnsani yardıma odaklanmış birçok ulusal ve uluslararası kuruluş, devlet kökenli kuruluşlar, sivil toplum kuruluşları (STK), özel sektör ve gönüllüler bu alandaki ana aktörlerdir. Tarafsızlık, insancılık, bağımsızlık, yansızlığın temel değerler olarak kabul edildiği ve hesap verebilirliğin ön plana çıkarıldığı etkin ve etik insani yardım ile kırılğanlığın azaltılması sağlanabilir.

Kitabın bu bölümünde; insani yardımın tanımı, amacı, insani yardımın temel prensipleri ve standartları, insani yardım gerektiren durumlar, insani yardım paydaşları, insani yardım çeşitleri ve insani yardımın etik hususlara yönelik görünümü aktarılmaya çalışılmıştır.

İNSANİ YARDIM TANIMI

İnsani yardım terimi birçok açıdan farklı ele alış tarzlarına odaklanmaya izin verebilen bir kavramdır. Bu durum çok sayıda tanımlamayı ve bunlardan kaynaklanan felsefi ve ideolojik tartışmaları da beraberinde getirir. Tanımlar, insani yardımı sağlayan tarafın fikirleri, motivasyonları, tutumları, inançları, ideolojileri, duygu-

Alışıl gelmiş uygulamalarda, insani yardım söylemleri, çatışan değerleri çözmez ve etik sorunları tanımlamaz ve açıkça adlandırmaz (Clarival ve Biller-Andorno, 2014). İnsani yardım personelleri -çoğunlukla eğitim derecesi, uzmanlık alanı gibi konularda heterojen bir grup- çoğu zaman yönetim ile ilgili ve ya jeopolitik sorunlar yaşamaz, sorunların kaynağı büyük oranda sınırlı kaynakların tahsisi gibi durumlar nedeniyle ortaya çıkar (Asgary ve Lawrence, 2020; Hurst, Mezger ve Mauron, 2009) Bu ve benzeri durumların etik sonuca ulaştırılması ve insani yardım personeline saha içi rehber olacak çerçevenin belirlenmesi gerekir. Açıklığa kavuşturulmayan ikilemler insani yardım personeline tükenmişliğe, ahlaki sıkıntılara, psikolojik istikrarsızlığa neden olabilir (Asgary ve Lawrence, 2020).

İnsani yardım kuruluşlarına, etkin ve insancıl faaliyetler sergileyebilmeleri, personeline ortaya çıkabilecek olumsuz sonuçlardan kaçınabilmeleri ve etik yetkinliğe ulaşabilmeleri için aşağıdaki yaklaşımlar önerilebilir (McGowan vd., 2020):

- İnsani yardım personeli için pratik etik rehberlik hizmeti sunulmalıdır.
- İnsani yardım kuruluşlarınca bünyelerindeki etik alan araştırmaları desteklenerek genişletilmelidir.
- Kurum içi ve sahada etik müzakere ve uzlaşma kültürü teşvik edilmelidir.
- Etik ikilemlerde karar verme araçlarını kullanılmalıdır.
- Ahlaki-etik sıkıntı içindeki personel kurumsal olarak desteklenmelidir.

İnsani yardım sektörünün etik hususlar konusunda ele alması gereken bir başka bakış açısı da yardımdan faydalananların etik deneyimlerine dair görüşlerinin alınıp sonraki yaklaşımlar için değerlendirilmesidir (Asgary ve Lawrence, 2020).

BÖLÜM 4

MESLEK ETİĞİ

GİRİŞ

Globalleşen dünyada kitle iletişim teknolojilerinin çok hızlı gelişmesi ile birlikte insan yaşamının neredeyse tamamının etkileneceği yeni gelişmelerle karşılaşmaktadır. Bu gelişmeler toplum yapısını etkilemekte ve değişimlere sebep olmaktadır. Toplum yapısında önem teşkil eden insan davranışları; psikoloji, yönetim bilimi ve hukuk disiplinlerini ilgilendirdiği kadar etik disiplini de etkilemektedir. Çünkü insan davranışlarının ahlaki boyutu toplumda sosyal düzeni sağlamak açısından oldukça önem taşımaktadır. İnsanlar buldukları yaşam alanlarını sosyal, siyasal, ekonomik ve kültürel açıdan doğrudan etkileyen davranışlar sergileyip yaşanacak gelişmelere ve değişimlere öncülük etmektedir. Yaşanan değişim ve dönüşümler insan davranışları, toplumların sahip oldukları değer yargıları ve toplumsal, bireysel ideolojiler üzerinde de köklü değişiklikler meydana getirmektedir. Bu bağlamda hızlı değişimler neticesinde oluşan dinamik yapı da, etik sorunları da beraberinde getirerek etik, ahlak, değerler gibi kavramların irdelenmesini gerektirmektedir.

Etik konusu sosyal bilimcilerin uzun senelerdir tartıştıkları, tanımlamaya çalıştıkları, insanlık tarihi kadar eski bir konudur. Etik iyi ve kötü, doğru ve yanlış vb. kavramların ayrımını yapabilmek için norm ve ilkeler oluşturmaya çalışan bir bilimdir (Frankena, 2007: 36). Etik kavramı, ahlak kavramıyla aynı anlamda kullanılsa da her ikisinin de birbirinden farklı kavramlar olduğu sonradan anlaşılmıştır. Ahlak etiğin araştırma alanıdır bu nedenle etiğin tanımı yapılırken ahlak üzerinde durulmaktadır. Etik, ahlak yasalarının sistematize ve standardize edilmiş hâlidir. Aristoteles, Kant gibi bazı filozoflar ahlakın felsefi düzlemde incelenmesini etik olarak nitelendirmektedir. Etik insanların eylemlerini bazı standartlar doğrultusunda doğru veya yanlış olarak değerlendirir. Bu nedenle etik için en önemli husus insan eylemidir. İnsan “düşünen” ve “eylemde bulunan” bir varlık olarak

BÖLÜM 5

AFET YÖNETİMİNDE ETİK

GİRİŞ

Afetler “Toplumun tamamı veya belirli kesimleri için fiziksel, sosyal, ekonomik kayıplar doğuran, normal hayatı ve insan faaliyetlerini durduran veya kesintiye uğratan, beklenmeyen bir anda ortaya çıkan doğal ya da insan kaynaklı olaylar”dır (Oktay 2023). Bu yönüyle afetler hayatın kaçınılmaz bir parçasıdır. Toplumların afetlerle karşılaşma riski ve tehlikesi altında olmaları, afetlerin hem anlık hem de uzun vadede etkilerinin olması, afetlerle birlikte yaşama becerilerini geliştirmelerini zorunlu kılmaktadır (Akyel 2007).

Her yıl milyonlarca insan afetlerden etkilenmekte, çok sayıda can kayıpları ve yaralanmalar yaşanmakta bunun yanında ciddi ekonomik kayıplar oluşmaktadır. Afetler toplum, ekonomi ve çevre üzerindeki etkileri nedeniyle sürdürülebilir kalkınmayı tehlikeye atar. Çevresel bozulma, her türlü eşitsizliği artırarak ve risklerin artmasına katkıda bulunarak ekonomik ve sosyal kırılganlığı artırmaktadır (Prieur 2010).

“Çağdaş Afet Yönetimi” afetlerin önlenmesi ve zararlarının azaltılabilmesi için afete yol açabilecek tehlike ve risklerin iyi bilinmesini, gerekli önlemlerin önceden alınmasını, en akılcı yol ve yöntemlerle ortadan kaldırılmasını veya yol açabilecekleri olumsuz etkilerin azaltılmasını gerektiren bir mücadeledir. Bu mücadele içerisinde, her bir vatandaşın en yetkili makamlara kadar, herkese görev ve sorumluluk düşmektedir (Erkal ve Değerliyurt 2011; Jenson 1997).

Son yıllarda başta Birleşmiş Milletler (BM) olmak üzere, pek çok uluslararası kuruluş, afet yönetiminde etiğin önemi üzerinde durmaktadır. Özellikle afetzedelerin

- Risk azaltma çalışmaları öncelikli olarak ele alınmalı, acil eylem planı hazırlanarak toplumun tüm kesimi ortak sorumluluk ve iş birliği içinde hareket etmelidir.
- Ülkemizin çeşitli afetler açısından yüksek riskli olması nedeniyle eğitim öğretimin tüm aşamasında okullardaki müfredatlara afet etiği ile ilgili konular eklenmelidir.
- Toplumun afet etiği konusunda bilinçlendirilmesi için eğitim materyalleri hazırlanmalı, bunların kullanımında medya, görsel işitsel araçlardan faydalanılmalıdır.
- Afete müdahalede afet öncesi, afet anı ve afet sonrası dönemin özelliklerine göre etik yaklaşım ilkelerine özen gösterilmelidir.
- Nüfusun özellikle korunmasız gruplarına (çocuklar, yaşlılar, sağlık bakımındaki ve cezaevlerindeki bireyler, engelli kişiler) hoşgörü, merhamet, saygı çerçevesinde insanca davranmalı bakımını planlamak için özel çaba gösterilmelidir.

BÖLÜM 6

AFET ÖNCESİNDE ETİK İLKELER

GİRİŞ

Afetler, aniden ölüm veya ölüme neden olan olağanüstü olaylardır. Çok sayıda insanın yaralandığı bir felaket bir durumdur ve en önemlisi yerel kapasiteyi aşan bir olaydır ayrıca hem ulusal hem de uluslararası düzeyde dış yardım talebinde bulunduğu durumdur. Afetlerin diğer büyük ölçekli olaylardan farkı çok sayıda insan için korkunç sonuçlar doğuran sorunlar ve normal günlük yaşamda kabul edilebilir hayati tehlike derecesidir (Beck, 1992).

Afetlerde karşılaşılabilecek spesifik sorunların önceden tahmin edilmesi, olayların dinamik ve öngörülemeyen doğasından dolayı zorlayıcı olabilmektedir. Ancak çeşitli afet türleri sırasında ortaya çıkma eğiliminde olan ortak sorun kategorileri vardır. Bu kategorileri anlamak, daha iyi hazırlıklı olma ve müdahale çabalarına yardımcı olabilir. Bu sorunların niteliğinin ve kapsamının, afetin türüne (doğal, teknolojik, biyolojik vb.) ve özel koşullara bağlı olarak büyük ölçüde değişebilir (Bellah ve ark., 1985; Davis. & Fowler, 2010; Allen, 1993; Anonymous, 1999; Beatley, 1989).

AFETLERDE KARŞILAŞILABİLECEK SPESİFİK SORUNLAR

Afetlerde karşılaşılan sorunlar, afetin türüne, ölçeğine, konumuna ve etkilenen nüfusa bağlı olarak büyük ölçüde değişiklik gösterebilir. Farklı afet türlerinde karşılaşılabilecek bazı spesifik sorunlar şunlardır;

İletişim Arızaları

Kesintiye uğrayan iletişim ağları, kritik bilgilerin yayılmasını engelleyebilir, bu da karışıklığa ve müdahale çabalarında gecikmelere neden olabilir. Ayrıca bilgi ve söylentiler hızla yayılarak paniğe ve yanlış bilgilendirilmiş kararlara yol açabilir.

toplulukların ihtiyaç ve haklarına saygı gösterilmesini sağlayabilir. Topluluklar, bu etik ilkeleri afete hazırlık planlarına ve politikalarına entegre ederek kriz zamanlarında bireylerin refahını ve haklarını daha iyi koruyabilirler.

BÖLÜM 7

AFET SIRASINDA ETİK İLKELER

GİRİŞ

Dünyada özellikle içinde bulunduğumuz yüzyılda çeşitli afetler ile karşılaşmıştır. Ülkeden ülkeye farklılık gösteren saldırılar, depremler, tsunamiler, nükleer santral kazalar, terör ve salgın hastalıklar gibi bir dizi doğa ve insan kaynaklı afetler yaşamış ve literatüre her geçen gün yenileri eklenmektedir (Usta ve Yükseler, 2021). Bunların yanı sıra iklim değişikliğine bağlı olarak iklim göçleri, iklim mülteciliği bunlar dışında iklim ile ilişkili sel, kuraklık, taşkın, çölleşme gibi afetlerin sayısı ve şiddetinde artışlar olmuş (Usta ve Yükseler, 2021) ve bunlara ek olarak ülkemizi derinden etkileyen 6 Şubat 2023 Kahramanmaraş merkezli deprem insanlık için ağır sonuçlar doğurmuştur.

Afet sırası dönemi, müdahale çalışmalarının yapılmış olduğu dönem olarak bilinir. Ayrıca bu dönem karmaşa ve krizin olduğu dönemdir. Afet öncesinde yapılmış olan planların ve türlü önlem hazırlıklarının yaşama geçtiği kritik öneme sahip bir dönemdir. Afet bölgesinde, insan haklarını ihlal edecek birçok farklı durum ortaya çıkmaktadır. İlk olarak mevcut düzen bozulur, bireyler temel ihtiyaçlarını karşılamak için yardıma ihtiyaç duyarlar, aile yapısı parçalanabilir, ciddi nüfus hareketleri meydana gelebilir (Ekşi, 2015). Afet sırasında bu kriz döneminde tüm dikkatlerin toplanmış olduğu aşama, yapılan hazırlıkların son aşamasıdır. Bu aşamanın başarılı olması diğer aşamaların başarısıyla doğrudan ilişkilidir (Gökkaya ve Dinç 2020; Kaya, 2013). Bu dönemde en önemli hedef mümkün olduğunca yüksek sayıda insanın hayatını kurtarmak esastır. Bunun yanı sıra temel ihtiyaçların karşılanması, geçici barınma önlemlerinin alınması ve güvenliğin sağlanması gereklidir. Tüm bunlarla birlikte hayatı tekrar normale döndürme çalışmaları afet öncesi dönemde yapılan plan ve programların hazır ve etkin olmasıyla mümkündür (Gökkaya ve Dinç 2020; Bilik, 2015).

SONUÇ

Afet sırasında etik ilkeler, farklı kültür, inançlara ve değerlere sahip bütün insanlar için tüm insanları gözeterek evrensel olmalıdır. Ayrıca afetzedelerin ve afete müdahale ekiplerinin hassasiyetleri göz önünde bulundurulmalıdır. Ayrımcılık yapmaksızın tüm insanların afet durumunda acil yardım alması, bu etik ilkeler bakımından oldukça önemlidir. Önemli bir konu olarak yağmacılığın önüne geçilmesi, bunu fırsat bilen kişilere izin verilmemesi olmalıdır. Bir diğer önemli konu da çevrenin korunması ve yeniden iyileştirme sürecine başlanmasıdır. Özellikle afetten etkilenmiş insanların ibadet, toplanma yerlerinin ve afetzedelerin boş zamanlarında geçirebilecekleri sosyal aktiviteler oluşturabileceği ortamların oluşturulmasının da “afet sırası etik ilkeler”in en önemli öğelerinden biri olması gerekir.

BÖLÜM 8

AFET SONRASINDA ETİK İLKELER

GİRİŞ

Neyin doğru, neyin yanlış olduğuna ilişkin davranış kuralları ve ahlaki yargıların incelenmesi olarak tanımlanan etik kavramı kritik zamanlarda ön plana çıkmaktadır (Geale, 2012). Özellikle afet gibi kaotik durumlarda etik ikilemler ön safta görevli kişiler tarafından iyi uygulanmalıdır. Sıradan hayat durumları için oluşmuş etik ilkelerin, afet dönemlerinin olağan dışı şartlarında geçerliliğini ve etkisini koruması zor bir durumdur. Etik yükümlülük olarak yönetimden, başlıca kayırmacılık ve ayrımcılığı engellemesi, halkla uyum içinde, sert ve hiyerarşik bir idare anlayışının dışında, katılım mekanizmasını kullanan, saydam ve hesap verebilir bir idare anlayışını benimsemesi beklenir. Afetlerde etik ilkeler, hem yönetime hem de halka ışık tutan önemli bir faktördür (Gökkaya ve Dinç, 2020). Bu bölümün hazırlanmasında kavramsal çerçeve oluşturulurken iki önemli nokta dikkate alınmıştır. Bunlardan birincisi afet yönetimi döngüsü, diğeri ise uluslararası Kızıllaç örgütünün benimsemiş olduğu etik ilkelerdir. Afet ve acil durumların etik yönetimi, afet yönetiminin hafifletme, planlama, müdahale ve iyileştirme döngüsünün bir parçası olarak iletişim, eğitim ve öğretim, farkındalık oluşturma, kaynak edimi ve planlama ve tahsisi içeren karmaşık bir iştir. Afet yönetiminin temel amacı elbette önlemedir. Afet meydana geldiğinde zamanında, etkili, kültürel açıdan duyarlı ve cinsiyete uygun bir müdahale hayata geçirilmelidir. Böyle bir müdahale, afetten etkilenenlerin, müdahale edenlerden farklı adalet standartlarına ve etik geleneklere sahip olabileceğini kabul etmelidir. Bu nokta özellikle uluslararası ortamda doğrudur. Bu tür farklılıkların tanınması ve takdir edilmesi, mağdurun onurunun korunmasına ve sürdürülebilir iyileşmeye yönelik çalışmalara yardımcı olur (Geale, 2012).

aştıkça ve gelişmiş ve gelişmekte olan ülkelerdeki toplumlar içinde ve arasında var olan küresel bölünme ve eşitsizlikler arttıkça bu tür zorluklar da artmaktadır. Gelişmiş ülkelerden kendi çalışmaları için araştırma tamamlamak isteyen doktora öğrencilerinin gelişini anlattı. Bazı durumlarda mağdurlar anketi yanıtlayanlar tarafından tacize uğramış hissettiler ve çoğu durumda yerel bilgi ve toplumsal gelenek eksikliği kültürel hassasiyetleri rahatsız eden durumlar yarattı. Ancak araştırmacılar ve etik uzmanları bu tür sorunların üstesinden gelmek için birlikte çalışabilirler (Geale, 2012).

BÖLÜM 9

AFETLERDE ÇEVRE VE ETİK

GİRİŞ

Canlı bir sistem üzerinde etkili olan ve onun biçimini, işlevini ve hayatta kalmasını etkileyen fiziksel, kimyasal ve biyotik faktörlerin bileşimi çevre olarak tanımlanır. Bir kişinin çevresi, onun ana rahmine düşmesinden ölümüne kadar aldığı uyarıların toplamı olarak da tanımlanabilir (Singh, 2006; Chu ve Karr, 2017). Yüksek yaşam kalitesi ve tüketicilerin gereksinimleri nedeniyle temel çevre sorunu önemli ölçüde artmıştır. Çağdaş toplumlar için gerekli olan kozmetikler, böcek ilaçları, kişisel bakım ürünleri, steroid hormonları, tehlikeli kimyasal atıkların boşaltılması, pestisitlerin dağıtılması, biyolojik olarak parçalanamayan malzemelerin kullanımı, gübrelerin kullanımı, zararlı sera gazları ve çamurun bertaraf edilmesi gibi ciddi tehlikelere neden olan çok sayıda çevresel tehlike vardır (Khan vd., 2022).

Çevre etiği, insanın doğal çevreyle olan etik ilişkisiyle ilgili olup insanın çevreyle ahlaki ve etik ilişkisini dikkate alan ve insanların, insan olmayan dünyanın (insan olarak kabul edilmek için yeterli olmayan bazı insani özellikler sergileyen herhangi bir varlık) korunması ve bakımına yönelik ahlaki yükümlülüğüne dayanan felsefi bir disiplindir. Doğru ve yanlış kavramı ya da değerler kişiden kişiye ve zamana göre değişse de evrensel olarak kabul edilmiş bazı etik ilkeler vardır. İnsanlığa çevreyi koruma konusunda yardımcı ve yol gösterici olabilecek evrensel olarak kabul edilmiş bu ilkeler etik değerlerdir. Çevre etiği, insanın çevreyle ahlaki ve etik ilişkisini ele alan felsefi disiplin olarak tanımlanabilir. Dolayısıyla insanı çevreyi doğru şekilde yönetmeye zorlayan bir etik değerler sistemidir (Jazib, 2018).

Geleneksel olarak çevre etiği afet alanında zayıf bir rol oynamıştır ancak iki sebepten dolayı giderek önem kazanmıştır. Birincisi, doğal sistemlerin bozulmasının doğal afetlerin daha şiddetlendirmede oynadığı rolün giderek daha fazla tanınmasıdır. ABD'de 7 eyalette yaklaşık 2 bin kişinin hayatını kaybetmesine neden olan

AFETLERDE ETİK YAKLAŞIM

- Doğa yalnızca insanlar için değil yeryüzünde bulunan tüm türler için vardır.
- Doğal kaynaklar sınırlıdır ve yalnızca insanlara veya şimdiki insan nesline ait olmayıp diğer yaşam formları ve gelecek nesiller de dâhil olmak üzere herkes tarafından paylaşılmaktadır.
- Ekonomik büyüme, dünya ortamına en az zarar verene kadar iyidir.
- Sağlıklı bir ekonomi sağlıklı bir çevreye bağlıdır.
- İnsanlığın başarısı, doğanın geri kalanını kendi çıkarımız için kullanmaya çalışırken onlarla en iyi şekilde nasıl iş birliği yapabileceğimize bağlıdır (Jazib, 2018).

Modern çevre etiği alanı 1970'lerde ortaya çıkmıştır. Çevre etiğine ilişkin ilk akademik konferans 1971 yılında Georgia Üniversitesinde düzenlenmiş, ilk dergi "Çevre Etiği" 1978'de yayım hayatına başlamıştır. 1980'lerden itibaren çevre etiğine ilişkin araştırma, yayım ve öğretim hızla genişlemiştir (Palmer, 2014). Çevre etiği 1970'lerin başında felsefenin yeni bir alt disiplini olarak ortaya çıkması, bunu geleneksel insan merkezciğe meydan okuyarak yapması, ilk olarak, insanların yeryüzündeki diğer türlerin üyelerine karşı varsayılan ahlaki üstünlüğünü sorgulamıştır. İkinci olarak, doğal çevreye ve onun insan dışı içeriklerine içsel değer atamak için rasyonel argümanların olasılığını araştırmıştır (Brennan ve ark., 2022).

BÖLÜM 10

AFETLERDE HAYVAN HAKLARI VE ETİK

GİRİŞ

Hayvanlar, insanlara sadece geçim kaynağı ve üretken varlıklar olarak değil aynı zamanda psikolojik olarak da insanların hayatında büyük bir öneme sahiptir. Birçok insan hayvanları yaşamlarının ayrılmaz bir parçası olarak kabul eder, onlarla yaşar, onlara değer verir ve ailelerinin bir parçası gibi görür (Thompson vd., 2014). Bu nedenle hayvanlarını kaybettiklerinde büyük bir üzüntü yaşayabilirler. Hayvan haklarına ve korunmasına yönelik çeşitli yasal ve toplumsal çabalara rağmen afet ve acil durumların hayvanların haklarına nasıl etki ettiği genellikle yeterince ele alınmamaktadır. Kitabın bu bölümü hayvanların afetlerde yaşayabileceği sorunları, evcil hayvan sahiplerinin yaşayabileceği travmaları ve müdahale ekiplerinin yaşayabileceği zorlukları ele almayı amaçlamaktadır.

AFETLERDE HAYVAN HAKLARI VE ETİK

Afetler, zenginlik, coğrafya veya ülke ayrımı yapmaksızın herkesi etkileyebilir ve hayvanların yaşamı da tehlikeye girebilir (Sawyer ve Huertas, 2018). Afetler, insanların gıda güvenliğini tehdit edebilir ve maddi kayıplara neden olabilir. Bu da toplum sağlığını olumsuz etkileyebilir. Özellikle hayvanlara dayalı geçim kaynaklarına sahip olan insanlar, afetlerden daha fazla etkilenebilirler. Bu kişiler hem sahip oldukları hayvanları hem de geçim kaynaklarını kaybedebilirler. Sonuç olarak, afetler sadece insanlara değil aynı zamanda hayvanlara da zarar verebilir ve bu nedenle afet durumlarında hayvan haklarına ve refahına daha fazla dikkat gösterilmesi gerekmektedir. “Evcil hayvan sahipliği”, hem insanlar hem de hayvanlar için doğal afetlerin etkilerine karşı artan hassasiyetle ilişkilidir. Birçok bakıcı (“sahip”), evcil hayvanlarını yanlarında götüremezlerse afet bölgesinden tahliye olma- yabilir ve bu nedenle hem kendilerini hem de evcil hayvanlarını artan yaralanma veya ölüm riskine maruz bırakırlar. Ancak bazı sahipler, evcil hayvanlarını terk

ULUSAL ARAMA VE KURTARMA MEVZUATI

GİRİŞ

Arama ve kurtarma, afet veya acil durumun yaşanmasıyla birlikte etkilenen birey veya bireylerin yerlerinin tespit edilmesi ve kurtarılmasını amaçlayan bir faaliyet alanıdır. Yaşanan olayın türü ve yerine göre söz konusu krizler karşısında gerçekleştirilecek arama kurtarma faaliyetleri çeşitlenmekte ve her biri için özel ekip ve ekipman gerekliliği doğmaktadır. Nitekim literatürde arama kurtarma faaliyetlerinin, olay türlerine göre farklı şekillerde sınıflandırıldığını görmek mümkündür. Ulusal mevzuat açısından bakıldığında arama kurtarma faaliyetlerinin iki ana ekseninde şekillendiği görülmektedir. Denizde ve havada meydana gelen acil durumlarda arama kurtarma faaliyetleri bir eksen oluştururken karada meydana gelen afet ve acil durumlarda arama kurtarma faaliyetleri diğer eksen oluşturmaktadır. Bu bağlamda arama kurtarma faaliyetleri, *denizde ve havada arama kurtarma* ve *karada arama kurtarma* olmak üzere iki ana başlıkta sınıflandırılabilir. Buradaki her bir başlık altında farklı türde olayların gerçekleşmesinden dolayı arama kurtarma faaliyetine göre alt türlerin olduğunu söylemek mümkündür. Ayrıca bilimsel ilerlemeler, hızlı nüfus artışı, afet ve acil durumların sayısının artması, iklim değişikliğinin etkilerinin giderek hissedilmesi gibi birçok unsura bağlı olarak gelecekte farklı türde olayların yaşanması hâlinde arama kurtarma faaliyetlerinin sayısının ve türlerinin artabileceği de söylenebilir. Örneğin havacılık sektörünün gelişmesi ve hava araçlarının atmosfer dışına çıkması gibi durumlar neticesinde havada arama kurtarma çalışmaları ortaya çıkmış ve günümüzde atmosfer içi ve atmosfer dışı olmak üzere iki alt türü bulunmaktadır. Bunun yanı sıra, son yüzyılda Orta Doğu'da ve Afrika kıtasında gerçekleşen iç çatışmalar ve savaşlar sonucunda bireylerin yasal olmayan yollardan ve uygun olmayan deniz araçları ile Avrupa kıtasına

melerin yeterli olmadığı görülmektedir. Bu bağlamda yasal ve idari düzenlemelere ihtiyaç duyulmaktadır.

BÖLÜM 12

INSARAG YAKLAŞIMI

GİRİŞ

Afetler, acil durumlar, engellenemeyen doğa olayları, insan eliyle yaratılan kriz ve kazalar gibi yeni dünyanın kaçınılmaz gerçekleri her geçen gün sayıca artmakta, neden oldukları yıkımlar gittikçe daha da şiddetli olmaktadır. Tüm ülkeler de yıkımları azaltmanın yollarını aramaktadır.

Afet zararlarını azaltmada hazırlık, müdahale ve rehabilitasyon dönemleri için yapılan çalışmaların yanında tüm dünyanın iş birliğini zorunlu kılacak tecrübeler de neredeyse hemen her gün yaşanmaktadır. Gelişmiş ülkelere göre daha dezavantajlı durumda olan az gelişmiş ve gelişmekte olan ülkelerde afet yıkımı daha büyük çaplı olmaktadır.

Dünyanın büyük deprem tecrübelerinden olan 1985 Meksika ve 1988 Ermenistan depremlerinde beraber çalışan Kentsel Arama Kurtarma (USAR) oluşumunun ardından 1991 yılında yeni ve daha büyük çaplı bir insani ağ gelişmiştir. Bu Uluslararası Afet Zararlarının Azaltılması Stratejisinin (ISDR) uygulamasına katkı sağlayan bir ağ oluşumudur. Sivil toplum kuruluşları (STK), Birleşmiş Milletlere (BM) bağlı ülkelere memurlar, USAR uygulayıcıları ve yetkin afet yöneticilerinden oluşan bir sivil inisiyatif birliği olarak “International Search and Rescue Advisory Group: Uluslararası Arama ve Kurtarma Tavsiye Grubu” (INSARAG) meydana gelmiştir. Oluşum temeli BM’nin 2002 yılında uluslararası yardımların eş güdümüne dair aldığı kararlara dayanmaktadır (Pekkan vd., 2018; INSARAG, 2023a).

INSARAG afetten çöküş yaşayan bir ülkeye ilkeli ve etkin şekilde USAR yardımı hazırlayıp harekete geçirme, ulusal ve uluslararası çapta kapasite

INSARAG kurumsal internet sitesi (INSARAG, 2023a), INSARAG hakkındaki genel bilgilerle beraber daha önceki faaliyetler ve gelecekteki etkinlik planları ve kılavuzların yönergeleriyle ilgili paylaşımlar yapar (INSARAG, 2023b). INSARAG USAR Dizini; INSARAG üyesi devletler, STK'lar ve bunların USAR ekiplerine ilişkin ayrıntıları içeren özgün bir veri tabanıdır. Dizin aynı zamanda Politika ve Operasyonel Odak Noktalarıyla ilgili kurumsal iletişim bilgilerini de içerir.

Arama-Kurtarma (USAR) ekipleri uzmanlık ve kapasitelerine göre Hafif, Orta ve Ağır sınıf Arama Kurtarma ekipleri olarak da kategorilere ayrılır.

BÖLÜM 13

ULUSLARARASI ARAMA KURTARMA MEVZUATI

GİRİŞ

Mevzuat uygulamada var olan hukuk kurallarını tanımlayan bir terimdir. Mevzuat belirli bir alanda yapılacak faaliyetlerin sınırlarını, ölçülerini belirlemekte ve aynı zamanda o işi mevzuata uygun yapan kişileri korumaya almaktadır. Mevzuatın getirdiği kurallar herhangi bir faaliyeti gerçekleştiren kişilerin o iş dolayısıyla sorumlu tutulup tutulamayacağını da belirlemeye yaramaktadır. Afet veya acil durumlarda hasta/yaralının yerinin belirlenmesi ve tehlikeli bölgeden güvenli bölgeye nakledilmesi süreçlerini içeren arama kurtarma faaliyetleri de belirli mevzuat kuralları çerçevesinde yürütülmelidir (Kılıç, 2015; Sevim, 2023).

Afetlerin oluş sayıları ve etkisi her geçen gün artmaktadır. Afetler nedeniyle her yıl birçok insan yardıma muhtaç duruma düşebilmektedir (Demirbilek, 2023). Büyük yıkımlara ve toplumların yaşamının yok olmasına neden olabilen afetlerle mücadele için iyi bir hazırlık, yetişmiş insan gücü ve güçlü bir mevzuat son derece önemlidir (Demirbilek ve Gökkaya, 2022). Mevzuat yapılan işlerin uygulanmasını ve denetlenmesini kolaylaştırmaktadır. Yaşanan afetler sonrası doğru bir şekilde gerçekleştirilen arama kurtarma faaliyetleri, can ve mal kaybını azaltılmasında önemli rol oynamaktadır. Bu durum arama kurtarma faaliyetlerinin belirli kurallar çerçevesinde yürütülmesinin önemini artırmaktadır. Bu kapsamda ülkeler kendi içlerinde afetlere müdahale kurumlarının işleyişi ve arama kurtarma faaliyetlerinin ne şekilde yürütülmesi gerektiğine dair farklı mevzuat düzenlemelerine sahiptir. Ülkeler içerisinde yürütülen arama kurtarma organizasyonları ülkelerin iç mevzuatı kapsamında ele alınarak yürütülmektedir. Bununla birlikte yapılacak arama kurtarma faaliyetlerinin gerçekleştirildiği sahanın ve alanın uluslararası bölge olması yapılacak faaliyetlerde dikkat edilmesi gereken kuralları da farklılaştırmaktadır.

da deniz sınırı gözetim operasyonlarının önemli ve ayrılmaz bir parçası olması gerektiği belirtilmektedir (European Commission, 2023a).

BÖLÜM 14

ARAMA KURTARMADA ETİK SORUMLULUKLAR

GİRİŞ

Doğa ve insan kaynaklı afetler, normal günlük yaşamı ve durumu zorlu bir hâle dönüştürmektedir. Çoğu zaman insanlar yıkılmış binaların içinde ya da güvenli olmayan koşulların ortasında sıkışıp kalırlar ya hayatlarını kaybeder ya da hayatta kalma şansları çok azdır. Afetler ile doğrudan ya da dolaylı etkileşim hâlinde olan arama kurtarma ekipleri de insanları güvenli bir şekilde kurtarmak ve afet durumunda ertelenen hayat akışını normale çevirmek üzere etkin bir rol oynamaktadır. Arama kurtarma ekiplerinin afetlere ve afet mağdurlarına karşı etik sorumlulukları bu yönden oldukça önem arz etmektedir.

Arama kurtarma ekipleri, afetzedenin durumundaki değişimleri ilk önce tespit eden ekipler olduğu için beklenmeyen durumda meydana gelen karmaşık problemlerle sıkça karşılaşmaktadır. Bu problemlerin büyük bölümünü etik problemler meydana getirir. Dolayısıyla afetzedeye yaklaşımda etik karar verme süreci isteyen durumlar ortaya çıkmaktadır (Eryiğit ve ark., 2011). Bir afet ve acil durumda arama kurtarma ekiplerinin en temel etik sorumluluğu afet bölgesine erken ulaşması ve olaya müdahale etmesidir. Arama kurtarma ekipleri, ellerindeki çeşitli araçları kullanarak çöken yapıların enkazları içinde hayatta kalanları aramak, bilgi toplamak ve kazazedelerin güvenli bir şekilde kurtarılmasını sağlamak için en uygun hareket tarzını benimsemekle görevlidir.

Afet bölgesinde ilk müdahale yapacak ekiplerin seçiminde, ekibin hızlı ve efektif olması, kurtarma ekipleri belirlenirken göz önünde bulundurulması gereken önemli faktörlerdendir. Hızlı ve efektif bir ekip, afetlerden sağ veya yaralı kurtulan bireyleri güvenli bir bölgeye yerleştirerek olası kayıpları en aza indirgeyebilir. Ekip-

SONUÇ

Afet ve acil durumlarda arama ve kurtarma ekipleri ile karar vericilerin insan haklarını dikkate alarak farklı kültürdeki insanların kültürel değerlerine ve inançlarına hitap etmesi, afet mağdurlarının hassasiyetini dikkate alması gerekmektedir. Ayrım yapılmaksızın tüm insanların bir afet ve acil durum anında acil yardım alması, etik sorumlulukların başında gelmektedir. Meydana gelen afet sonrası kurtarma çalışmaları ile diğer faaliyetleri engelleyecek ve etik olmayan yağmacılığa dikkat edilmeli, bu durumu fırsat bilen kişiler tespit edilerek afet bölgesinden uzaklaştırılmalıdır. Afet sonrası yeniden iyileştirme sürecine hızlıca geçilebilmesi ve çevrenin korunması, gerekli halk sağlığı tedbirlerinin en hızlı şekilde alınması gerekmektedir. Özellikle toplanma yerlerinde bulunan afet mağdurları için ibadethanelerin açılması ve boş vakitlerinde zaman geçirebilmeleri için sosyal aktiviteler oluşturup kişiler arası sosyal bağlantıları hızlıca kurmak afet sırası etik sorumlulukların oldukça önemli öğelerindedir. Her bir etik sorumluluk, tüm ekipler ve yetkililer için ayrı bir yükümlülük olmakla beraber arama kurtarma çalışanları bu sorumlulukları göz önünde bulundurmalı ve yerine getirmelidir. Afet sırası uyulan her etik sorumluluk afetzedeleri daha sıkı hayata bağlamaktadır. Bu bakımdan arama kurtarmada görevli ekiplerin etik sorumlulukları her bir insan hayatı için son derece önem arz etmektedir.

ULUSLARARASI ARAMA KURTARMADA ETİK

GİRİŞ

Geçmişten günümüze meydana gelen afetlere müdahalede arama ve kurtarma görevinin daha etkili olabilmesi için ulusal ve uluslararası seviyede çalışmalar yapılmaktadır. Bu çalışmalar, yerel veya ulusal seviyede arama kurtarma faaliyetlerini güçlendirirken bir taraftan uluslararası seviyede arama kurtarma yapan ekipler ile ortak bir iletişim, ortak bir dil konuşabilmek için iş birliğini gerektirmektedir. Farklı ülkelere mensup arama kurtarma ekiplerinin afetlere müdahale aşamasında düzenli ve sistematik çalışabilmesi için de sistem ve mekanizmalar geliştirilmektedir. Uluslararası arama kurtarma faaliyetlerinde etkinliğin sağlanması ve koordinasyonun güçlenmesini amaçlayan bu gelişmeler beraberinde arama kurtarmada etik değer ve davranışlar ilkelerini yaygınlaştırarak gündeme getirmektedir. Çünkü arama kurtarma faaliyetleri, kritik ikilemler ile oldukça sık karşılaşılabilen ve en kısa sürede, o an mümkün olan en doğru kararı verebilmek için, etik değerler, standartlar ve ilkelerin rehberliğine en çok ihtiyaç duyulan faaliyetlerdir. Uluslararası arama kurtarma operasyonlarının başarılı ve insan odaklı bir şekilde gerçekleştirilmesini sağlamak için insan hayatın saygı ve öncelik, profesyonellik ve uzmanlık, hızlı tepki, görgü kurallarına uygunluk, risk yönetimi ve güvenlik, eşitlik ve adalet, gönüllülük ve istek, mülkiyet ve saygı, insani yardım ilkelerine uygunluk, eğitim ve kapasite geliştirme, uzun dönemli destek, yerel toplulukların katılımı, çevre duyarlılığı ile iş birliği ve koordinasyon temel etik kurallarını içermesi gerekir.

Herhangi bir arama kurtarma faaliyeti gerektiren bir bölgede; Birleşmiş Milletlere (BM) üye ülkelerde arama kurtarma faaliyeti gösteren resmî kurumların ve BM çatısı altında bulunan üye ülkelerde uluslararası seviyede arama kurtarma faaliyet-

SONUÇ

Uluslararası arama ve kurtarma faaliyetleri, doğal afetler, kazalar, terör saldırıları gibi acil durumlarda insan hayatını korumak ve yardım etmek amacıyla yapılan önemli operasyonlardır. Bu türdeki faaliyetlerde etik sorumluluklar oldukça önemlidir çünkü insan hayatı ve refahı söz konusu olduğunda en üst düzeyde yeterlilik gerekmektedir. Uluslararası arama ve kurtarma operasyonlarında etik sorumluluklar, insan yaşamının korunması, profesyonellik, iş birliği ve toplumsal değerlere saygı gibi temel prensipler etrafında şekillenir. Her durumda, insani değerler ve etik standartlar gözetilmelidir. İnsan hayatına saygı, tarafsızlık ve adil yaklaşım, koordinasyon ve iş birliği, risk yönetimi, iletişim, çevresel koruma ve yerel kültüre saygı bu etik standartlardan bazılarıdır. Bu etik ilke ve sorumlulukların dikkate alınması, uluslararası arama ve kurtarma operasyonlarının başarılı bir şekilde sonuçlanmasında önemli bir rol oynamaktadır.

BÖLÜM 16

AFETLERDE İNFODEMİ

GİRİŞ

Afet, dilimize Arapçadan geçen bir kelime olup mecazen “olumsuz sonuçlar doğuran durum” ve gerçekte “çeşitli doğa olaylarının sebep olduğu durum” anlamlarında kullanılmaktadır (<https://sozluk.gov.tr/> , t.y.). Her ne kadar kelime anlamı doğa olaylarına atıfta bulunuyor olsa da literatürdeki afet sınıflandırmasında trafik kazaları, yapı çökmeleri, savaş, tehlikeli madde kazaları, yangın, patlama gibi durumlar insan eliyle meydana gelen afetlere örnek olarak listelenmektedir. Afetleri kaynağına, meydana geldiği yerin özelliklerine, önceden tahmin edilebilme durumuna, başlangıç şekline, süresine, sıklığına ve büyüklük belirteçleri gibi özelliklerine göre sınıflandırılmak mümkündür (Altıntaş, 2012; Waeckerle, 1991). Bu bölümde afetlerin tüm sınıflandırmalarından bağımsız olarak afetler kapsamında sağlık açısından yapılacak çalışmaların bilgi akışı ile etkilenmesinden bahsedilecektir.

AFETLER VE SAĞLIK HİZMETLERİ

Kurumların kaynak kapasitelerinin dalgalanması veya genişlemesinin afetlerde en önemli kavramlardan biri olduğu belirtilmektedir (Koçak vd., 2021). Kurumların afet nedeniyle hem malzeme hem de insan kaynaklarını kaybetmeleri ihtimali ile faaliyet kapasitelerinin azalması kadar bölgesel, ülke geneli veya uluslararası yardımlarla faaliyet kapasitelerinin artması ve gelen yardımların sonlandırılması ile yeniden kapasite daralması da yaşanabilmektedir. Mevcut malzeme ve uzman insan iş gücünün sağlık ekonomisi prensipleri çerçevesinde kullanılması ancak önceliklere göre gerekliliklerin ortaya konulabileceği sağlıklı bilgi akışı ile mümkündür.

Afetlerde normal zamanlardaki sağlık hizmetleri sunum konseptinden farklı olarak özellikle sahada çalışanlar için hastane öncesi alanda güçlü bir acil sağlık hizmet-

proje kapsamında faaliyet gösteren Avrupa Gerçeklik Kontrol Standartları Ağı (The European Fact-Checking Standards Network) bağımsızlık, şeffaflık ve gazetecilik kalitesi standartlarına bağlı olan bilgi doğrulama kuruluşlarından oluşan bir birlik olduğunu beyan etmektedir (<https://efcsn.com/>, t.y.) .Doğruluğundan tereddüt edilen bilgilerin kontrol edilmesi için bu tür birliklerin üyesi olan kuruluşlardan yardım alınabilmektedir.

SONUÇ

İnfodemi geleneksel medyanın, dijital medya kullanımına tacını devretmesi ile birlikte küresel bir sorun olarak ortaya çıkmıştır. Afet dönemleri gibi toplumun ve kurumların gerekli müdahale ve yardımları organize etmek için doğru bilgiye en fazla ihtiyaçlarının olduğu dönemlerde bilgi düzensizliği nedeniyle yanlış ve yanıltıcı bilginin ön plana çıkararak karışıklığa yol açtığı, hem tüm dünyayı etkileyen Covid-19 pandemisi boyunca hem de ülkemizdeki 10 ili etkileyen Kahramanmaraş merkezli iki depremden sonra gözlenmiştir. Bu durum afetlerde sağlık hizmet sunumunu planlamak için ihtiyaç duyulan bilgiye ulaşılmasını engelleyen bir olumsuzluktur. Bu olumsuz deneyimlerin tekrarlanmaması için bir sonraki olası afetten önce resmî kurum ve kuruluşların yöneticileri ve çalışanları ile birlikte dijital sosyal medyanın asıl kullanıcıları olan tüm halkın bu mecraaya yönelik okuryazarlıklarını geliştirmek için gerekli çalışmalar yapılmalıdır (Esen, 2021; Eyuboğlu ve Kodak, 2023).

İÇİNDEKİLER

ÖN SÖZ	iii
Birinci Bölüm - GASTRONOMİ	1
1.1. Gastronomi ile İlgili Temel Kavramlar	1
1.2. Gastronomi Turizmi	5
İkinci Bölüm - ARTVİN	9
2.1. Artvin İlinin Genel Özellikleri	9
2.1.1. Artvin İlinin Tarihi	9
2.1.2. Artvin İlinin Coğrafi Konumu	11
2.1.3. Artvin İlinin Fiziki Özellikleri	13
2.1.3.1. Yeryüzü Şekilleri	13
2.1.3.2. İklim	16
2.1.3.3. Bitki Örtüsü	17
2.1.3.4. Yaban Hayvanları	18
2.1.3.5. Yeraltı Suları ve Kaplıcalar	18
2.1.3.6. Toprak Özellikleri	19
2.1.3.7. Yeraltı Zenginlikleri	19
2.1.4. Artvin İlinin Beşerî Özellikleri	20
2.1.4.1. Nüfus Durumu	20
2.1.4.2. Ekonomik Durumu	22

2.2. Artvin İlinin Turizm Kaynakları	25
2.2.1. Artvin İlinin Doğal Turizm Kaynakları	25
2.2.2. Artvin İlinin Kültürel Turizm Kaynakları	31

Üçüncü Bölüm - ARTVİN GASTRONOMİSİ35

3.1. Artvin İlinin Tarihi ve Gastronomisi	35
3.2. Artvin İlinin Coğrafi Konumu ve Gastronomisi	36
3.3. Artvin İlinin Fiziki Özellikleri ve Gastronomisi	37
3.4. Artvin İlinin Nüfusu ve Gastronomisi	38
3.5. Artvin İlinin Ekonomisi ve Gastronomisi	39
3.6. Artvin İlinin Turizmi ve Gastronomisi	40

Dördüncü Bölüm - ARTVİN GASTRONOMİ DEĞERLERİ45

4.1. Artvin İlinin Mutfak Kültürü	45
4.1.1. Merkez İlçesi Mutfak Kültürü	47
4.1.2. Ardanuç İlçesi Mutfak Kültürü	48
4.1.3. Arhavi İlçesi Mutfak Kültürü	49
4.1.4. Borçka İlçesi Mutfak Kültürü	51
4.1.5. Hopa İlçesi Mutfak Kültürü	52
4.1.6. Kemalpaşa İlçesi Mutfak Kültürü	53
4.1.7. Murgul İlçesi Mutfak Kültürü	53
4.1.8. Şavşat İlçesi Mutfak Kültürü	54
4.1.9. Yusufeli İlçesi Mutfak Kültürü	55
4.2. Artvin İli Mutfağına Özgü Terimler ve Kavramlar	57
4.3. Artvin İli Mutfağına Özgü Araç - Gereçler ve Ekipmanlar	63
4.4. Artvin İli Mutfağına Özgü Pişirme Yöntemleri	67
4.5. Artvin İli Mutfağına Özgü Özel Gün ve Törenler (Ritüeller).....	70
4.6. Artvin İli Mutfağına Özgü Öğünler ve Servis Şekilleri	74
4.7. Artvin İli Gastronomisine Özgü Yöresel ve Tarımsal Ürünler	77
4.7.1. Çay	77
4.7.2. Mısır	78
4.7.3. Fındık	79
4.7.4. Karalahana.....	79

4.7.5. Kivi	80
4.7.6. Beyaz Patates	80
4.7.7. Fasulye	81
4.7.8. Isırgan Otu	81
4.7.9. Kuşburnu	81
4.7.10. Pazı	82
4.7.11. Zeytin	82
4.7.12. Karayemiş	83
4.7.13. Turunçgiller	83
4.7.14. İhlamur	84
4.7.15. Bal.....	84
4.7.16. Peynir ve Tereyağı	85
4.7.17. Su Ürünleri.....	86
4.7.18. Silor (Siron - Ziron - Sırın)	88
4.7.19. Ev Makarnası ve Erişte	88
4.7.20. Pekmez	89
4.7.21. Baharatlar	89
4.7.22. Reçel ve Marmelat	90
4.7.23. Pestil ve Köme	90
4.7.24. Diğer Ürünler	91
4.8. Artvin İli Gastronomisine Özgü Coğrafi İşaretli Ürünler	93
4.9. Artvin İli Gastronomisine Özgü Yemekler ve Bazı Yemeklerin Reçeteleri	95
4.9.1. Çorbalar	96
4.9.2. İştah Açıcılar ve Atıştırma İçecekleri	98
4.9.3. Sebze ve Ot Yemekleri	101
4.9.4. Et ve Balık Yemekleri	104
4.9.5. Hamur İşleri Ürünleri	106
4.9.6. Tatlılar ve İçecekler	109
4.10. Artvin İlinin Gastronomi Değerleri	111
KAYNAKÇA	115

1. BÖLÜM

GASTRONOMİNİN TARİHİ VE GELİŞİM SÜREÇLERİ

Hüsniye Koçak Başaran

Giriş

Değişen ve gelişen dünyada yemek olgusu değişmiş ve karşımıza gastronomi kelimesini çıkarmıştır (Karaköse, 2023). Gastronomi, insanların sofraya düzenlerinden yiyeceklerine kadar her ayrıntıyı kapsayan ve sürekli gelişim gösteren bir bilim dalıdır (Özdemir, 2022). Gastronomi mutfak sanatı, başka bir ifade ile güzel pişirme akademisidir (Küçükaslan ve Baysal, 2009).

Gastronomi kelimesi, Yunanca “gastros” (mide) ve “nomos” (yasa) kelimelerinin birleştirilmesiyle meydana gelmiştir. “Gastro” sözcüğü mide ve tüm sindirim sistemini kapsayan bir kavram, “Nomos” sözcüğü ise kural ve düzenlemeler olarak tanımlanmaktadır (Yılmaz, 2017). Türk Dil Kurumu, gastronomi kelimesini; “gerek yiyecek içecek yapma yöntemlerine gerek yemek pişirme tekniklerine ilişkin bilgilerin tümü” ve “sağlığa uygun, iyi düzenlenmiş, hoş ve lezzetli mutfak, yemek düzeni ve sistemi” olarak tanımlamaktadır (TDK, 2023). Gastronomi; tarihsel gelişim sürecinden itibaren yiyecek ve içeceklerin tüm özelliklerinin ayrıntılı bir şekilde kavranması, uygulanması, geliştirilmesi ve modern koşullara uyarlanmasına kadar sahip olduğu tüm sanatsal ve bilimsel unsurları içeren bir disiplin olarak tanımlanmıştır (Eren, 2007). Gastronominin ilk tanımları, yiyecek ve içeceklerin hazırlanması hakkında olmuştur (Karaköse, 2023). Buna karşın daha sonraki tanımlar; gastronominin fizyolojik olgularının dışında ekonomik, kültürel, ekolojik, psikolojik, toplumsal ve siyasi süreçlerin de içinde bulunduğu çok yönlü yapılarla ilişkilidir (Ayyıldız ve Şahingöz, 2018; Karaköse, 2023). Diğer bir

göre bu çarpıcı değişim ve gelişimler, daha farklı hizmetler sunan yiyecek içecek işletmelerinin ortaya çıkmasını sağlamıştır. Örneğin street food, slow food ve fast food gibi yeni mutfak akımları toplumların tüketim alışkanlıklarını etkilemiştir (Özdemir, 2022).

Tüm bu bilgiler ışığında gastronomi tarihinin insanlık tarihi kadar köklü bir geçmişe sahip ve hızla büyüyen bir bilim dalı olduğu söylenebilir. Sonuç olarak mutfak kültürlerinin yaşatılabilmesi için gastronomi tarihinin günümüzle bağlantısı kurulabilmelidir. Bu anlamda devlet, özel sektör ve üniversiteler ile iş birliği sağlanarak konunun uzmanlarının daha verimli ve derinlemesine araştırma yapabilmelerine destek sağlanmalıdır.

MUTFAK ORGANİZASYONU VE ÖRGÜT YAPISI¹

Zühal Özdemir Yaman, Mehmet Güllü

Giriş

Tüm canlılar için mutlak olan fizyolojik ihtiyaçların başında hayatta kalma ve bunun için de yeme-içme zorunluluğu yer almaktadır. Bu ihtiyacı giderebilmek her canlının yaşamı boyunca değişmeyen tek uğraşı olmuştur. Bunun için bazı canlılar besin kaynağına ulaşabilmek amacıyla toprağa kök salarak en aşılmaz kayaları aşarken bazı canlılar ise ölüm kalım savaşına girerek kendilerinin ve yavrularının beslenebilmesi için yiyecek bulma çabası içine girerler. Tüm bu canlılardan farklı olarak insan ise önce avcı-toplayıcı olarak başladığı yiyecek-içecek bulma serüvenini ilerletmiş ve kendi yiyecek-içeceğini üretir hâle gelmiştir. Bununla birlikte yeme-içme fiilini bir ihtiyaç olmaktan öteye taşıyarak kültürel bir boyut kazandırmış ve tarihî süreç içerisinde geliştirerek yiyecek-içecek üretimi için özel alanlar oluşturmuştur. Bu alanlarda hem tarlada yetiştirdiği tarımsal ürünleri hem de hayvansal ürünleri işlemiş, farklılaştırmış ve yeni ürünler meydana getirmiştir. Aynı zamanda bu faaliyetleri için çeşitli hazırlama, pişirme, sunum ve tüketim ekipmanları ile yeme-içme alışkanlıkları geliştirmiş ve tümüne ortak isim olarak mutfak adını vermiştir. Mutfak kavramı; bireylerin, ailelerin ya da küçük toplulukların yeme-içme alanları olmanın yanı sıra toplumların

¹ Bu bölüm, “Gastronomi ve Mutfak Sanatları Lisans Programlarından Sektör, Öğrenci ve Öğretim Elemanı Beklentilerinin Değerlendirilmesi” başlıklı doktora tez (Özdemir, Z. 2017) çalışmasından yararlanılarak hazırlanmıştır.

Sonuç

Turizm alanı içerisindeki önemi her geçen gün daha da artan gastronomi, kendi başına diğer tüm turizm dallarının başarılı olup olmamalarında bir kriter olarak değerlendirilebilir. Konaklanan bir işletmenin, gezilen bir yörenin ya da sağlık amacıyla ziyaret edilen bir tesisin hizmet kalitesi, tüketicilerin söz konusu yerlerde aldıkları yiyecek-İçecek hizmet kalitesiyle ölçülmektedir. Mutfakta gerçekleşen operasyonlarda sunulan turistik ürünlerin önceden hazırlanması, depolanarak sonradan satılması veya müşterinin fark ettiği bir ürün hatasının telafisi mümkün olmamaktadır. Ürün üretildiği yerde tüketildiği için her açıdan kusursuz olmalıdır. Bunun sağlanabilmesi ancak kusursuz bir organizasyon ve örgüt yapısının oluşturulmasıyla mümkündür. Ninemeier (2001) de bu görüşlere paralel olarak bir işletmenin ekonomik açıdan başarılı ya da başarısız olmasını, doğrudan mutfak personelinin yapacak işlemleri etkin planlamasına, kontrol etmesine ve müşteriyi cezbedecek yiyecek-İçecek hizmetlerini sağlamasına bağlamıştır. Bu bölümde mutfakta organizasyon ve örgüt yapısı literatür incelemesi neticesinde ana hatlarıyla ele alınmaya çalışılmıştır. Mutfak örgütsel yapısı içerisinde yer alan birimlerde görevli yöneticiler dışındaki personele yer verilmemiştir. Ayrıca mutfak organizasyonu ve örgüt yapısı; fast-food işletmeleri, bir ya da iki kişinin çalıştığı küçük işletmeler ve tüm işlerin işletme sahibinin kontrolünde olduğu işletmeler göz ardı edilerek irdelenmiştir.

MUTFAKTA ÜRETİM HAZIRLIKLARI, PLANLAMALAR VE KULLANILAN EKİPMANLAR

Mehmet Güllü, Zühal Özdemir Yaman

Giriş

Gastronomi bilimi içerisinde yer alan en önemli öge, hiç kuşkusuz yiyecek ve içeceğin kendisidir. Bu önemli gastronomik turizm unsurunun hazırlandığı temel alanların tümü mutfak olarak adlandırılabilir. Ancak mutfak kavramını günümüz turizm alanı içerisinde var olan işletmelerin özelliklerine bağlı olarak farklı bölümlere ayrılmış durumdadır. Satın alma, depolama, hazırlık, pişirme, servis ve bulaşikhane söz konusu sınıflandırmada temeli oluşturan ana bölümlerdir.

Üretim hazırlıkları aşaması, turistik ürünün mikro-bütünlük (her aşamada hatasızlık) özelliğinden hareketle servis öncesi en önemli aşama olarak düşünülebilir. Uygun koşullarda ve doğru tekniklerle yapılmayan bir hazırlık, ürünün pişirilme ve sunumunu olumsuz etkilemekle kalmayıp insan sağlığı için bir tehdit unsuru hâline gelmesine de yol açabilmektedir. Çiğ-pişmiş veya hayvansal-bitkisel gıdaların hatalı üretim proseslerinden geçirilmesi, insandan-gıdaya/gıdadan-insana meydana gelebilecek çeşitli kontaminasyonlar kalitesiz veya başarısız ürünün çok daha ötesinde sorunlara yol açabilmektedir. Bu doğrultuda üretim hazırlıklarının en doğru şekilde yürütülmesi amacıyla uygun planlamalar yapılması önem taşımaktadır. Ayrıca her anlamda sağlıklı sonuç alınabilmesi için gıda ve insan faktörünün yanı sıra

yönelik bilgilere yer verildiğinden söz konusu diğer hazırlıklara, planlama ve ekipmanlara yer verilmemiştir.

4. BÖLÜM

MENÜ VE REÇETE HAZIRLAMA

Kerem Çırak

Giriş

Temelde menü servis edilecek yiyecek içeceklerin listelendiği belgeler olarak kabul edilmekte olup işletme bakış açısıyla incelendiğinde bir listeden çok daha fazla nitelik barındırmaktadır (Gisslen, 2021). İşletmelerdeki hemen her yönetsel karar menü ve reçetelere bağlı kalınarak gerçekleştirilmekte bu durum da menü ve reçeteleri önemli bir yönetim aracı konumuna taşımaktadır. Bunun yanı sıra menüler satın alma, maliyet yönetimi, insan kaynakları yönetimi, hazırlık ve üretim planlaması süreçlerinin yönetimine temel oluşturmaktadır. Benzer biçimde Kivela (2003) menü planlamasını bir binanın inşaat sürecine benzediğini ve işletmenin kurulması sırasında karar verilmesi gereken ekipman seçimi, satın alma ve stok yönetimi, personel seçimi, tedarikçi seçimi gibi hayati kararların menü ile gerçekleştiğini vurgulamaktadır. İşletme yönetimi ve sürdürülebilir iş akışının sağlanabilmesi için doğru planlanmış bir menü başarının temelini oluşturmaktadır.

Başarılı bir menünün arkasında tüm detayları düşünülerek hazırlanan standart reçeteler yer almaktadır. İşletme başarısında doğru planlanmış bir menü, iyi bir menünün hazırlanmasının temelinde de kusursuz hazırlanmış standart reçete yer almaktadır. Öyle ki menülerin işletme için önemli bir yönetim aracı olduğunun farkında olan yiyecek-içecek işletmeleri senelerce süren menü planlama ve ar-ge çalışmaları yürütmekte, hazırlanan standart reçeteleri sürekli test ederek hatalardan arındırarak işletmenin hedeflerini doğru

Menü kartlarını yalnızca tüketici perspektifinden ele almak kısıtlı bir bakış açısı sunmaktadır. Menü kartları, işletme yönetimi için en önemli yönetim aracı olarak görülmektedir. Maliyet yönetimi, insan kaynakları yönetimi, işletme kurulumu gibi hemen her aşama iyi hazırlanmış bir menü ile oluşturulmaktadır. Öyle ki işletmenin açılacağı yerden tesis yapısına kadar her aşamada menüler yol gösterici görevi görmektedir. Doğru hazırlanmış bir menü işletmeye rekabet avantajını kazandırırken menü hazırlama sürecinin yanlış yönetilmesi işletmeleri ekstra maliyetlere ve başarısızlığa sürükleyebilmektedir.

Menünün işletmeler için hayati bir öneme sahip olmasında standart reçetelerin de destekleyici rolü unutulmamalıdır. Bir standart reçete, servis edilen yiyeceklerin kalite standartlarını koruyarak hizmet kalitesinin devamlılığını sağlamaktadır. Bunun yanı sıra standart reçeteler; maliyet yönetimi, stok yönetimi, personel yönetimi, satın alma kontrolleri gibi yönetsel süreçlerde pek çok avantaj sağlamaktadır. Buna bağlı olarak yiyecek içecek işletmeleri için doğru hazırlanmış menü kartlarının başarı anahtarı olduğu ve standart reçetelerin de menü kartlarının meydana gelmesini sağlayan önemli bir yönetim aracı olduğu unutulmamalıdır.

5. BÖLÜM

GASTRONOMİDE YİYECEK HAZIRLAMA VE PIŞİRME PRENSİPLERİ

Sibel Ayyıldız

Giriş

Pişirme, yiyeceklerin besin kalitesini artırmak ve yiyecekleri tüketilebilir bir yemeğe dönüştürmek için ısı uygulama işlemidir (Baldwin, 2012). Gıdaların duyuşal özelliklerini (renk, koku ve kıvam vb.) korumak, lezzet arttırmak ve sindirime destek olmak için gerçekleştirilen pişirme işlemi aynı zamanda yiyeceklerin bozulmasına neden olan mikroorganizmaları ortadan kaldırmayı amaçlar (Koçak, 2012; Ranjan, Dasgupta ve Walia, 2017; Tayar ve Hecer, 2016). Isıtma işlemi sırasında aldehitler ve ketonlar gibi hoş tatlar ve melanoidinler gibi fonksiyonel maddeler üretilir (Nagai, Kai ve Tanoue, 2017). Pişirme ayrıca yiyeceklerde bulunan nişastaların, proteinlerin, karbonhidratların, lipidlerin ve vitaminlerin biyoyararlılığını değiştirebilir (Suresh, Manjunatha ve Srinivasan, 2007; Margier vd., 2018). Bununla birlikte yanlış uygulanan pişirme işlemleri, aşırı besin kaybına ve gıda kalitesinin bozulmasına da neden olabilir (Fabbri ve Crosby, 2016). Tüm bu bilgiler kapsamında, pişirme yöntemlerinin bilinmesi ve doğru prensiplerle uygulanması bakımından oldukça önemli bir konudur. Gastronomide sağlıklı ve güvenli gıda yaklaşımı, yiyecek içecek işletmelerini ve gastronomi turizmini etkileyen önemli faktörlerden biridir. Bu nedenle bu çalışmanın konusu gastronominin önemli alanlarından biri olan yiyecek üretimidir. Çalışmanın amacı ise yiyecek üretim aşamasında gerçekleşen hazırlama ve pişirme ile ilgili yön-

Gastronominin önemli unsurlarından biri olan yiyecek üretimini konu alan bu çalışma, yiyecek üretim aşamasında gerçekleşen hazırlama ve pişirme ile ilgili yöntem ve prensipleri detaylı bir şekilde incelemiştir. Yapılan çalışmanın gastronomiye ilgisi olan bireyleri destekleyeceği ve mevcut literatüre katkı sağlayacağı düşünülmektedir.

GASTRONOMİDE LEZZET YAPILANDIRILMASI

İbrahim Yılmaz

Giriş

Lezzet, tüketici tercihleri üzerinde oldukça etkili olan önemli bir unsurdur. Yiyeceklerin tüketiminde beş duyu organımızın algıladığı uyaranlar lezzet kavramını oldukça değiştirmektedir. Örneğin, yemeğin sunumu yani görünümü ya da yemeğin çıtırtısı lezzet algılamamızı oldukça değiştirmektedir. Bununla birlikte o yemekle ilgili daha önce yaşadığımız deneyimler de lezzet algımızın şekillenmesinde etkili olmaktadır (Small, 2012).

Lezzet algısı, tat ve aromanın ve tüketicinin duygusal durumunun birleşimi ile oluşan bir algıdır ve yiyecek içecek işletmeleri için oldukça önemli bir kavramdır. Çünkü lezzetsiz bir gıdayı hiçbir tüketici isteyerek tüketmez. Bu sebeple lezzetin oluşumunu iyi kavramak oldukça önemlidir. Özellikle gıda sektörü için de lezzet ve lezzet algısı oldukça önemli olup bu sektörde çalışanların tat ile lezzet kavramlarını doğru tanımlaması ve bilmesi önemlidir (Boyacı ve İçigen, 2021).

Bu bölümde lezzet, tat, aroma kavramları ve bunların birbiri ile olan etkileşimleri ayrıntılı olarak incelenmiştir. Bununla birlikte bu çalışmada, yemeklerde en önemli lezzet belirleyicisi olan baharatların yiyeceklerde lezzet oluşumuna etkisi işlenmiştir.

7. BÖLÜM

DUYUSAL ANALİZ YÖNTEMİ VE DUYUSAL ANALİZ YÖNTEMİ İLE ÜRÜN GELİŞTİRME

Hüseyin Avni Kırmacı, Zuhal Kırmacı

Giriş

Gıda ürünlerinin tüketicilerin duyularını nasıl etkilediğini belirlemek gıda endüstrisinin en önemli hedeflerinden biridir. Bu aynı zamanda daha sağlıklı tarifler geliştiren beslenme uzmanları ve diyetisyenler için de öncelikli bir konudur. Beş duyumuz vücudumuzun bekçisi olarak hareket ettiğinden, sağlıklı gıdanın faydaları ancak duyularımız onu kabul ederse elde edilecektir. Bu nedenle, beş duyu tarafından algılanan tüketici tepkisi, gıda gelişiminin hayati bir ölçüsü olarak kabul edilir. Gıdaların değerlendirilmesinde hiçbir aygıt duyuların yerini tutamayacağı için insanlar denek olarak kullanılmaktadır. İnsanların potansiyel önyargılarına ve ilgili maliyetlere rağmen bu tür çalışmalar giderek yaygınlaşmaktadır.

Duyusal değerlendirme, görme, koklama, dokunma, tatma ve ses duyuları aracılığıyla algılanan ürünlere yönelik tepkileri uyandıran, ölçen, analiz eden ve yorumlayan bilimsel bir yöntemdir (Stone ve ark.,2004). Yaygın olarak kabul gören bu tanım, Gıda Teknolojileri Enstitüsü ve Amerikan Test ve Malzeme Derneği de dâhil olmak üzere çeşitli profesyonel kuruluşlar bünyesindeki duyu analizi değerlendirme komiteleri tarafından kullanılmaktadır (Lawless ve ark.,2010). Diğer bilimsel ölçüm yöntemleri gibi duyu analizi değerlendirme de hassasiyet, doğruluk, duyarlılık ve yanlış-pozitif sonuçlardan

8. İkili karşılaştırma testi, belirli bir özelliğin belirlendiği bir nitelik farkı testidir. Denekten, ölçülen özelliğin daha fazla miktarda bulunduğu örneği belirlemek için sunulan iki örneği test etmesi istenir. Denek sadece şans eseri %50 oranında haklı çıkma şansına sahiptir.
9. Tanımlayıcı duyusal testler, duyusal değerlendirmede kullanılan en kapsamlı ve bilgilendirici araçlardır. Tanımlayıcı testler iyi eğitilmiş bir panel gerektirir ve asla tüketicilerle kullanılmamalıdır çünkü tutarlı ve tekrarlanabilir veriler tanımlayıcı testlerin önemli bir parçasıdır. Tanımlayıcı testlere örnek olarak Lezzet Profili Analizi (FPA), Kuantitatif Tanımlayıcı Analiz (QDA), Doku Profili Analizi (TPA) ve Duyusal Spektrum (SS) tekniği verilebilir.
10. Duyusal testler kabul testlerini ve tercih testlerini içerir. Kabul testinin birincil görevi beğenme derecesini derecelendirmek iken tercih görevi daha çok beğenilen ürünü tanımlamayı amaçlar.

8. BÖLÜM

GASTRONOMİDE İÇECEKLER

Özlem Özer Altundağ

Giriş

İnsanlar, iecek tüketime anne sütüyle başlamış olup yaşamsal ihtiyacı karşılamanın ötesinde serinletici, keyif verici ve rahatlatıcı gibi etkilere sahip olması sebebiyle çok eski çağlardan itibaren farklı çeşitlerde iecekler üretmiş ve tüketmiştir. Çeşitli bitkilerden ve meyvelerden elde edilen çaylar, meyve ve sebze suları, tahıllardan elde edilen fermente iecekler, süt bazlı iecekler, asitli ve şekerli iecekler, alkollü iecekler ve kahve günümüzde sıklıkla tüketilen iecek çeşitleridir (Süren ve Kızıleli, 2021).

Tarihte yaşanan baskılar, savaşlar neticesinde birçok ülkeye çok sayıda göç yaşanmıştır. Göç eden topluluklar, göç ettikleri yerlere gelenek, göreneklerinin yanı sıra yeme-ime kültürlerini de beraberlerinde getirmişlerdir (Uslu ve Kırmacı, 2021). Ayrıca gelişmiş ülkelerde değişen yaşam tarzları, yenilikçi ürünler ve sağlık endişeleri ayrıca birçok gelişmekte olan ülkede harcayabilir gelirlerin artması ve Batı kültürünün artan etkisi ile paketlenmiş, alkolsüz, su bazlı ieceklerin tüketimi dünya çapında artmaktadır (Levy ve Shrapnel, 2014).

8.1. İeceklerin Sınıflandırılması

Geniş iecek kategorisi, değişen enerji yoğunluğuna sahip hem şekerle tatlandırılmış hem de şekersiz iecekleri içerir (Levy ve Shrapnel, 2014).

Alkolsüz içecekler

Çay

Çay, suyun yanı sıra dünya çapında en çok tüketilen içeceklerden biridir ve büyük ilgi görmektedir (Qiu vd., 2023). Yeşil çay, beyaz çay, sarı çay, oolong çayı, siyah çay ve koyu çay gibi çeşitli çaylar fermantasyon seviyesine göre üretilmektedir (Chong, He, Rao, Li ve Ke, 2021). Çin çayı olarak da geçen Oolong çayı yarı fermente bir çaydır. Yaklaşık 5000 yıl önce Çin'de ortaya çıkan yeşil çay, dünya çapında en çok tüketilen içeceklerden biri konumundadır (Dong vd., 2022). Fermente olmayan tek çay kategorisi olan yeşil çay, *Camellia sinensis* bitkisinin taze yapraklarından üretilmektedir (Wang, Chen, Zhou, Zhao ve Wang, 2022). Yeşil çay taze çay yapraklarının su buharı ile işlenip küçük toplar hâline getirilip kurutulmasıyla elde edilmektedir. Yeşil çay, Asya'da, özellikle Çin ve Japonya'da en popüler içeceklerden biridir (Zhao vd., 2021).

Resim 1. Çay (Kişisel Arşiv, 2023).

Resim 2. Kahve (Kişisel Arşiv, 2023).

Kahve

Kahve siyah çaydan sonra dünya çapında en sık tüketilen içeceklerden bir diğeridir. Tüketim kalıpları, kültürel gelenekler/arka planlar ve toplumda kökleşmiş alışkanlıklar nedeniyle ülkeler arasında farklılık göstermektedir. Norveç, Avrupa'da kişi başına kahve tüketiminde liderdir. Kafeinli içecekler içmenin son on yılda popülerlik kazandığı ve ABD nüfusunun yaklaşık %85'inin günde bir veya daha fazla kafeinli içecek içtiği tespit edilmiştir (Frosztega vd., 2023).

Brezilya, 1880'lerden günümüze dünyanın en büyük *Coffea Arabica* ve *Coffea Canephora* kahve üreticisi olmuştur ancak aynı zamanda iç tüketimde zaman zaman düşüşler yaşamıştır. Son zamanlarda Brezilya, tarımsal, endüstriyel ve tüketici hizmetleri açısından artan bir yenilik göstermekte ve özellikle pazar payının yaklaşık %10'unu temsil eden özel veya gurme kahveler kategorisinde yüksek kaliteli kahvelere yönelik artan bir talebi sürdürmektedir (Teles ve Behrens, 2020).

Bitki çayları

Bitki çaylarına olan talebin artması, araştırma ve ticari faaliyetlerinde artışa neden olmuştur. Bitkisel çaylar, sıcak veya soğuk suda yapraklar, meyveler, kabuklar, kökler veya çiçekler gibi çeşitli bitki materyallerinin sulu infüzyonlarıdır (Mosii, Pheko-Ofitlhile, Kobue-Lekalake ve Mazimba, 2023).

Salep

Salep Türkiye’de çok eski zamanlardan beri kullanılan bir içecektir. Özellikle 8. yüzyıldan itibaren İslam'a geçişle birlikte şarap ve kırmızı gibi alkollü içeceklerin yasaklanmasıyla birlikte bunların yerini alkolsüz içecekler olan boza, şıra ve salep almıştır (Ece Tamer, Karaman ve Utku Copur, 2006). Orkide köklerinden elde edilen un, Akdeniz ülkeleri ve Türkiye’de geleneksel olarak “salep” veya “sahlep” adı verilen bir içecek olarak hazırlanmaktadır. Salep içeceğinin hazırlanması için önce süt, şeker ve salep tozu ile karıştırılıp kaynatılır ve son olarak üzerine toz tarçın serpilerek sıcak olarak içilir; geleneksel, koyulaştırılmış sütlü bir içecektir (Bozdoğan, Yaşar ve Korkut, 2016; Kiziltas, Goren, Alwasel ve Gulcin, 2022).

Boza

Türkçede boza adı, darı anlamına gelen Farsça *buze* kelimesinden gelmektedir. Ancak Orta Asya'da yaşayan Türkler bu içeceğe *basso* adını vermişlerdir. Doğu Avrupa ülkelerinde (*braga* veya *brascha*), Balkanlar'da (*busa*) ve Mısır'da (*bouza*) üretilen benzer içecekler de vardır. Geçmişte boza, Türk ülkelerinde tarifte ufak farklılıklarla üretilmekte ve tüketilmektedir. Boza, mısır, pirinç ve buğday unları gibi tahıllardan yapılan, oldukça viskoz, geleneksel, fermente edilmiş bir Türk içeceğidir. Boza çeşitli unlardan (arpa, yulaf, mısır, buğday) yapılır ama en kaliteli ve lezzetli boza darı unundan yapılmaktadır. (Arici ve Daglioglu, 2002).

Meyve suları

Soğuk içecekler meşrubatlar olarak bilinmektedir. Meşrubatlar içerisinde meyve suları ve gazlı içecekler yer almaktadır. Ayrıca maden suyu, limonata ve ayran da soğuk içecekler arasında yer almaktadır. Meyve suları taze mey-

velerin sıkılmasıyla elde edilen ve henüz mayalanmamış (fermentasyona uğramamış) içeceklere verilen gelen bir adlandırmadır. Mekanik şekilde elde edilmiş olan meyve pulpu (püresi) veya konsantresinin en az %40 meyve pulpu içerecek şekilde su, sakkaroz ve diğer katkı maddeleriyle hazırlanan hâline meyve nektarı denilmektedir. Meyve suları tüketicilere 6-10°C’de servis edilmektedir (Güler ve Güler, 2000).

Gazlı içecekler

Türk Gıda Kodeksi Alkolsüz İçecekler Tebliği’ne göre meyveli içecek, aromalı içecek, meyveli şurup, aromalı şurup, meyveli içecek tozu, aromalı içecek tozu, meyveli doğal mineralli içecek, aromalı doğal mineralli içecek, yapay soda, kola, tonik ve aromalı sular tanımlanmaktadır. Gazoz, içerisinde belli miktarda sitrik asit veya tartarik asit, şeker ve saf karbonik asid ile içilebilir bulunan üründür (Türk Gıda Kodeksi, 2007). Gazlı içeceklerin tüketicilere uygun sıcaklıkta servis edilmesi önemlidir. Gazlı içeceklerin servis sıcaklığı +3 ile +5°C olması önerilmektedir (Güler ve Güler, 2000).

Şerbet

“Şerbet” kelimesi, Arapçada “içmek” anlamına gelen “şarba” kökünden türemiştir. Geçmişten günümüze, yemeklerin yanında, hastalıkların tedavisinde veya ferahlamak amacıyla tüketilmektedir. Günümüzde meyve suları ile asitli ve şekerli içeceklerin yerini alabilecek, sağlıklı ve içinde en az bir meyvenin ana madde olmasıyla baharat ve lezzet verici otların karışımıyla hazırlanan içeceklerdir (Süren ve Kızıleli, 2021). Şerbetlere ekşiliğini artırmak için sağlığa zararlı olmasa bile herhangi bir asit katılması, kokulandırılması için esans konulması, boya ve koruyucu madde eklenmesi yasaktır. Şerbetler yapıldıkları meyvenin adı ile satılmaktadır (Güler ve Güler, 2000).

Şerbet yapımında bal, gül yaprakları, meyveler, baharatlar, kuruyemişler ve bunların karışımları yaygın olarak kullanılmaktadır. Osmanlı döneminden günümüze lohusa, bal, gül, meyan, sirkeçübün ve kızılıçlık gibi birçok şerbet taşınmış konumdadır. (Ceyhun Sezgin ve Durmaz, 2019).

Ayran

Türkiye'de su ile seyreltilmiş ve tuzla tatlandırılmış sade yoğurttan oluşan ayran geleneksel bir içecek olarak önemli bir sıvı alımı kaynağıdır (Kabak ve Dobson, 2011; Nergiz-Unal, Akal Yıldız, Samur, Besler ve Rakicioğlu, 2017). Ayran, Anadolu'da yüzlerce yıldır evlerde geleneksel olarak yoğurda su ve tuz karıştırılarak üretilir. Ancak günümüzde, *Streptococcus thermophilus* ve *Lactobacillus delbrueckii subsp. bulgaricus* ile süt fermantasyonları yoluyla endüstriyel ölçekte üretilmektedir. Fermantasyon, pH 4.4–4.6 elde edilene kadar devam etmektedir. Pıhtı daha sonra tuzlu su eklenerek seyreltilir. Bitmiş ürünün pH değeri 4,2–4,3'tür. Ayranın bileşimi kullanılan sütün türüne, yağ giderme etkinliğine ve seyreltme oranına bağlı olarak değişir. Ürün, kabul edilebilir duyuşal özelliklerle buzdolabında 15 güne kadar saklanabilmektedir (Kabak ve Dobson, 2011).

Kefir

Bir diğer mayalandırmayla elde edilen içekte kefiridir. Kefir kelimesi Türkçede “keyif” kelimesinden gelir ve “iyi duygu” anlamına gelir. Kefir, kefir danelerindeki mikroorganizmalarla simbiyotik ilişki içinde bir arada bulunan probiyotiklerle fermente edilmiş Kafkasya ve Anadolu yörelerine ait olduğu düşünülen geleneksel bir içecektir. Kefir, ürün çeşitlendirmesi sağlamak için yeni fonksiyonel içeceklerin üretimine izin veren farklı substratlara adapte edilebilir özelliktedir. Güvenli ve ucuz olması nedeniyle de kefirin beslenme potansiyelinde küresel olarak büyük bir ilgi olduğu görülmektedir (Kabak ve Dobson, 2011; Dertli ve Çon, 2017; Azizi vd., 2021).

Kefir, inek, keçi, koyun veya manda gibi çeşitli hayvan sütlerinin fermantasyonundan üretilir ve ağızda gaz veya köpük hissi veren maya benzeri belirgin bir tat ile karakterize bir içecektir. Kefir, üretiminde kullanılan tanelerin laktik asit bakterileri (*Lactobacillus*, *Lactococcus*, *Streptococcus*, *Leuconostoc*), maya ve asetik asit bakterileri gibi çeşitli ve karmaşık mikrobiyotaya sahip olması nedeniyle oldukça karmaşık bir tada sahiptir (Biçer vd., 2021).

Sporcu İçecekleri

Sporcu içecekleri, özellikle proteinden zengin olanları genç nesil tarafından tercih edilen ve buna bağlı olarak da son yıllarda tüketimi artmış içecekler arasında yer almaktadır. Ek olarak kolajen içeren yeni içecekler de hem sağlık hem de güzellik amacıyla popüler hâle gelmiş içecekler arasındadır. Bunların dışında keten tohumu, yulaf, meyve ve sebzelerin karışımı ile elde edilen shakeler de son yıllarda tüketimi artmış diğer içecekler arasındadır (Yıldız, 2017).

8.2. Alkollü İçecekler

Bira

Bira Türk standartlarına göre malt ve diğer ekstrakt verici maddelerin öğütülüp sıcak su ile belirli metotlara göre işlenmesiyle elde edilen şıranın, şerbetçiotu veya preparatlarının kayıtılıp soğutulmasıyla elde edilen fermente bir alkollü içkidir. Ekstrakt verici olarak farklı tahıllar kullanılabilir. Örneğin pirinç, mısır, darı, buğday, arpa ya da yulaf ile farklı kalitelerde biralara üretilmektedir (Güler ve Güler, 2000). Biranın has aromasını şerbetçiotu sağlasa da günümüzde genç ve kadın tüketiciler tarafından meyve kokulu ya da meyveli biralarda talep edilmektedir. Özellikle zor bulunan biralara menüsüne ekleyen işletmeler “adanmış bira turistleri” ya da “bira gee’leri” için bulunmaz bir hazine konumundadır (Thacker, 2015).

Şarap

Taze üzüm veya üzüm şırasının fermentasyonu ile elde edilen alkollü bir içkidir. Renklerine göre beyaz şarap, pembe şarap ve kırmızı şarap olarak sınıflandırılmaktadır. İçerdikleri maddelere göre de sek şaraplar, dömisek şaraplar, tatlı şaraplar, vermutlar ve köpüklü şaraplar olarak sınıflandırılmaktadırlar. Tüketim alışkanlıklarındaki değişikliklere bağlı olarak ülkelerin farklı bölgelerinde bulunan az bilinen üzümlerden elde edilen şarapların tüketimine karşı bir ilgi artışı söz konusudur. Aynı şekilde pembe şaraplar da ilkbahar dışında da uygun yemeklerle eşleştirerek sofralarda yerini almakta-

dır. Ayrıca genç tüketiciler tarafından talep edilen şeftalili, greyfurtlu, kolalı şaraplarda menülere eklenmektedir (Güler ve Güler, 2000; Yıldız, 2017).

8.3. Damıtılmış Alkollü İçkiler

Damıtılmış alkollü içkiler alkol oranları diğer alkollü içkilere göre daha yüksek olan ve bira şarap gibi alkollü içkiler bir ya da daha fazla kez damıtılmasıyla elde edilen içkilerdir. Bu içkiler arasında Brendi, Kanyak, Cin, Votka, Viski, Rom, Tekila ve Rakı sayılabilir (Güler ve Güler, 2000; Bostancı, 2012).

Rakı

Rakı, Anadolu topraklarında yaşamış olan çeşitli uygarlıkların kültürel mirasının bir sentezidir ve geleneksel üretim yöntemiyle günümüze kadar ulaşmıştır (Şimşek, 2021). Rakı, ulusal bir içecek olarak Türkiye'de üretilmekle birlikte Almanya başta olmak üzere tüm Avrupa'da bulunan temel bir üründür (Anlı vd., 2007).

Rakı, kuru üzüm, yaş üzüm ya da her ikisinden elde edilen sumanın anason tohumu veya anason tohumundan elde edilen saf anason esansı ile üretilen alkol oranı %85 olan alkollü bir içkidir (Güler ve Güler, 2000; Şimşek, 2021). Rakı ve Uzo, Ege Denizi'nin iki yakasından gelen kardeşler gibi diğerlerinden daha çok benzerlik göstermektedir. Türkiye'de rakı üretimi, modern damıtma sistemleri ile donatılmış büyük resmî yasal şirketler tarafından yapılmaktadır. Ancak Orta ve Güney Anadolu'nun bazı bölgelerinde ev yapımı geleneksel rakı üretimi hâlen devam etmektedir (Anlı vd., 2007).

Sonuç

Küresel olarak Birleşmiş Milletler Gıda ve Tarım Örgütü (FAO) tarafından izlenen içeceklerin tüketimi, son 40 yılda %20'den fazla artış göstermiştir. Ayrıca son yarım yüzyılda, yeni seçenekler de son derece hızlı bir şekilde ortaya çıkmıştır. Süt, şarap, bira, çay ve kahve gibi köklü içeceklerle sporcu içecekleri, enerji içecekleri, şerbetler ve limonata gibi yüksek kalorili ve

bunların yanı sıra farklı aroma vericilerin etkisiyle alkollü içecekler de eklenmiştir (Wolf, Bray ve Popkin, 2008).

Teknolojideki yenilikler ve değişen tüketici beklentileri, içecek endüstrisinin gelişimini farklı özelliklere sahip yeni ürünler üretmeye zorlamaktadır. Bu durum göz önünde bulundurulduğunda endüstriyel anlamda tüketicilerin beklentilerini karşılayan, yetiştiricilerle uzun vadeli ortaklıklar yoluyla yerel şifalı bitkileri de içine alan içeceklerin üretilmesinin desteklemesi ve teşvik edilmesi gerekmektedir (Ece Tamer vd., 2006).

9. BÖLÜM

GASTRONOMİDE SUNUM VE SERVİS TEKNİKLERİ

Fatih Türkmen, Emre Aykaç

Giriş

Yemek yemek genellikle konuğun odak noktasıdır. Ancak lezzetli ve çekici yiyecekler üretmek şefe, doğru ve gösterişli bir servis yapmak da servis elemanına düşer. Yemek sunumu, şeflerin mutfak çalışanlarının yeteneklerini ön plana çıkarmalarını sağlayan önemli bir konudur. Menü seçimleri ve yemek sunumu, tema, münü, servis tarzı ve konukların beklentileri dâhil olmak üzere yemek sunum ve servisi operasyonunun tüm yönlerini entegre eden nihai bir sonuçtur. Nitekim amaç asla sadece bu beklentileri ve standartları karşılamak değil, onları daha da ileri taşıyarak aşmak olmalıdır.

Yiyecek ve içecek sektöründe lezzet her zaman birinci planda olsa da yemek servis ve sunum teknikleri, bu lezzeti perçinleyen önemli bir unsurdur. Profesyonel yemek sunumları, tarifleri görsel bir şölene dönüştürerek konuklar için unutulmaz bir deneyim yaşatılmasına yardımcı olur. Bunun için servis ve sunum teknikleri hakkında bilgi sahibi olmak ve bazı püf noktalarına dikkat etmek son derece önemlidir.

Uluslararası literatürde profesyonel yiyecek içecek işletmelerinin kalitesini yansıtabilecek sunum ve servis teknikleri konusu ile alakalı servis ve sunumların nasıl olması gerektiğine dair önemli bilgiler farklı kaynaklardan derlenerek bu bölümde bir araya getirilmiştir.

Bu bölümde servis konusu hakkında özellikle alakart olarak masa servisine yönelik uluslararası standartta yer alan usuller değerlendirilmeye çalışılmıştır. Burada belirtilen servis usulleri dışında büfe servisi, kafeterya servisi, self servis, paket servisi, oda servisi, ziyafet (banket) servisi, satış makinaları yoluyla servis, gel-al servis gibi birçok servis yöntemi de bulunmaktadır. Ancak bu tür servis türleri alakart servis kadar profesyonellik gerektirmeyen servislerden olduğu için bu bölüm dâhilinde değerlendirilmemiştir.

Sonuç

Turizm sektörünün vazgeçilmez yapı taşlarından olan gastronomi bilimi ister bağımsız işletmeler, isterse turizm işletmeleri bünyesinde uygulansın kendine özgü bazı prensipleri ve disiplini olan konuları içermektedir. Gastronominin pek çok farklı turizm türünde hizmet kalitesi açısından turizm işletmelerine olumlu etkileri güncel çalışmalarda da özellikle ifade edilmektedir (Öztürk ve Işınkaralar, 2018; Öztürk vd., 2020; Öztürk vd., 2021; Dönmez ve Türkmen, 2015; Türkmen ve Dönmez, 2015).

Bu noktada gastronomi bilimi içerisinde bulunan sunum ve servis teknikleri de konukların hem yemek yeme deneyimlerini ve yemekten aldıkları keyfi artırmak adına hem de bu hizmetleri sunan işletmelerin hizmet kalitesi anlamında farklılaşmasında oldukça etkili bir konu olarak değerlendirilmelidir.

Bu bölümde değinilmiş olan alakart servis teknikleri daha çok profesyonel bilgi ve servis elemanı tecrübesi gerektirdiğinden bazı işletmeler tarafından tam anlamıyla tercih edilmese de uluslararası standartlarda literatürde yer alan, turizm sektöründe servis bölümünde çalışanlar tarafından mutlaka bilinmesi gereken ve uygulayan işletmelere ayrı bir prestij katan servis teknikleridir.

10. BÖLÜM

YİYECEK VE İÇECEK İŞLETMELERİNDE GIDA ATIKLARI VE YÖNETİMİ

Aydan Bekar

Giriş

Küreselleşmenin getirdiği yenilikler, nüfus yoğunluğunun artması, tüketim alışkanlıklarının değişmesi gibi unsurlar tüm dünyada olduğu gibi ülkemizde de gıda atıklarının artmasına neden olmaktadır. Birleşmiş Milletler insan tüketimi için üretilmiş hazır hâldeki gıdaların %17'sinin hiç dokunulmadan çöpe atıldığını vurgulamaktadır. Küresel bir sorun hâline gelen gıda atıkları çevrenin kirlenmesine neden olurken bir taraftan da ülkeleri ekonomik olarak olumsuz etkilemekte ve etik sorunları beraberinde getirmektedir. Milyonlarca insanın açlıkla mücadele ettiği ya da açlıktan öldüğü düşünüldüğünde, insan tüketimi için hazırlanan gıdaların çöpe atılması üzerinde durulması gereken önemli bir sorundur.

Gıda atıklarının olduğu önemli sektörlerden biri de yiyecek ve içecek sektörüdür. Yiyecek ve içecek hizmetini veren otel, restoran, kafe vb. işletmelerde satın alma, depolama, hazırlık ve servis aşamalarında değişen miktarlarda gıda atıkları oluşmaktadır. Bu süreçte atık yönetimi hiyerarşisine uygun olarak oluşan gıda atıklarının önlenmesine/azaltılmasına, yeniden kullanılmasına veya gerekliyse bertaraf edilmesine yönelik önlemler alınmadığında atıkların azaltılması ve sürdürülebilir üretim ve tüketim anlayışının benimsenmesi mümkün olmayacaktır.

Sonuç

Gıdaların israf edilmesinin birçok olumsuz etkisinin olduğu bir gerçektir. Nüfus yoğunluğunun hızlı bir şekilde arttığı ve doğal kaynakların kısıtlı olduğu dikkate alındığında gıda israfını azaltmak için önlemler alınması gelecek nesiller için çok önemlidir. Bu önlemler hem ulusal hem de küresel çapta alınmalı ve yürütülmelidir. Gıda atıkları çevre kirliliğine neden olan, ülke ekonomilerini olumsuz etkileyen, dorudan veya dolaylı olarak halk sağlığını bozan, kaynakların gereksiz harcanmasına neden olan önemli bir sorundur. Öte yandan dünyada azımsanmayacak sayıda insan açlıkla mücadele ederken; yenilebilir gıdaların çöpe atılması etik bir sorundur.

Gıda atıkları hem hane düzeyinde hem de hizmet ve perakende sektöründe farklı oranlarda ve farklı aşamalarda oluşmaktadır. Bu bağlamda ulusal ve uluslararası mevzuata ve çalışmalara uygun olarak gıda atık değerlendirme hiyerarşisine uygun hareket edilmesi gerekmektedir. Ayrıca tüm tüketicilere gıda tüketimi, gıda okuryazarlığı ve israf ile ilgili farkındalık eğitimleri verilmesi çok önemlidir. Öte yandan tüm dünyada olduğu gibi ülkemizde de birçok kurum, kuruluş, dernek ve vakıflar gıda atıklarının önlenmesine/azaltılmasına, değerlendirilmesine ve tüketicilerin bilinçlenmesine yönelik çalışmalar yapmaktadır. Örneğin bazı ülkelerde uygulanan, günümüzde ülkemizde de var olan gıda bankası bu çalışmalara güzel bir örnektir. Gıda bankası, bağışlanan veya tüketilebilir nitelikteki üretim fazlası gıdaların tedarikini sağlayan, uygun depolama koşullarında depolayan ve bu gıdaları direkt veya farklı yardım kuruluşları ile ihtiyaç sahiplerine dağıtan, kâr amacı gütmeyen bir organizasyondur. Gıda israfı ile mücadele etmek her vatandaşın en önemli sorumluluklarından biri olmalıdır.

11. BÖLÜM

SÜRDÜRÜLEBİLİR GASTRONOMİ

Seza Zerman

Ulusların kaderi, beslenme tarzlarına bağlıdır.

(Jean Anthelme Brillat-Savarin, Lezzetin Fizyolojisi)

Giriş

Günümüzde sosyal medya, kitle iletişim araçları ve ulaşım araçlarındaki ilerlemenin hem bilginin hem de bireylerin mobilitesini artırdığı söylenebilir. Buna bağlı olarak yiyecek, mutfak kültürü, bu kültüre ait unsurlar (şefler, endemik bitkiler, yöresel yemekler) de mobil hâle geldi, bu noktada yiyecekler farklı iklimlerde, farklı mevsimlerde ve farklı coğrafyalarda talep edilir, erişilebilir ve tüketilebilir hâle geldiği sonucuna ulaşılabilir.

Bu değişimlere bağlı olarak günümüzde, Freedman'ın da belirttiği üzere damak tadı, sabit kuralların dışına çıkarak yeni serüvenlerde bireysel tercihler hâline gelmeye başladı. Ulusal mutfaklar, otantik yemekler bakımından bölgesel mutfaklardan daha etkili hâle geldi. Freedman'ın örneğine göre Fransız mutfağı ulusallıktan uzaklaşarak ihracata uyum sağlayacak şekilde uyarlanan bölgesel ürünleri derleyerek genel bir mutfak hâline geldi; benzer şekilde İtalyan mutfağı da ulusal referanslardan çok ihracata yönelik bir tanıtma ve paketleme malzemesi hâline geldi (Freedman, 2018).

Bu süreçlerde yiyecek ve gıda fiziki faydasının yanında sosyal ve duygusal faydaları içeren bir unsur hâline gelirken; yemeğin yetiştirme, hazırlama, sunum ve saklama aşamalarındaki bütüncül yapıyı ve ilişkileri ifade eden

Özet olarak gıda ve gıdanın geleceği sadece damak tadıyla değil, insanın özgürlüğü ile de ilgili konulardır (Freedman, 2008). Zira soğuk savaşın ilk mücadelesi mermi ya da bomba gibi askeri unsurlar üzerinden değil, süt, şeker, tuz gibi yiyecek maddeleri zerinden yapıldı (Standage, 2020). Bu nedenle gastronominin sürdürülebilir şekilde devamı sadece çevresel değil, sosyal, askeri güvenlik gibi unsurların ana nedenidir.

12. BÖLÜM

GASTRONOMİ, TÜKETİM KÜLTÜRÜ ve DİN

Ayşe Nur Uslu

Giriş

Din; yılın hangi günlerinde ve dönemlerinde, hangi yiyeceklerin yenilip hangilerinin yenilmeyeceği ile ilgili riritüeller, kutsal olarak kabul edilen yiyecekler ve gastronomik semboller gibi çok sayıda uygulama açısından belirleyici olmaktadır (Uca ve Yüncü, 2021). Dinlerin büyük bir çoğunluğu yaşam tarzı ile ilgili prensipler ve beslenme ile ilgili emirler içermektedir. Örneğin çoğu dindeki kutsal yazılar ve dogmalar yenilmesi ve yenilmemesi gereken yiyecekler ile yemekleri hazırlama ve yeme şekli hakkında bilgi vermiştir. Ayrıca kutlama şölenlerinin önemini vurgulayan bu unsurlar, dine mensup ihtiyaç sahiplerini doyurmayı da teşvik etmiştir (Aulet, Fernandes ve Timothy, 2022). Din, kültürel bir faktör olarak gastronomi ile etkileşim içerisinde. Kitabın bu bölümünde, Semavi dinler ve Semavi olmayan dinlerdeki yeme içme ritüelleri, yeme içmeye yönelik emir ve yasaklar, oruç, bayram gibi özel günler ele alınmıştır.

12.1. Semavi Dinler

Bu bölümde semavi dinler olan Yahudik, Hristiyanlık ve İslamiyet gastronomi ve tüketim boyutlarıyla ilişkilendirilerek incelenmiştir.

(2019) göre yemeğin masaya gelene kadar geçirdiği tüm süreçlerde dinin etkisi görülmektedir.

Yapılan bu çalışma dinî yapıların beslenme kültürü üzerinde ne kadar etkili olduğunu göstermektedir. Bununla birlikte beslenme eyleminin dinî ritüellerin önemli bir parçası olduğu da aşikârdır. Birçok toplumda dinî bayramlarda ve özel günlerde (Noel, Paskalya vb.) yeme içme ritüellerinde tüketilen yiyeceklerde dinin etkilerini görmek mümkündür. Örneğin Hristiyanların Paskalya bayramında “*Büyük perhiz*”’i de içeren süreçte balık ve et tüketilmez.

Çalışmanın bir diğer önemli sonucu da oruç gibi ibadet uygulamalarında gastronomi unsurlarının önemli bir aracı rolü olduğudur. Birçok dinde gerçekleştirilen bu oruç uygulamaları dinlere göre farklılık göstermektedir. Örneğin Müslümanlarda ve Yahudilerde oruç; tüm yiyecek ve içeceklerden tamamen uzak durmak şeklindeyken, Hristiyanlarda oruç; hayvansal gıdaların, alkollü içeceklerin veya bazı yiyecek ve içecek türlerinden uzak durulması şeklindedir.

Hayvansal gıdaların tüketilmesi konusunda da dinlerde farklı uygulamalar görülmektedir. Domuz eti Müslümanlar ve Yahudiler açısından haram olarak kabul edilirken, Hristiyanlar tarafından yaygın bir şekilde tüketilmektedir. Hinduizm, Budizm ve Caynizm’e inanların çoğu canlılara şiddet uygulanmasına karşı olduğundan vejetaryendir.

Tüm bu bilgiler ışığında, gastronomide ve din ilişkisi konusunda yapılan bu çalışmanın okuyucuya katkı sağlayacağı öngörülmektedir.

GASTRONOMİNİN KÜRESELLEŞMESİ VE YERELLEŞMESİ

Gökhan Yılmaz

Giriş

Gastronomik ürünlere ilişkin tüketim ya da deneyimin anlaşılabilmesi için küreselleşme ve yerelleşme ikileminin açıklanmasına ihtiyaç duyulmaktadır. Bu bağlamda öncelikle gastronomik ürünlerin ne anlama geldiği sorusunun yanıtlanması gerekmektedir. Gastronomik ürünler, tüketicilerin veya turistlerin belirli bir süre kullanabileceği ya da tüketebileceği, merkezinde gastronomik unsurların (yiyecek-içecek gibi) yer aldığı ürün, hizmet veya bunların bileşiminden oluşan faaliyetler (gastronomi festivalleri gibi) şeklinde açıklanmaktadır (Yılmaz, 2021). Ana akım yazında gastronomik ürünlerin küreselleşmesi ve yerelleşmesine ilişkin nispeten az sayıda çalışma (Hall ve Mitchell, 2000; 2002; Askegaard ve Kjeldgaard, 2007) olduğu dikkat çekmektedir. İlk olarak küreselleşmenin yemek veya mutfak kültürü (Orkun, 2009; Fendal, 2012; Díaz Méndez, 2014; Bingör, 2016; Gürhan, 2017), restoranlar (Lane, 2011), yemek programları (Kanık, 2016), gurmeler (Çaycı, 2019) gibi gastronomik ürünlere ya da paydaşlara yönelik etkileri ele alınmaktadır. Öte yandan fast food restoranları (Taylan, 2008; Khan ve Khan, 2013; Crawford, Humphries ve Geddy, 2015; Ulaş Kadioğlu, 2019), etnik yiyecekler (Mak, Lumbers ve Eves, 2012; Kim, Choe ve Lee, 2016; Hwang, Kim ve Choe, 2018; Nahar, Ab Karim, Karim, Ghazali ve Krauss, 2018) gibi gastronomik ürünlerin küreyerelleşmesi de araştırmalara konu olmaktadır. Yerelleşme ise ağırlıklı olarak turistik tüketim içerisinde çekicilik (Harring-

faaliyet gösterdiği ülkenin yerel kültürünü ve özelliklerini dikkate alarak lavaş, köfte ve ayranı bir araya getirerek oluşturduğu menü, bu işletmelerin nasıl küresel düşünüp yerel olarak hareket ettiğine de somut bir örnek teşkil etmektedir. Bu durum küreselleşme ve yerelleşmeyi ayrı ayrı anlayışlar olarak düşünmek yerine birbirinin tamamlayıcısı olarak görmek gerektiğine işaret etmektedir.

Ana akım yazında gastronomi ile küreselleşme ve yerelleşme ilişkisi gerek kavramsal gerekse görgül bulgular ışığında ayrı ayrı incelenmektedir. Bu çalışmada ise söz konusu olgular belirli bir süreç çerçevesinde birbiriyle ilişkilendirerek ele alınmaktadır. Hâl böyle olunca bu çalışmanın gastronomik ürünlerin küreselleşmesi, yerelleşmesi ve küreyerelleşmesine dair teorik bir çerçeve çizdiği ve bu konuları çalışmak isteyen araştırmacılara bütüncül bir yol haritası sunduğu öngörülmektedir. Aslında teorik de olsa küreselleşme ve yerelleşmenin birbirini tamamlayan bir süreç olduğunu destekleyen az sayıdaki öncül çalışmalardan (Robertson, 1995; Hall ve Mitchell, 2002) biri olarak kabul edilebileceği düşünülmektedir. Pratik açıdan bakıldığında ise daha geniş kitlelere ve pazarlara ulaşmak isteyen yiyecek ve içecek işletmelerinin, yerel tüketicilerin istek ve beklentileri doğrultusunda ürünlerini hazırlaması ve buna ilişkin birtakım pazarlama stratejileri geliştirmesi gerektiği söylenebilir.

Giriş

Mutfak diplomasisi olarak da adlandırılan gastrodiplomasi, bir ülkenin yemek ve mutfak kültürünün uluslararası ilişkilerin geliştirilmesi ve diplomasi için bir araç olarak kullanılması anlamına gelmektedir. Gastronomi ve diplomasi kelimelerinden oluşan gastrodiplomasi, ülkeler arasında iyi ilişkiler kurmak, kültürel anlayışı geliştirmek ve bir ulusla ilgili olumlu algı yaratmak için o ülkenin mutfak geleneklerinin ve yemek kültürünün diplomatik platformlarda kullanılmasıdır.

Gastrodiplomasi ülkeler açısından büyük önem taşımaktadır. Gastrodiplomasi, kültürel alışverişi kolaylaştırdığı, bir ülkenin yumuşak gücünü geliştirdiği, ekonomik faydalar sağladığı, insanlar arası ilişkileri güçlendirdiği, barışın inşasına katkıda bulunduğu ve kamu diplomasisini güçlendirdiği için ülkeler açısından önemlidir.

Gastrodiplomasi, günümüzün sert ve rekabetçi dünyasında yumuşak bir güç olarak kullanılmaktadır. Yumuşak güç, bir ülkenin istenen sonuçlara ulaşmak için baskı veya kuvvet uygulamadan ikna yöntemini ve ülkenin çekiciliklerini kullanarak diğer ulusları etkileme yeteneğini ifade etmektedir (Nye, 2004). Gastrodiplomasi, hem ulusal hem de uluslararası bağlamlarda halkla ilişki kurmak için erişilebilir ve tehdit edici olmayan bir yol sağlar. Bir ülkenin mutfağının ön plana çıkarılması ülkenin itibarını artırabilir ve insanların o ulusun kültürü ve halkı hakkındaki algılarını olumlu yönde etkileyebilir. Ülkeler, mutfaklarını tanıtarak uluslararası arenada ilgi uyandırabilir, yurt

Dijital platformların ve sosyal medya platformlarının yükselişi, hükûmetlere ülke mutfaklarını sergilemeleri ve küresel izleyicilerle etkileşim kurabilmeleri için uygun bir zemin sağlamaktadır. Gelecekte de gastrodiplomasi faaliyetlerinin yürütülmesinde, ülke ve yemek kültürlerinin tanıtılmasında bu platformların önemi artmaya devam edecektir. Günümüz tüketicisi sağlık ve sürdürülebilirlik konularına karşı daha ilgili ve hassastır. Bu nedenle tüm toplumlarda geleneksel ve organik tarım uygulamalarını teşvik etmeye, yerel gıda sistemlerini desteklemeye ve yerel gıda kültürlerini öne çıkarmaya doğru bir eğilim söz konusudur. Gastrodiplomasi, sürdürülebilir tarım uygulamalarının desteklenmesinde önemli rol oynayabilir.

GASTRONOMİDE POPÜLER KÜLTÜR VE SOSYAL MEDYA

Özge Kılıçarslan

Giriş

Medya, iletişim ve bilgilendirme fonksiyonunun yanı sıra kültürel dönüşümlerin yaşanmasında ve aktarılmasında önemli bir rol üstlenmektedir (Karaduman, 2017). Öyle ki günümüzde popüler kültürün, medyanın etkisinde kaldığı birçok araştırmacı tarafından belirtilmektedir (Ishak ve Rahman, 2022; Karaduman, 2017). Gazete, radyo ve dergiden sonra televizyon, bilgilendirme işlevinden ziyade kitleleri etkileme fonksiyonu ile dikkat çekmiştir. Filmler, diziler, televizyon programları gibi kitlelerin davranışlarını etkileyen geleneksel medya biçimlerinin yanı sıra söz konusu geleneksel medya türlerini tamamlayan ve bazı durumlarda onların yerini alan Instagram, Facebook gibi modern sosyal medya anlayışının doğması, popüler kültür ile medyanın iç içe geçmesine neden olmuştur.

Günümüzde sosyal medya kullanımının yaygınlaşması ve sosyal medyada geçirilen sürenin artması, sosyal medya araçlarının, geleneksel medya araçlarından çok daha fazla kültüre yön verdiği ve geniş kitleleri etkileyip harekete geçirdiğini düşündürmektedir. Öyle ki 2023 yılı itibarı ile dünyanın %60'ının sosyal medya kullandığı belirlenmiş ve yaklaşık 4,80 milyar kullanıcıya ulaşan sosyal medyada günlük ortalama geçirilen sürenin 2 saat 24 dakika olduğu tespit edilmiştir (Chaffey, 2023). Traveler Value Index (2023) verileri ise sosyal medyanın, televizyon, dergi gibi geleneksel bilgi kaynakları kadar turistik aktivitelere ilham olduğunu göstermiştir. İstatistik veriler

sosyal; son olarak iyi hissetmek veya uzaklaşmak için psikolojik olarak güdülenmektedir. Bilimsel veriler de toplumun gastoronomi temelli görsel içerikler aracılığı ile sosyal medyayı artan şekilde benimsemesini *işlevsel, sosyal ve psikolojik* güdülere bağlamaktadır.

GASTRONOMİDE TURİSTİK ÜRÜN UNSURLARI

Ayşegül Acar

Giriş

Turizm endüstrisindeki sürekli değişim ve gelişmeler, turistlerin seyahat alışkanlıklarını büyük ölçüde etkilemektedir. Gastronomi turizmi, alternatif bir turizm türü olarak ortaya çıkmış olup seyahat edenlerin ilgi ve tercihlerinde önemli bir değişim yaratmıştır. Geleneksel turizm anlayışını, lezzet ve mutfak kültürleriyle birleştiren gastronomi turizmi, destinasyonları zengin yemek çeşitliliği ve yerel tatlarla birlikte sunduğu kültürel deneyimlerin öne çıktığı bir turizm türüdür (Akgöl, 2014). Turistlerin seyahatleri sırasında gıda ve içecek hizmetleri satın almak zorunda kaldığı düşünüldüğünde, bu hizmetlerin kalitesi, turistik deneyimlerini şekillendirmede önemli bir rol oynamaktadır (Kozak vd., 2011). Standart hizmetlerin ötesinde, sunulan hizmetler ve ürünlerin arkasındaki hikâyeler, doğal ve kültürel unsurlarla desteklenerek kalıcı iyi bir izlenim ve gastronomik deneyim sağlamaktadır (Nebioğlu, 2016).

Gastronomi turizmi, turistlerin yerel lezzetlerle etkileşime girebileceği ve yeni kültürel deneyimler yaşayabileceği bir fırsat sunmaktadır. Ancak burada üzerinde durulması ve ayırımının yapılması gereken husus, gastronominin bir turistik ürün olarak mı ele alındığı yoksa gastronomideki turistik ürün unsurlarının mı vurgulandığıdır. Bu durumda, net bir ayırım yapmak önemlidir. Gastronomi turizmi, bir turistik ürün olarak ele alınırken, destinasyonların gastronomik çekiciliğini vurgulayan bir kavram olarak karşımıza çıkmakta-

layabilirler. Aynı zamanda turistik ürünlerin sürdürülebilirliğini sağlamak için, yerel ekonomi ve kültürel mirasın korunmasına özen gösterilmelidir. Bu amaçla, gastronomi turizminin gelişimi için tüm paydaşların iş birliği ve uyumlu çabaları önemlidir.

Sonuç olarak gastronomi turizmi, turistik ürünler ve yerel mutfak kültürüne odaklanan bu çalışma, turizm sektörü ve gastronomi alanındaki profesyonellerin ve akademisyenlerin dikkatini çekmeyi hedeflemiştir. Gastronomi turizmi ve turistik ürünlerin potansiyelinden yararlanmak için, gelişmiş pazarlama stratejileri, eğitim merkezleri ve iş birliği çabalarının desteklenmesi gerekmektedir. Bu sayede, gastronomi turizmi daha sürdürülebilir ve katma değeri yüksek bir turizm türü olarak gelecekteki yerini sağlamlaştırabilir.

GASTRONOMİ VE TEKNOLOJİ

Burak Pınarođlu

Giriş

Gastronomi bilimi, gıdaların üretim, dağıtım ve sunum süreçlerinde teknolojik yeniliklerden yararlanmaktadır. Bu çalışmada teknoloji ve gastronomi etkileşimi, literatür taraması ve doküman analizi gibi nitel araştırma yöntemleriyle araştırılmaktadır. Araştırmanın ana amacı teknoloji ve dijital dönüşümün gastronomi üzerindeki etkilerini tespit etmektir. Gastronomide belirli teknolojilerin genel teknolojik gelişmelerle birlikte geliştiđi gözlemlenmiştir. Artırılmış gerçeklik, nesnelerin interneti (IoT), yapay zekâ (AI), robot teknolojisi, mobil uygulamalar ve 3D baskı gibi dijital yenilikler sektörde giderek yaygınlaşmaktadır. Gastronomi, teknoloji trendlerine ayak uydurmakta ve gelecekte de bu eğilimi sürdürmesi beklenmektedir. Bu nedenle, dijital teknolojilerin gastronomi alanında kullanımının artık bir bilim-kurgu olmaktan çıkıp gıda endüstrisinde giderek daha sık kullanılan bir trend olduđu sonucuna varılabilir.

17.1. Dijital Gastronominin Ortaya Çıkışı

Teknolojik gelişmeler çeşitli sektörlerde devrim yaratmıştır. Gastronomi endüstrisi de bu sektörlerden birisidir. Lipson ve Kurman (2013) tarafından ortaya atılan “dijital gastronomi” kavramı, gıda bilimi, mutfak sanatları ve dijital teknolojinin kesişimini ifade etmektedir. Yemek hazırlama ve sunmaya yönelik bu yenilikçi yaklaşım, gastronomi ortamını dönüştürerek tüketici-

yenilikçi yaklaşımların benimsenmesini kolaylaştırarak gıda sektöründe sürdürülebilir ve etkili büyümeyi destekleyebilir. Gastronomi mutfak sanatları alanında teknoloji ve inovasyonun kullanılmasının sağladığı yararlar ve faydalar konusunda sürekli bilgi paylaşımı yapılarak gastronomi sektörünün büyüme ve gelişme hızı artırılabilir.

Sonuç olarak gastronomi alanında teknolojik gelişmelerin ve yeniliklerin uygulanması, endüstri bazında büyümesi için bir zorunluluk hâline gelmiştir. Bu süreçte, kesintisiz bilgi alışverişinin yanı sıra çalışan eğitimi, gelişen teknolojilere uyum sağlamayı sağlarken, endüstri büyümesinde de hayati bir rol oynayacağı düşünülmektedir.

Her geçen gün daha fazla teknoloji ile iç içe geçen gastronomi, dünya çapındaki araştırmacılar arasında yeni ve ilgi çekici bir konu olarak kabul ediliyor. Bu çalışmanın konu ile ilgili mevcut literatüre katkı sağlayacağı ve bundan sonraki araştırmalar için bir kaynak olarak değerli olacağı öngörülmektedir.

18. BÖLÜM

GASTRONOMİDE PAZARLAMA

Samet Gökkaya

Giriş

Günümüz pazarlama anlayışı klasik manadaki mal ve hizmetler yerine mal ve hizmetlerle etkileşim hâlinde bulunan insanlar, olaylar, tarihî ve kültürel alanlar, geçmiş tecrübeler ve fikirleri de kapsamaktadır. Pazarlama sadece mal ve hizmetleri talep edecek tüketim noktalarının bulunması olmaktan çıkmış, yaşam alanlarımızın geliştirilmesi, kaynakların verimli ve hedefe yönelik kullanımı ve hatta bir kentin tercih edilebilirliğini artırmak için de kullanılmaya başlanmıştır (Elmacıoğlu ve Seçme, 2023). Özellikle kültürel değerleriyle ön plana çıkan kentlerin pazarlama stratejileri oluşturdukları ve bu stratejileri uygulamaya çalıştıkları ifade edilebilir.

Kültür turizm destinasyonları olarak ifade edebileceğimiz mutfak kültürleriyle ön plana çıkan kentler, kendilerini gastronomi ürünleriyle pazarlamaya çalışmakta ve bu kapsamda pazarlama karması elemanlarını kullanmaktadır. Günümüzde gastronomi ve turizm arasındaki bağ gün geçtikçe kuvvetlenmektedir. Turizm hareketleri içerisinde gastronominin rolü anlaşıldıkça destinasyon yöneticilerinin gastronomi turizmi ile ilgili yaptıkları faaliyetlerde de artış gözlemlenmektedir. Ziyaretçilerin fizyolojik ihtiyaçlarını karşılamak için zorunlu olarak sunulan yiyecek ve içecekler günümüzde fizyolojik ihtiyaçları karşılamının ötesine geçmiştir. Artık insanlar birlikte olma, statü, prestij gibi nedenlerle yiyecek içecek tüketmektedir. Bu nedenlerle son yıllarda gastronominin turistik faaliyetlerde temel motivasyon nedeni hâline geldiği ifade edilebilmektedir.

heyecan verici bir yolculuk vaat etmektedir. Bu trendler, yemek deneyimini sadece bir beslenme şekline çok daha fazlasına dönüştüren etkileyici ve ilgi çekici bir sektörün varlığını sürdüreceğini göstermektedir. Gastronomide markalaşma süreci, özenle ve stratejik bir şekilde yönetilmelidir. Marka kimliğinin oluşturulması, hedef kitlenin ihtiyaç ve beklentilerine uygun olarak planlanmalıdır. Lezzet ve sunum, markanın temelini oluştururken, görsel tasarım, renkler ve mesajlar da markanın algılanışını şekillendirmektedir. Farklılaşma, güven, müşteri bağlılığı ve büyüme imkânları gibi avantajlarıyla markalaşma, gastronomi dünyasında başarıya ulaşmak için önemli bir stratejidir. Gastronomi pazarlaması, stratejik bir planlama ve sürekli takip gerektiren bir süreç olarak ifade edilebilmektedir. Müşteri odaklılık, kalite, yenilikçilik ve duygusal bağ oluşturma, gastronomi işletmelerinin başarılı bir pazarlama süreci yürütmesinde kritik rol oynamaktadır. Restoranlar ve gıda işletmeleri için etkili pazarlama stratejileri, müşteri tabanını genişletmek, sadık müşteri kitlesini oluşturmak ve rekabet avantajı sağlamak açısından büyük önem taşımaktadır.

Yenilikçi ve Isıl Olmayan Teknolojilerin Gıda Sanayinde Kullanımı: Yüksek Basınç

Sencer Buzrul

1. GİRİŞ

Hepimiz yiyip içiyoruz ve bunu istisnasız her gün yapıyoruz. Belki de günlük yaşamımızın içerisinde bu kadar yer kaplaması nedeniyle gıda söz konusu olduğunda hepimiz konuşuyor, tabiri caizse konunun uzmanı gibi davranıyoruz. Gıda tüketicisi olarak bize “Yiyecek ve içeceklerinizin nasıl olmasını istersiniz?” diye sorsalar, hemen herkes benzer şeyler söyleyecektir: “Sağlıklı, lezzetli, besleyici değeri yüksek, ucuz, raf ömrü uzun, doğal, ya da doğala en yakın, katkı maddesi içermeyen, yıl boyunca market raflarında bulunan vb.” Aslına bakılırsa tüketici olarak gıdalla ilgili isteklerimiz çelişkilerle doludur. Şöyle ki, bir ürünün hem katkı maddesi içermemesi hem uzun bir raf ömrüne sahip olması hem de besin değerinin yüksek olması çok kolay değildir. Biz bunlara tüketici çelişkileri diyoruz. Bir kısmı çelişkili de olsa günümüz tüketicilerin talep ettikleri gıda ürünlerini ortaya çıkarma çabası gıda sanayinde birtakım yeni teknolojilerin türemesine neden olmuştur. Kitabın bu bölümünde yenilikçi ve ısıl olmayan gıda teknolojilerinden olan yüksek basınç işlemlerinden bahsedeceğiz. Ancak detaylara geçmeden siz okuyuculara kısa bir ön bilginin verilmesi gerektiğini düşünmekteyiz.

Geleneksel ısıl işlemler (örneğin sütün veya meyve suyunun pastörize edilmesi) gıdaların raf ömrünün uzamasını ve mikrobiyal açıdan güvenilirliğini sağlarken, gıdalarda besin, vitamin ve renk kaybına veya değişimine neden olabilmekte, gıdalarda kullanılan bazı katkı maddelerinin ise -o gıda-

BÖLÜM 2

Nanoliflerin Et Ürünlerinde Kullanımı

Halime Alp, Kübra Ünal

1. GİRİŞ

Enkapsülasyon işlemi; maddenin uygun bir kaplama bileşeniyle kaplanması sonucu raf ömrünün uzatılması ve daha etkin olması amacıyla uygulanmaktadır. Enkapsülasyon tekniği, ürünün stabilitesinin korunmasına ve kontrollü şartlarda salınımına avantaj sağlayan bir uygulamadır (Dordevic vd., 2015; Atak, Yıldız ve Uslu, 2017).

Nutrasötik bileşenlerin gıda sistemlerinde ideal bir enkapsülasyon işlemi ile enkapsülasyonu, biyoyararlanımı tehlikeye atmadan hem gıda işleme sırasında hem de sindirim sisteminden geçiş sırasında nutrasötik yükü biyokimyasal olarak sert ortamlardan korumuş olacaktır. Ayrıca, lipofilik veya sulu bir ortamda biyoaktif maddelerin çözünürlüğünü artıracak ve depolama veya işleme sırasında gelişebilecek olumsuz duyuşsal özellikleri de maskeleyecektir (Babazadeh, Jafari ve Shi, 2019). Sprey kurutma, dondurarak kurutma ve emülsifikasyon gibi bazı teknikler, biyoaktif bileşenlerin enkapsülasyonunda kullanılmaktadır. Ancak biyoaktif yüklü lipozomların biyopolimer kaplaması için püskürterek kurutma ve dondurarak kurutma gibi teknolojilerin, kurutma prosesi sırasındaki kullandıkları yüksek işlem sıcaklıkları, çevreye duyarlı biyoaktif maddelere zarar vermektedir ve enerji açısından pahalı bir süreçtir. Bu zorluklar ele alındığında, elektrohidrokinamik işleme de dâhil olmak üzere ortaya çıkan yeni teknolojilerin benimsenmesine iten güçler olarak sayılabilmektedir (Gómez-Mascaraque, Sipoli, de La Torre ve López-Rubio, 2017).

BÖLÜM 3

Sürdürülebilir Gıda Ambalajları: Doğal Biyopolimer Bazlı Nanokompozit Filmler

Aysun Oraç

1. GİRİŞ

Gıda ambalajı, gıda ürünlerinin dış kontaminasyondan korunmasında ve raf ömürleri boyunca kalite, bütünlük ve güvenliklerinin korunmasında kritik bir rol oynar. Geleneksel gıda ambalaj malzemelerinin %75'inden fazlası, hafiflikleri, şekillendirilebilirlikleri, sağlamlıkları ve maliyet etkinlikleri nedeniyle petrol türevi polimerler tarafından üretilen, biyolojik olarak parçalanamayan plastik malzemelerdir (X. Zhao vd., 2020). Ancak bu sentetik polimerler bozunmaz ve plastik atıkların ve molozların çoğu çevreyi büyük ölçüde kirletir. Bu sebeple bu ambalajlar yüksek çevre ve insan sağlığı risklerine neden olmaktadır (Abejón vd., 2020; Rochman vd., 2013). Bu sorunları çözümü için biyolojik olarak parçalanabilen polimer malzemelerin geliştirilmesi ve kullanılması zorunlu hâle gelmiştir.

Son zamanlarda, yeşil kimyanın gereksinimlerini karşılayabilen yenilenebilir ve çevre dostu malzemeler sürdürülebilir gıda ambalaj uygulamaları için geniş çapta araştırılmaktadır. Biyo bazlı polimerler, geleneksel petrol bazlı gıda ambalaj malzemelerinin yerini alma konusunda muazzam potansiyele sahip, sürdürülebilir, yüksek performanslı malzemelerdir. Bu malzemelerin biyolojik olarak parçalanabilirlikleri ve yenilenebilirlikleri nedeniyle potansiyel çevre ve insan sağlığı risklerini ortadan kaldıracılabileceği düşünülmektedir (Atta vd., 2022; Rhim vd., 2013a). Bununla birlikte, biyopolimerler, sentetik polimerlerle karşılaştırıldığında, düşük termal ve mekanik özel-

ve diğer çevresel faktörler gibi çeşitli özelliklerini geliştirebilir. Ayrıca nano-biyoteknolojideki gelişmelerin, biyoaktif gıda bileşenleri ve ambalajlamadaki emtianın sağlık gereksinimlerine de büyük katkı sağladığı açıktır. Yenilikçi malzemelerin kullanımı ve bunların endüstriyel düzeyde uygulanması, gıda maddelerinin kalitesini ve güvenliğini teyit etmenin yanı sıra fiyatları düşürüp etkinliği de arttıracaktır. Sonuç olarak, biyopolimer bazlı nanokompozitler, sürdürülebilir, uygun maliyetli, aktif ve akıllı ambalaj malzemeleri olarak gıda endüstrisinde geniş bir uygulama yelpazesi için muazzam bir potansiyel sergilemektedir.

BÖLÜM 4

Gıda Kaynaklı Biyoaktif Peptitlerin Özellikleri ve Fonksiyonelliklerinin in Silico Analizler ile Değerlendirilmesi

Hale İnci Öztürk

1. GİRİŞ

Proteinler, her canlı organizmaların hayati faaliyetlerini sürdürebilmeleri için temel bileşenler olan makromoleküllerdir. İnsanlar ihtiyaç duydukları miktarda ve kalitede proteinleri besinler aracılığıyla sağlamaktadır. Son zamanlardaki çalışmalar, prekürsör olarak gıda proteinlerinin belirli amino asit dizisi ve kompozisyonuna sahip peptitlere parçalanması ile insan vücudunda belirli fonksiyonlara veya sistemlere fayda sağladığı ortaya konmuştur (Karami ve Akbari-Adergani, 2019). Bu peptitler, biyoaktif peptitler veya fonksiyonel peptitler olarak adlandırılmaktadır. Bu spesifik peptit sekanslarının antimikrobiyal, antihipertansif, kolesterol düşürücü, antioksidan, immünomodülatör, antitrombotik, mineral bağlayıcı ve daha birçok fonksiyonel özelliği gösterdiği bildirilmiştir (Öztürk ve Akın, 2021b). Ayrıca bu peptitler belirtilen fonksiyonel özelliklerinden birini tek içerebildiği bazı peptitler birden fazla fonksiyonel özellik gösterebilmektedir. Birden fazla fonksiyonel özelliğe sahip biyoaktif peptitler multifonksiyonel olarak tanımlanmaktadır. Gıda proteinleri üzerine gerçekleştirilen çalışmalarda da multifonksiyonel peptitlerin çeşitli gıdalarda meydana geldiği ortaya konmuştur (Öztürk ve ark., 2021; Palma-Albino ve ark., 2021; Taniguchi ve Ochiai, 2017). Dolayısıyla gıda proteinleri besin değerine ek olarak fonksiyonel özellikleri açısından son yıllarda bilimsel olarak büyük ilgi görmektedir (Capriotti ve ark., 2016).

BÖLÜM 5

Yoğurdun Yapısının Geliştirilmesinde Kullanılan Yeni Teknolojiler

Çiğdem Konak Göktepe

1. GİRİŞ

Dünya çapında oldukça popüler bir süt ürünü olan yoğurt, *Streptococcus thermophilus* ve *Lactobacillus delbrueckii* subsp. *bulgaricus* tarafından sütün fermente edilmesiyle üretilmektedir (Purwandari ve ark., 2007). Üretim teknolojisi açısından; piyasadaki yoğurtlar pıhtısı kırılmamış yoğurtlar, pıhtısı kırılmış yoğurtlar ve ayran olmak üzere temelde 3 ana grupta toplanmaktadır. Pıhtısı kırılmamış yoğurtlar genellikle ambalajda fermente edilir ve geleneksel imajlarıyla bağlantılı olarak daha sert bir jel yapısına ve doğal bir lezzete sahiptirler. Pıhtısı kırılmış yoğurtlar ise fermentasyon tankında fermente edildikten sonra pıhtı karıştırılarak kırılır. Bu işlem ona yarı katı bir yapı kazandırırken genellikle stabilizatörler, meyve parçaları ve çeşitli aromalar eklenmektedir (Loveday ve ark., 2013). Ayran ise geleneksel olarak yoğurda su ve tuz katılarak veya endüstriyel olarak seyreltilmiş sütün fermentasyonu ve fermentasyondan sonra tuz içeren su ile daha fazla seyreltilmesiyle üretilir (Koksoy ve Kilic, 2004). Fermente süt ürünlerinin popülaritesini belirleyen en önemli özellikleri arasında reolojik, tekstürel ve duyuusal karakteristikleri sayılabilir (Lee ve Lucey, 2010).

Yoğurdun tekstürel özellikleri, yoğurt sütüne uygulanan sıcaklık ve süre, starter bakterilerin türü ve miktarı, fermentasyon sıcaklığı, depolama koşulları ve daha özel olarak süt bazlı protein kompozisyonu gibi çeşitli parametrelerden etkilenmektedir (Kristo ve ark., 2003; Lucey ve ark., 1998;

BÖLÜM 6

Tahıl ve Baklagillerden Elde Edilen Protein İzolatları ve Gıdalarda Fonksiyonel Kullanımı

Hilal Arslan Bayrakçı

1. GİRİŞ

Dünya protein gereksinimleri, gıda güvenliği ve proteince yetersiz beslenme ile ilgili artan endişelerle küresel bir sorun olmaya devam etmektedir (Blandford, 1996). 2050 yılına kadar 9 milyar olacağı tahmin edilen dünya nüfusu ile küresel gıda güvenliğinin önündeki en büyük zorluklardan biri, protein gereksinimlerinin sağlıklı ve çevreye duyarlı bir şekilde karşılanabilmesini sağlamaktır (de Boer vd., 2014; Smetana vd., 2018). Hayvansal proteinler, besleyici ve fonksiyonel özellikleri açısından bitki bazlı proteinlere göre rekabet avantajına sahip olsa da protein içeriği pazarı, hayvansal bazlı ürünlerin tüketimiyle ilişkili farklı etnik, dini, diyet ve ahlaki tercihlere sahip tüketicilerin taleplerini karşılamak için yoğun bir şekilde alternatif, yeterince kullanılmayan konsantre bitki proteinleri kaynakları aramaktadır (Hadnadjev vd., 2017a). Et, iyi beslenme profili, eşsiz ve çekici tadı ile uzun zamandır vazgeçilmez bir besin kaynağı olmuştur. Ancak dünya çapında ete olan talebin sürekli artması, arz konusunda endişelere yol açmıştır (Zheng vd., 2022). Özellikle 2050 yılına kadar et tüketiminin %50'den fazla artacağı tahmin edilmektedir (Bonny vd., 2017). Bu talebin artmasıyla, etle ilgili etik ve çevresel sorunun ele alınması gerekliliği ortaya çıkmıştır (P. Kumar vd., 2017). Toprak ve su kaynaklarına olan talebin artması, sera etkisinin neden olduğu ekolojik değişiklikler ve hayvan refahı gibi sorunlar bunlardan bazılarıdır (Clark vd., 2017). Ayrıca vejetaryen gıdaların geliştirilmesi, vejetaryenlerin, hayvan refahı savunucularının ve sağlıklı diyet yapanların destek-

zemelerin kompostlaştırılmasını teşvik ettiğinden, biyobozunur plastikler gelişmiş ülkelerde pazar ivmesi kazanmaktadır (Agriculture and Agri-Food Canada, 2015).

Soya proteini, film oluşturucu özellikleri nedeniyle kapsamlı bir şekilde incelenmiştir. Çalışmaların çoğunda %90'dan fazla protein içeren ve izoelektrik çöktürme (pH 4.5) ile elde edilen soya proteini izolatu kullanılmıştır. Soya sütü, soya unu ve fraksiyonlarına ayrılmış soya proteinlerinin kullanımı da bildirilmiştir (Mariniello vd., 2003; Seung ve Rhee, 2004).

Buğday gluteni, plastikleştirildiğinde, tahıllar ve diğer bitki proteinleri arasında viskoelastik özelliklere sahip viskoz karışımlar oluşturma yeteneği bakımından benzersizdir (Gällstedt vd., 2004). Glutenden yapılan filmler saf ve şeffaftır, böylece saflık ne kadar yüksek olursa, mekanik özelliklere sahip o kadar güçlü bir film üretilir (Hernández-Muñoz vd., 2004). Gluten, yer fıstığını kaplamak ve boyaları ve tatlandırıcıları kapsüllemek için kullanılır. Doymamış yağ asitlerinin püskürtülerek kurutulmuş gliadin tozu ile mikrokapsülasyonu, oksidasyonu azaltır ve diğer numunelere kıyasla en düşük miktarda peroksit üretir. Gluten bazlı biyobozunur filmler, esnek olmalarına rağmen yeterli dayanıklılığa sahiptir ve aynı zamanda nispeten şeffaftır. Gluten filmi ayrıca antioksidanlar, antimikrobiyaller ve tatlandırıcılar gibi katkı maddelerinin taşıyıcısı olarak işlev görebilir ve gıda kalitesinin korunmasına yardımcı olabilir (Gontard vd., 1993).

BÖLÜM 7

Gıda Proseslerine Yeni Yaklaşım: 3 Boyutlu Baskı (3D Printing) Teknolojisi

Sevil Çıkrıkçı Erünsal

1. GİRİŞ

Doğal kaynakların verimli şekilde değerlendirilmesi ve sürdürülebilir yaklaşımlar, küresel sorunlara verilen önemin artmasıyla son yıllarda oldukça gündem kazanmıştır. Özellikle artan nüfusun ihtiyaçlarını karşılamaya yönelik en temel konulardan biri olan gıdanın kaynaklarının korunması, güvenli tüketimi, mevcut kaynakların yeni teknolojilerle farklı ihtiyaçlara cevap verebilen formlara dönüştürülmesi ve sıfır atık üretimi gibi amaçlara yönelik yeni yollar araştırılmakta ve gelişen teknoloji ile bu konulara yönelik çalışmalar hızla ilerlemektedir. 3D gıda yazıcıları bu noktada pek çok avantajı nedeniyle ön plana çıkan uygulamalar arasında sayılabilir.

Sürdürülebilirlik sadece mevcut kaynakların korunması değil aynı zamanda verimli ve akılcı bir yolla üretmek anlamına da gelmektedir. Kısaca gıda sektöründe sürdürülebilirlik, gıdaların çiftlikten çatala olan hazırlanma, işlenme, saklanma ve tüketim gibi aşamalarına ait ekonomik ve ekolojik oluşabilecek zararı en az seviyeye indirme girişimi şeklinde tanımlanabilir (Taş ve Olum, 2020). 3D gıda baskısı, istenilen formlarda kişiye özel üretim ortamı ve beslenme programı sağlayan, gıda atıklarının yeni ürün geliştirmede kullanımını sağlayan, isteğe bağlı üretim avantajı ile gıda israfını önleyen bilgisayar destekli bir teknolojidir. Gıda yazıcıları, karmaşık şekillerin de basımına olanak tanımakta, özel hasta vb. kişisel ihtiyaçlara göre yeni ürünlerin geliştirilmesinin önünü açmakta, malzeme ve iş gücünden tasarruf sağ-

lenmekte, basımı yapılacak ürünler için hazırlanacak anketlerin bireyler tarafından doldurulması sonucu her tüketicinin ihtiyacı olan besinlerin belirlenmesi ve her katmanda farklı bileşenlerin yer almasıyla bu bileşenlerin birbiri ile etkileşiminin önlenmesi ve böylece sipariş üzerine kişisel ürünlere talebin artması umut edilmektedir. Gelişen dijitalleşme ve pek çok aplikasyon yardımı sayesinde ileride bu alanın gelişiminin son derece hız kazanacağı düşünülmekte ve günlük hayatı kolaylaştıran pek çok kullanım ile karşımıza çıkması beklenmektedir.

Özetle, gıda yazıcıları, gıda endüstrisinde gelecekte hem bireysel hem de ticari kullanımda sürdürülebilir teknolojiler arasında yaygınlaşması beklenen yöntemler arasında olup mevcut durumların iyileştirilmesi ve dijitalleşmedeki ilerlemeler ile bu yazıcıların son derece umut vadeci sonuçlar doğuracağına inanılmaktadır.

Teşekkür

BÖLÜM 8

AtıŖtırmalık Et Ürünleri

Sümevra Sultan Tiske İnan, Gizem Şahin

1. GİRİŞ

Et, bünyesinde doğal olarak bulunan proteinler, yağ asitleri, vitaminler, mineral maddeler gibi besin öğelerince oldukça zengin bir yapı arz eden biyolojik değeri yüksek mükemmel bir gıda maddesidir. Kaliteli besin öğeleri, yüksek nem içeriđi ve uygun pH değeri nedeniyle çiđ etin raf ömrü oldukça kısadır. Çiđ et ve et ürünlerinin raf ömrünü uzatmak amacıyla geçmişten günümüze kadar geçen süreçte tuzlama, kurutma, çeşnilendirme, tütsüleme vb. çok çeşitli muhafaza tekniklerinden yararlanılmıştır. Bu tekniklerin çiđ et ve et ürünlerinin bozulma sürecini geciktirdiđi ve raf ömrünü uzattığına yönelik yapılan birçok çalışma mevcuttur. Et katkılı atıŖtırmalık gıdaların gelişiminin kökeni, bozulmayı geciktirmek amacıyla en eski muhafaza tekniklerinden biri olan kurutma uygulamasına dayanmaktadır. Paleolitik çağda (eski taş devrinde) tarımın benimsenmesinden önce, gıdalar insanlar tarafından çođu kez toplayıcılık yoluyla elde ediliyordu. Bu dönemde insanlar, göçebe ortamlarında ana geçim stratejisi olarak avlanmayı ve toplanmayı benimseyerek hayatta kalmışlardır. Bu insanların uzun süre bozulmadan saklanabilen, hafif, yüksek besleyicilik ve enerji değerine sahip olduğundan dolayı bir yerden başka bir yere yolculukları sırasında yanlarında genellikle kurutulmuş et bulundurdıkları ve avlanma faaliyetleri sırasında bunları tükettikleri bildirilmiştir. Avcılıđın MÖ 10.000'li yıllara (Mezolitik dönemin başlangıcı) kadar insanların yaşamında başlıca geçim faaliyeti olduğuna belirtilmiştir. Kurutulmuş et ürünlerinden olan Pemmikanın ve charqui'nin Avru-

6. SONUÇ

Et katkılı ve atıřtırmalık et ürünleri hızlı ve kolay erişilebilirlik, yüksek besleyicilik değerine sahip olma ve ana öğün yerine tüketilebilme gibi avantajlarından dolayı oldukça popüler olup, alışveriş listelerinde ve tüketici tercihlerinde önemli bir yere sahiptir. Atıřtırmalık gıdaların besleyicilik değerlerini geliştirme amacıyla zenginleştirme ve/veya güçlendirme çalışmalarının yanı sıra oda sıcaklığında raf ömrünü uzatma ve depolanma stabilitesini iyileştirmede çeşitli teknolojik çalışmalara yoğunlaşmıştır. Bu teknolojik çalışmalar arasında hızlı kurutma işlemleri, doğal koruyucu maddelerin formülasyona dâhil edilmesi, ambalajlama/paketleme uygulamalarında inovatif yaklaşımlar gibi konulara öncelik verilmektedir. Ayrıca, üretim maliyetlerini düşürebilmek, nispeten daha ucuz protein kaynaklarından faydalanılabilme olanaklarının yanı sıra sürdürülebilir üretim ve tüketim olanaklarına yönelik çok farklı sayı ve çeşitte atıřtırmalık ürün formülasyonları üzerine de çalışmalar devam etmektedir (Çizelge 1).

BÖLÜM 9

Meyve Atıklarının Gıda Endüstrisinde Değerlendirilme Olanakları

Evrım Burcu Uncu Kırtış, Sühayla Tuna

1. GİRİŞ

Meyve ve sebzeler içerdikleri biyoaktif bileşikler nedeniyle beslenme ve insan sağlığı üzerinde önemli bir role sahiptir. Taze olarak tüketilebildikleri gibi, yarı işlenmiş veya işlenmiş ürün olarak da tüketilebilmektedir. Tüketicilerin bilinçlenmesi ve dünya nüfusunun hızla artması nedeniyle gıdaya, özellikle de meyve ve sebze ve ürünlerine olan talep artmaktadır. Talebi karşılamak için meyve, sebze ve ürünlerinin üretiminin artması ise, ortaya çıkan atık miktarının da artmasıyla sonuçlanmaktadır. Meyve ve sebzelerin hasat sonrası işlenmesi ve depolanması sürecinde (hatta hasattan tüketiciye ulaşıncaya kadar geçen tüm aşamalarda) önemli miktarda işleme yan ürünü veya atığı ortaya çıkmaktadır (Coman ve ark., 2020, Sharma ve ark., 2021). Birleşmiş Milletler Gıda ve Tarım Örgütü (FAO), dünyada üretilen gıdanın en az üçte birinin yani yaklaşık 1.3 milyar metrik ton gıdanın her yıl kaybolduğunu veya israf edildiğini (FAO, 2019) ve meyve ve sebzelerdeki kayıp ve israfın tüm gıda türleri arasında en yüksek olduğunu tahmin etmektedir (Gustavsson ve ark., 2011). Meyve ve sebze atıkları fenolik bileşikler, flavonoidler, karotenoidler, antosiyaninler gibi birçok biyoaktif bileşik açısından zengindir. Bu atıkların değerlendirilmesi, çevre kirliliğinin önlenmesi açısından önemli olduğu kadar, aynı zamanda artan nüfusun ihtiyaçlarının karşılanmasını kolaylaştıracak ve tüketim kaynaklarının daha verimli ve sürdürülebilir kullanımını sağlayacaktır (Pagotto, M. ve Halog, A., 2016; Andrade ve ark., 2019).

Üzümlere uygulanan işlemler sonrası açığa çıkan fazla miktardaki bu posanın kullanılmaması, atılması, üretim yerlerinde birikmesi, uzun süre beklemesi çevre kirliliğine neden olmaktadır (Sarıçiçek ve Kılıç, 2002; Bekar, 2016). Üzüm atıkları (posası) zengin kimyasal bileşimi göz önüne alındığında ucuz ve fonksiyonel bir besin kaynağıdır. Zengin biyoaktif bileşime sahip olması nedeniyle üzüm atıklarından katma değeri yüksek ürünlerin geliştirilmesi, mevcut gıda üretiminde tahıl, et, meyve ve sebze ve süt ürünlerinin üretiminde çeşitli amaçlarla değerlendirilmesi hem mevcut kaynaklarımızın etkin kullanımını hem de çevre açısından önem taşımaktadır. Bu konu birçok araştırmacının da dikkatini çekmektedir. Son dönemde atıkların değerlendirilmesi ile ilgili birçok çalışma yapılmaktadır.

Yeni Nesil Probiyotikler: Taksonomileri, Güvenlikleri, Uygulamaları ve Potansiyel Sağlık Faydaları

Talha Demirci

1. PROBIYOTİK TANIMI VE TARİHÇESİ

Son zamanlarda moleküler biyoloji ve informatik alanında gerçekleşen yeni buluşlar ve devrim niteliğindeki gelişmeler araştırmacıları insan bağırsak mikrobiyomunun kompozisyonunu ve fonksiyonunu karakterize etme konusunda teşvik etmektedir, fakat aslında insan bağırsağı ve mikroorganizmalar arasındaki bağlantılar ve bu bağlantıların sağlık üzerine etkileri konusundaki çalışmalar yaklaşık yüz yıllık bir geçmişe sahiptir. 1889 yılında Tissier bir bebeğin bağırsağından ilk kez bifidobakteri izole etse de sağlık faydası için bağırsak mikrobiyotasının değiştirilmesi gerektiği konsepti ilk kez Elie Metchnikoff tarafından ortaya koyulmuştur (1907). Metchnikoff uzun ömürlü Bulgar köylülerinin beslenme alışkanlıklarını gözlemlemiş ve düzenli şekilde laktik asit bakterilerince zengin fermente yoğurt tükettiklerini ve bu sayede uzun yıllar yaşadıklarını belirtmiştir. 1930 yılında da Minoru Shirota *Lac ticaseibacillus casei* subsp. Shirota içeren ve ilk ticari probiyotik ürün olarak kayda geçen probiyotik Yakult ieeğini satışı sunmuş ve ardından hem üreticilerin hem araştırmacıların ve de tüketicilerin probiyotik ürünlere olan ilgisi hiç azalmadan devam etmiştir (O'Toole ve ark., 2017; Singh ve Natraj, 2021).

Aynı zamanda izolasyon ve karakterizasyon kısımlarında, sonrasında biyüretim ve depolama aşamalarında oksijene hassasiyet engelleri aşılrsa da bu bakteriler için en büyük soru işaretlerinden birisi gastrointestinal sistemden geçerken canlılığını sürdürebilmeleri, düşük pH, sindirim enzimleri ve safra tuzları gibi hücre yapılarını bozabilecek fizikokimyasal ve biyolojik çevre koşulları karşısındaki davranışlarıdır. Bu tür engelleri aşabilmek de yine formülasyonlara ve gıda matrislerine çeşitli koruyucu maddelerin ilavesi, hücre immobilizasyonu ve subletal stres uygulamaları gibi protokoller ile mümkün olabilmektedir.

6. SONUÇ

Birçok metabolik, inflamatuvar ve nörolojik hastalıkla ilişkilendirilen bağırsak mikrobiyotası disbiyosisinin sağlıklı hâle gelmesi için aslında en iyi yollardan bir tanesi beslenme düzenini değiştirmektir. Yüksek yağlı, yüksek karbonhidratlı gıdalardan, aşırı şekerden ve yapay tatlandırıcılardan uzak durarak lif, sebze ve fermente gıda ağırlıklı bir beslenme düzeni oluşturmak bağırsaktaki faydalı bakterileri arttıracaktır. Fakat bu tavsiyelere toplumda uyabilen birey sayısı oldukça azdır. Bu durumda yeni nesil probiyotik bakteriler bağırsak mikrobiyotasının mikrobiyal çeşitliliğini düzenlemek ve restore etmek hususunda önemli bir alternatiftir. İlerleyen dönemde güvenlik endişeleri ortadan kaldırılan ve özellikle insan denemeleriyle faydası net bir şekilde ortaya konan çok sayıda yeni nesil probiyotik adayının tedavi süreçlerine ve ilaç kapsamına girebileceği tahmin edilmektedir.

Et ve Et Ürünlerinin Fonksiyonelleştirilmesi Üzerine Güncel Çalışmalar

N. Meziyet Dilek

1. GİRİŞ

Günümüzde beslenme alışkanlıklarının değişmesi ve buna bağlı olarak toplumda kanser, kalp hastalıkları gibi kronik hastalıkların görülme sıklığının artması tüketicileri ve dolayısıyla gıda üreticilerini sağlıklı ürünlere yönlendirmektedir. Özellikle et ve et ürünleri tüketiminin kanser ve kalp-damar hastalıkları başta olmak üzere birçok hastalıkla ilişkilendirilmesi tüketicilerin et ürünlerine karşı olumsuz tutum geliştirmesine neden olmaktadır. Son yıllarda “fonksiyonel gıdalar” kavramı tüketiciler ve gıda üreticileri için oldukça ilgi çekici hâle gelmiştir. Fonksiyonel gıdalar, hastalık riskini düşüren ve/veya sağlığa faydalı gıda maddeleri olarak tanımlanmaktadır. Tüketiciler bilgi ve bilinç düzeylerinin artmasına bağlı olarak vücuda alınan gıda maddelerinin beslenme işlevinin yanı sıra sağlık üzerinde olumlu etkilere sahip olmasını da talep etmektedir. Bu durum gıda üreticilerini ve araştırmacılarını gıdaların fonksiyonel özelliklerinin artırılması için çalışmalar yapmaya yönlendirmiştir. Bu bölümde, et ve et ürünlerinin daha sağlıklı ve fonksiyonel hâle getirilmesi için yapılan uygulamalar ele alınmaya çalışılmıştır.

2. FONKSİYONEL GIDA TANIMI

Son yıllarda yapılan çalışmalar beslenme ile sağlıklı yaşam arasında önemli bir ilişkinin olduğunu ortaya koymuş, bu durum da tüketicilerin sağlıklı ürün taleplerinin artmasına yol açmıştır. Fonksiyonel gıdalar, temel

formülasyonlarına dâhil edildiği çalışmalar yapılmaktadır. Et ürünlerinin daha sağlıklı ve fonksiyonel hâle getirilmesinde kullanılacak fonksiyonel gıdanın kolay temin edilebilir, ucuz, ürünün teknolojik ve duyuşal özelliklerini olumsuz etkilemeyecek özellikte olması başlıca dikkat edilecek hususlardır. Bir diğer dikkat edilecek nokta ise; bu yeni nesil et ürünlerinin pazarlanması ve tüketimlerinin uzun vadeli etkilerinin değerlendirilmesi ve nihai olarak bu ürünleri yemenin faydaları konusunda müşterileri ikna etmektir. Tüm bu gereklilikler göz önüne alındığında bu alanda daha fazla araştırmaya ihtiyaç olduğu görülmektedir.

CHAPTER 1

E-BOOK QR CODE

Humans have relied on their capacity to create, invent, and innovate for survival throughout their existence. From humble beginnings as primitive hunter gatherers to space explorers in the information age they have developed technologies that have helped them adapt to their environment and thrive. There have been epochs of transformational technological innovation that have reshaped human society.

5 W 1 H

- **What:** Innovation and new technology based transformation of society.
- **Who:** Humans.
- **Why:** To survive, adapt to changing conditions, solving new challenges.
- **When:** Ongoing since at least the last 50,000 years.
- **Where:** Until recently limited to earth, since the 1950s, including space.
- **How:** Through endless ingenuity whereby new learning and knowledge provides different understandings of the challenges faced. Through constant innovation and creativity better solutions to already solved problems are found, in addition to making great efforts to solve novel challenges.

Being Able to Learn and Manage the Learning Organization in the Age of Technology and Information

Fatma Zehra Tan
Alper Tunga Şen

CHAPTER 2

E-BOOK QR CODE

One of the most important competitive factors for businesses in this period in which we live in the information age emerges as an information and learning phenomenon. Knowledge of the business consists of learning. Learning, organizational learning, and learning organizations concepts are essential for businesses in this context. In our study, we aimed to define the outline of a literature review related to these terms.

5 W 1 H

- The process of improving the learning abilities and experiences of organizations.
- Provides significant contributions to the organization by activating ordinary intelligence, increasing innovation ability by uniting the workforce, and creating an accessible environment.
- We are living in the age of knowledge and technology for building a collaboration in business we must know how to learn and how to be a learning organization.
- The ideas and origins of organizational learning can be traced back to the early 1900's. Philosophers, psychologists, business professionals and many more have influenced the concept of organizational learning as a process.
- Argris and Schon (1978) were the first ones to approach organizational learning as a matter for research as itself. Those researchers considered organizational learning a process of detecting, revealing, and fixing mistakes.
- Peter Senge, who approaches learning from a behavioural perspective, claims that behavioural changes should occur due to learning.

5. For an organization to be considered a learning organization, they need to take in new ideas and be willing to do what?
- Spend money on training
 - Built a database to keep them
 - Take action on them
 - Write them down
 - None of them

Answer Key

1. b - 2. c - 3. d - 4. a - 5. c

CHAPTER 3

E-BOOK QR CODE

The digital age has changed the way businesses operate, and companies that are slow to adapt are at risk of falling behind their competitors. Digital transformation requires companies to embrace change and adopt new technologies and processes. Innovative thinking is crucial in this process because it enables companies to find new and better ways to improve their operations and remain competitive. In the age of Industry 4.0, digital transformation and innovation are crucial for companies to remain competitive and meet the demands of customers.

5 W 1 H

- **What:** Development of digital transformation around innovative thinking in the era of Industry 4.0.
- **Why:** In recent days, the concepts of innovative thinking and industry 4.0 have started to gain importance for businesses along with digitalization.
- **How:** Based on this importance, it is thought that it will be useful to include new information in the literature on this subject.
- **When:** Industry 4.0 and digital transformation have started to enter the life of humanity in a short period of time with the discovery of the element silicon.
- **Where:** The term Industry 4.0 was first used at the Hannover Fair in Germany in 2011.
- **Who:** In October 2012, Robert Bosch GmbH and Henning Kagermann formed a working group and submitted the 4th Industrial Revolution proposal file to the German Federal Government

4. Where did Industry 4.0 first start?

- a) USA
- b) England
- c) Japan
- d) Germany
- e) China

5. What can be defined as digitalizing all processes, starting from the procurement process with the new technology and including all business functions, and as a result, designing and producing products to meet customer demands with customer integration, collecting data from all processes and processing this data, and responding to customer needs in a way to gain competitive advantage?

- a) Innovation
- b) Digital transformation
- c) Innovation Thinking
- d) Industry 4.0
- e) Tecnology

Answer Key

CHAPTER 4

E-BOOK QR CODE

Fierce competition due to customer expectations, technology, and globalization has compelled businesses to innovate to survive and succeed. Innovation is crucial for firms' competitiveness, longevity, and performance. Psychological safety, where employees can express themselves without fear, is key to creating an innovative culture.

5 W 1 H

- **What:** Psychological safety is feeling safe to take interpersonal risks within a group, enabling team members to share ideas, make suggestions and speak up without fear of negative consequences.
- **Who:** Psychological safety affects everyone within a team or organization, especially those involved in innovation processes such as R&D, product development, or creative teams.
- **Why:** Psychological safety is crucial for innovation as it encourages team members to take risks and share perspectives, leading to more creative and innovative solutions.
- **When:** Establish psychological safety at the outset of a project or team formation to ensure team members feel comfortable contributing and taking risks throughout the innovation process.
- **Where:** Psychological safety is relevant in any team or organizational context where innovation is important, including R&D, product development, or other teams creating new products, services, or processes.
- **How:** Encourage open communication, active listening, and constructive feedback. Model vulnerability and risk-taking. Promote diverse perspectives and experimentation.

KEYWORDS

Psychological safety
Innovation
Trust
Productive conflict
Team performance
Leadership
Accountability

CHAPTER 5

E-BOOK QR CODE

The common definition of innovation is the effective commercial exploitation of novel concepts. The emphasis placed on innovation's role in strategy is largely a product of the social and economic climate that is currently in place. Business organizations have increasingly had to react to change more quickly if they wish to succeed in the marketplace in what Drucker termed the “knowledge economy”. The successful implementation of new ideas is so crucial that a company must first find a consumer before it can adjust to deliver the goods and services required to continue turning a profit. From this point of view this chapter's aim is to put forth the link between the innovation and strategy for new business eras.

5 W 1 H

- **What:** The relationship between strategy and innovation in the framework of economic theories.
- **Why:** The roots of innovation lies in 1850's world. So, to understand the need of change for economies we need to know the theoretical roots.
- **How:** Business issues are all related to economic theories, then literature review is the key method.
- **When:** Innovation mentions in the other words the need of change started after Industrial Revolution.
- **Where:** Specially in England and spread through European economies and then to all over the world.
- **Who:** Firstly, Schumpeter talked about innovation, then Peter Drucker gave importance to the matter and linked it with strategy for competitive advantage.

CHAPTER 6

E-BOOK QR CODE

Thriving in today's business environment needs constant innovation, and the relationship between human capital and innovation lies at the heart of an organization's ability to compete and succeed. Human resource management (HRM) and related HR practices can help organizations manage their dependence on these resources by attracting, retaining, and developing employees with the necessary knowledge and skills.

5 W 1 H

- **What:** Human resource practices in innovation refer to the policies and procedures that organizations implement to attract, develop, and retain talent with the skills, knowledge, and abilities required to drive innovation within the organization.
- **Who:** HR practices help organizations build and maintain relationships with key external stakeholders, such as industry experts, academics, and professional networks, to ensure they have access to the latest information and knowledge.
- **Why:** Human resource practices help to attract and retain talent, foster a culture of creativity, and provide resources and support for employees to develop new ideas and technologies.
- **When:** The process of fostering innovation through HR practices can happen at any stage of an organization's lifespan, from start-up to maturity. It is an ongoing process that requires continuous attention and adaptation to changing organizational needs, market conditions, and technological developments.
- **Where:** HR practices should be integrated into the organization's overall strategy and be aligned with its goals and objectives to ensure that innovation is prioritized and effectively supported throughout the company's lifecycle.
- **How:** Resource dependency theory suggests that organizations can reduce their dependence on external resources by building their internal capabilities. HR practices, such as training and development, performance management, and knowledge management, can help organizations develop and leverage their internal resources to achieve their innovation goals.

CHAPTER 7

E-BOOK QR CODE

With the disappearance of borders in the globalizing world, customer expectations and the speed of change have increased significantly. Therefore, companies invest in continuous innovation activities to maintain their market share and profitability. Innovation is fundamental to the survival of most companies today. Marketing and innovation, as two dynamic concepts, have complementary features. Both activities are result-oriented and aim to provide profitability to companies. While the concept of innovation is evaluated in terms of marketing, each marketing mix element, including product, price, distribution, and promotion, should be evaluate separately. One of the main goals of companies is to accurately identify and meet changing consumer expectations. Accordingly, the main purpose of this chapter is to explain the relationship between marketing and innovation and related concepts.

5 W 1 H

- **What:** Marketing innovation is the implementation of a new marketing method that includes elements of the marketing mix known as the 4Ps (product, price, place, promotion) or a combination of these.
- **Who:** In 1954, Peter Drucker stated that business, whose primary objective is to create a customers, have two essential functions: marketing and innovation.
- **Why:** Besides supporting new products and ideas, marketing activities can also be considered an innovation element. Hence, marketing and innovation are two interrelated concepts. Consequently, it is crucial to examine the relationship between these two concepts.
- **When:** Marketing activities should occur throughout all processes, from the emergence of innovation to developing new products and services to introducing these innovations into the market.
- **How:** The changing market structure, increasing environmental concerns, and technological advancements have influenced and transformed customer expectations. Businesses attempting to meet these expectations have had to emphasize marketing and innovation activities more

4. Which of the following is not one of the 4Ps of innovation?
- a) Product
 - b) Process
 - c) Position
 - d) Paradigm
 - e) Place
5. Which of the following cannot be one of the reasons for implementing innovation strategies?
- a) Maintain or increase market share.
 - b) Increase production costs.
 - c) Improve production quality.
 - d) Improve working conditions.
 - e) Improve existing technology.

Answer Key

1. d - 2. d - 3. a - 4. e - 5. b

CHAPTER 8

E-BOOK QR CODE

Innovation in tourism refers to the introduction of new ideas, technologies, and processes that improve the customer experience, streamline operations, and enhance the competitiveness of the business in the management of tourism businesses and destinations. By embracing innovation, tourism businesses and destinations can stay competitive and adapt to changing market conditions and customer preferences. The goal of this study is to show the relationship between tourism management and innovation.

5 W 1 H

- **Who:** is the innovation intended for? Innovation could include tourists, tourism businesses, or government organizations responsible for tourism management.
- **What:** is innovation? Innovation could be a new technology, service, or product that is designed to enhance the tourism experience.
- The origins of the innovation concept can be traced back to the early work of Schumpeter (1934), who defined innovation as the process of creating new products, processes, and business models that disrupt existing markets and create new ones. In the tourism context, innovation has been studied extensively since the 1990s, particularly in destination development, tourism product design, and tourism marketing.
- **Why:** is innovation important? This could be to attract more tourists, improve the tourism experience, or increase revenue for tourism businesses. Embracing innovation, tourism businesses and destinations can stay competitive and adapt to changing market conditions and customer preferences.
- **Where:** will the innovation be available? This could be a specific location, such as a tourist attraction or destination, or a wider area, such as a country or region.
- **How:** will the innovation be implemented? This could involve partnerships between businesses, funding from government organizations, or a marketing campaign to promote innovation.

4. Why is it important for tourism businesses and destinations to embrace innovation?

- a) To maintain traditional practices that have worked in the past
- b) To reduce costs by cutting corners on customer service
- c) To stay competitive in a rapidly changing market
- d) To limit access to certain tourist attractions
- e) None of the above

5. How can government organizations responsible for tourism management promote innovation in the industry?

- a) By imposing strict regulations on tourism businesses
- b) By providing funding for research and development of new ideas and technologies
- c) By limiting access to certain tourist attractions
- d) By promoting traditional practices that have worked in the past
- e) None of the above

Answer Key

1. a - 2. d - 3. a - 4. c - 5. b

CHAPTER 9

E-BOOK QR CODE

In the business world, innovation and entrepreneurship are related terms. Entrepreneurship involves three actions of planning, beginning and maintaining another business. In an economy, entrepreneurship is the taking of risks by innovators known as entrepreneurs. Innovation is the process of translating ideas into products that add value. It fulfills the requirements and meets the preferences of customers.

5 W 1 H

- **What:** The relationship between innovation, entrepreneurship and start up
- **Why:** The majority of start-ups fail within the first five years
- **How:** entrepreneurship and innovation can survive the business.
- **When:** The companies that survive after the first five years, continue to expand at a faster rate and contribute significantly to employment and productivity growth
- **Where:** Innovation is when someone discovers something but is unable to transform it into a commercial idea. That's where an entrepreneur becomes meaningful.
- **Who:** Drucker focuses on innovation as a specific tool for entrepreneurship.

Merkezî Otonomik Kontrol

Resim-1: Beyinde gladyonun yönetim-denetim ve arşiv görevini gören insula (INS) izlenmektedir.

gastrointestinal fonksiyonlar ve miksiyonun refleks kontrolü ile ilgilidir. Pontomezensefalik ağlar ağrı modülasyonunu ve strese karşı davranışsal refleksleri koordine eder. Ön beyin düzeyindeki merkezler, hipotalamus, singulat korteks, amigdala ve insula ise iç ve dış homeostazisi modüle ederek iç ve dış ortama uyumu sağlar. Sıfır ve sonsuzluk arasındaki köprüdür.

İnsular Korteks

İnsular korteks, öncelikle lateral hipotalamusun hem sempatik hem de parasempatik bilgilerini kontrol eden visseromotor alandır (Loewy, 1982; Westerhaus, 2001). Insula esas olarak interoseptif bir kortektir. Üreme, yaşama ve beslenme için gerekli olan visseral fonksiyonları idare eder (Craig, 2003; Saper, 2002). İnsular korteks, otonom organların karakutusudur.

Kardiyak ganglionlar gladyo, ferratio, sibernatio ve mentationun duygusal yazılımının yüklendiđi çipler olabilir. Kim demiş gladyatörler aşktan anlamaz diye... Çünkü aşk denkleminin kökleri karmaşıktır. Ve bu karmaşık kökler gönüle dolaşıktır. Çözemez gül düğümü...

Gladyonun Düş ve Rüyalarının Nöro-Diyalektiği

Düş, bilinç evrenimizin temsilcisi olan beyin kabuğundaki hayal tohumlarının loblar arası izdüşümünün uyanık bilince yansımasıdır. Rüya ise bilinç okyanuslarında daha derinlere düşmüş olan solgun bilinçsiz düşlerimizin otonom ganglionlardaki kayıtlarının beyin kabuğu tarafından bilinç diline tercüme edilmesidir. Düş sibernatio, rüya gladyonun bir güncellenme fonksiyonu olabilir. Beyin kabuğunun yazılım potansiyeli kadar düş; otonom ganglionların yazılım hacmi kadar da rüya potansiyelimiz vardır.

Mehmet Dumlu Aydın

Zihin bilimi gelişen teknolojilerle yeniden anlamlandırılmaya başlanmıştır. Fonksiyonel manyetik görüntüleme teknikleri ile beyindeki imajların resimleri çizilebilmektedir. EEG dalgalarını mors alfabesi felsefesiyle okumanın geleceği yola çıktı geliyor. Jung, Freud gibi bilim adamları insan davranışının bilinç dışı boyutuna bağlı olarak yoğun düşündüler ama kullandıkları yöntemlerin doğuş ve etki mekanizmalarını keşfedemediler. Beyin hasarlı insanların incelenmesi ve mikroelektrot kayıtları ile çok ilginç keşiflerin önünü açtılar. Karmaşık ve muazzam güncel teknolojiler beynin bilinçli yazılımı olan bilinçaltında iş gören kısımlarını anlamamız hususunda devrim yarattılar. Bu kısımdan Subliminal Dünya diye bahsettiler. Başımıza gelen bütün bu bilinçaltı/dışı olayların ölçülemez boyutları bize gündelik hayatımızda pek az rol oynuyor gibi gelebilir. Ama aslında bunlar bilinçli olduğunu sandığımız düşünce ve eylemlerimizin görünmez kökleridir diyor C. Jung. Bizim bu eserde ortaya koymaya çalıştığımız beynin galdyosu, zihin/akıl adlı yazılımımızın altında yatan değil dimdik duran şaşırtıcı ve tuhaf güçlerin veya bu bilinç ötesi içgüdülerin genellikle iradi ve rasyonel kabul edilen davranışlarımız üzerindeki etkileri şimdiye kadar tahmin olunandan daha derin ve karmaşıktır. Eğer kendimizi, toplumu ve dünyayı anlamak istiyorsak ve bizi engelleyen etkenleri anlayıp üstesinden gelmek istiyorsak, her birimiz kendi içimizde gizli olan

dorsal kök ganglionları yoluyla omuriliğe girdiği bildirilmiştir (Richardson J Br J Anaesth, 2009).

Omurilik, gladyonun zamansız çalıştığı derin ve karanlık bir tüneldir.

Dorsal Kk Ganglionları

Dorsal kk ganglionları uyardıkları dokuların yazılımsal ve donanımsal beyinleridir.

Mehmet Dumlu Aydın

Duyusal nronların hcre gvdeleri, zel duyuların entegrasyonu iin beyin ve omuriliđin dıřında ganglionlarda veya organlarda bulunur. Ganglionlar, omurilik veya belirli kraniyal sinir kkleri boyunca yer alır ve duysal nronların ve dendritlerin hcre gvdeleri deride, kaslarda, tendonlarda, eklemlerde ve i organlarda bulunur. Bu dendritler, dokunma, titreřim, esneme, sıcaklık ve ađrıyı hissetmek gibi bir rol oynar. Spinal sinirlerle iliřkili ganglionlara dorsal kk ganglionları denir. Dorsal kk ganglionundaki her bir duyu nronunun hcre gvdesi, dıř ortamdan dendritlerden dorsal kk ganglionundaki hcre gvdesine uzanan ve daha sonra omuriliđe devam eden uzun bir aksona sahiptir. Aksonun gangliondan omuriliđe uzanan blm benzer aksonlarla demet hlindedir. Bu demetlere dorsal kk denir. Spinal ganglion hcreleri bařlangıta bipolar hcrelerdir. Bununla birlikte, bazı nronlar ge-liřim sırasında T-řekilli bir řekilde atallanan tek bir gvde oluřturmak zere birleřerek psdounipolar sinir hcrelerini oluřtururlar.

Arka omurilik kk, duyu nronlarının hcre gvdeleri ve spinal gangliondan oluřan bir icik ierir. Bu nronların biri perifere ve diđeri omuriliđe giden iki dalı vardır. Dorsal kk ganglionları, hcre kmeleri veya sinir lifleri demetleri arasında hcre sıraları olarak bulunur. Bu nedenle, spinal ganglionlar, omuriliđin evreye g eden gri maddesi olarak kabul edilebilir. Nral krestin diđer trevleri, otonom gangliyon, paraganglia ve adrenal medulla hcreleridir. Spinal ganglionun kapslnde spinal sinirin perinryumu vardır, bunun bađ dokusu ieriye dođru uzanır ve her nronun etrafında bir kılıf oluřturur. En iteki kılıf ektodermal uydu hcreler tarafından oluřturulur ve periferik sinirin Schwann hcrelerinin etrafındakine benzer bir bazal zar ile

nusu ağ dejenerasyonunun hem cinsel işlev bozukluklarına hem de anorgazmiye ve hatta literatürde bahsedilmeyen infertiliteye neden olabileceğini dünyaya duyurmuş bulunmaktayız.

Bronislaw Onuf-Onufrowicz (1863-1928). Rusya doğumlu Polonya asıllı Amerikalı nörolog, Zürih Üniversitesinde tıp okudu. Forel'in öğrencisiydi. 1890 dolaylarında ABD'ye göç etti. Patoloji Enstitüsünde Ira van Gieson'un yöneticiliğinde çalıştı. Omurilikte kendi adıyla anılan Onuf çekirdeğini keşfetmesiyle tanınır. Onuf'u bu konularda ilk kez zikretmekten bahtiyarız.

İrade Üzerine Bir Aforizma

Düşündüğünü uygulamakta özgürsün ama düşündüğünü düşünmekte özgür müsün?

(ANONİM).

Oysa irade beyin kabuğu ile gladyonun anlaşmasından doğan ortak bir yazılım ve eylem sergilemesi hâlidir. Gladyo ne düşünüleceğini beyin kabuğuna bildirir. Beyin kabuğu da ne yapılacağını gladyoya bildirir.

Mehmet Dumlu Aydın

İrade bir sistemin kinetik ya da statik konunumu kendi bilinci yönetiminde sürdürbilmesi kudretidir. İnsan için taraf ederse herhangi bir eylemine karar vermesi, başlaması, devam ettirmesi ve sonlandırması işleminde beyin kabuğu ile gladyonun tüm iç ve dış şartları değerlendirerek onunla uyumlu ya da zıt biçimde bir eylem sergilemesi kudretidir. Su içme ihtiyacını hissetmeden ve dilde bulunan susuzluğu hissetme hücreleri bunu beyne bildirir. Bu su içme eyleminin düşünülmesi hususundaki sinyali beyin kabuğu eyleme döker, su arama işini başlatır. Ve bu hücreler doyunca gladyo su içme işlemini sonlandırır. Trigeminal, fasiyal, glossofaringeal ve vagal sinirler bu eylemde müşterek çalışır.

Vicdan Üzerine Aforizmalar

Gladyo ile beyin kabuğu arasındaki bilgi akışını sağlayan önemli sinirlerden biri olan ve en zengin ağ ihtiva eden vagal sinir beyindeki yıldırımları gladyonun yönettiği iç organlara taşıyan bir paratoner, bu organlarda patlayan yanardağların külünü de beyne taşıyan bir volkan bacasıdır. Vicdan iradenin işlediği eylemden dolayı beyin kabuğu ile gladyonun birlikte denge hâlinde oluşudur. Gladyo beyinden aldığı sinyalleri tüm iç organlara iletir ve onların cevabını da beyne gönderir. Bu işlemde vagal sinir adlı bir sinir ağı vardır. Bu sinir gladyonun eyaletleri olan kalbin, akciğerlerin, böbreklerin,

bildirilmiştir (Aydın MD, Int. J. Devl Neuroscience, 2006). Adamkiewicz arter vazospazmı ile ilişkili Onuf'un nükleus dejenerasyonu (Çağlar O, Revista In de Andrologia, 2022) hayvanlarda emzirme anorgazmisinin olası nedeni olabilir. Çünkü bu yol hayvanlarda meme ve genital organları birlikte innerve eder. Vertebral yaralanmalar, intervertebral disk herniasyonu veya intervertebral foramen stenozu sonrası dorsal kök ganglionunun sıkışması da bu anorgazmiye yol açabilir (Sapunar D, J Pain Res,2012; Aydın MD, Int J Neurosci 2018). Adamkiewicz arteri cinsel fonksiyonların düzenlenmesinde çok büyük klinik öneme sahiptir. Spinal subaraknoid kanama Adamkiewicz arteri vazospazmının indüklediği iskemiye bağlı olarak Onuf'un çekirdeğinde ve sakral parasempatik pleksusta nörodejenerasyona, üretral tat tomurcuklarında atrofiye neden olarak da (Çağlar O, Revista Int Androl, 2020) emzirmeden kaynaklanan orgazm duyusunun kaybolmasına neden olabilir.

Vagal/pudental sinirin bu meme tat tomurcuklarını innerve ettiğini ve emziren annelerin meme tat tomurcuklarından aldığı hedonik duyguyu, literatürde şimdiye kadar adı geçmeyen üst beyin merkezlerindeki tat bilgisi düzenleme ve hesaplama merkezlerine ilettiğini ve anneliğin kutsal sayılan duyusunun buradan kaynaklandığını düşünmekteyiz.

Otonom Ganglionlar ve Psikiyatri

Otonom ganglionlar ve oluşturdıkları network, aynı zamanda beyin kabuğunun altındaki fay hatlarıdır. Akıl Depremleri'ne yol açarlar.

Mehmet Dumlu Aydın

Otonom sinir sisteminin ve ganglionlarının bilinç dışı davranışlar üzerinde önemli rolleri vardır (Hall JL, Prog Neurol Psychiatry, 1972; Richins Ca, Prog Neurol Psychiatry. 1963). Otonom sinir sistemi beyin kabuğunun altında bulunan fay hatları gibidir. Nasıl ki fay hatlarının kırılması depremlere yol açıyorsa otonom sinir sisteminin ve ganglionların yazılım çatlama da ruhsal depremlere yol açar. Tüm serebral depremlerden otonom ganglionlar arasındaki istihbarat ağının bozulması ya da hacklenmesi sorumlu olabilir (Aydın MD). Gladyo beynin irrasyonel şifrelerini kırar.

Otonom sinir sistemi, sempatik ve parasempatik sinir sistemi aracılığıyla mesajlar alır ve gönderir. Sempatik sinir sistemi, kalbin kardiyο-hızlandırıcı merkezini, artan solunum ritmini ve bronşların genişlemesini ve arteriyel kasılmayı düzenler, gaz değişimi için akciğerleri modüle eder. Nörotransmitter olarak adrenalın-noradrenalın kullanır. Sempatik sinir sisteminin aksine, parasempatik sistem kalbin kardiyomoderatör merkezini, solunum ritmini ve solunumu yavaşlatır. Nörotransmitter olarak asetilkolin kullanır. Sempatik ve parasempatik bölümler, hayati fonksiyonların dinamik bir modülasyonunu korumak için antagonist olarak işlev görür. Bu sistemler, sırasıyla stellat ganglion ve vagus siniri aracılığıyla kalbe etki eder. Bu mesajların sinoauriküler düğümüne yönelik etkileşimi, kalp hızı değişkenliğinin izlenmesiyle ölçülebilen normal kardiyak değişkenlikten sorumludur. Kalp hızı öncelikle vagal aktivite tarafından kontrol edilir. Kalpten gelen duyuşal veriler merkezî sinir sistemine geri iletilir. Kalp atış hızı değişkenliği, hem merkezî sinir sisteminin otonom sinir sistemini nasıl düzenlediğinin hem de periferik nöronların bilgiyi merkezî seviyeye nasıl ilettiğinin bir göstergesidir. Kalp atış hızı değişkenliği sempatik-parasempatik sistem alternansının bir sonucudur. Son zamanlarda

Son Sözler ve Gelecek Perspektifleri

Orgazmik sensasyon canlılarda ulaşılabilecek en yüksek hazzın zirvesidir. Genital tat tomurcuklarının uyarılmasının gladyoya ve beynin sivil bürokrasisine yaptırılmayacağı iş yoktur. Bu sistem en tehlikeli ve en faydalı gladyodur. O gladyolar gladyosudur.

Otonom Ganglionların Nöro-Pato-Psikiyatrik Yönü

Yöneticilikte kendilerini mahir sanan hücreler; gladyonun da yardımıyla kendilerine karşı sinyal üreten hücreleri organizmadaki yazılıma göre tembel ve bilgisiz olarak kodlanan hücreler tarafından ya aşırı enerjiye sahip antihiyerarşik ya da aşırı stabil ve yeterince yazılım üretemeyen katı tutumlu bağınaz hücrelere göre çok reformik ilan ederek immun sistemin ateşlerine atılır, lenf nodlarında çürütülür ya da yazılımlarını yok etmek için denerve edilirler. Böylece beynin derin iletişim ağları donanım ve yazılım devrelerini logaritmik tarzda kaybederek hızlı bir yıkıma sürüklenir. Hem beyin adlı donanım ve hem de bu donanımın ürünü olan akıl adlı yazılım yavaş yavaş ve farkedilmeden yok olur gider. Dolayısı ile beynin bu derin ağ teşkilatının zarar görmesi telafisi imkânsız otoimmun hastalıkları da beraberinde getirir.

Mehmet Dumlu Aydın

Otonom sinir sistemi, sempatik ve parasempatik sinir sistemi aracılığıyla mesajlar gönderir. Sempatik sinir sistemi, kalbin kardiyo-hızlandırıcı merkezini, artan solunum ritmini ve bronşların genişlemesini ve arteriyel kasılmayı düzenleyen akciğerleri innerve eder. Nörotransmitter olarak adrenalin-noradrenalin kullanır. Sempatik sinir sisteminin aksine, kalbin kardiomodulator merkezini, solunum ritmini yavaşlatan akciğerleri ve bronşların kasılmasını ve arteriyel genişlemeyi innerve eder. Nörotransmitter olarak asetilkolin kullanır. Sempatik ve parasempatik bölümler, hayati fonksiyonların dinamik bir modülasyonunu korumak için antagonist olarak işlev görür. Bu sistemler, sırasıyla stellat ganglionu ve vagus siniri aracılığıyla kalbe etki eder. Bu mesajların sinoauriküler düğüme yönelik etkileşimi, kalp hızı değişkenliğinin izlenmesiyle ölçülebilen normal kardiyak değişkenlikten sorumludur. Kalp hızı öncelikle vagal aktivite tarafından kontrol edilir. Kalpten gelen duyu verileri merkezî sinir sistemine geri beslenir. Kalp atış hızı değişkenliği, hem

Beyinde Hafızayı Silen Karadeliklerin Oluşumu: Alzheimer-Parkinson Hastalığının Kökenine Metaforik Bir Yaklaşım

Hergün bir tanıdık görüntü ya da ses Alzheimer hastalığını ebediyen erteleyebilir.

Mehmet Dumlu Aydın

Makalenin İngilizce aslında, yeni keşfedilen bu hafıza silici ve beyin yutucu kara deliklere verilen ‘‘Dada-Black Hole-DADA-BH’’ kısa ismi, **Data Deleting Amyloid Black Hole**’ tamlamasındaki siyah harflerden alıntıdır.

Dada Black Hollerinin Oluşum Psikofiziği

Black holler, sıfırın fizikteki temsilcileridir. Toplama ve çıkarma işleminde bugün için etkisiz görünen sıfır; böldüğü sayıyı sonsuz parçaya ayırırken çarpıldığı sayıyı yok eder. Karadelikler de maddenin sıfırlanmış hâlidir. Onu önce sonsuz parçaya ayırır sonra da sıfır kütle/hacimde toplayarak bağısladığı sonsuz bir çekim gücü ile tüm evreni yutacak hâle getirir. Soyut anlamda ölüm, canlının kendi içinde taşıdığı sıfırla çarpılması sonra da sıfıra bölünerek sonsuz parçaya ayrışmasıdır.

Dada Black Hollerinin Nörofiziği

Beynin donanımında koku ve tat sinyalleri, yazılımında işe ışık ve ses sinyalleri daha etkindir. Beyni yutan karadelikler, özellikle hafıza alanlarında koku ve tat sinyallerinin bozulmasıyla oluşan ve öncelikli olarak beyin yazılımı olan hafızayı silen, sonra da yazılım ve donanımı birlikte yutarak yok eden tehlikeli elektromanyetik kütlelerdir. Bu kütlelerin oluşumunda koku ve tat sinyallerinin bozulması kadar; 85 desibel üstü sesler ve 80 Watt üstü ışıklar da sorumludur. Koku ve tat yollarıyla bulaşan COVID-19’un DADA-BH’ler oluşturması da muhtemeldir.

Kitabın Özeti

Eğer beyin adlı organizasyon bir Devleti temsil ediyorsa otonom ganglionlar bu devletin istihbarat ağını temsil ederler. Her organın yakınında ya da içinde bulunan bu ganglionlar aynı zamanda o organın beyni olarak işlev görürler. Kendi içlerinde bağımsız olan bu teşkilat, dış ilişkilerde beyin sapı üzerinden insula ve limbik loba bağlıdır. Yani, derin beyinde olup biten sayısız faaliyetten yalnızca otonom ganglionların temsil ettiği gladyo, omurilik ve beyin sapının temsil ettiği ferratio, insular korteks, limbik lob ve amigdalanın temsil ettiği sibernatio haberdar edilir. Bütün bu alanlarda özetlenen bilgiler neşe-depresyon, huzur-huzursuzluk, labilite-stabilite ve hatta salaklık-deha ikilileri şeklinde mentatiouyu temsil eden beyin kabuğuna gönderilir. Her iki sağ ve sol beyin kabuğu bu bilgileri, ihtiva ettiği milyarlarca nöral devreden oluşan networkun onayına sunar ve geçerlilik kazanan bilgilerin her birinin birer kopyası kendi alanıyla ilgili işlemci çekirdekler olan otonom ve somatik ganglionlarda depolanırken bunların birer kopyası da aynı zamanda hippokampal dosyalarda kayıt altına alınır.

İÇİNDEKİLER

Sunuş..... vii

BÖLÜM 1..... 1

- a. Matematik Nedir? 3
- b. Sanat Nedir? 4
- c. Matematik ve Sanat İlişkisi 5

BÖLÜM 2..... 7

DOĞADA MATEMATİK..... 9

- a. Simetri 9
 - İnsan Vücudunda Simetri 13
 - a. Dış Görünüşte Simetri 13
 - b. İç Organlarda Simetri 14
 - Bazı Simetrik Şekiller 15
 - Güzelliğin Temelleri 16
- b. Altın Oran 18
 - Kepler Üçgeni 20
 - Altın Oranın Tarihçesi 21
 - Doğada Altın Oran 23
 - İnsan Bedeni'nde Altın Oran 23
 - İnsan Eli'nde Altın Oran 24
 - İnsan Kafası'nda Altın Oran 24
 - İnsan Yüzü'nde Altın Oran 24
 - Akciğerde Altın Oran 26
 - İnsan Kulağı'nda Altın Oran 26
 - Bitkilerde Altın Oran 27
 - Sanatta Altın Oran 28
 - Leonardo Da Vinci ve Altın Oran 29
 - Deniz Kabukları'nda Altın Oran 31
 - Yumuşakçalarda Altın Oran 32
 - Deniz Kabukları'nda Altın Oran 33

Boynuzlar ve Dişler’de Altın Oran.....	34
Mikro Dünyada Altın Oran.....	34
Mikro Organizmalarda Altın Oran.....	35
DNA’da Altın Oran.....	37
Kar Kristallerinde Altın Oran	37
BÖLÜM 3.....	39
SANATTA MATEMATİK	41
a. Mimaride Matematik	41
Mimar Sinan;	41
Gize Piramitleri.....	45
Partenon Tapınağı.....	47
Taç Mahal.....	47
Sidney Opera Evi	48
b. Resimde Matematik.....	48
Leonardo Da Vinci.....	49
MC Esher.....	50
c. Müzikte Matematik.....	53
d. Sinemada Matematik.....	56
e. Edebiyatta Matematik.....	57
Edebiyatın Matematikle İlişkisi	57
Şiir’de Matematik	58
BÖLÜM 4.....	59
KEŞİFLERDE MATEMATİK.....	61
a. Thales	61
Thales Teoremleri;	62
Bazı Geometrik Teoremler	63
Thales’in Piramit Problemi.....	65
b. Arşimet (Archimedes) (M.Ö. 287-212)	67
Altın Taç.....	71
Bir Orduyu Tek Başına Yenen Matematikçi.....	72
Kaldırma Kuvveti.....	72
c. Isaac Newton (1642-1727).....	73
Elma Efsanesi	75
Isaac Newton’un Sözleri.....	76

d. Galileo Galilei (1564-1642).....	77
e. Albert Einstein (1879-1955).....	78
Einstein'ın Sözlerinden	81
Einstein'ın Araştırmaları	82
BÖLÜM 5.....	83
EVRENDE MATEMATİK VE	
İNSAN VUCUDUNDA MATEMATİK.....	85
a. Evrende Matematik.....	85
Evrenin Oluşumu - Büyük Patlama (Big Bang).....	87
Senaryo:.....	87
Büzülme (Geriye Gidiş)	89
Evrenin Sırları.....	90
b. İnsan Vücutunda Matematik	92
Vücudumuzla İlgili İlginç Bilgiler	96
İnsan Vücudunun Sırları.....	99
Bazı İlginç Saptamalar	101
BÖLÜM 6.....	105
DOĞADA MATEMATİK.....	107
a. Fraktallar	107
b. Bal Petekleri.....	109
c. Kar Taneleri	111
d. Örüntüler.....	114
e. Bir Anlatı	115
KAYNAKÇA	117

 - 1.3.3. İşitme Duyusu Gelişimi
 - 1.3.4. Duyular Arası Entegrasyon

1.1. GİRİŞ

Normal gelişim, pediatrik rehabilitasyon alanında çalışan bir fizyoterapistin öncelikli olarak bilmesi gereken konular arasındadır. Gelişimsel sapmaları belirleyebilmek, doğru değerlendirme ve analiz normal sürecin bilinmesi ile gerçekleştirilebilecektir. Bu bölüm; okuyucunun normal gelişim, motor gelişim prensipleri, motor gelişim ile dinamik sistemler arasındaki etkileşim, motor gelişimi etkileyen değişkenler, yaşa uygun motor gelişim parametreleri, duyuşal gelişim ve yaşa uygun gelişim özellikleri duyu-algı-motor gelişim süreci ve bu sistemlerin birbiri üzerine etkisi hakkında bilgi ve fikir sahibi olmasını amaçlamaktadır.

1.2. İNSAN GELİŞİMİ

İnsanlarda gelişim, diğer birçok canlıya göre oldukça farklıdır. Kaldı ki bebek ve çocuklardaki gelişim de yetişkinlerdekinden oldukça farklıdır. Bu farklılık, hem sorunların tespiti sırasında hem de rehabilitasyon programlarında mutlaka göz önünde bulundurulur.

Çocuklarda gelişim, yetişkinlerden farklılık gösterir: (1) Çocuklarda çoklu organ maturasyonu (olgunlaşması) ve hızlı büyüme söz konusudur. (2) Hızlı gelişimsel kilometretaşları söz konusudur ve (3) Giderek artan fonksiyonel beceri kazanımı vardır. Bu anlamda normal büyüme ve gelişmenin ne zaman normal olduğu, normal varyasyonlarının ve normalden sapmaların ne olduğu ve ne zaman görülebileceğinin mutlaka bilinmesi gerekmektedir. Bu durum, etkin bir değerlendirme ve rehabilitasyon programı açısından oldukça önemlidir. Çocukluk çağı hastalıkları, bu normalden sapmaların yaygın şekilde görülebildiği durumları kapsamaktadır ve yaş grubuna göre özelliklerde değişkenlikler olabilmektedir.

fazda da duyu modaliteleri arasındaki transferi içeren yüksek seviyeyi ifade eder.

Duyusal entegrasyon, gelişimsel süreç içerisinde bebeğin büyüme ve gelişmesine paralel olmakla birlikte bebeğin meraklı, keşfedici, araştırmacı kimliği, kognitif fonksiyonu ile de ilişkilidir. Duyular arası bütünleşme ayrıca duyuşal gelişim sıralamasına ve duyuşal içi (intersensory integration) ve duyuşal arası (intrasensory integration) entegrasyona da bağlıdır. Duyusal entegrasyonun zor veya daha spesifik özellikleri ergenlik döneminde gelişmeye devam eder.

Bebeklerde basit duyuşal stimulusları birleştirmek zor iken çocuklarda yüksek seviye entegrasyondan bahsetmek mümkün olabilmektedir. Duyular arası bütünleşme, duyunun kendi içindeki gelişimi ile çok yakından ilişkilidir. Çocuklar, ayrıca spatio-temporal alandaki duyuşal stimulus entegrasyonunu da öğrenebilmektedir. Öncelikle spatial-spatial entegrasyon görevlerinde uzmanlaşır, daha sonra karmaşık spatial ve temporal görevleri ve en sonunda da temporal-temporal görevlerde uzmanlaşırlar. Bunun için görülen obje ve/veya şeklin hafızada ututulmasını sağlayan kognitif gelişimin önemi unutulmamalıdır.

Uyarı! Duyusal bütünleşme belli bir sıralama ile bebek/çocuğun motor ve kognitif gelişimi paralelinde ilerler. Herhangi bir basamakta sorun yaşanması duyuşal bütünleşmeyi de olumsuz etkileyecektir.

ÜST MOTOR NÖRON LEZYONU OLAN ÇOCUKLARDA KUVVETLENDİRME EGZERSİZLERİ VE ETKİLERİ

2

Tülay Tarsuslu

Kısa İçerik

- 2.2. GİRİŞ
- 2.2.2. Spastik Serebral Palsili Çocuklarda Meydana Gelen Yumuşak Doku Adaptasyonları
- 2.2.3. Soru-Cevaplarla Kuvvetlendirme Egzersiz Uygulamaları

2.2. GİRİŞ

Çocuklarda erken rehabilitasyon ve egzersiz yaklaşımları, kas iskelet sistemi adaptasyonlarının önlenmesi bakımından da oldukça önemlidir. Bilindiği üzere bebek ve çocuklarda motor performans, vücut yapı ve sistemlerinin durumu, çevre baskısı ve bebeğe görünen durum/olay/hareketin ne olduğuna bağlı olarak değişkenlik göstermektedir. Yani büyüme ve gelişme çağında bebeğin yeni ve zorlu ortamlarda keşfedici olması, problem çözme davranışı ve tekrarlayan uygulamalar göstermesi, motor gelişimi ve motor performansı bakımından önemlidir. Bu keşfedici süreç içerisinde bebek, bazı hareketlerin diğerlerinden daha etkili olduğunu da keşfetmekte ve deneyimlemektedir. Yapılan pratiklerle fleksibilite ve kompleksitede de artış görülmektedir. Böylelikle beceri gelişimi de desteklenmiş ve bebeğin yetenekleri de yavaş yavaş kazanılmış olur.

Beyin lezyonları, hareket paternlerinde bozukluklarla karakterizedir. Bu durum, motor kontrol kaybı, kas zayıflığı ve kas imbalansı ile sonuçlanmakta, uzun dönemde adaptif değişimlerle sonuçlanmaktadır. Organize ve amaca uygun eğitim ve egzersiz programlarının yokluğunda, bu yetersiz hareket paternleri, stereotipik ve alışkanlık/sonradan kazanılmış hareket paternlerine dönüşmektedir. Meydana gelen bu değişimlerde, beceri ve yeteneklerden bahsetmek mümkün değildir. Erken dönem rehabilitasyon programları ile bu duruma müdahale edilmemesi, daha sonraki süreçlerde tedaviyi ve tedaviden elde edilecek başarıyı daha da zorlaştırmaktadır. Erken rehabilitasyon programları ile meydana gelmesi olası bu olumsuz gelişmelerin önlenmesi ve müdahalesi hedeflenmektedir. Yani spesifik kas aktivasyonu ve ekt-

Önemli! Kuvvet antrenmanları ve kuvvetlendirme egzersizleri sırasında daha büyük çocuklar ve ergen SP'li bireyler **sağlıklı** çocuklardan daha hızlı yorulmaktadır. Dinlenme aralarının bu doğrultuda planlanması önemli olacaktır.

Sonuç olarak, kas tonus artışı olan çocuklarda doku adaptasyonları mutlaka göz önünde bulundurulmalı ve her ne kadar egzersizin yarattığı etkiler sağlıklı çocuklarda olduğu gibi olsa da problem yaşayan çocukların (örneğin SP'li çocuklar) egzersiz uygulamasına vereceği cevapların farklılık göstereceği unutulmamalıdır. Bu nedenle egzersiz uygulamalarının etkilerini gözlemleyebilmek için çocuğa özel programlar çizilmeli ve gelişmelerin gözlenebilmesi için zaman tanınmalıdır. Bozulmuş bir dokuyu yeniden tamir etmek, düzeltmek ve işlevsel hâle getirebilmek için spesifik çalışmanın yanı sıra fonksiyonel becerileri de egzersiz uygulamalarına dâhil etmek gerekmektedir. Yani kuvvetlendirme eğitimlerine tek bir kas ve/veya eklemle başlayıp daha sonra, çoklu eklem ve kas eğitimleri şeklinde devam etmek ve fonksiyonel becerilerle desteklemek önemlidir.

3.1. GİRİŞ

Nöromotor bozukluk denilince ilk akla gelen çocukluk çağı tanıları arasında yer alan SP, pediatrik rehabilitasyonun önemli bir kısmını oluşturmaktadır. Bununla birlikte kas hastalıkları (musküler distrofiler ve spinal musküler atrofiler), obstetrik brakial pleksus yaralanmaları, juvenil miyastania gravis, hareket bozuklukları (tremor vb.), otizm spektrum bozuklukları, Down sendromu gibi çocukluk döneminde karşılaşılan durumlar da motor, kognitif, dil ve uyum ile ilişkili sorunlar nedeniyle sıklıkla nöromotor bozukluklar olarak ele alınmaktadır. Bununla beraber prematüre doğan bebekler de nöromotor bozukluklar açısından risk taşımaktadır.

Nöromotor bozukluğu olan çocuklarda rehabilitasyon süreci ve sonuçları var olan sorunu tespit etmek ve çocuğun kapasitesini ölçmeye yönelik değerlendirme sürecinden önemli derecede etkilenmektedir. Çocuklarda değerlendirme ve müdahale, normal gelişim, biyomekanik özellikler, tipik ve atipik gelişim özellikleri, hareket ve postüral kontrol, aktivite ve katılımın yaşam boyu analizine dayanmaktadır. Terapötik müdahaleler, çocuğun kronolojik yaşı göz önünde bulundurularak sosyal-emosyonel-kognitif-duyusal ve fiziksel gelişimine uygun olarak pozisyonlanması, anormal hareket paternlerinin yerine normal hareket paternlerinin öğretilmesi ve desteklenmesi, kas tonus regülasyonu, var olan becerilerin oyun ve günlük yaşam aktiviteleri ile desteklenmesi, gelişebilecek ikincil problemlerin (deformite, kontraktür gibi) önlenmesine yönelik uygulamaları içermektedir. Yapılan bu uygulamalar, motor öğrenme temelli olup beyin plastisitesini aktive edecek, hareket/aktivite tekrarı, biyomekanik gelişim çerçevesinde büyüme ve gelişmenin desteklenmesi ve egzersiz/oyun yaklaşımlarından oluşmaktadır.

hat boyunca yürüyemediği, statik ayakta duruşta salınımlar gösterdiği, dinamik denge içeren futbol vb. aktivitelerde zorlandığı görüldü. Günlük yaşamında farklı zeminlerde (engebeli, taşlı vb.) denge zaafiyetleri yaşadığı ve düştüğü gözlemlendi. Göz hareketleri yavaş olup hareket geçişlerinde göz hareketleri daha geriden geliyordu. Postür al reaksiyonlarda göz hareketlerinin katılımı yetersizdi. Emosyonel olarak çekingen, sosyal yönü zayıf bir çocuktur. Kaba Motor Fonksiyon Sınıflama Seviyesi'ne göre (KMFSS) seviye 2, El Becerileri Sınıflandırma Sistemi'ne göre (EBSS) seviye 1, İletişim Becerileri Sınıflandırma Sistemi'ne göre (İBSS) seviye 1 düzeyindeydi. Tedavi programında gövde ve kalça stabilizasyonunun geliştirilmesi, statik ve dinamik denge eğitimi, göz hareketleri ile kombine egzersizler postür al egzersizler, yürüme eğitimine odaklanıldı. Resim 3.57'deki gibi ayakta postür al stabilizasyonu geliştirmek amacıyla itme ve aproksimasyon uygulamaları yapıldı. Haftada 2 kez 45 dakikalık seanslar şeklinde 3 aylık terapi süreci sonunda, çocuğun statik pozisyondaki salınımlarının ve düşme sıklığının azaldığı, düz bir hattı takip ederek yürüyebildiği, yürümede gözlenen proksimal stabilizasyon yetersizliklerinin azaldığı gözlemlendi. Günlük yaşamında bisiklet sürme, futbol oynama gibi rekreasyonel aktivitelere yönlendirildi.

Resim 3.57. Ataksik çocukta stabilizasyon amacıyla ayakta üst ekstremitesi ile itme ve alt ekstremiteye aproksimasyon uygulamaları

- 4.8. ÜNİTE SONU
 - 4.8.1. Olgu Örneği 1
 - 4.8.2. Olgu Örneği 2

4.1. GİRİŞ

Üst ekstremitte omuz kompleksi ile başlar ve sternum, klavikula, kostalar, skapula ve humerusun mekanik olarak ilişkili olduğu eklemler sayesinde üst ekstremitte geniş bir hareket açıklığı sağlanır. Dirsek, el bileği ve el kompleksi ile üst ekstremitte becerileri günlük yaşam aktivitelerine özgü bir biçimde aktif olarak kullanılır. Mevcut pediatrik hastalıklarda üst ekstremitte problemlerinin varlığında fonksiyonel bozukluklar yaygın olarak gözlenmektedir. Güncel rehabilitasyon programları içerisinde artık pasif modaliteler temel unsur olarak düşünülmemekte ve terapötik egzersizlerden daha fazla yararlanılmaktadır. Yapılan tüm terapötik egzersizlerle kazanılan becerilerin günlük yaşam içine aktarılması, motor öğrenme prensiplerine dayandırılması ise en önemli konulardandır. Bu bölümde, üst ekstremitte becerilerini kazandırmak, ince motor becerilerini artırmak ve günlük yaşam aktivitelerini desteklemek amacıyla taşıyan aktivite ve egzersiz önerileri üzerinde durulacaktır.

4.2. PRONE ÜST EKSTREMİTE PROGRESYONU

Yenidoğan bir bebekte doğum sonrası ilk ay, tüm vücutta olduğu gibi üst ekstremitelerde de fizyolojik fleksiyon pozisyonu hâkimdir. Fizyolojik fleksiyonun azalmaya başlamasıyla birlikte prone pozisyonda pelvis yerle temas etmeye başlar. Fizyolojik fleksiyonun tamamen kaybolmasıyla bebek yüzüstü pozisyonda düz bir şekilde yatabilir. Bebeğin prone pozisyonda ön kollar üzerinde yükselmesi için pelvis stabilizasyonu, antigraviteye karşı başın kaldırılabilmesi, üst ekstremitelerin neonatal pozisyondan farklı hareket edebilmesi gerekir (Resim 4.1).

4.8.2. Olgu Örneği 2

12 yaşında sol unilateral Serebral Palsi (SP) tanılı kız çocuğu. Kaba Motor Sınıflama Sistemi (KMFSS) seviye 1, El Becerileri Sınıflama Sistemi (EBSS) seviye 2. 3 yaşından bu yana, haftada iki seans olmak üzere, bir rehabilitasyon merkezinde fizyoterapi ve rehabilitasyon eğitimi alıyor. Etkilenmeyen taraf ekstremite kas gücü ile karşılaştırıldığında omuz, dirsek çevresi ve ön kol kasları zayıf. Ön kol supinasyon yönünde hareket kısıtlılığı mevcut. Değerlendirmeler sonucunda üst ekstremite fizyoterapi ve rehabilitasyon programına serratus anterior, rhomboid, biceps brachii, brakialis, brakioradialis ve triceps kası kuvvetlendirme eğitimi, ön kol supinasyon germe egzersizleri dâhil ediliyor. Bunun yanında el bileği ekstansiyon ve fleksiyon yönünde dirençli kuvvetlendirme egzersizleri ve el becerilerine yönelik çocuğun yaşına uygun olan aktivite ve egzersizler uygulanıyor. Seansları daha eğlenceli hâle getirmek ve çocuğun katılımını artırmak amacıyla, üst ekstremite enduransını da artırmaya yönelik, basket topu, farklı büyüklükteki pilates toplarıyla farklı açılardan ve farklı hızlarda top atıp yakalama aktivitesi uygulanıyor. Kuvvetlendirme eğitimi için bölüm içeriğinde bulunan görsellerden yararlanılarak egzersiz programı oluşturuldu ve uygun ev programı önerisi verildi.

5.1. GİRİŞ

Pediyatrik rehabilitasyonda alt ekstremiteye yönelik egzersizler gerek ailelerin beklentileri gerekse fizyoterapistin bakış açısına göre rehabilitasyonun önemli bir kısmını kaplar. Günümüz pediyatrik rehabilitasyonunda fonksiyonel egzersizler daha önem kazanmaktadır. Ancak fonksiyonel bir beceriyi elde etmek için bölgeye veya soruna yönelik özel çalışılması gerekliliği de unutulmamalıdır.

Pediyatrik rehabilitasyonda egzersiz programı çizmek için olmazsa olmaz parametrelerden birisi de iyi bir gözlem ve ayrıntılı değerlendirmedir. Fizyoterapistte başvuran çocuk hastanın tek bir değerlendirme ile tedavi edilmesi yanıltıcı sonuçlara neden olabilmektedir. Bu nedenle değerlendirmeler mümkün olduğunca tekrarlanmalı ve yeni gözlemler not edilerek terapi planı elde edilen bulgular doğrultusunda yeniden gözden geçirilmeli ve güncellenmelidir.

5.9 OLGU ÖRNEKLERİ

5.9.1 Örnek 1

2 yaşında kuadriparezi SP olan hastamızın Kaba Motor Fonksiyon Sınıflama Sistemi'ne göre (KMFSS) skoru 5 olarak belirlendi. Sezeryan doğumla 2000 gr olarak doğmuştur. Doğumdan sonraki erken ilk haftalarda gece gündüz ağlaması olan huzursuz bir bebekmiş. Yapılan değerlendirmelerde, gövde ve baş kontrolünün olmadığı gözlemlendi. Alt ekstremitelerde özellikle adduktor kas grubunda Modifiye ashworth Skalasına göre (MAS) 2 değerinde spastisite saptandı. 3 ay boyunca haftada 2 seans olacak şekilde tıp merkezimizde takibe alındı. Diğer günlerde ev egzersizleri verildi.

Egzersiz topu üzerinde gövde çalışmaları yüzüstü pozisyonda baş kontrolü çalışmaları, destekli ayakta durma ve adduktor kas grubu için aktif dinamik germe egzersizleri yapıldı. 3 ay sonunda baş kontrolünün sağlandığı kısa süre de olsa oturmada durabildiği gözlemlendi.

5.9.2 Örnek 2

36 haftalık erken doğum ile 2200 g olarak dünyaya gelen Efe doğum sonrasında 20 gün küvezde kalmıştır. 1 yaşında diparetik SP tanısı konmuştur. Tanı konduktan sonra fizyoterapi ve rehabilitasyon programında başlamıştır. 2 yaşında alt ekstremitede çoklu seviye botulinum toksin Tip A uygulaması yapılmış, 4 yaş civarında da bağımsız yürümeye başlamıştır. 7 yaşında, bilateral gastrosoleus kaslarından gevşetme cerrahisi olmuştur.

Şu anda 9 yaşında olan hastamızın yapılan değerlendirmesinde bağımsız ayakta durabildiği, 400 metre kadar yürüebildiği gözlenmektedir. Yapılan görsel yürüme analizinde erken topuk kalkışı ve dizlerde hafif bükük diz yürüyüşünün olduğu kaydedilmiştir. Aynı zamanda sağ alt ekstremitte internal rotasyon pozisyonundadır. 10 cm yükseklikteki basamağa desteksiz çıkamamaktadır. Değerlendirme sonucunda, fizyoterapi programı şu şekilde düzenlenmiştir: dorsi fleksiyon yönünde dinamik germe egzersizleri, dorsi fleksör kasları kuvvetlendirme, bağımsız ayakta dururken denge ve stabilizasyon egzersizleri, farklı zeminlerde yürüme egzersizleri, 5 cm yükseklikteki basamakta desteksiz adım alma çalışmaları, duyu minderi ve bosu topuyla proprioseptif duyu çalışmaları, destekli merdiven inme çıkma

çalışmaları, erken topuk kalkışı için çift aşamalı eklemli AFO önerilerek çocuk ortopedistinden konsültasyon istenmiştir.

5.9.3 Örnek 3

Doğum öyküsünde normal doğum, normal ağırlık ve zamanında doğumla dünyaya gelen hastamızın 10-11 ay civarında hareketlerinin yavaş olduğunun fark edilmesi üzerine doktora başvurulmuş ve yapılan tetkiklerde, 1 yaşında metabolik sendrom tanısı almıştır. 1.5 yaşından beri fizyoterapi ve rehabilitasyon programına devam eden hastamız şu anda 2.5 yaşındadır. Yapılan değerlendirmede, tonus artışının olmadığı belirlenmiştir. Bağımsız oturabilmekte ve destekli yürüebildiği, bağımsız ayakta durma süresinin de 30 sn kadar olduğu kaydedilmiştir. 2 ay boyunca haftada 2 seans fizyoterapi ve rehabilitasyon programına alınan hastanın, özellikle ayakta durma dengesini artırmaya yönelik farklı zeminlerde durma çalışmaları, destekli-desteksiz yürüme çalışmaları, adım alma sıralama çalışmaları gerçekleştirilmiştir. Tedaviden 2 ay sonra 15 adım desteksiz yürüebildiği ve 3 dk.ya kadar bağımsız ayakta durduğu gözlenmiştir.

Vaka Örneği -2

6.1. GİRİŞ

Duyusal entegrasyon vücuttan ve çevreden alınan duyu bilgilerin işlenmesi, bütünlenmesi ve organize edilmesidir. Duyu bütünleme teorisi ilk kez 1972 yılında Amerikalı bir ergoterapist olan A.J. Ayres tarafından ortaya atılmıştır.

Anne karnından itibaren duyular aktif olarak gelişmeye başlar. İlk olarak kalp atışının duyulmasıyla birlikte intereseptif (içten gelen) duyu aktif hâle gelir. Embriyonun olgunlaşmasıyla birlikte dokunma (taktil), işitme ve vestibüler sistem gebeliğin beşinci haftasından itibaren gelişmeye başlar. Ancak vestibüler sistemin gelişmesi işitme sistemine göre daha hızlıdır. Bebeğin anne karnında hareket etmesiyle birlikte propriyoseptif sistem olgunlaşmaya başlar. Hamilelik süresince anne rahminde amniyon sıvısının verdiği baskı ve rahim duvarından aldıkları uyarı ile dokunma, propriyoseptif ve vestibüler sistem gelişmeye devam eder. Görme sistemi, 6. ile 20. hafta arasında şekillenir ancak uterusun karanlık ortamında aktif değildir. Prematüre doğan bebeklerde bu gelişimsel süreç, doğum haftası, kilosu ve küvözde geçirilen sürece bağlı olmakla birlikte sekteye uğrar.

Anne karnında, vestibüler, propriyoseptif ve taktil duyu ön planda gelişmeye devam ediyorken; yenidoğan yoğun bakım ünitesinde zaman geçiren bebeklerde görme ve işitsel duyuların gelişimi daha ön plandadır. Anne karnında gelişim için temel oluşturan ve bebek doğduktan sonra 12. aya kadar devam eden primitif refleksler daha çok vestibüler, propriyoseptif ve taktil uyaran temellidir. Primitif refleksler, dışsal bir uyarana karşı verilen istemsiz ve hızlı cevaplardır. Bebek, ritmik hareketler yaptıkça bu refleksler inhibe olur (veya değişime uğrayarak yerini kalıcı denge ve

VAKA ÖRNEĞİ-2

D.B. 1 yaş 7 aylık. Ebeveynleri dışındaki kişilerin ona yaklaşmasından çok hoşlanmıyor. Uykuya geçişte çok zorlanıyor ve gün içerisinde de uyku süresi yaşına uygun süreden daha kısa olarak gerçekleşmektedir. Sadece anne göğsünü emerek ve ayakta belli bir ritimde sallanarak uykuya geçiyor. Geceleri çok sık uyanıyor. Anne D. B.'nin ev içerisinde sandalyeye tırmanma, koltuğa çıkma gibi aktivitelerden kaçınan genel olarak sakin bir çocuk olmasına karşın oyun grubunda yaşlılarıyla birlikte hareketli ve dokunsal uyararı içeren aktivitelerde huzursuz olduğunu, etraftan gelen beklenmedik yüksek seslerden tedirgin olduğunu, ağladığını veya sakinleşmek için annesine sarılma ihtiyacı duyduğunu ifade edilmektedir. Beslenme sürecinde erken bebeklikte ilk ek gıdaya geçişte besin çeşitliliğinin daha fazla olmasına karşın beslenme rutinlerinin daha zor gerçekleştiği ve belirli tat ve dokudaki yiyecekleri tercih ettiği belirtiliyor.

VAKA ANALİZİ: Yapılan değerlendirmede, 11 aylık olduğunda çok kısa süre emekleyip 1 yaş civarında bağımsız yürümeye geçmesine karşın hâlâ denge reaksiyonlarının yeterli olmadığı sıklıkla düştüğü ve kendini yerden kaldırmakta zorlandığı gözlemlenmiştir. Bebeklerde Duyusal Fonksiyon Testi sonuçlarına göre, dokunsal derin basınca, uyumsal motor fonksiyonlarda, görsel dokunsal entegrasyonda ve oküler motor kontrol parametrelerinde yetersiz, vestibüler uyarana tepki parametresinde ise normal olarak değerlendirilmiştir. Ancak baş pozisyonunun değiştiği ve yoğun vestibüler uyararı içeren aktivitelerden kaçındığı gözlemlenmiştir.

Yapılan gözlem ve değerlendirme sonuçlarına göre D. B.'nin, primer olarak dokunsal ve propriyoseptif duyunun entegrasyonunda zorlandığı, bu durumun vücut farkındalığı gelişimini olumsuz etkilediği, buna bağlı olarak da motor planlama deneyimlerinin ve denge-düzeltilme reaksiyonları gelişiminin olumsuz etkilendiği ve yeni becerileri deneyimlemekten kaçındığı tespit edilmiştir. Elde edilen bütün bu bulguların, yaşlıları veya ebeveynleri dışında kişilerle de sosyal etkileşimde zorluklar yaşadığı ve/veya yaşayacağı şeklinde yorumlanmıştır. Uykuya geçişte ve sürdürmekte etraftan gelen dokunsal uyarıları filtrelemekte zorlandığı, bu durumda uyku kalitesinde zorluklara yol açtığı öngörülmüştür.

VAKA ÖRNEĞİ-2 – AKTİVİTE ÖNERİLERİ

- Vücut farkındalığı gelişimini destekleyecek oyun çadırı, tünel gibi düzenlemelerle içine girip çıkmasını teşvik etmek üzerine kurgulanacak oyunlar.
- Şişme yatak, sünger zemin gibi daha yoğun propriyoseptif ve taktil girdi alabileceği yüzeylerde yürüme, eğilip kalkma gibi aktiviteler.
- Bedenini farklı olarak konumlandırabileceği düzenlemelerde tırmanma aktiviteleri.
- Tüm bedene oyun ve şarkılar eşliğinde uygulanabilecek etkileşim temelli masaj.
- Büyük yastıklar veya pilates topuyla sıkıştırma aktiviteleri.
- Ağır ve büyük nesnelere taşıma, itip çekme.
- Dokunsal uyararı içeren oyunlar.
 - Top havuzunda gerçekleşecek oyunlar.

7.1. GİRİŞ

Denge, genellikle vücudun kütle merkezini destek yüzeyi içinde tutma yeteneği olarak adlandırılır. Görsel, sensorimotor ve vestibüler reseptörlerden gelen duyu bilgilerin bütünleştirilmesi ve yeterli kas sinerjilerinin üretilmesi, kişilerin destek yüzeyi ve zeminin sabit kaldığı statik koşullar altında (örneğin ayakta durma) ve kütle merkezi ile destek yüzeyinin yer değiştirdiği dinamik koşullar altında (örneğin yürüme) dengeye ulaşmasını ve sürdürmesini sağlar. Shumway-Cook ve Woollacott'a göre denge; (1) statik sabit durum dengesi (ayakta/otururken sabit bir pozisyonu sürdürme), (2) dinamik sabit durum dengesi (yürürken sabit bir pozisyonu sürdürme), (3) proaktif denge (tahmini bir postüral bozukluğun beklentisi) ve (4) reaktif denge (önceden tahmin edilmeyen bir postüral bozukluğun kompensasyonu) olmak üzere 4'e ayrılır.

Tüm yaş gruplarında normal fonksiyon için denge gereklidir. Çocuklarda denge, ayrılmaz bir şekilde motor gelişim ve temel hareket becerileri ile bağlantılıdır. Dengenin gelişimi doğumdan itibaren başlar. Tipik olarak gelişen bebekler, ayakta

tekerlekli sandalyeyi kontrol etmekte güçlük yaşamaktadır. Bu durumun, çocuğun sosyal katılımını etkilediği gözlenmiştir.

Fizyoterapi programında ilk olarak, olgunun anormal pozisyonlarla karakterize düzgün olmayan duruşunun düzeltilmesi ve eklemlerinin doğru pozisyonlanması planlandı. Tonus regülasyonu için antagonist yöndeki hareketlerin artırılması ve normal hareketin fonksiyonel aktiviteler içerisinde öğretilmesi hedeflendi. Ayakları yer ile destekli oturma pozisyonunda eğitim verildi. Sakrum üzerine oturmanın engellenmesi ve iskiyal sekilere eşit ağırlık vererek düzgün oturmanın sağlanması için oturma yüzeyine üçgen kama yerleştirilerek olgu pozisyonlandı. Bu pozisyonda unilaterale ve bilateral fonksiyonel uzanma aktiviteleri çalışıldı. Ritmik hareketler kasılmayı azaltacağı için bir salıncak üzerine olgu sırtüstü pozisyonda yatırılarak öne-arkaya sallanma egzersizi yapıldı. Olgu egzersiz topuna oturtularak fizyoterapistin pelvisten uygulayacağı el teması ile öne-arkaya ve sağa-sola top hareket ettirilerek denge ve koruyucu reaksiyonların geliştirilmesi amaçlandı. Bu egzersizler sonrasında çocuğun oturma dengeinde iyileşme ve üst ekstremitelerde fonksiyonel hareketlerinde gelişme kaydedildi.

7.4.2. Olgu Örneği

16 yaşında erkek hasta, 11 yaşında yürümede zorlanma şikâyeti ile hastaneye başvurmuştur. Yapılan genetik test ve diğer tetkikler sonucunda Charcot-Marie-Tooth Tip 1A tanısı konmuştur. Annenin 4 hamileliğinden 2 canlı doğum gerçekleşmiştir. Kardeş sağlıklıdır. Ailede benzer rahatsızlığı olan biri olmamakla birlikte akraba evliliği bulunmamaktadır. Hastanın şikâyetleri yürümede denge kaybı ve takılıp düşmedir. Hastanın kilosu 52 kg, boyu 170 cm ve vücut kütle indeksi 19 kg/m² dir. Sağ ve sol ayak bileğinde 15° pasif dorsi fleksiyon limitasyonu vardır. Hamstring ve gastrocnemius kaslarında bilateral kısalık mevcuttur. Bir yıl önceki değerlendirmesi ile kıyaslandığında en belirgin postüral değişiklik omurga deformitesindeki artış olarak değerlendirilmiştir. Sol torakolomber C skolyozu mevcuttur. 6 dk yürüme testinde, yürüme mesafesi 440 m'dir. Pediatrik Berg Denge Skalası toplam skoru 48/56'dir. Duyu değerlendirmesinde Semmens Weinstein Duyu testi yapılmış ve bilateral S1 (Tibial ve sural sinirin distal dalı) dermatom alanlarında koruyucu duyunun azaldığı belirlenmiştir.

Hastanın değerlendirme sonuçlarına göre tedavi programında aşağıdakiler uygulandı:

- Hamstring ve gastrocnemius kaslarına germe egzersizleri verildi.
- Ortez yaklaşımları bakımından bilateral gece moldu önerildi. Ayrıca hasta yürüyüş moldu açısından değerlendirildi ve bilateral yürüyüş moldu önerildi.
- Alt ekstremitelerde ve üst ekstremitelerde distaline masaj ve duyu eğitimi yapıldı.
- Proprioseptif stimülasyonu sağlamak için farklı yüzeylerde yürüme eğitimi verildi ve düz çizgi üzerinde tandem, semi-tandem ve topuk üzerinde yürüme egzersizleri yapıldı.
- Ayakta durmada, ayaklar bitişik pozisyonda top atma ve tutma aktiviteleri, yerden top alıp atma gibi aktiviteler çalışıldı.
- Ayrıca gövde kaslarını ve ekstremitelerde distallerindeki kasları kuvvetlendirmek için Propriyoseptif Nöromusküler Fasilitasyon (PNF) tekniklerinden faydalanıldı.

Bu tedaviler sonucunda, hastanın tek ayak üzerinde durma süreleri artmış, Pediatrik Berg Denge skorunda iyileşmeler not edilmiştir. Duyu kaybının azaldığı tespit edilmiştir.

8.1. GİRİŞ

Son yıllarda, özellikle serebral palsi (SP) başta olmak üzere pediatrik rehabilitasyonda kas zayıflığı ve buna bağlı sorunların giderilebilmesi bakımından kuvvetlendirme eğitimine odaklanılmıştır. Pediatrik kronik hastalıklarda motor performans bozukluğunun temel nedenlerinin başında kas kuvveti gösterilmektedir. Birçok pediatrik kronik hastalıkta görülen kas zayıflığı; bozulmuş kas fizyolojisi, antagonist kasların yetersiz koaktivasyonu, sekonder miyopati veya yetersiz ya da azalmış motor ünite deşarjı ile bağlantılıdır. Motor becerilerini yeteri kadar gerçekleştiremeyen çocuklarda kas zayıflığı günlük yaşam aktivitelerini olumsuz yönde etkilemektedir. Dolayısı ile çocuğun sosyal katılımı ve fonksiyonel kapasitesi de azalmaktadır.

Bu bölümde, çocuklarda kuvvetlendirme eğitiminin önemi, kuvvetlendirme programları ile ilgili detaylar, kuvvetlendirme egzersiz örnekleri ve eğlenceli boş zaman aktiviteleri üzerinde durulacaktır.

8.2. KUVVETLENDİRME EĞİTİMİ NASIL BELİRLENİR?

“Ulusal Güç ve Kondisyon Derneği (National Strength and Conditioning Association-NSCA)” çocuklarda kuvvetlendirme eğitimine özel bir rehber geliştirmiştir. Bu

- Köprü kurma aktivitesi; bu çalışma ile kalça çevresi ekstansör kaslar kuvvetlenebilir.
- Üst ekstremitede bilateral aktivite kullanımını artırmak ve etkilenmiş ekstremitede omuz çevresi kasları kuvvetlendirmek adına tam taban teması ile oturma pozisyonunda ağırlıklı top atıp tutma aktivitesi yapılabilir.
- Etkilenen tarafta genel bir kuvvetlendirme ve elongasyon istiyorsak platform üzerinde ağırlık aktarma ve topa uzanma aktivitesi yapılabilir.

ÖNEMLİ!!! Bütün aktiviteler çocuğun motivasyonunu ve katılımını artıracak şekilde oyun içerisinde fonksiyonel olarak tasarlanmalıdır. Verilen uygulamalar örnek amaçlıdır. Amaca yönelik ve bireye özgü egzersizler çoğaltılabilir.

8.6. ICF PARAMETRELERİ ÇERÇEVESİNDE KUVVETLENDİRME EĞİTİMİNE BAKIŞ: BİR SEREBRAL PALSİ ÖRNEĞİ

Kuvvetlendirmenin pozitif ve negatif sonuçları, sağlık tanımı için çerçeve olan "İşlevsellik, Engel ve Sağlığın Uluslararası Sınıflandırılmasının" (ICF) kullanımıyla ele alınmıştır. Bu çerçevede, kişideki bozukluk, engeller, aktivite sınırlamaları ve katılım kısıtlamaları bakımından ele alınabilir. ICF tanımlarına göre, 5 bozukluk, vücut işlevi veya yapısında sapma veya kayıplardır, faaliyet sınırlamaları görevlerin veya eylemlerin yapılmasındaki güçlüklerdir ve katılım kısıtlamaları yaşam durumlarına ilgi ile ilintili sorunlardır. Bir kişinin işlevselliği ve engeli, çevre gibi içeriksel faktörler ile sağlık koşulu (bu durumda SP) arasındaki dinamik etkileşim olarak düşünülür.

Bozukluk: Kuvvet eğitiminin SP'li kişilerde spastisiteyi ve kontraktürleri artırdığı yönünde hiçbir deneysel kanıt yoktur. Klinisyenlerden bazıları, spastik SP'li kişilerin güçsüz olmadığını ve genellikle gözlemlenen işlevsel faaliyetlerin bozuk performansının asıl olarak spastisitenin bir sonucu olduğunu ileri sürmüştür. Klinik gözlemlere dayalı olarak, güç eğitimi ile ilgili olan artmış çabanın nörolojik hastalığı olan kişilerde spastisiteyi artıracığı ve bunun da artan kas ve eklem kontraktürlerine ve azalan motor fonksiyona yol açacağı hipotezi ileri sürülmüştür. Bu gö-

rüş, var olan literatürde desteklenmemiştir. Güç eğitiminin spastisite üzerindeki etkisini inceleyen çalışmalar, kuvvetlendirmenin spastisite üstünde hiçbir etkisi olmadığını veya hatta olasılıkla, spastisiteyi azaltabileceğini göstermiştir. Benzer şekilde kuvvetlendirme programlarının SP'li kişilerde ROM'u azaltacağı görüşünü destekleyen hiçbir kanıt yoktur. Aslında, kanıtlar, kuvvet eğitiminin özellikle alt ekstremitelerde ROM artışına yol açabileceğini ileri sürmektedir.

Faaliyet: Yapılan çalışmalar da bireylerin üst ekstremitede kaslarını hedefleyen bir kuvvet eğitim programını tamamlamalarından sonra Kaba Motor Fonksiyon Ölçümünün (KMFÖ) boyut D ve E'sinde önemli gelişmeler bulunmuştur. KMFÖ faaliyetlerinin bu kısımları, örneğin tek başına ayakta durma, oturmadan ayakta durmaya geçme, yürüme, koşma, tekmeleme, sıçrama ve basamaktan yukarı doğru ve aşağı doğru yürümeyi ölçer. Yürüme hızı ile ilgili yapılan bir çalışma da kuvvetlendirmeden sonra pozitif etki bulurken bir diğer çalışma da hiçbir değişiklik bulunamamıştır. Bu bulgu, bireysel gereksinimlere uygun hâle getirilen kuvvet eğitim programlarının, bireysel olmayan programlardan daha iyi işlevsel sonuçlara yol açabileceğini ileri sürmektedir. Ayrıca üst ekstremitede kuvvetlendirme egzersizleri, tekerlekli sandalyede olan SP'li çocukların performansını geliştirebilir.

Katılım: Kuvvet eğitiminin SP'li kişilerin sosyal katılımı üstüne etkilerini inceleyen çok az araştırma yapılmıştır. Ancak anekdot olarak, programın tamamlanmasında sonra katılımcıların bir kısmının, düzenli toplum egzersiz programına katılacak kadar kendilerine güvendikleri bildirilmiştir.

Bağlamsal Faktörler: Bağlamsal faktörler, güç eğitim programlarının etkilerini değerlendirmede önemli bir noktadır. En iyi programı uygulamak için, klinisyenlerin farklı çevre ve kişisel bağlamsal faktörlerin etkileri hakkında bilgiye gereksinimleri vardır. Bu bağlamsal faktörlerin önemine rağmen sağlam sonuç çıkarmak için daha fazla çalışmaya ihtiyaç vardır.

9.1. GİRİŞ

Bu bölümde, riskli bebeklere yönelik fizyoterapi değerlendirmeleri ve müdahaleleri özetlenmiştir. Bebeklere yönelik bakım planı dinamiktir, bebek büyüdükçe ve değiştikçe bakım planı da değişiklik göstermektedir. Fizyoterapistler, bebeğin durumunda değişiklik olup olmadığını, hedeflere ve sonuçlara ulaşıp ulaşılmadığını ve hedeflere ulaşmak için müdahale planında değişiklik gerekip gerekmediğini belirlemekle yükümlüdürler. Bu açıdan pediatrik fizyoterapistlerin bilgi birikimlerini artırmaları ve güncel gelişmeleri takip etmeleri önem arz etmektedir.

9.2. RİSKLİ BEBEK KAVRAMI

Riskli bebek; 37 haftadan erken doğan bebekler ile term (zamanında) dönemde doğan düşük doğum ağırlıklı bebekler başta olmak üzere nöro-motor gelişim açısından risk altında olan, sağlık uzmanlarının yakın gözetiminde bulunması gereken be-

Önemli! Kısıtlandırılmış alanda çalışmak, bebeğe postüral kontrol becerilerini geliştirmek için iyi bir fırsat sunar.

Resim 9.44'te daha derin bir kutuda alan kısıtlaması kullanılarak bebeğin destekli ayakta durmayı deneyimlemesi gösterilmiştir. Bu şekilde bir düzenleme yapılması bebeğe hareketi kendisinin başlatabilmesi için bir fırsat sunar.

Resim 9.44. Ayakta durma için alan kısıtlaması

Alan sınırlamasından yararlanmak, motivasyonel amaçlarla da kullanılabilir. Örneğin yüzüstü pozisyona gelmeyi veya bu pozisyonu sürdürmeyi tercih etmeyen bir bebek bile tünelin içinden geçmeyi eğlenceli veya cezbedici bulabilir. Bu sayede yüzüstü kurulumlarda geçirilen vakit artırılabilir. Kısıtlı alan, görsel bir referans noktası sunduğu için kısıtlı alanın görsel duyusu etkilenen bebeklerde kullanımı ayrıca önemlidir (Resim 9.45 a ve b).

Resim 9.45. Kısıtlı alan bebeğe görsel bir referans noktası sunar., **9.45a.** Oyun tüneli içinde üst ekstremitelerde ağırlık taşıma., **9.45b.** Silindir rulo içinde üst ekstremitelerde ağırlık taşıma

Bu bölümde riskli bebek kavramı, riskli bebeklerde fizyoterapi değerlendirmeleri ve müdahaleleri özetlenmiştir. Bebeklerle çalışacak fizyoterapistlerin bilgi ve becerilerini güncel tutmaları elzemdir. Bu alanda çalışacak fizyoterapistlerin,

çok zor bir dönem geçiren kırılğan bebekler ve ailelerini en doğru şekilde yönlendirebilmeleri için iletişim becerilerini geliştirmeleri gerekmektedir.

PEDİATRİK REHABİLİTASYON EKİPMANLARI VE ZENGİNLEŞTİRİLMİŞ ÇEVRE

Seda Ayaz Taş, Eylem Tütün Yümin

Kısa İçerik

10.1. GİRİŞ

- 10.1.1. Pozisyonlama Amacıyla Kullanılan Ekipmanlar
- 10.1.2. Duyusal Bütünlüğü Sağlamak ve Artırmak Amacıyla Kullanılan Materyaller
- 10.1.3. Teknoloji Destekli Rehabilitasyon Araçları
- 10.1.4. Kuvvetlendirme Amacıyla Kullanılan Ekipmanlar
- 10.1.5. Ayakta Durma ve Yürüme Yardımcıları
- 10.1.6. Giyilebilir Giysiler (Terapötik Giysiler)
- 10.1.7. Denge Ve Koordinasyon Amacıyla Kullanılan Ekipmanlar
- 10.1.8. El Becerilerini Desteklemek Amacıyla Kullanılan Araçlar

10.2. ZENGİNLEŞTİRİLMİŞ ÇEVRE

10.1. GİRİŞ

Rehabilitasyon süreci, oldukça karmaşık ve uzun solukludur. İstenilen hedeflere ulaşılabilmesi, multidisipliner ekibin bir arada çalışması ve dirsek temasının çok iyi olmasıyla mümkündür. Bu nedenle günümüzde rehabilitasyon yaklaşımları ekip yaklaşımı kavramı içinde ele alınmaktadır ve rehabilitasyonun başarısı için bu durum bir zorunluluktur. Çocuğa ve aileye ait özelliklerin, engel yaratan ya da yaratabilecek durumların her çocukta farklı tablolar oluşturması nedeniyle ilgili disiplinlerin rehabilitasyondaki rolleri de değişiklik göstermektedir. Bireysel tedavi planına veya bu kapsamda yer alan terapi planlarına, kesinlik kazanmış bir tanıdan sonra yapılan kapsamlı bir değerlendirmeden sonra karar verilmesi en doğru yaklaşımdır. Öncelikle ailenin beklentileri ve çocuğun ihtiyaçları ile birlikte çocukların çok yönlü terapi ihtiyaçlarının bütüncül değerlendirilmesi gerekmektedir. Bu değerlendirmeler aynı anda, ilgili uzman hekim, terapist ve ilgili sağlık profesyonellerinin bir arada olduğu bir ortamda, aile ve çocuğun ev, okul gibi yaşam alanlarının dikkatli gözlemlenmesiyle yapılmalıdır. Bireysel ve detaylı değerlendirmenin ardında sağlık profesyonelleri çocuk için en doğru hedefleri belirleyerek ortak görüş sunmalıdır. Bu şekliyle çocuk ve aile için en etkili bireysel terapi ve bakım programlarının belirlenmesi mümkün olabilmektedir.

Kronik engelli bireylerde, yardımcı cihaz ve ortez kullanımı gerek fiziksel fonksiyonların korunması gerekse günlük yaşam aktivitelerinin desteklenmesi ve yaşam kalitesinin artırılması bakımından rehabilitasyon ekibinin vazgeçilmez unsurlarıdır. Yardımcı cihaz kullanımının, sosyal etkileşim, motivasyon, öz güven, beceri kazanımı (yazı yazma), kognitif beceriler, dikkat süresinin artışı, problem çözme, akademik becerilerde ve üretkenlikte artış gibi birçok olumlu etkileri mevcuttur.

Bu bölümde, pediatrik rehabilitasyon uygulamaları sırasında yaygın olarak kullanılan ekipmanlar, kullanım alanları ve amaçlarından bahsedilecektir. Akış şeması, kullanım amaçlarına göre sıralanmıştır.

dengeğini koruması beklenmektedir. Bağımsız olarak destek yüzeyi içerisinde oturmada farklı yönlere ağırlık aktararak, keşfederek motor öğrenmeyi destekleyecektir.

Resim 10.30. Proksimal gelişim aralığında, uygun destekle oturma

Proksimal gelişim aralığı, çocuğun kendi potansiyelini ortaya çıkarabileceği aralıktır. Terapi- de planlanan aktiviteler, çocuğun proksimal gelişim aralığına göre olmalıdır. Yani ne çok zor ne de çok kolay olmalıdır. Çocuk, proksimal gelişim aralığı içinde ona sunulan ortamda aktif olarak hareket etmelidir. Terapist mümkün olduğunca, *hands off* durumunda (pasif) ama her zaman, iletişim ve etkileşim hâlinindedir. Kullanılan materyaller, her ortamda bulunabilen kullanışlı araçlardır. Resim 10.30'da bez kolileriyle oluşturulan ortamda oturma becerisini deneyimleyen bir çocuk görülmektedir. Terapist, çocuğa dokunmayıp hands off durumunda olup, çocuğun oturma becerisine aktif katılımını iletişim, etkileşim temelli oyunlar ve bez kolileriyle oluşturulmuş çevre düzenlemeleri ile sağlamaktadır.

Resim 10.31. Araba lastikleri ile oluşturulan ortamda sıralama ve uzanma becerisi

Ayakta durma, sıralama, yürüme gibi becerilerin gerçekleştirilmesi, başlangıçta çocuklar için etrafta destek yoksa oldukça zor olduğundan çocuklar oturmayı ve oturma pozisyonunda

kalçaları üzerinde hareket ederek bir yerden bir yere gitmeyi tercih edebilirler. Çocukları bu becerilere hazırlamak için Resim 10.31'de de iki araba lastiği içinde ayakta durma ve sıralama becerileri çalışılabilir. Böylece çocuk istediğinde destek alabileceği, performansını tam olarak sergileyebileceği uygun desteğe sahip olup beceriyi gerçekleştirecek, motivasyonu artacak ve motor öğrenme desteklenecektir. Resim 10.32'deki gibi oturma becerisinin farklı varyasyonları, oturmada uzanma becerileri, oturmada denge ve düzeltme reaksiyonlarının gelişimi ile birlikte gövde kaslarının güçlenmesi sağlanır. Resim 10.33'teki gibi oturmadan ayağa kalkma becerisi ile alt ekstremitte kas gücünün artırılması zenginleştirilmiş çevre ortamında desteklenmektedir.

Resim 10.32. Zenginleştirilmiş çevrede oturma becerisi varyasyonları

Resim 10.33. Zenginleştirilmiş çevre müdahalesinde oturmadan ayağa kalkma

11.1. GİRİŞ

Kronik engelli çocukların tipik gelişen sağlıklı yaşlılarına göre fiziksel aktivite düzeyleri düşüktür. Bu çocuklarda görülen motor, duyuşsal, bilişsel, dil, iletişim ve/veya sosyal becerilerdeki gecikmiş gelişim çocukların aktivitelere katılım kısıtlılıklarına neden olmaktadır.

Resim 11.1 Egzersiz ve rekreasyon amaçlı adaptif araç

Spor ve rekreasyonel aktiviteler, kişinin boş zamanlarında gerçekleştirdiği aktivitelerdir. Bu aktiviteler, özellikle kronik engelli bireylerde mobilite fonksiyonlarını

tivite olarak okçuluk sporunu yapmak istiyordu. Fizyoterapistin yönlendirmesi doğrultusunda aile evinin bahçesine bir hedef tahtası konumlandırılarak birey için uygun ekipmanları temin etmiştir. Fizyoterapist seanslarda alt ekstremiteler ile ilgili uygun rehabilitasyon yaklaşımları ile birlikte üst ekstremitelerin eklem hareket açıklığının korunması, kas kuvvetinin artırılmasına yönelik uygulamaları ve okçuluk sporunu yaparken çok önemli olan el göz koordinasyonunu artırmaya yönelik aktiviteleri de rehabilitasyon programına dâhil etmiştir. Birey çok istemesine rağmen gerek yaşadığı şehrin şartları gerek ailenin imkânları dâhilinde yarışa dayalı bu sporu yapamasa da evinin bahçesinde bu sporu yapmaktan çok mutlu olduğunu dile getirmiştir.

12.1. NÖROGELİŞİMSEL SORUNU OLAN ÇOCUKLAR İLE ÇALIŞIRKEN YAŞANABİLECEK SORUNLAR

Tipik gelişen çocuklar motor ve bilişsel görevleri gerçekleştirmek için deneme yanılma yöntemine başvururlar. Küçük bilim insanları gibi davranarak pek çok deney yaparlar. Hatalardan öğrenir ve her defasında değişiklikler yaparak tekrar denerler. Bunu yaparken net bir amaçları yokmuş gibi görünürler. Yapmak istedikleri ve yaptıkları, yaşadıkları deneyimden aldıkları haz kaynaklıdır. Nörogelişimsel problemleri olan çocuklarla çalışırken çoğunlukla karşılaşılan zorluklardan biri, tipik gelişen yaşlıları kadar araştırmacı davranmadıklarını gözlemlemektir. Bu durum çocukların hareket kapasiteleri, bilişsel kapasiteleri ve/veya bazı durumlarda da her ikisinin yetersiz olmasından kaynaklanabilmektedir.

Çocuğun keşfetme/öğrenme sürecindeki denemeleri tekrar tekrar başarısız olursa sonunda çocuk denemekten vazgeçecektir. Bu durumda, çocuğu denemeye ikna etmek gelişimini desteklemek bakımından oldukça önemlidir. İkna sürecinde, çocukları sözlü telkin ile ikna etmeye çalışmak genellikle başarısızlıkla sonuçlanabilmektedir. Böyle durumlarda, üzerinde durulması gereken nokta, çocuğun limitasyonu sebebiyle kendisine ilgi çekici gelmeyen durum ve olayları cazip hâle getirmektir.

Çocuktan yapması beklenen görevle ilgili olarak sözel yönergeler yetersiz kalacağından modelleyerek göstermek daha uygun olacaktır. Terapötik aktiviteyi, özellikle çocuğun bilişsel seviyesine uygun seçmek ve motor kapasitesine göre modifiye etmek gerekir. Örneğin nesne sürekliliği gelişmemiş bir vaka ile çalışırken materyalin görme alanından çıkmayacağı aktiviteler kullanmak önemlidir.

Terapist- “Hmm şimdi anladım, demek burası mutfak. Sizin evinizde bir banyo var mı?”

Çocuk- “Anne banyo neresi?”

Terapist- Çocuk ile göz teması sağlayarak “Sen neresinin banyo olmasını istersen orası banyo olacak. Mutfağı koyduğun gibi istediğin yeri seçebilirsin.”

Çocuk- 5 dakika boyunca, yaptığı evde mutfak ve banyodan sonra bir salon ve kendi odasını belirler. Daha sonra baba figürünü mutfağa, anneyi salona, kendisini ve abisini odaya yerleştirip sesini değiştirerek kendisini ve abisini konuşturur.

Terapist- Boşta kalan en küçük figürü alarak çocuğun okulda oyuncak için kavga ettiği arkadaşları Ilgaz rolünü oynar. Hayalî kapıyı çalar, sesini değiştirerek “ Tık tık tık. Merhaba, ben geldim, Ilgaz. Evde kimse var mı?”

Çocuk- Kendi figürü ile Ilgaz figürünün yanına gider. Hayalî kapıyı açarmış gibi yapar ve normal sesini kullanarak “Niye geldin sen?”

Terapist- “Seninle oynamaya geldim. Bana da oyuncak verir misin?”

Çocuk- Kendi figürü ile terapistin tuttuğu Ilgaz figürüne vurarak “Sana oyuncak yok, git burdan.”

Terapist- Normal sesi ile fısıldayarak “Ne istiyorsun? Ilgaz’a söyleyebilirsin ne istediğini.” Ilgaz figürünü çocuğun figürünün önüne koyar.

Çocuk- “Ilgaz, önce ben oynamak istiyorum.”

Terapist- Normal sesi ile “Sırayla mı oynayacaksınız?”

Çocuk- Sesini değiştirerek “Ilgaz, bu oyuncak benim o yüzden sıra bende.”

Terapist- Sesini değiştirerek “Ama ben şimdi oynamak istiyorum.”

Çocuk- Kendi figürü ile Ilgaz figürünü devirir ve terapiste bakar.

Terapist- Oyundan kopmadan Ilgaz figürünü düzelterek normal sesi ile “Ilgaz iyi misin? Kalkmana yardım edeyim, canın acımış olabilir.” Çocuğa bakarak “Sence Ilgaz’ın canı acımış mıdır?”

Çocuk- Elindeki figürü bırakır, aşağı bakarak normal sesi ile “Evet”

Terapist- Ilgaz figürünü eline alıp çocuğun göz hizasına getirir normal sesi ile “ Ilgaz’a bir şey söylemek ister misin?”

Çocuk- Figürünü eline alarak Ilgaz figürüne yaklaştırır sesini değiştirerek “Özür dilerim.”

Terapist- Terapist başıyla onaylayarak çocuğa gülümser “Ilgaz ile paylaşmak istediğin bir oyuncuğun var mı?”

Çocuk- Ilgaz figürünü terapistin elinden alarak salona koyar, odada abisi ile 2 dakika kadar daha oynadıktan sonra elinde birşey tutarmış gibi yapar ve elindekini hayali oyuncuğu Ilgaz figürünün önüne koyar, sesini değiştirerek “Ilgaz, al sana oyuncak.”

Terapist- Sesini değiştirerek “Yaşasın! Teşekkür ederim. ”

- 13.7. Literatürde Pediatrik Osteopati
- 13.8. Osteopatik Manuel Terapide Dokunmanın Rolü
- 13.9. Ünite Sonu
 - 13.9.1. Olgu sunumu 1
 - 13.9.2. Olgu sunumu 2

13.1. GİRİŞ

Osteopati, günümüzde, Dünya Sağlık Örgütü tarafından bilimsel teşhis ve tedavi yöntemi olarak kabul görmektedir. Bazı Avrupa ülkelerinde çok ciddi 6 yıllık eğitim programı karşılığında profesyoneller yetişmektedir. Ülkemizde de osteopatlar, çok ciddi bir eğitim sonrasında yetkinliğe sahip olarak mezun olmaktadır.

Osteopati tamamlayıcı tıp bilimi olarak birçok hastalığın teşhis ve tedavisinde kullanılmakla birlikte pediatri de yoğun bir şekilde kullanılabilir.

Bu bölümde; osteopatinin temeli ve felsefesi, dünyadaki yeri ve kullanım alanları, pediatrik rehabilitasyon alanında osteopatinin terapötik etkileri ve dokunmanın iyileşme süreçlerindeki etkilerinden bahsedilecektir.

13.2. OSTEOPATİ VE FELSEFESİ

Dr. Andrew Taylor Still 19. yüzyılın sonlarında üç çocuğunu menenjit nedeni ile kaybedince sağlık, hastalık ve hasta bakımı kavramları üzerine düşünmeye başlamıştır. Bu konular üzerine düşünürken yaşadığı zamanın dini ve felsefi akımlarından etkilendiği bilinmektedir. İnsan denilen varlığın, evren ve doğanın bir parçası olduğu, bu olgularla uyum içinde yaşadığında kendi kendini şifalandırma gücünün farkındalığına erişebileceğine vurgu yapan felsefeyle uyumlu bir tedavi şekli geliştirmek istemiştir. Mevcut tıbbi bilgisi ve insanın kendini şifalandırma gücü inancını birleştirerek yeni bir tedavi şekli geliştirmiştir. Bu tedavi şeklinin temel felsefesini, hastalık, sağlık ve hasta bakımı üzerinden tanımlamıştır.

seansına gelmektedir. Epileptik nöbetleri mevcuttur. Uzun yıllardır kabızlık şikâyeti bulunmaktadır. Hastaya haftada 3 defa lağman yapılmaktadır.

Değerlendirme sonucunda; mevcut diskinetik tabloya eşlik eden,

- Ağız ve dil hareketlerinde zayıf kontrol.
- Çiğneme fonksiyonunda kayıp.
- Annesi her besini yediğini ifade etmektedir.
- Baş ve gövde kontrolü yok.
- Thorakal vertebralar gergin ve hareket kısıtlılığı mevcut.
- Yoğun gelen ağız kokusu.
- Manuel bağırsak muayenesinde yoğun yapışıklıklar olduğu, tüm visseral yapıların birlikte hareket ettiği tespit edildi.

Değerlendirme bulguları sonrasında 3 aylık, haftada 3 kez OMT'nin yapılması öngörüldü. Yapılan uygulamalar aşağıda özetlendiği gibidir:

- Thorakal bölgede her seviye tek tek mobilize edildi.
- Kostalar her seviyede mobilize edildi.
- Her mobilizasyonun ardından baş ve gövde desteklenerek oturma pozisyonuna getirildi.
- Ağız hareketlerinin kontrolü için temporomandibular eklem ve bağlantılı yapılar mobilize edildi.
- Sırtüstü baş desteklenerek yatış pozisyonunda visseral yapılar tek tek mobilize edildi.

Üç ay süren tedavinin sonunda anne, son 3 haftadır lağman uygulanmadığını ifade etmiştir. Hasta aktif bir şekilde gayta boşaltımını kendi sağlayabiliyordu. Ağız kokusu kayboldu. Hastanın çevresine olan ilgi seviyesinde önemli bir artış ve göz kontağı ve göz takibinde önemli gelişmeler olduğu gözlemlendi. Oturma pozisyonuna gelme ve pozisyonu koruma becerilerinde kontrollü ve aktif hareketin arttığı belirlendi.

Unutmayalım! Beden; zihin, ruh ve çevre ile birlikte bir bütündür. İyi olma hâli bu bütünlüğün uyum içinde olabilmesi ile mümkündür.

- 14.10. HİPPOTERAPİ UYGULAMALARINDA ENDİKASYON VE KONTRAENDİKASYONLAR

dir. Otizm spektrum bozukluklarında vakaların %68'inde agresif davranışlar görülmektedir. Çalışmalar, atla yapılan terapilerin çocuklardaki agresif davranışlarda azalma gösterdiğini belirtmektedirler. Ancak burada çocuğun ata zarar verecek hareketlerde bulunuyor olmaması gerekmektedir. Bu tür davranışlar hem çocuğun güvenliği hem de atın konforu ve sağlığı açısından bir kontraendikasyon oluşturmaktadır. Otizm spektrum bozukluğu olan çocuklarda 12 hafta boyunca haftada bir yapılan tedavi ile adaptif davranışların ve sosyal katılımın arttığı görülmektedir. Ek olarak; problem çözme durumlarında daha kısa tepki süresi de hippoterapinin etkileri arasında gözlenmiştir. Bununla birlikte hippoterapinin uyumsuz davranışların düzelmesinde ve empati kurmada etki gösterdiği saptansa da sosyalleşme ve iletişimde belirgin bir düzelleme sağlamadığını belirten kanıtlar da bulunmaktadır.

Önemli! Agresif ve hırçın davranış sergileyen otizm spektrum bozukluğu olan çocuklarda çocuğun ata zarar verici davranışlar sergilememesi özellikle dikkat edilmesi gereken parametrelerdendir. Bu durum, hem çocuğun güvenliği hem de atın sağlık ve konforu açısından önemlidir.

14.9. HİPPOTERAPİ UYGULAMA SÜRESİ

Hippetoterapi seansları genel olarak toplamda 40-45 dk. olacak şekilde planlanmaktadır. Ancak tedaviye ilk başladığı dönemde bu süre 20-30 dk. olarak planlanabilir. Hippetoterapi uygulamaları, haftada 1 ya da 2 kez düzenli olarak devam ettiği rehabilitasyon programına ek olarak verilebilmektedir. Tedavinin toplam süresi 6-12 hafta arasında değişmektedir.

Kanıtlar yeterli olmasa da spastik tip serebral palsi tanısı almış bir çocuğa hippoterapi uygulamasının 4 yaş ve üzerinde başlanmasının uygun olduğu düşünülmektedir.

Uyarı! Yeterli kanıt olmasa da SP'li çocuklarda hippoterapi uygulamalarının 4 yaş ve sonrasında daha uygun olacağı belirtilmektedir.

14.10. HİPPOTERAPİ UYGULAMALARINDA ENDİKASYON VE KONTRAENDİKASYONLAR

Hippetoterapinin başarılı olabilmesi için uygun at seçimi kadar hastanın tedaviye uygunluğu

da büyük önem taşımaktadır. Bu nedenle hippoterapi yapacak sağlık profesyonellerinin endikasyon ve kontraendikasyonları iyi irdelemesi gerekir. Örneğin Down Sendromlu bir çocuk ile hippoterapi seansları yapılmak isteniyorsa öncesinde mutlaka atlantoaksiyal instabilite varlığı araştırılmalıdır. Böyle bir komplikasyonun varlığı hippoterapi seanslarında çocuk için hayati risk oluşturur. Çocuğun sahip olduğu hastalık endikasyon oluştursa da başka bir neden aynı hasta için kontraendikasyon oluşturabilmektedir. Örneğin serebral palsi hippoterapiden en fazla fayda gören hastalık grubudur. Ancak hastada açık yaralar bulunuyorsa bu çocuk hippoterapi için uygun olmayacaktır. Tablo 14.2.3'te endikasyon ve kontraendikasyon yaratan durumlar gösterilmiştir.

Tablo 14.2.3. Hippetoterapi uygulamalarında endikasyon ve kontraendikasyon yaratan durumlar

Endikasyonları	Kontraendikasyonları
Otizm	Kırılgan kemikler
Serebral palsi	Hemofili
İletişim problemleri	Hayvanlara karşı şiddet uygulama eğilimi
Serebrovasküler olay/inme	Kontrol edilemeyen epilepsi
Gelişim geriliği	Akut disk hernisi
Down sendromu	Atlantoaksiyal instabilite
Lisan problemleri	Koksartroz
Musküler distrofiler	Kalıcı kateterler
Spinal kord yaralanmaları	Ağırlığı taşıyan yüzey üzerinde açık yaralar
Multiple skleroz	Stabil olmayan spinal kord ve platinler
Travmatik beyin yaralanmaları	
İşitme bozukluğu

15.1. GİRİŞ

Elektrik stimülasyonu (ES) yeni bir teknik değildir. Tarihi, kas kasılmalarına neden olmak ve bir dizi fizyolojik tepki üretmek için ovuşturulmuş kehribar ve torpido balıklarını kullanan Eski Yunanlılara kadar uzanmaktadır. 18. ve 19. yüzyıllarda Volta ve Faraday'ın araştırmaları ile fizik alanındaki ilerlemeler ve Galvani ve Duchenne'in nörofizyolojik çalışmaları sonucu daha güvenilir, kontrol edilebilir elektrik kaynaklarının kullanımına kadar dayanmaktadır. İlerleyen dönemlerde ise denerve kasların, alternatif akıma yanıt vermediği, yalnızca doğru akım ile uyarılabildikleri tespit edilmiştir. Ancak serebral palsi (SP) ya da inme gibi üst motor nöron lezyonunun olduğu durumlarda, kas kasılmasının, sağlam bir motor nöronun alternatif bir akımla uyarılması ile sağlanabileceği görülmüştür.

ES, rehabilitasyon kliniklerinde ve araştırma laboratuvarlarında çok çeşitli koşulları tedavi etmek ve/veya değerlendirmek için yaygın olarak kullanılmaktadır. Rehabilitasyon uzmanları, ağrıyı azaltmak, kasları uyarmak, kas gücünü artırmak, eklem hareket açıklığını, ödemi azaltmak, atrofiyi önlemek ve hatta yaraların iyileşmesine yardımcı olmak için ES'den yararlanmaktadır. Pediatrik rehabilitasyonda en yaygın olarak kullanılan ES yöntemleri; nöromusküler elektriksel stimülasyon (NMES), fonksiyonel elektrik stimülasyonu (FES) ve eşik elektriksel stimülasyondur (EES).

NMES, yüzeysel iskelet kaslarında kas kasılmalarını tetiklemek için, kas içi sinir dallarının aktivasyonunu sağlayacak bir dizi aralıklı stimülasyonun uygulanmasını

Resim 15.1.3. Sağ taraf quadriceps femoris kasına yönelik NMES uygulaması

Resim 15.1.4. Sağ taraf tibialis anterior kasına yönelik NMES uygulaması

SANAL GERÇEKLİK

Dilan Savaş, Merve Kurt, Tülay Tarsuslu Şimşek

Kısa İçerik

- 16.1. GİRİŞ
- 16.2. TANIM VE MEKANİZMA
- 146.3. PEDIATRİK REHABİLİTASYONDA SANAL GERÇEKLİK UYGULAMALARI
 - 16.3.1. Serebral Palsi ve Sanal Gerçeklik Uygulamaları
 - 16.3.2. Obstetrik Brakiyal Pleksus Yaralanmaları ve Sanal Gerçeklik Uygulamaları
 - 16.3.3. Down Sendromu Rehabilitasyonunda Sanal Gerçeklik Uygulamaları
 - 16.3.4. Pediatrik Nöromuskuler Hastalıklar ve Sanal Gerçeklik
- 16.4. ÜNİTE SONU
 - 16.4.1. Örnek Vaka

16.1. GİRİŞ

Teknolojik gelişmelerle birlikte diğer birçok alanda olduğu gibi sağlık alanında da yenilikçi ve teknolojik yaklaşımların kullanımı büyük artış göstermiştir. Geçmişte benzer problemler sebebiyle kaybedilen bebekler bu gelişmeler sayesinde kurtarılabilen, gelişebilecek sağlık sorunları önlenilebilmekte ve önemli toplumsal role sahip yetişkin bireyler olarak topluma kazandırılmaktadırlar. Bu bölümde, son yıllarda nörorehabilitasyon alanında yaygın olarak kullanılan; denge, postural kontrol ve yürüyüş üzerinde önemli katkıları olduğu vurgulanan sanal gerçeklik uygulamalarından bahsedilecektir.

16.2. TANIM VE MEKANİZMA

Sanal gerçeklik (SG), kullanıcılara gerçek dünyadaki nesnelere, olaylara benzeyen ve/veya benzer hissettiren ortamlara girme fırsatları sunmak amacıyla bilgisayar donanımı ve yazılımı ile oluşturulan etkileşimli simülasyonların kullanılması olarak tanımlanmaktadır. SG uygulamaları, kullanıcının hareketine yanıt veren simülasyonlar kullanarak işlevsel etkinlikler gerçekleştirilirken sanal bir ortamda etkileşim sağlamaktadır.

Nörorehabilitasyon ilkeleri, motor öğrenme ve beyin plastisitesini uyarmak için; yoğun tekrar ve uygulama dozu, göreve yönelik ve hedefe özel fonksiyonel eğitim, randomize değişkenler kullanma, yoğun duyuşsal uyarım ve artan zorluğu içermelidir. Sanal gerçeklik temelli motor rehabilitasyon, önemli bir öğrenme bileşeni olan performans hakkında anında hem duyuşsal hem de motor geri bildirim sağlayarak

için NMH'li çocuklarda SG uygulamaları ile ilgili daha fazla çalışma yapılmasına ihtiyaç duyulmaktadır.

16.4. ÜNİTE SONU

16.4.1. Örnek Vaka

7 yaşında, DMD tanılı hasta Brooke Üst Ekstremitte Fonksiyonel Sınıflandırmasına göre Seviye 1'de, Vignos Skalasına göre ise Seviye 3'te yer almaktaydı. Hastanın, Motor Fonksiyon Ölçümü 32 (MFM-32) toplam puan oranı %90,62 iken alt skorları sırasıyla D1: %79,48, D2: %100, D3: %95,23 şeklinde idi. Balance Master Sistemi kullanılarak yapılan denge değerlendirmesinde, dengenin kliniğe uyarlanmış duyuşsal etkileşim testinde (DKUDET) gövde salınım hızı gözler açık durumda 1,2 °/sn, gözler kapalı durumda ise 1,6 °/sn olarak kaydedildi. Stabilité limitleri testinde (SLT) ise reaksiyon zamanı 0,93 sn, hareket hızı 3,3 °/sn, yön kontrolü %40 olarak kaydedildi. Hand-held dinamometre ile yapılan kas kuvvet değerlendirmesi bulguları Tablo 16.2.1'de özetlendi. Hasta 4 yaşından itibaren haftanın 2 günü düzenli rehabilitasyon programına alınmakta, 1 günü de yüzmeye gitmektedir.

Tablo 16.2.1. SG öncesi kas kuvvet değerlendirme bulguları

Kas grubu	Sağ	Sol
Quadriceps Femoris	3,2	4,3
Tibialis Anterior	3,8	3,7
Hamstring	4,4	4,1
Gluteus Maksimus	4,7	4,5
Kalça Fleksörleri	4	3,7

Tedavi hedefleri; geleneksel fizyoterapi ve rehabilitasyon programına alınan hastanın motivasyonunu artırmak, yapılan çalışmalarda SG'nin etkinliği ile ilgili olarak belirtilen alanlarda kazanımlar sağlamak amacıyla fizyoterapi ve rehabilitasyon programına X-BOX Kinect sisteminin dâhil edilmesi planlanmıştır. Amaç, yorgunluk sınırı içerisinde oyun aktiviteleri ile kas kuvvet ve endüransı, denge parametrelerinde önemli kazanımlar elde etmektir.

Program dâhilinde hasta XBOX Kinect 360 kullanılarak haftada 3 kez 12 haftalık sanal gerçeklik eğitimine dâhil edildi. Her seans toplam 45 dakikadan oluşmakta idi. Ancak oyunlar arasında yorgunluk oluşturmamak için ara verilerek

toparlanma sağlandı ve çocuğun aktif olarak oyun oynadığı süre 30 dakika olarak belirlendi. Seçilen oyunlar hem alt hem de üst ekstremitelerin fonksiyonel kullanımını içerdi. Seçilen bazı oyunlar şu şekildeydi: sabit ve hareketli hedeflerin olduğu kaleye gol atma, kalede top kurtarma, bowling toplarını yuvarlama, plaj voleybolu, boks, uzun atlama, engelli koşu, üzerine atılan cisimlerden kaçma, akvaryumda oluşan çatlakları el ve ayaklar ile kapatma. Oyunlar seans süresini tamamlayacak şekilde farklı kombinasyonlar ile gerçekleştirildi.

Rehabilitasyon programı sonucunda yapılan değerlendirmede, hastanın Brooke veya Vignos Skalalarındaki seviyelerinde bir değişiklik tespit edilmedi. MFM-32 toplam puan oranı %96,87'ye yükselirken alt skorları sırasıyla D1: %94,87, D2: %100, D3: %95,23 şeklinde belirlendi. Balance Master Sistemi ile yapılan denge değerlendirmesinde, DKUDET'te gövde salınım hızı gözler açık durumda 1 °/sn'ye, gözler kapalı durumda ise 1,1 °/sn'ye düşüş gösterdi. SLT'de ise reaksiyon zamanı 0,39 sn, hareket hızı 3,6 °/sn, yön kontrolü %66 olarak kaydedildi. Kas kuvvet değerlendirmesi bulguları Tablo 16.2.2'de özetlendi.

Tablo 16.2.2. Tedavi sonrası kas kuvvet değerlendirme bulguları

Kas grubu	Sağ	Sol
Quadriceps Femoris	7,4	8,2
Tibialis Anterior	5,7	6,0
Hamstring	5,0	5,1
Gluteus Maksimus	7,0	6,5
Kalça Fleksörleri	6,8	7,9

Son değerlendirme verilerine göre, 12 haftalık eğitim sonrası hastanın fonksiyonel seviyesinde, alt ekstremitte kas kuvvetinde ve dengesinde gelişimler kaydedildi.

ADLI PSİKOLOJİYE GİRİŞ

Gökçe Baykuzu Gündüz - Gülsen Erden

Giriş

Psikoloji birçok bilimsel kuram ve kuramcının temsil ettiği, laboratuvarlarda ya da gerçek hayatta araştırmalara ve araştırmacılara kaynak sağlayan farklı çalışma alanları ile geniş bir yelpazeye sahip bir bilim alanıdır. Bilim dünyasının bir adım ötesinde yıllar boyu yerli ve yabancı popüler medya kanallarında ve edebiyatta psikolog temsilleri genellikle psikoterapist olarak karşımıza çıkmıştır. Öte yandan en az psikoterapistlik kadar dikkat çekici bir diğer temsil ise kriminal dizilerde gördüğümüz suçlu profileme uzmanları ya da dram yapımlarında velayet değerlendirmesi yapan psikologlar olmuştur. Bu temsiller farklı rolleri ile adli psikolojinin medyadaki yansıması olarak sunulmuştur. Her ne kadar psikolojinin ve özelden adli psikolojinin tanıtılmasına katkı sağlamış olsa da medyanın dikkat çektiği bu temsillerden farklı olarak, gerçek hayatta adli psikoloji hem araştırma hem de uygulama alanları ile çok daha teknik, kurallara bağlı, kuramsal temelleri olan, içgüdüsellikten uzak, bilimsel ve kanıta dayalı olarak tanımlanan bir psikoloji alt alanıdır. Adli psikologluk da adli psikoloji alanının gerektirdiği bilimsel yeterlik ve yetkinliğin lisans eğitimi üzerine alınan lisansüstü eğitimlerle tanımlanan bir ünvanıdır.

1.1. Adli Psikolojinin Tarihçesi

Adli psikolojinin tarihsel anlamda ortaya çıkışına, günümüzde uygulama ve araştırma açısından popüler olan konularına bakıldığında, sıklıkla, hukuk ve adalet sisteminin ihtiyaç duyduğu noktalarda sahneye çıktığı görülmektedir.

Tarihsel olarak bakıldığında adli psikolojiye dair en erken uygulamalar 19. yüzyılın sonları ve 20. yüzyılın başlarına kadar takip edilebilmektedir. Özellikle suç davranışının kuramsal temelinde adli psikolojiyle ortak yönleri olan kriminolojinin (suç bilimi) kurucusu olarak kabul edilen Cesare Lombroso'nun çalışması, ilk dönem çalışmaları-

BÖLÜM 2

SUÇ VE ŞİDDET

Çiğdem Ünlü Çeber

Giriş

Campanella'nın *Güneş Ülkesi*, Platon'un *Devlet* ya da Thomas More'un *Düş Ülkesi* (*Ütopya*) yapıtlarının dışında suç davranışının görülmediği bir dönem ya da coğrafyaya bugüne değin hiç rastlanmadığı düşünüldüğünde; suçun, insanların sosyal gelişimine, değerlerine ve temel çıkarlarına bağlı olarak sürekli değişen bir kavram olduğu görülmektedir.

Nedenleri, sonuçları, toplumsal ve bireysel yaşam üzerindeki etkileri bakımından oldukça karmaşık bir sosyal olgu olan suç; insanlık tarihi kadar eski sayılabilecek bir kavramdır. Suça ilişkin olarak kişinin özgür iradesi ile biyolojik, psikolojik, sosyolojik, ekonomik ve politik faktörlerin hemen hepsinin farklı kurgularıyla suçu açıklayan birçok kuram geliştirilmesine karşın bu faktörlerin hiçbirisi suçun neden meydana geldiğini tek başına açıklayamamaktadır. Geçmişten günümüze suç kavramı; toplumların sosyal, ekonomik ve manevi şartlarına göre şekillenmiştir. Günümüzde geline noktaya bakıldığında, artık suç ve şiddet davranışlarına neden olan bireysel ve çevresel etmenler ile fizyolojik etmenlerin de oldukça ayrıntılı olarak araştırıldığı görülmektedir.

Bu bağlamda okuyucunun suçun tarihsel gelişiminden, suçu açıklayan kuramların alandaki yansımalarının neler olduğuna, şiddet eyleminin nedenleri ve sonuçları bağlamında tartışılmasına değin çok yönlü bir farkındalığa sahip olmasının adli psikoloji eğitimine devam eden, bu alana ilgi duyan ve sahada çalışan bireyler için çalışmaları temel teşkil edeceği değerlendirilmektedir.

Ön Söz

Hukukun normatif (küralsal) yapısı ile psikolojinin çok boyutlu karakteri bu iki alanın birlikte çalışılmasında bazı bilimsel sorunları açığa çıkarır. Örneğin hukuk bir

Anahtar Kelimeler

Suç, şiddet, kişilik, saik, edim, şiddet döngüsü.

Tartışma Soruları

1. Her suç davranışı şiddet içermekte midir?
2. Sosyal bilişsel süreçlerin suç davranışının öğrenilmesinde ne gibi etkileri olabilmektedir?
3. Mağdurun şiddet döngüsünden çıkabilmesi için ne gibi adli psikolojik müdahaleler uygulanabilir?
4. Suçun önlenmesine yönelik çalışmalarda şiddet unsurları nasıl ele alınabilir?

BÖLÜM 3

AİLE İÇİ ŞİDDET

Melike Ceylan

“Kadınları geride bırakan toplum, geride kalmaya mahkûmdur.”

Mustafa Kemal Atatürk

Giriş

Aile içi şiddet, her gün karşılaştığımız sosyal bir sorundur. Aile içi şiddet konusunda farkındalık yaratmak ve mağdurlara destek sağlamak bu açıdan oldukça önemlidir. Aile içi şiddet konusunun çeşitli yönlerden anlamak, aile içi şiddeti önlemek ve herkes için daha güvenli bir toplum yaratmak açısından önem arz etmektedir. Aile içi şiddet, mağdurların zihinsel ve fiziksel sağlığı üzerinde uzun süreli etkileri olabilecek karmaşık bir konudur. Şiddet döngüsünü kırmak için aile içi şiddetten etkilenen mağdurlara destek ve kaynak sağlamak en önemli unsurdur. Özellikle aile içi şiddetin mağdurları anneler ve çocuklardır. Aile içi şiddeti önlemede kilit faktör, arkasındaki nedenleri anlamaktır. Bu mağdurlar için barınak ve danışmanlık hizmetleri gibi destek ve kaynakların sağlanması gerekmektedir. Ayrıca toplumu sağlıklı ilişkiler konusunda eğitmek ve şiddeti sürekli kılan toplumsal normları ele almak da aile içi şiddeti önlemeye yardımcı olabilir. Bu bölümde aile içi şiddet kavramı, yaygınlığı, türleri, nedenleri ve sonuçları tartışılacaktır.

3.1. Aile İçi Şiddet Kavramı ve Tanımı

Aile içi şiddet kavramı, genellikle kadın ve çocukların mağdur olduğu bir problemdir. Hem dünyada hem de ülkemizde ciddi bir toplumsal problem olarak karşımıza çıkmaktadır. Her üç kadından biri yaşamının herhangi bir zamanında partneri tarafından cinsel, fiziksel veya duygusal şiddete maruz kalmaktadır. Aile içi şiddet, yakın bir partner tarafından hâlihazırda veya geçmişte gerçekleştirilen çeşitli fiziksel, cinsel ve/veya psikolojik eylemlerin bir bütünü olarak adlandırılabilir (Rodriguez ve ark.,

şiddeti önleyici çalışmaların önemi, ailelere destek ve eğitim sağlama, mağdurların güvenliğini sağlama, hukuki ve psikolojik yardım hizmetlerine erişimi kolaylaştırma gibi adımlar atılabilmektedir. Bu bağlamda aile içi şiddetin ciddiyetini anlamak, etkilerini değerlendirmek ve önleme stratejilerini keşfetmek önem arz etmektedir. Aile içi şiddetin önlenmesi ve mağdurların desteklenmesi için toplumun ve bireylerin birlikte çalışması gerekmektedir.

Anahtar Kelimeler

Aile içi şiddet, kadına yönelik şiddet, fiziksel şiddet, cinsel şiddet, psikolojik şiddet.

Tartışma Soruları

1. Aile içi şiddetin ortaya çıkmasındaki en önemli etkenler nelerdir?
2. Aile içi şiddet kuramlarını tartışınız.
3. Aile içi şiddeti sürmesine sebebiyet veren etkenleri çevrenizdeki örnek olaylarla ilişkilendiriniz ve açıklayınız.

BÖLÜM 4

KADINLARDA ŞİDDET VE SUÇ DAVRANIŞLARI

Merve Koçak Çapkın

Ön Söz

Dünya genelinde hüküm giyen kadınların artması, kadınlardaki şiddet ve suç davranışlarının ilgi odağına alınmasına yol açmıştır. Ceza adalet sistemine giren kadınların ekonomik sorunlar yaşamakla birlikte, düşük sosyal desteğe sahip ve eğitim düzeyi düşük kadınlar oldukları görülmektedir (Chesney-Lind ve Shelden, 2004). Kadın hükümlüler, çocukluk döneminde başlayan travmatik istismar ve ihmal yaşantılarının ardından, fiziksel ve ruhsal sağlık problemleri ile birlikte madde kötüye kullanım sorunları yaşamaktadır (Asberg ve Renk, 2012; Coid ve ark., 2001; Flynn ve ark., 2011; Jordan ve ark., 1996; Huang ve ark., 2006; Widom, 2000). Aynı zamanda, ceza adalet sistemindeki kadınların erkeklere göre, çocuklar için birincil bakım veren ve tek destek kaynağı olmaları daha olasıdır (Glaze ve Maruschak, 2008).

Suçta yönelen kadınların çocukluk öykülerindeki travmatik kötü muamele deneyimleri dikkat çekmektedir. Kadınlarda çocukluk dönemi cinsel istismar yaşantılarının ileriki yaşantıda şiddet davranışları, alkol ve madde kötüye kullanımı, seks işçiliği ve suç öyküsü bulunan erkek partnerle birlikte yaşama ile ilişkili olduğu bulunmuştur (Frost ve ark., 2006). Kadın suçluluğunun bir diğer özelliği, kendini savunma motivasyonu ile uygulanan şiddet davranışları olmaktadır. Örneğin, kadınlar, kendilerinin veya çocuklarının ciddi yaralanma ya da öldürülme tehdidi altında maruz kaldıkları yoğun şiddet ve tehditlerden kurtulmak için eşini öldürebilmektedirler (Browne ve ark., 1999a). Mağduriyetten doğan suç döngüsünün kadın suçluluğunun önemli bir özelliği olduğu görülmektedir.

Kadın suçluluğunun doğasını, özelliklerini, kapsamını ve etiyojisini anlamak, öncelikle önlenmesine ve sonrasında ise yeniden suç işleme riskinin azaltılmasına katkıda bulunacaktır. Ayrıca bu suçtan doğrudan etkilenen failer ve mağdurların (çocuklar, eşler, aile üyeleri gibi) tedavisinin yanı sıra kadın suçluluğunu önlemek için başlatılan girişimlerin etkililiğini artıracaktır. Rehabilitasyon çalışmalarında toplumsal cinsiyete

2. Kadın suçluluğu ile ilişkilendirilen ataerkil toplum yapısı ve cinsiyet rolleri, ülkemizde kadın suçluluğu ile nasıl ilişki göstermektedir?
3. Suça yönelen kadınlar için cinsiyete özgü bir müdahale programı hazırlasanız çalışma alanlarınızda hangi ihtiyaçlara odaklanırsınız?
4. Sizce kadın suçluluğuna yönelik rehabilitasyon çalışmalarında grup terapilerine nasıl yer verilebilir?

BÖLÜM 5

AİLE İÇİ ÇOCUK CİNSEL İSTİSMARI

Ebru Akın - Şennur Tutarel Kışlak

Giriş

Dünya Sağlık Örgütü (World Health Organization/WHO, 2006) çocuğa kötü muameleyi; çocuğun sağlığına, hayatta kalmasına, gelişimine veya onuruna fiilî olarak zarar veren ya da zarar verme potansiyeli olan, sorumluluk, güven veya güç ilişkisi bağlamında her türlü fiziksel ya da duygusal kötü muamele, cinsel istismar, ihmal veya çocuktan ticari amaçlı ya da başka bir şekilde faydalanma içeren tüm eylemler olarak tanımlamaktadır. Alanyazındaki araştırma bulguları, çocuğa kötü muamelenin tüm dünyada oldukça sık görüldüğünü ve hem çocukluk hem yetişkinlik döneminde çok sayıda fiziksel ve psikolojik sağlık sorunuyla da ilişkili olduğunu ortaya koymaktadır (Kalmakis ve Chandler, 2015; Petruccelli ve ark., 2019; Sheffler ve ark., 2020). Bu nedenle çocuğa kötü muamele, günümüzde önemli bir halk sağlığı problemi olarak ele alınmaktadır (Ports ve ark., 2020; Tonmyr ve ark., 2020).

Bu bölümde çocuğa kötü muamele kapsamında yer alan ve yetişkinlik yaşamında yarattığı güçlükler nedeniyle WHO'nun 24 global risk faktörü arasında belirlediği (Mathers ve ark., 2009) çocuk cinsel istismarı olgusu, aile içi cinsel istismar yaşantıları temelinde ele alınacaktır. Aile içi çocuk cinsel istismarı, aile dışından bireylerin gerçekleştirdiği istismardan farklı özellikleri bulunan, açığa çıkması daha zor ve mağdur üzerinde akut ve kronik olarak daha yıkıcı etkiler gösteren bir durumdur. Olgunun tüm yönleriyle anlaşılması, mağdurun rehabilitasyonu ve istismarın önlenmesi için geliştirilen müdahalelerin temelini oluşturmaktadır.

Bu bölüm yedi alt başlıktan oluşmaktadır. Birinci bölümde, çocukluk dönemi cinsel istismarının kapsamı ve özellikleri ele alınmaktadır. İkinci bölümde, geçmişten günümüze yaygın olarak kullanılan bir terim olan ensest ile aile içi çocuk istismarı kavramı arasındaki farklılıklar açıklanmaktadır. Üçüncü bölümde, aile içi çocuk istismarının hem uluslararası alanyazındaki hem de Türkiye'deki yaygınlığına ilişkin bul-

Tartışma Soruları

1. Aile içi çocuk cinsel istismarını ifade etmek için ensest teriminin kullanılması hangi açılardan uygun değildir?
2. Türkiye’de aile içi çocuk cinsel istismarına ilişkin yürütülen araştırmalar, istismarın özelliklerine dair hangi bulgulara dikkati çekmektedir?
3. Baba cinsel istismarının görüldüğü ailelerin temel özellikleri nelerdir?
4. Kardeşler arasındaki keşif amaçlı cinsel etkileşimler ve cinsel oyunlar, kardeş cinsel istismarından nasıl ayırt edilebilir?
5. Kardeş cinsel istismarının görülme olasılığını artıran risk faktörleri nelerdir?
6. Aile içi çocuk cinsel istismarı faillerinin özelliklerine dair kuram ve araştırmalar hangi risk faktörlerine vurgu yapmaktadır?
7. Dört faktör travma modeline göre, çocuk cinsel istismarı hangi yollarla travmaya yol açmaktadır?
8. Aile içi çocuk cinsel istismarı mağdurları, çocukluk ve yetişkinlik döneminde psikopatolojinin gelişimi açısından ne tür riskler altındadır?
9. Aile içi çocuk cinsel istismarına yönelik adli değerlendirmenin temel prensipleri nelerdir?

BÖLÜM 6

SUÇLU PROFİLLEME

Adonis Çiğdem Erkunt Kanoğlu

Giriş

Profilleme, suçlu profilleme veya psikolojik profilleme olarak da adlandırılabilen suçlu profilleme, soruşturmaya yardımcı olmak için olay yeri ve mağdura ilişkin bulguları değerlendirerek, failin kişilik özellikleri, davranış eğilimleri ve demografik özellikleri hakkında öngöründe bulunmaktır (Douglas, Ressler, Burgess ve Hartman, 1986; Hicks ve Sales, 2006). Profilleme, aynı zamanda adli bir olayın muhtemel failini belirleyebilmek için bir suç veya suçlar dizisinde ortaya konmuş davranış kalıplarının analiziyle, olası şüphelileri belirlemeye yarayan bir suçla mücadele yöntemidir.

Profilleme, son yıllarda değeri daha net anlaşılmaya başlanan, soruşturma alanını daraltmak için kullanılan değerli bir araçtır. Suçun gerçekleşmesinin ardından olay yerine intikal eden profilleme uzmanları suçun sebebini, olayın oluş sırasını, olay esnasında yaşananları, failin mağduru nasıl seçtiğini ve mağdurun olay sırasındaki hareketlerini geriye dönük olarak anlamaya çalışırlar. “Davranış kişiliği yansıtır” prensibi (Douglas, Ressler, Burgess ve Hartman, 1986) esas alınır ve fail yaş, cinsiyet, medeni durum ve çalışma durumu gibi bireysel özelliklere odaklanılarak tariflenmeye çalışılır. Olay yerinden elde edilen bulgular failin yaşı, cinsiyeti, ırkı, eğitim düzeyi, medeni durumu, geçmiş suç öyküsü, askerlik durumu, aile geçmişi, sosyo ekonomik düzeyi, ikamet ettiği yer, sosyal hayatı ve ilgi alanları gibi bilgileri ortaya çıkartmak için kullanılır.

Şiddet içeren suçlar, kamuoyunun, otoritelere faili yakalama konusunda baskı yaptığı suçlardır. Daha fazla şiddetin önüne geçebilmek için fail mümkün olduğunca çabuk yakalanmalıdır. Zamana karşı yarışırken, soruşturma sırasında stratejik davranmak bir zorunluluktur. Olası failin karakter özelliklerini bilmek, soruşturmayı yapan otoritelerin sorgulamada kullanmak üzere teknikler ve stratejiler geliştirmesini sağlar. Profilleme, yalnızca failin belirlenmesi ve suçun çözümü açısından değil, gelecek

bilgilerin geçerli ve tutarlı olması ayrıca mahkeme tarafından kabul edilebilir bilgi olarak kabul edilmesi ancak bu şekilde mümkündür.

BÖLÜM 7

CEZA ADALET SİSTEMİNDE ALKOL-MADDE KULLANIMI VE BOZUKLUKLARI

Merve Vatansever

Giriş

Jack London, 1913 yılında kaleme aldığı ve alkole John Barleycorn olarak hitap ettiği kitabında şu satırlara yer verir: “John Barleycorn töre kurallarını hiçe saydırarak insanı suç işlemeye kışkırtıyordu. Ayıkken akıllarından bile geçirmeyecekleri şeyleri, sarhoş kafayla yapanlara her yerde rastlıyordum. Bu kadarla kalsa yine iyi. Sarhoşluğun asıl kötü yanı, insana çektirdiği cezaydı. Ağır suç yıkıcı oluyordu...” (London, 1913/2019, s.107). Jack London, kitabı boyunca 1900'lerin başında Amerika'da alkollü içeceklerin tüketiminin kişiyi nasıl etkilediğine dair çarpıcı örnekleri hem kendinden hem de gözlemlediği diğer insanlardan yola çıkarak sunar. Geçmişten günümüze alkol, uyuşturucu ve uyarıcı madde kullanımının bireyin fiziksel ve psikolojik sağlığı üzerinde olumsuz etkilere neden olduğu yaygın olarak bilinmektedir. Alkol ve uyuşturucu maddelerin birey ve çevre üzerindeki olumsuz etkileri, toplumda bu maddelerin kullanımına ilişkin birtakım sınırlamalar ve yasaklar getirilmesine neden olmuştur. Madde kullanımının yasa dışı olması, birtakım hukuki, sosyal ve toplumsal sorunları doğurmaktadır. Ceza adalet sistemi içerisinde uyuşturucu ve uyarıcı maddelerin kullanımına, suç işlendiği sırada alkol ve madde etkisinde olma durumuna ilişkin yasal düzenlemelere gidilmiştir. Medeni hukuk kapsamında ise alkol ya da madde bağımlılığının kişinin kendisini ve ailesini ekonomik anlamda zor bir duruma sokması hâlinde hukuki ehliyetin kısıtlanması ve vesayeti gerektiren bir durum olarak ele alındığı görülmektedir.

Bu bölümün amacı, ceza adalet sistemi içerisinde alkol ya da madde kullanımı ve bağımlılığı ile ilgili olabilecek durumları ele almak ve tartışmaktır. Bölüm boyunca psikologların adli sistemde, hastanelerde ve diğer kuruluşlarda alkol ya da madde kullanımını ve bağımlılığını ile ilgili karşılaşılabilecekleri konular üzerinde durulacaktır. Bölüm öncelikle ceza adalet sisteminde madde kullanımının suç olarak Türk Ceza Kanunu

8. Denetimli serbestlik müdürlüklerinde madde kullanımı olan yükümlüler için yürütülen süreç nasıl işlemektedir?

BÖLÜM 8

ÇOCUK VELAYETİ VE EBEVEYNLİK DEĞERLENDİRMELERİ

Belgin Üstün Güllü

Ön Söz

“Anne gezindiğin bağ, baba yaslandığın dağdır. Ömrünün en güzel çağı annen ve babanla olandır.” Ataol Behramoğlu, bu dizeleri sıralarken sizce çocuğun mutlaka anne ve babası ile birlikte yaşamasının önemine, anne babanın birlikte olduğu koşullarda çocuğun en güzel hayatı yaşayacağına mı vurgu yapmıştır? Ya da sizce çocuk en çok anne ve babası birlikteyken mi mutludur? Anne ya da baba ile ayrı ayrı mutlu olamaz mı çocuk? Nedir çocuk için anne ve babası ile olan çağı en güzel yapan?

Çocuğa bir dal verirsiniz dünyalar onun olur, bazen bir dünya verirsiniz tutunacak dal bile bulamaz. Çocukları mutlu etmek için dünyayı ayaklarına sermeye gerek yok. İstedikleri zaman gezinecekleri bir bağ, güvenerek korkmadan gidecekleri bir dağa ihtiyaç duyuyorsa bırakın o bağda gezsinler, bırakın o dağa yaslansınlar.

Bu bölümü okurken o bağ ve dağda neler oluyor? O bağ ve dağın birlikte olmadığı koşulda ortaya çıkan süreç nedir? Çocuğun en güzel çağını yaşaması ve yüksek yararı için yazılı hukuki kurallar neler söylüyor? Velayete karar verirken çocuğun ve ebeveynin hakları nelerdir? Velayetin değerlendirilmesi sürecinde nelere dikkat edilir? göreceğiz.

Giriş

Kadın ve erkek evli kaldıkları süre boyunca çocuklarının bakımından birlikte sorumluluktadırlar. Bu sürede velayet hakkı anne ve babadadır ve bu hakka sahip olan anne ve babalar tüm hak ve yükümlülüklerini de birlikte üstlenmekte ve birlikte yerine getirmektedirler. Boşanma söz konusu olduğunda ise çocuğun velayeti anne ya da babadan birine bırakılmaktadır.

sahip olması önemlidir. Bu bilgi ve becerilere sahip olan uzmanın, özellikle çatışmalı boşanma sürecinde fazlasıyla yıpranan ve arada kalan çocuğun daha fazla zarar görmemesi, velayetine karar verirken uyum sorunları yaşamaması hem ruhsal hem de fiziksel açıdan zarar görmemesi açısından ayrıntılı ve ciddi değerlendirmeler yapması önem taşımaktadır.

Çocuk ve yetişkinlerle yapılan görüşmelerin yanı sıra değerlendirme sürecinde çocuğun velayetiyle ilgili olabilecek (mahkeme dosyası, suç kayıtları, gibi) kaynaklardan yararlanmak, aileden ya da avukatlardan varsa ek bilgiler almak, verilecek her bilgiyi dikkate almak ve gerekirse bir liste tutmak önemlidir. Velayetin kime verileceği konusunda ihtiyaç hâlinde velayet değerlendirme süreçlerinde psikolojik testlerden de yararlanılmaktadır. Bu testler arasında; zekâ testleri, başarı testleri, psikoeğitimsel testler yer almaktadır.

Anahtar Kelimeler

Velayet, velayetin değerlendirilmesi, çocuğun üstün yararı, ebeveyn yabancılaştırma sendromu.

Tartışma Soruları

1. Velayetin değerlendirilmesinde çocuğun üstün yararı nedir?
2. Velayeti alan ve almayan ebeveynlerin ne gibi hakları bulunmaktadır?
3. Velayeti değerlendirme sürecinde çocukla görüşmenin önemini açıklayınız.
4. Velayeti değerlendirirken yaygın olarak kullanılan ölçekler nelerdir? Ölçeklerden yararlanmanın ne gibi faydaları vardır?

BÖLÜM 9

YAŞLILARDA ADLİ PSİKOLOJİK DEĞERLENDİRME VE UYGULAMALAR

Gülbahar Baştuğ - Erguvan Tuğba Özel Kızıl

Giriş

Tüm dünyada ve ülkemizde yaşlı nüfus giderek artmaktadır. Ülkemizdeki nüfus projeksiyonlarına göre yaşlı nüfus oranının 2023 yılında %10,2, 2030 yılında %12,9, 2040 yılında %16,3, 2060 yılında %22,6, 2080 yılında ise %25,6 olacağı öngörülmektedir (TUİK 2018). Günümüzde Türkiye, %7-10 arasındaki yaşlı nüfus oranı ile “yaşlı” bir ülke durumundadır. Değişen demografik yapıyla beraber geriatric sendromlar ve yaşlılarda görülen psikiyatrik bozuklukların da artması beklenmektedir. Dünya Sağlık Örgütü (DSÖ) tarafından 60 yaş ve üzerindeki yaşlı nüfusun yaklaşık %15’inin psikiyatrik bir bozukluk, %20’den fazlasının ise baş ağrısı dışında nörolojik ya da psikiyatrik bir bozukluğa bağlı sorun yaşadığı, nörolojik ve psikiyatrik bozuklukların yeti yitimine ayarlanmış yaşam yılının (disability adjusted life years-DALY) %6,6’sından sorumlu olduğu bildirilmiştir. Bu yaş grubunda en sık görülen psikiyatrik bozuklukların demans ve depresyon olduğu, dünya genelindeki yaşlıların %5’inin demans, %7’sinin depresyon, %3,8’inin anksiyete bozuklukları, %1’inin madde kullanım bozukluklarından etkilendiği, kendine zarar verme davranışı ile ilişkili ölümlerin dörtte birinin 60 yaş ve üzerindeki bireylerde görüldüğü belirtilmiştir. Ek olarak yaşlılarda madde kötüye kullanımının genellikle gözden kaçtığı ya da yanlış tanı aldığı ifade edilmiştir. Yaşlıların birçok yaşamsal stresöre (yeti yitimi, kronik ağrı, kırılmalık, diğere sağık sorunları, yas, emeklilikle birlikte sosyoekonomik statünün düşmesi vb.) de maruz kaldıkları ve her 6 yaşlıdan birinin istismara uğradığı bildirilmiştir (World Health Organization, 2017).

Özetle, yaşlı nüfusun artmasına paralel olarak önümüzdeki yıllarda yaşlı adli olguların da artması, dolayısıyla yaşlılarda adli psikiyatrik ve psikolojik değerlendirmele rin önem kazanması söz konusu olacaktır. Bu bölümde yaşlılarda sık rastlanan ihmal ve istismar ile adli psikiyatrik durumlar ve adli psikiyatrik değerlendirmede dikkat edilmesi gereken hususlar örnek olgularla ele alınmıştır.

Özet

Yaşlı nüfusun artması ile beraber yaşlıda adli psikiyatrik ve psikolojik değerlendirme önem kazanmaktadır. Yaşlılarda genellikle sık karşılaşılan AH gibi nörobilişsel bozukluklar nedeniyle ceza sorumluluğu ya da fiilî ehliyet değerlendirmesi yapılmakta ayrıca yaşlılar sıklıkla ihmal ve istismar nedeniyle de adli olgu olarak karşımıza çıkmaktadırlar. Yaşlılarda fiziksel, duygusal/psikolojik istismar, ekonomik istismar, ihmal, kendini ihmal ve terk edilme gibi ihmal ve istismar türleri görülebilmektedir. Fiziksel hastalıklar, bilişsel ve psikiyatrik bozuklukların varlığı, ekonomik sorunlar, bakım veren stresi gibi etmenler yaşlılarda istismar ve ihmal için başlıca risk faktörleridir. Yaşlı adli olguların değerlendirilmesinde yaşlanmayla beraber bireylerde ortaya çıkan fiziksel, psikolojik ve bilişsel değişikliklerin bilinmesi, olgunun önceki durumu ile kıyaslanmanın yapılabilmesi için mutlaka yakınından/yakınlarından bilgi alınması ve tıbbi kayıtlarının incelenmesi oldukça önemlidir. Rutin adli psikiyatrik değerlendirmelerde olduğu gibi yaşlılarda da hastalık değil, hasta olduğu prensibi ile değerlendirme yapılmasının uygun olduğu bilinmektedir. TMK'ya göre yaşlı birey sadece akıl hastalığı/zayıflığı veya mal varlığını kötü yönetme nedeniyle değil yaşlılığı, sakatlığı veya ağır hastalığı sebebiyle işlerini yürütemediğinde de kısıtlanabilir. 65 yaş ve üzerindeki bireylere noterlikler tarafından istenen akli meleke raporları ile ilgili değerlendirmelerin mümkün olduğunca detaylı bir şekilde yapılması ve raporlanması gereklidir.

Anahtar Kelimeler

Yaşlı, ihmal, istismar, ceza sorumluluğu, adli psikolojik değerlendirme.

Tartışma Soruları

1. Yaşlı istismar ve ihmali nasıl değerlendirilir?
2. Demansı olan yaşlı hastalarda ceza sorumluluğu değerlendirmesinde dikkat edilecek hususlar neler olabilir?
3. Fiilî ehliyet kavramını açıklayınız.
4. Yaşlılarda kısıtlanmaya neden olabilecek durumları sayınız.

BÖLÜM 10

CEZA İNFAZ HİZMETLERİNDE PSİKOLOJİ UYGULAMALARI

Nalan Peker Güneş

Giriş

Bu bölümde yargılama aşamasında ve hüküm sonrası cezaların infaz sürecinde; ceza infaz kurumları ve denetimli serbestlik müdürlüklerinde verilen hizmetlerden, bu hizmetlerde psikologların görevlerinden bahsedilecektir. 2000’li yılların başından itibaren ülkemizde infaz hizmetlerinde önemli değişiklikler ve gelişmeler olmuştur. Psikologların önce ceza infaz kurumlarında sonraki yıllarda denetimli serbestlik müdürlüklerinde istihdam edilmesi ile birlikte yapılan çalışmalar artmıştır.

İnfaz hizmetleri hem kamunun yararını gözetmek hem de bireysel refahı sağlamak adına yapılan tüm müdahaleleri içermektedir. Önleme ve koruma aşamalarını geçmiş artık müdahale aşamasına gelmiş suça karışan bireylerle bire bir çalışmalar yürüten psikologlar infaz konusunda bilgi sahibi olmak, suç odaklı çalışmanın ne olduğunu bilmek, bireysel ve grup olarak tutuklu veya hükümlülerle nasıl çalışılması gerektiğini öğrenmek durumundadır.

10.1. İnfaz ve İyileştirme Sürecinde Hükümlü/Tutuklu Ruh Sağlığı ve Ceza İnfaz Kurumlarında Görülen Ruhsal Bozukluklar

Suç işleyen bireylerin rehabilitasyon ya da iyileştirilmesi ve ruhsal rahatsızlıklarının giderilmesi, toplumu korumak ve onların mağdurlara verdikleri zararı azaltmak kadar değerlidir. Her ne kadar hükümlünün bireysel refahı ve kamu güvenliği terazinin iki ayrı kefesinde duruyor gibi görünse de bu iki olgu birbirlerini besleyen ve destekleyen konulardır. Yapılacak rehabilitasyon çalışmaları ve terapötik müdahaleler bu çerçevede önem kazanmaktadır. Ceza infaz kurumuna kabul edildikten sonra bireyler araştırma-değerlendirme, risk analizi, sürecinden geçişler ve kendilerine en uygun eğitim-iyileştirme çalışmasına alınırlar. Suçun işlenmesi ve yeniden suça karışma ko-

10. Suç alanında çalışan meslek gruplarının yaygın olarak yaşadıkları zorluklar ve çözüm önerileri nelerdir?

BÖLÜM 11

YENİDEN SUÇ İŞLEME VE RİSK VE İHTİYAÇ DEĞERLENDİRMESİ

Gamze Erhan - Gamze Gündoğdu Mercimek

“İlk defa geldim dedim polise. Sen açılışı yaptın, daha çok gelirsin dediler.” (Dağdelen, 2017).

Denetimli serbestlik sisteminde görev yapan meslek elemanının böyle bir yargıya varmasına sebep ne olabilir? Bu kişi, denetimli serbestlik sistemine gelen ortalama profile uygun bir dış görünümüne mi sahipti ya da bakışı, duruşu, jest ve mimiklerinden dolayı mı etiketlendi? Meslek elemanının kendi yargılamasından ayrı olarak, erken tahliye ile denetimli serbestliğe başvuran bir kişinin yeniden suç işleyeceğini tahmin etmek mümkün müdür? Bu riski önceden saptarsak, kişinin tekrar suça yönelmesini önleyebilir miyiz? Bunların ötesinde zorlu ceza infaz kurumu yaşantı deneyimlerine, sicilindeki suç öyküsünden dolayı iş bulmakta zorlanma, toplum içinde damgalanma gibi sorunlarla mücadele etmelerine rağmen bu kişiler neden tekrar suça yönelmektedir? Dağdelen’in (2017) denetimli serbestlik sistemi içinde yaptığı bir çalışmasında, başka bir yükümlü de bu soruyu bizlere sormaktadır.

“Burası iyi tamam. Hocalarla falan görüştük de suçu niye işledin falan diye soruluyor da ama bence şey öylesine şey olardan. Sormak gerektiği için soruluyor. Sorup da bir yere varmıyor. Devletin o konulara bir ilgisi yok. Bir adam bir kere bu suçu işlediğinde sen bu suçu neden işledin diye soran yok.” (Dağdelen, 2017).

Risk değerlendirme araçları yeniden suç işleme olasılığını hesaplarken, bu sorunun cevabını da aramaktadır.

Giriş

Suçun tekrarının önlenmesi için öncelikle nedenlerinin doğru bir şekilde anlaşılması gerekmektedir. Suçun önlenmesi ve suça karışmış bireylerin eski yaşantılarına sağlıklı bir şekilde dönebilmeleri için bu nedenlerin doğru şekilde değerlendirilerek uygun müdahalelerin yapılması önemlidir. Değiştirmek istenilen bir alanda ölçme ve

6. Denetimli serbestlik sisteminde bireyin ihtiyaçlarına yönelik bir plan hazırlanmasının gerekliliği nedir?
7. Risk değerlendirme araçları, bireyin yeniden suç işlemede risk düzeyini belirlerken hangi durumları dikkate almaktadır
8. Risk değerlendirme araçlarının zayıf yanları nelerdir?

BÖLÜM 12

ÇOCUĞA YÖNELİK KÖTÜ MUAMELE VE MÜDAHALE YAKLAŞIMLARI

Gülçin Orhan - Hatice Demirbaş

“Çocuk istismarı, ömür boyu insanlığa bir gölge düşürür.” -Herbert Ward

Giriş

Çocuğa yönelik kötü muamele, on sekiz yaşını doldurmamış çocukların mağduru olduğu her türlü ihmal ve istismar yaşantısıdır. Bu yaşantı çocuğa yönelik sorumluluk, güven ya da güç ilişkisi bağlamında çocuğun sağlığına, gelişimine, hayatta kalmasına ya da onuruna karşı fiili veya potansiyel bir zararla neticelenen her çeşit fiziksel ve/ya da duygusal kötü muameleyi, özensizliği, ihmali, cinsel istismarı, ticari ya da başkaca sömürüyü içermektedir (World Health Organization, 2020). Çocuğa yönelik kötü muamele, hem bir çocukluk çağı travması (Herman, 2011) hem de çocuk hakları ihlali olup tüm toplumlarda farklı yaygınlıklarda ve hiç de azımsanmayacak oranlarda görülen önemli bir sorundur (Adli İstatistikler, 2020; Türkkkan ve Odacı, 2022). Öyle ki Dünya Sağlık Örgütünün (2020) son verilerine göre 2-4 yaşları aralığındaki her dört çocuğun yaklaşık üçü, bakım verenleri tarafından düzenli şekilde bedensel cezaya ve/veya psikolojik şiddete maruz kalmıştır. Rakamlar, bize her beş kadından ve on üç erkekten birinin 0-17 yaş aralığında çocuk veya genç bir birey iken cinsel istismara uğradığını göstermektedir. Yirmi yaşın altındaki 120 milyon kız ve genç kadın, bir tür zorla gerçekleşen cinsel ilişkinin mağduru olmuştur. Ülkemiz bazındaki son istatistikler, güvenlik güçlerine mağdur sıfatıyla başvurusu olan 170961 çocuğun %88,1'inin suç mağduru olduğunu göstermiştir (TÜİK, 2021). Yine ülkemiz ceza mahkemelerinde çocuğun cinsel istismarı suçu ile açılan dosya sayısı 17948 olup devam eden dava sayısı sırasıyla Marmara (%30,5), Akdeniz (%15,8), İç Anadolu (%12,8) ve Güneydoğu Anadolu (%12,6) Bölgelerindedir (Adli İstatistikler, 2020). Bu resmî veriler bize durumun ne ciddi boyutlarda olduğunu göstermektedir (Türkkkan, Odacı ve Bülbül, 2021).

Bazen sizler de çocuğun gelişimi, psikolojisi ve çocuk yetiştirme tutumları konusunda desteğe gereksinim duyabilirsiniz. “Sır versem saklar mısınız?” (Moore-Mallinos, 2008) adlı kitabı okuyabilirsiniz. Ayrıca böyle durumlarda çevrenizden ya da uzman olmayan başka kimselerden aldığımız önerilerden ziyade profesyonel desteğe yöneliniz. Kendinizle ve/veya çocuğunuzla ilgili konularda ruh sağlığı uzmanlarına başvurmakta çekinmeyiniz ve başvuruda gecikme göstermeyiniz.
